#### **2021 BUDGET Capital Decision Package Form Total Points** 10 Decision Package Item # IT 1 Project / Initiative Name Upgrade/Replace Desktop and Peripheral Equipment Commission: Corporate Services **Business Unit Number:** 13621 **Division:** Information Technology Business Unit Name: Information Technology Maintenance/ Service Level Mandatory/Legislative Growth Classification (select one): Change Replacement Section 1 Description Summary Please provide a brief summary of what the proposed budget item is... This decision package is critical to the on going replacement of end user desktop equipment and peripheral devices that have reached the end of their lifecycle. Equipment includes desktop computers, laptops, printers, audio/visual equipment, tablets, etc. Classification Please provide an explanation for the classification (i.e. Growth, Service Level Change, Mandatory/Legislative) QUOTE BILL NO. OR AGREEMENT SUPPORT FOR MANDATORY Service Level Maintenance will ensure desktop equipment is kept up to date and current with the latest in hardware and software as required. Priority If this item addresses a priority, please explain how it does so... To support the many initiatives outlined within Long-term Financial Sustainability, Safe Transportation, Economic Leadership and Vibrancy on Yonge, Davis and Mulock priorities, the upgrade and/or replacement of Desktop and peripheral equipment is crucial. Leveraging technologies, data driven tools and smart city solutions cannot happen effectively without end user equipment being kept to-to-date, secure and highly available. Desired Service Level If this item maintains or moves toward a desired service level, please explain how it does so.. The capital request is required to maintain the existing level of service. End user desktop environment needs to be kept current and up to date, otherwise staff are hindered from performing their daily work by interruptions for troubleshooting errors and/or the repair of equipment. Business Case If this item provides a financial return, please explain how it does so... Risk Mitigation If this item mitigates a significant risk, please explain how it does so... Without funds to upgrade/replace end of life and/or aging desktop equipment outages will likely occur with service loss and or quality of service impact for critical users Section 2 Collaboration and Consultation Please identify relevant business areas for this item. An area is relevant if collaboration or consultation is required. #### **2021 BUDGET** Capital Decision Package Form Decision Package Item # ENG 6 **Total Points** Project / Initiative Name Recreation Playbook Implementation - Skate Park Commission: Development & Infrastructure Services **Business Unit Number: 32101 Division:** Engineering Services Business Unit Name: Capital Projects Service Level Maintenance/ Classification (select one): Growth Yes Yes Mandatory/Legislative Change Replacement Section 1 Description Summary Please provide a brief summary of what the proposed budget item is.. To project manage, design and construct the next phase of the Recreation Playbook through the hiring of consultants, contractors and term vendors for the individual projects. This program includes the construction of the Magna Skate Park. Classification Please provide an explanation for the classification (i.e. Growth, Service Level Change, Mandatory/Legislative) QUOTE BILL NO. OR AGREEMENT SUPPORT FOR MANDATORY The projects will be new features/infrastructure (e.g.. Skate Park, Splash Pad, etc.) which will be required as a result of the Growth of the Town in accordance with the Council Approved Recreation Playbook. Priority If this item addresses a priority, please explain how it does so... The Magna Skate Park is regarded as a Priority Recreation Playbook project. The construction of this project will contribute to the Extraordinary Places and Spaces in the Town of Newmarket with respect to "iv. Develop a Parks Master Plan focused on both new development and re-development opportunities; update the Recreation Playbook, as required". Desired Service Level If this item maintains or moves toward a desired service level, please explain how it does so.. This program helps to move the Town towards a level of Recreational Opportunities that meets the Recreation Playbook as well as enhances the Extraordinary Places and Spaces in Town. Business Case If this item provides a financial return, please explain how it does so... Risk Mitigation If this item mitigates a significant risk, please explain how it does so... This program is essential to developing healthy individuals and healthy communities. It also provides an opportunity for citizens to engage the community and be healthy. #### **2021 BUDGET Capital Decision Package Form** Decision Package Item # PARK 6 **Total Points** 16 Project / Initiative Name Truck and Equipment for Marianneville Glenway Property Maintenance Commission: Development & Infrastructure Services **Business Unit Number:** 52811 Division: Public Works - Parks Business Unit Name: Parks Service Level Maintenance/ Growth Yes Mandatory/Legislative Classification (select one): Change Replacement Section 1 Description Summary Please provide a brief summary of what the proposed budget item is... In Operating Decision Packages, there is a request for maintenance of the Marianneville Glenway property that was newly donated to the Town. Parks are requesting a FTE(H5-L4) position along with capital for equipment(Truck \$70,000, lawnmower \$40,000, trailer \$5,000). Classification Please provide an explanation for the classification (i.e. Growth, Service Level Change, Mandatory/Legislative) QUOTE BILL NO. OR AGREEMENT SUPPORT FOR MANDATORY Growth for new area and service level requirements. **Priority** If this item addresses a priority, please explain how it does so... Extraordinary Places and Spaces as set out in councils strategic priorities, develop a parks plan focused on new development along with Newmarket's Parks Policy Development Manual created in 2012. Desired Service Level If this item maintains or moves toward a desired service level, please explain how it does so.. To maintain trees, garbage, trails, playground and whatever is planned for the site at current town standards. We are currently receiving a number of tickets on this area asking for maintenance. Business Case If this item provides a financial return, please explain how it does so... Risk Mitigation If this item mitigates a significant risk, please explain how it does so... To maintain the new property that was donated to the town, without funding, there would be corporate image issues up to moderate levels as set out on the risk matrix. There would also be environment issues from not maintain the grass and trees. There are also health and safety moderate issues from weeds, allergic issues, trees not safe from being maintained. Section 2 Collaboration and Consultation Please identify relevant business areas for this item. An area is relevant if collaboration or consolation is required. Identify by checking all boxes that apply below.. **Customer Services Building** Engineering HR **Legislative Services Planning** Operations **Finance** Legal **Recreation & Culture Parks** Communications **Procurement Facilities** Other Please discuss item with relevant areas and include their comments below...

#### **2021 BUDGET** Capital Decision Package Form **Total Points** 13 Decision Package Item # FAC 4 Project / Initiative Name Door Hardware and Security System Audit/Implementation Commission: Development & Infrastructure Services **Business Unit Number: 57301 Division:** Public Works - Facilities Business Unit Name: Facilities Administration Service Level Maintenance/ Growth Mandatory/Legislative Classification (select one): Change Replacement Section 1 Description Summary Please provide a brief summary of what the proposed budget item is... This request is to have an audit completed on all Facility Door Hardware and Security Systems and Procedures in all Town facilities. The recommendations outlined in the audit would then be implemented in phases over a period of two years. The audit would address the current key system for all town facilities, identify potential risks and review electronic security systems currently in place to ensure that the technology is up to date. Key systems have historically not been managed using a formal tracking system. Many keys have been duplicated over the years without proper authorization being received as low security keyway systems have been utilized. This has left the Town's facilities at a higher risk of unauthorized entry and the potential of damage and other security risks occurring. Implementing a more streamlined and higher security keyway system throughout all town properties would reduce the number of keys in a current "active" state and reclaim some control over persons allowed entry into town buildings. Included in this audit/review, we would address consistent practices with respect to security systems (i.e. when a building / facility should have remote monitoring, where panic systems should be in place, certain protocol for design, etc.). Finally, a review of aging electronic security technology needs to be conducted. This includes Camera Monitoring Equipment and Electronic Access Control Systems. Classification Please provide an explanation for the classification (i.e. Growth, Service Level Change, Mandatory/Legislative) QUOTE BILL NO. OR AGREEMENT SUPPORT FOR MANDATORY It is recommended that we move toward defining a classification of our facilities / buildings and using this classification to define certain features and how our assets should be equipped. Some facilities are equipped with security systems and others not, with no specific reasoning to support the equipment or lack of. This item would allow us to have a more comprehensive review at our facilities and by establishing a classification, apply logic behind what systems and functions are in certain facilities. It will also give us the ability to apply a hierarchy to our keying system and identify areas where we can tighten up access to certain areas. Priority If this item addresses a priority, please explain how it does so... Long-Term Financial Sustainability - This is an example of how we are attempting to ensure on-going continuous improvement and continually analyse the way in which we operate. This will also address elements of risk and implementation of a strategy to deal with municipal vacant properties. Desired Service Level. If this item maintains or moves toward a desired service level, please explain how it does so... This will create an improved service level to move us toward a standard classification of our buildings. The desired outcome is to determine what level of services, amenities and functions are addressed in each building. This would take into consideration the size of the building, it's use, etc. Business Case If this item provides a financial return, please explain how it does so... With respect to keys - Currently staff spend a significant amount of time searching for keys, rekeying doors and having keys cut. Using a low security key system does not allow for keys to be coded and to have corresponding registers associated with them. There is no organization to this system. The Town's portfolio of facilities and buildings have grown to a point that the low security technology no longer makes sense with regards to security levels as there is significant risk associated with using a key system that can be reproduced easily (i.e. get keys cut at any hardware store), nor is efficient to manage internally. With regard to Security Systems - Currently there is no classification of building to determine which properties are monitored and to what extent. This inconsistency in the procedures results in staff responding to after-hours calls at some locations while other locations remains unattended and security breach would not be discovered until it is reported or until the next time it is visited. Risk Mitigation If this item mitigates a significant risk, please explain how it does so... Upgrading these systems and establishing a process for addressing security concerns and analyze the risk for breaches will show due diligence and ensure the safety and security of the occupants, users and assets within the facility. This will in turn reduce the risk for financial damages and safety concerns associated with improper use of keys and improper monitoring of facilities. Section 2 Collaboration and Consultation Please identify relevant business areas for this item. An area is relevant if collaboration or consolation is required. Identify by checking all boxes that apply below... **Customer Services** Building HR IT Engineering **Legislative Services** Planning Operations Legal Finance

#### **2021 BUDGET Capital Decision Package Form Total Points** 13 Decision Package Item # IT2 Project / Initiative Name Town Marquee Signs (Magna) Commission: Corporate Services **Business Unit Number:** 13621 **Division:** Information Technology Business Unit Name: Information Technology Service Level Maintenance/ Mandatory/Legislative Growth Classification (select one): Change Replacement Section 1 Description Summary Please provide a brief summary of what the proposed budget item is... The Town's Marquee signs located at Magna and Townhall have reached their end of life and require replacement. At over 10 years old, the aging signs are either not working at all or in need of repair at any given time and the original supplier no longer provides support. The Magna Centre staff reply on the signs to provide information to the public and user groups on a continuous basis and frequent disruption in service impacts daily business for the Town as well as it's business partners. A portion of these funds will be dedicated to review other marquee signs and provide recommendations (and possibly the purchase of) solution to standardized the hardware and software along with a centralized platform to manage and administer all Town facilities signs. Classification Please provide an explanation for the classification (i.e. Growth, Service Level Change, Mandatory/Legislative) QUOTE BILL NO. OR AGREEMENT SUPPORT FOR MANDATORY Marquee signs at various facilities are in need of replacement as they've reached their useful lifecycle. **Priority** If this item addresses a priority, please explain how it does so. Vibrancy on Yonge, Davis and Mulock - Leverage Smart City technologies and municipally owned broadband (ENVI) to support corridor development strategies and business retention and expansion efforts. Adopting Smart City Technologies and providing the latest innovation in signage along the corridors will feed into the over all Council Priority. The signs can be connected to both the Town's data network and the internet using ENVI. Desired Service Level If this item maintains or moves toward a desired service level, please explain how it does so. This item maintains an existing level of service as the signs are well entrenched in operations at the Magne Center and Townhall. Business Case If this item provides a financial return, please explain how it does so... Risk Mitigation If this item mitigates a significant risk, please explain how it does so... Major Service Disruption, major service loss potential to Town programs, Sports Groups and businesses within the Magna Centre if important information cannot be displayed to customers in a timely manner. A portion of the Magna Marquee is designated to the Naming Rights and Timothy's Café within the Magna Centre. This has considerable value to our sponsors and helps the retail for the Café. Another important risk to consider is in the event of a disaster or emergency the Town may not be able to use these signs to communicate very important, key messaging to the community on a Town wide situation. Whether we are an emergency centre, a heat escape centre, a natural disaster recovery centre at any / all of our Town facilities. The additional Town Signage Review portion of this decision package will make way for the integrated emergency messaging for all Town facilities. Section 2 Collaboration and Consultation Please identify relevant business areas for this item. An area is relevant if collaboration or consultation is required. Identify by checking all boxes that apply below... **Customer Services** Building Engineering HR Legislative Services Planning Operations Legal **Finance** Recreation & Culture Communications **Procurement Parks Facilities** Other Please discuss item with relevant areas and include their comments below... #### **2021 BUDGET Capital Decision Package Form Total Points** 13 Decision Package Item # LIB2 Project / Initiative Name Video Equipment Commission: Community Services **Business Unit Number: Division:** Library **Business Unit Name:** Maintenance/ Service Level Mandatory/Legislative Classification (select one): Growth Change Replacement Section 1 Description Summary Please provide a brief summary of what the proposed budget item is... This project was to have been completed in 2020 but will no longer be feasible due to COVID. The project involves replacement of the video projection equipment in the library meeting rooms whose technology is no longer up to the standards of users and renters. Classification Please provide an explanation for the classification (i.e. Growth, Service Level Change, Mandatory/Legislative) QUOTE BILL NO. OR AGREEMENT SUPPORT FOR MANDATORY This is necessary in order to maintain existing service levels. Priority If this item addresses a priority, please explain how it does so... The Library Board as well as Council had approved this project for 2019. The Board recognized the priority of replacing out of date A/V equipment to mitigate risk to rental income as well as to Board and other uses of the equipment. Desired Service Level If this item maintains or moves toward a desired service level, please explain how it does so.. This is necessary in order to maintain existing service levels. Business Case If this item provides a financial return, please explain how it does so. Financial returns are not quantified, but room rental income is significant for the library so the financial risk is significant. C14 Risk Mitigation If this item mitigates a significant risk, please explain how it does so.. This mitigates the risk that rooms will no longer be suitable to the needs of renters. Section 2 Collaboration and Consultation Please identify relevant business areas for this item. An area is relevant if collaboration or consolation is required. Identify by checking all boxes that apply below... **Customer Services** Building Engineering HR Legislative Services **Planning** Operations Legal Finance **Recreation & Culture** Parks Communications **Facilities Procurement** Other Please discuss item with relevant areas and include their comments below... #### **2021 BUDGET Capital Decision Package Form Total Points** 13 Decision Package Item # LIB3 Project / Initiative Name Facility needs study Commission: Community Services **Business Unit Number: Division:** Library **Business Unit Name:** Service Level Maintenance/ Growth Yes Mandatory/Legislative Classification (select one): Change Replacement Section 1 Description Summary Please provide a brief summary of what the proposed budget item is... The Library Board approved spending funds on a future library facility needs study in partnership with Community Services and this was approved by Council as part of the 2020 capital budget. As it is unlikely due to COVID that this study will be completed in 2020 it is being re-requested for 2021. Classification Please provide an explanation for the classification (i.e. Growth, Service Level Change, Mandatory/Legislative) QUOTE BILL NO. OR AGREEMENT SUPPORT FOR MANDATORY This is related to the growth of the community. The number of square feet of library space per capita is far below provincial norms because of a growing population. **Priority** If this item addresses a priority, please explain how it does so... This addresses a priority of the Library Board and of SLT. Desired Service Level If this item maintains or moves toward a desired service level, please explain how it does so.. This is intended to maintain existing service levels and the community grows. Business Case If this item provides a financial return, please explain how it does so. Risk Mitigation If this item mitigates a significant risk, please explain how it does so... This mitigates the risk that library services will be unable to meet the needs of a growing population. Section 2 Collaboration and Consultation Please identify relevant business areas for this item. An area is relevant if collaboration or consolation is required. Identify by checking all boxes that apply below... **Customer Services** Building Engineering HR Legislative Services Planning Operations Legal Finance **Recreation & Culture** Parks Communications **Facilities** Yes **Procurement** Yes Other Please discuss item with relevant areas and include their comments below... Comments Department Community Services/Recreation & It has been agreed to pursue this study in cooperation. Culture

## **2021 BUDGET Capital Decision Package Form** Decision Package Item # PARK 2 **Total Points** 13 Project / Initiative Name Art Ferguson Parking Lot Rehabilitation Commission: Development & Infrastructure Services **Business Unit Number:** 52811 Division: Public Works - Parks Business Unit Name: Parks Service Level Maintenance/ Mandatory/Legislative Classification (select one): Growth Change Replacement Section 1 Description Summary Please provide a brief summary of what the proposed budget item is... This request is for total revamp of the parking stalls at Art Ferguson, full removal of asphalt, regrade sub aggregate to ensure proper drainage and install new top coat of asphalt and repaint lines. Classification Please provide an explanation for the classification (i.e. Growth, Service Level Change, Mandatory/Legislative) QUOTE BILL NO. OR AGREEMENT SUPPORT FOR MANDATORY The current asphalt has been deteriorating rapidly due to poor foundation (aggregates) causing multiple sink holes, which in turn would potentially cause damage to vehicles. In addition to this, the parking lot does not meet bylaw due to the depth of the parking spaces and the road laneway which does not meet bylaw allowances. We have been previously given legal advice to maintain travel portions on the public property, similar to the travel portion of the road aka, minimum maintenance standards. Priority If this item addresses a priority, please explain how it does so... This project relates to Council Strategic Priority - Environmental Stewardship: i. Continue to implement programs that make Newmarket a leader in the implementation of low impact design (LID); and item v. Support highly effective partnerships with the LSRCA, MECP, York Region, NT Power and others who provide funding and support for our numerous projects. Desired Service Level If this item maintains or moves toward a desired service level, please explain how it does so.. If this is not addressed residents will continue to call into Customer Services with potential damage claims and injuries. Business Case If this item provides a financial return, please explain how it does so... There would be an environmental return of installing a LID feature for this parking lot. It is difficult to estimate the financial return at this point Risk Mitigation If this item mitigates a significant risk, please explain how it does so.. Without this project, there are potential damage claims on vehicles, potential trip and falls, potential injury to town staff when plowing the parking lot. Potential trip and fall hazards. Not in compliance with the Town of Newmarket Bylaw regarding size of parking lot spaces. Section 2 Collaboration and Consultation

#### **2021 BUDGET Capital Decision Package Form Total Points** 13 Decision Package Item # PARK 3 Project / Initiative Name | Art Ferguson Interlocking Replacement Commission: Development & Infrastructure Services **Business Unit Number:** 52811 Division: Public Works - Parks Business Unit Name: Parks Service Level Maintenance/ Mandatory/Legislative Classification (select one): Growth Change Replacement Section 1 Description Summary Please provide a brief summary of what the proposed budget item is... This request is to replace Art Ferguson interlocking. Ensuring public safety is at the forefront of our facilities and parks, we will be replacing the interlocking as the grading is unsafe at this time from frost movement and age of the current subgrade. At Art Ferguson, the stones are becoming unsafe due to deterioration and ground movement. Full removal, regrade and asphalt installation is needed. Classification Please provide an explanation for the classification (i.e. Growth, Service Level Change, Mandatory/Legislative) QUOTE BILL NO. OR AGREEMENT SUPPORT FOR MANDATORY This project is replacement and also addresses resident and patron safety concerns with public usage and rentals. Multiple years of snow plowing, salting, and maintenance vehicles using the area have created erosion and trip hazards on the stones. Under the Ontario and Newmarket's AODA (2005), we need to ensure that facilities and parkland are safe and accessible for all types of users. According to the Newmarket Parks Policy Development Manual for maintenance to facility buildings and parks, we need to create ramps into the playground & the parking lot in order to make it accessible. Priority If this item addresses a priority, please explain how it does so... Under the Ontario and Newmarket's AODA (2005) to ensure that facilities and parkland are safe and allow all types of users including any accessible issues addressed as per AODA rules and regulations. This is also relates to develop new place making that integrates and reflects inclusivity within our growing community. Desired Service Level If this item maintains or moves toward a desired service level, please explain how it does so.. Maintains the current level of service by allowing this building to be used safely. We are ensuring safe passage for the public including accessibility to the park amenities and buildings. Business Case If this item provides a financial return, please explain how it does so... Risk Mitigation If this item mitigates a significant risk, please explain how it does so.. There is a possible litigation risk due to uneven surfaces causing bodily injury in the whole park throughout the year. There will be possible negative media exposure. Currently pedestrians with accessibility needs are travelling the laneway out onto the sidewalk then back onto the path as there are no cut curbs nearby for accessibility needs. Section 2 Collaboration and Consultation Please identify relevant business areas for this item. An area is relevant if collaboration or consolation is required. Identify by checking all boxes that apply below.. **Customer Services Building** Engineering HR Legislative Services **Planning** Operations **Finance** Legal **Recreation & Culture Parks** Communications Procurement х **Facilities** Other

#### **2021 BUDGET Capital Decision Package Form Total Points** 13 Decision Package Item # REC1 Project / Initiative Name Magna Centre-Board Room/MP #5 Meeting Room Expansion Commission: Community Services/Development & Infrastructure **Business Unit Number: Division:** RC & PWS Facilities **Business Unit Name:** Service Level Maintenance/ Mandatory/Legislative Classification (select one): Growth yes Change Replacement Section 1 Description Summary Please provide a brief summary of what the proposed budget item is... Increase programming space- with the YCDSB ending their agreement- making use of the new space to generate more revenue. Requesting to remove the wall between the Board Room and MP#5, add a divider wall, new flooring, doorways (AODA compliant) to allow for maximum programming opportunities for 2 separate meeting spaces along with a larger space when required. This will be our largest programmable room within the Magna Centre offering increased opportunities for rentals and programs. Additional kitchenette allows water access for programming (increases programming options) and allows renters for their events (regularly requested for tournaments/meetings). This will maximize the amount of revenue opportunities for the space. Classification Please provide an explanation for the classification (i.e. Growth, Service Level Change, Mandatory/Legislative) QUOTE BILL NO. OR AGREEMENT SUPPORT FOR MANDATORY Growth- Programming a new space at the Magna Centre where there is a high demand for rentals, birthday parties, and programs. Priority If this item addresses a priority, please explain how it does so... Long Term Financial Sustainability- As the use of the Magna Centre continually evolves- it has become a hub location for the community and user groups. We are not currently maximizing the use of the meeting room space in the facility based on the current size of our meeting rooms. As the population increases and community use programming/rental requests increase- expanding the room will allow for more programming/rental opportunities for the community, maximize the use of the space (with minimal set up required), increasing revenue to offset the costs of the space. Desired Service Level If this item maintains or moves toward a desired service level, please explain how it does so.. Increasing the size of the room will allow for a growth in rentals as we are currently capped at 20 people for the one room. Program. Currently we cap program numbers based on the maximum number permitted in the room. Business Case If this item provides a financial return, please explain how it does so... Expanding the room will allow for increased programming and rentals. New FWS programs: 5 Classes/Wk./3 Sessions Approx. \$1700/class = \$25,500/yr. Rentals: Additional Rentals for Sports User Groups, Community Rentals and Birthday Parties estimated \$5.000/vr. Total annual increased revenue forecasted at \$30.500. Risk Mitigation If this item mitigates a significant risk, please explain how it does so... Possible risk of negative local media exposure if unable to provide spaces for community members to use for their special events, community meetings, courses, trainings, etc. Additional space within program/rental areas will mitigate spread of virus. Section 2 Collaboration and Consultation Please identify relevant business areas for this item. An area is relevant if collaboration or consolation is required. Identify by checking all boxes that apply below.. **Customer Services** Building Engineering HR Legislative Services Planning Operations Legal **Finance** Recreation & Culture **Parks** Communications **Facilities Procurement** Other Please discuss item with relevant areas and include their comments below... Classification (select one):

This submission covers a variety of technical equipment for the Newmarket Theatre that are due for asset replacement, maintenance or upgrades. This has been categorized as "Legislated" due to the sale of bandwidth by the federal government. This change has made some of our equipment obsolete. More information can be found in the attached appendix, but an itemized listing is: Apple iPad2, ETC Sensor Dimmers (X 48), Strand 8" FresnelLite (X 16), Elation Opti Tri Par (X 6), Martin Rush Par (X 10), Martin Mac250 Entour X 6, Elation Design Spot 250 Pro (X4), GAM SX4 Six Gobo Tray Changer (X 3), Spectrum 4" Broadway (X 2), Spectrum ColorQ 8 Way Power Supply, Spectrum PSU 02 24 Volt Power Supply, Rosco 200W PSU (X 2), Altman Comet (X2), MediaMaster Server (Custom), Show Cue System Computer (Custom), Le Maitre DMX Smoke Machine, Rosco Delta Hazer, Le Maitre True North (X2), Radience Hazer, Behringer Eurorack UB 1002, QSC ISA1350 (X3), QSC PLX 3002, EAW UX8800, EAW AX396 (X3),

Maintenance/

Replacement

#### Classification Please provide an explanation for the classification (i.e. Growth, Service Level Change, Mandatory/Legislative) QUOTE BILL NO. OR AGREEMENT SUPPORT FOR MANDATORY

In 2019, the Federal Government sold bandwidth to the private sector. The frequency auctioned off was currently in use by wireless mics across the theatre industry, including the Newmarket Theatre. This sale means our wireless mic equipment will be operating in a restricted bandwidth and must be replaced. We have experienced feedback this year, where cell service is picked up and audible to the crowd, during a presentation or performance. The replacement/maintenance of these items will maintain existing service levels at the Newmarket Theatre. Inherent with technology, often with maintenance/replacement also result in enhancements to existing services.

#### **Priority** If this item addresses a priority, please explain how it does so...

Creating Extraordinary Spaces - Develop a Plan... that integrates and reflects diversity and inclusivity in our growing community. Without the correct equipment at the Theatre, we may fail to meet the changing needs of our community. We have a number of items that are no longer functioning to current technical standards, which at the least will result in customer dissatisfaction and could escalate to losing customers all together. The nature of our Theatre business is few, but high value rentals so addressing any technical shortcomings is a priority for business viability.

Desired Service Level If this item maintains or moves toward a desired service level, please explain how it does so..

Creating Extraordinary Spaces - We have a number of items that are no longer functioning to current technical standards, which at the least will result in customer dissatisfaction and could escalate to losing customers all together. The nature of the Theatre business is few, but high value rentals so addressing any technical shortcomings is a priority for business viability.

Business Case If this item provides a financial return, please explain how it does so...

In the theatre business, keeping technical equipment up to standard is crucial in retaining and attracting new clients. The items on this list have been budgeted for replacement through strategic asset replacement budgeting. This upgrade/replacement is complimentary to the renovation occurring in the lobby in 2019, ensuring both esthetics and technical ability line up.

Risk Mitigation If this item mitigates a significant risk, please explain how it does so.

Purchase of these items through existing asset recovery funds will reduce (or eliminate) potential for loss of revenue due to lacking technical services. Further, by continuing the asset replacement cycle and tracking/charging depreciation on these items, we will continue to maintain a stable replacement reserve. Failure of technical equipment during a show will result in significant financial and reputational loss.

Comments

#### Section 2 Collaboration and Consultation

Please identify relevant business areas for this item. An area is relevant if collaboration or consolation is required. Identify by checking all boxes that apply below... **Customer Services** Building Engineering HR Legislative Services **Planning** Legal Finance Operations **Recreation & Culture Procurement Parks** Communications **Facilities** Other

#### Please discuss item with relevant areas and include their comments below... Department

The equipment at the Newmarket Theatre is operated and maintained by Theatre Technical staff. Therefore, feedback from the Public Works services staff is not relevant to this **Facilities** submission.

#### **2021 BUDGET Capital Decision Package Form** Decision Package Item # FAC 6 **Total Points** Project / Initiative Name Greenhouse Operating System at Operations Centre Commission: Development & Infrastructure Services **Business Unit Number: 57301 Division:** Public Works - Facilities Business Unit Name: Facilities Administration Maintenance/ Service Level Classification (select one): Growth Mandatory/Legislative Change Replacement Section 1 Description Summary Please provide a brief summary of what the proposed budget item is... This request is for additional funds to acquire a computer control system to operate irrigation, fans, heat, etc. in the Operation Centre greenhouse. A budget request was submitted and approved in 2018. Upon further research and consideration for the type and level of automation that would be most beneficial to the operations of the greenhouse, it was found that the initial budget allocated for this project is insufficient. The purpose of this technology is to allow for information about the ambient conditions of the greenhouse to be known in real time when off site, and allow to adjust and operate the irrigation, ventilation and heat systems from a computer or cell phone. This system will also alert staff immediately of a failure with equipment, closure of vents, heating system default, etc. in an effort to avoid loss of crop or plants in the event of a malfunction. This was an approved 2019 budget that was underfunded, so we are requesting additional funds to complete the project. Classification Please provide an explanation for the classification (i.e. Growth, Service Level Change, Mandatory/Legislative) QUOTE BILL NO. OR AGREEMENT SUPPORT FOR MANDATORY This project represents a service level improvement to allow staff more control over the quality and consistency of the indoor environment in the greenhouse, while providing them more flexibility with time management as they will have the ability to respond to changes in the environment remotely. The existing operating system in the greenhouse has minimal capabilities for automation of the building system components, and does not have a capability to be controlled off site. In order to provide the desired service level, the existing system needs to be replaced with a new one. Priority If this item addresses a priority, please explain how it does so... This represents an on-going continuous improvement to the Town's operations and would contribute to creating an environment for job attraction by providing high level technological tools. The system would be an investment into the asset and also reflect a corporate risk strategy to mitigate financial impact of loss of plants and provide energy efficiency with closer monitoring of the indoor conditions inside the greenhouse. Desired Service Level. If this item maintains or moves toward a desired service level, please explain how it does so... The acquisition of an operating system for the greenhouse will enhance the level of service by allowing the Town staff to improve operations of the greenhouse and reduce the costs of possible loss of plants due to these incidents. Business Case If this item provides a financial return, please explain how it does so... This system will result in increased efficiencies such as remotely watering, opening fans in extreme heat and or closing in cold, all through this technology. This in turn reduces staff costs to come in on weekends and evening to address these needs. Risk Mitigation If this item mitigates a significant risk, please explain how it does so... Crops and plants must be kept in favorable conditions at all times not only to ensure their proper growth but also their survival. The installation of such operating system will ensure that environmental conditions remain within an acceptable range even outside of working hours and improve response time in the event of failures of the building systems. This will mitigate the potential for financial damage that loss of crops/plant would generate. The greenhouse experienced product loss in the winter of 2018/2019 when heating systems failed and temperatures in the greenhouse plummeted to a temperature not conducive to plant material survival. The financial impact of losing all plants within the greenhouse is significant. Section 2 Collaboration and Consultation Please identify relevant business areas for this item. An area is relevant if collaboration or consolation is required. #### **2021 BUDGET Capital Decision Package Form** Decision Package Item # PARK 7 **Total Points** 11 Project / Initiative Name Ball Diamond Backstops Replacement Commission: Development & Infrastructure Services **Business Unit Number:** 52811 Division: Public Works - Parks Business Unit Name: Parks Service Level Maintenance/ Mandatory/Legislative Classification (select one): Growth Change Replacement Section 1 Description Summary Please provide a brief summary of what the proposed budget item is... This request is for a multi-year ball diamond backstop replacement project. This project scope includes: replace the existing backstops for Ray Twinney Complex Ball Diamond 1 (\$100,000) and Ball Diamond 2 (\$100,000), George Richardson Diamond 2 (\$50,000), Whipper (\$100,000). The ground conditions at these locations along with the wear and tear of the user groups on the fencing need to be replaced over the next few years. Classification Please provide an explanation for the classification (i.e. Growth, Service Level Change, Mandatory/Legislative) QUOTE BILL NO. OR AGREEMENT SUPPORT FOR MANDATORY These backstops are anywhere from 25-35 years of age and are due for replacement. Priority If this item addresses a priority, please explain how it does so... Implement park development opportunities as required. The Parks Policy Development Manual from 2012 states how many diamonds are needed with current and proposed population, to meet these requirements, we need to update our infrastructure and amenities with current standards. Desired Service Level If this item maintains or moves toward a desired service level, please explain how it does so. Current diamond backstops are showing wear and tear from years of use/age/weather affecting the ground conditions and steel, they need to be replaced to meet current standards. Business Case If this item provides a financial return, please explain how it does so... Risk Mitigation If this item mitigates a significant risk, please explain how it does so.. Constant repairs are being completed each year, without this there is a chance that poles will fall down and fencing will be damaged and it could be a health and safety issue. Balls may go through the gaps in the fence and hit patrons or cause property damage. We have received CRM tickets and complaints from residents/user groups of balls going through the backstop and hitting people, surrounding houses, cars etc... Section 2 Collaboration and Consultation Please identify relevant business areas for this item. An area is relevant if collaboration or consolation is required. Identify by checking all boxes that apply below.. **Customer Services Building** Engineering HR Legislative Services **Planning** Operations **Finance** Legal **Recreation & Culture Parks** Communications **Facilities Procurement** х Other Please discuss item with relevant areas and include their comments below... ### **2021 BUDGET Capital Decision Package Form** Decision Package Item # PARK 4 **Total Points** 10 Project / Initiative Name Paving of Limestone Walkways at Ken Sturgeon Park Commission: Development & Infrastructure Services **Business Unit Number:** 52811 Division: Public Works - Parks Business Unit Name: Parks Service Level Maintenance/ Mandatory/Legislative Classification (select one): Growth Change Replacement Section 1 Description Summary Please provide a brief summary of what the proposed budget item is... This project is to pave the remaining trail at Ken Sturgeon Park to allow access for all and to reduce tripping hazards caused by washouts when it rains, or change of season from winter to spring. Paving will also help with AODA issues and make the trail compliant. Portions of the trail have been paved due to the projects being completed such as the playground replacement, being brought up to AODA standards and the new basketball court/outdoor community rink. Classification Please provide an explanation for the classification (i.e. Growth, Service Level Change, Mandatory/Legislative) QUOTE BILL NO. OR AGREEMENT SUPPORT FOR MANDATORY Growth and service level change, paving this trail will allow more users to access the park all year long, a new basketball court and fully accessible playground was just recently installed. Priority If this item addresses a priority, please explain how it does so... Desired Service Level If this item maintains or moves toward a desired service level, please explain how it does so.. Improving our level of service of the trail from screenings to pavement helps users use the trail safely and year round. If we do not complete the paving users with accessibility needs will not be able to use the park vear round. Business Case If this item provides a financial return, please explain how it does so... Risk Mitigation If this item mitigates a significant risk, please explain how it does so.. Not paving this trail allows for users to injure themselves on any washouts which happen every rain along with users not able to use the trail safely during the winter months. There is also a high risk of media exposure from those with accessibility needs and new parents with strollers. This has been an issue previously with users. ### **2021 BUDGET Capital Decision Package Form Total Points** 8 Decision Package Item # PARK 5 Project / Initiative Name Ice Breaker Equipment For Sidewalk Winter Maintenance Commission: Development & Infrastructure Services **Business Unit Number:** 52811 Division: Public Works - Parks Business Unit Name: Parks Service Level Maintenance/ Mandatory/Legislative Classification (select one): Growth Yes Change Replacement Section 1 Description Summary Please provide a brief summary of what the proposed budget item is... This project is to purchase an attachment for our sidewalk winter maintenance equipment that will help break up ice after freezing rain storms. This attachment will minimize the wear and tear on our equipment that is not designed for this function. This will increase the life span of our equipment due to not pushing out machines outside there limits, equipment is meant to clear snow and spread melting agents, but not to remove hard packed ice. Currently we are putting too much pressure on the plow when we are required to break ice as the machine is not made to do this. The Ontario minimum maintenance standards refers to clearing snow and ice off sidewalks within 24 hours of a snow event. Classification Please provide an explanation for the classification (i.e. Growth, Service Level Change, Mandatory/Legislative) QUOTE BILL NO. OR AGREEMENT SUPPORT FOR MANDATORY This would be a service level change as we currently do not have anything similar to the proposed equipment. When we have an ice storm this would enable our crews to move freely and efficiently through their plow routes, thus creating clean and safe sidewalks for the public. The Ontario minimum maintenance standards refers to clearing snow and ice off sidewalks within 24 hours of a snow event. Priority If this item addresses a priority, please explain how it does so... This project falls under Council Strategic Priority Safe Transportation, i. Incorporate technology/data driven tools and tactics into engineering design and enforcement measures related to the safety of vehicles, pedestrians, and other transportation modes in order to enhance trail and street safety. Desired Service Level If this item maintains or moves toward a desired service level, please explain how it does so. Winter storms are more aggressive due to climate change, there has been an increase in ice storms and new technology is required to combat these events in order to maintain the safety of Newmarket pedestrians. Business Case If this item provides a financial return, please explain how it does so... The potential of the requirement for vehicle maintenance decreases because we are lowering the risk of hitting ice and damaging the equipment. However, the dollar value cannot be quantified at this time. Risk Mitigation If this item mitigates a significant risk, please explain how it does so.. The Ice breaker will help to reduce the amount of slip and falls by assisting with a more efficient ice clearing process during freezing rain storms. It will reduce potential injury with staff (whiplash) lest sudden stops when hitting ice along with extending the life of the equipment. Section 2 Collaboration and Consultation Please identify relevant business areas for this item. An area is relevant if collaboration or consolation is required. Identify by checking all boxes that apply below.. **Customer Services Building** Engineering HR Legislative Services **Planning** Operations х Legal **Finance**

# 2021 Preliminary Draft Rate-Supported Operating Budgets Staff Report to Council

Report Number: 2020-80

Department(s): Financial Services

Author(s): Mike Mayes, Director of Financial Services/Treasurer

Meeting Date: October 19, 2020

### Recommendations

- 1. That the report entitled 2021 Preliminary Draft Rate-Supported Operating Budgets dated October 19, 2020 be received; and,
- 2. That subject to any additional direction from Committee, the proposed Water and Wastewater budgets be incorporated into the Draft Budgets to be presented to Committee of the Whole on December 7, 2020; and,
- 3. That the Treasurer be authorized and directed to do all things necessary to give effect to these recommendations.

## **Executive Summary**

The Rate-Supported Operating Budgets – Water, Wastewater and Stormwater - have restricted funding envelopes derived from the funding structure established in the Council approved multi-year financial plans. Updates of these financial plans were intended to be included in the 2021 budget process.

The Water and Wastewater plans require further review to incorporate recommendations from the Fiscal Strategy. The Stormwater plan requires direction from Council; this is covered in a separate report.

The proposed combined Water and Wastewater increase is 4% for the average residence using 200 cubic metres of water per year, which equates to \$49.44.

### **Purpose**

The purpose of this report is to obtain Council's direction on the Water and Wastewater Rate-Supported Operating Budgets.

### **Background**

Report 2020-35, 2021 Budget Process and Target set out the structure for the Rate-Supported Operating Budgets.

The Preliminary 2021 Draft Budgets were presented on October 5, 2020 as a starting point for community consultation and Council consideration.

### **Council Workshop on the Fiscal Strategy**

Council was presented a report and presentation on September 28, 2020. This included comparative diagnostics on Newmarket's financial sustainability, and made 79 recommendations resulting from that analysis.

As these recommendations include significant changes to Water and Wastewater reserve funds, as well as a rate-setting study, the introduction of the update to the Financial Plan is being deferred to allow for further analysis.

### **Budgeting in a COVID-19 world**

In reaction to the COVID-19 pandemic, the Town initiated a Financial Relief Program (see Report 2020-28). Two measures impacted Water and Wastewater:

- 2020 rate increases were reversed and returned to 2019 rates on May 1, 2020
- Overdue accounts started being transferred to the property tax accounts

The second measure could generate revenue from overdue charges in 2021 if this practice continues.

### **Discussion**

### FINANCIAL PLANS ARE THE STARTING POINT FOR THE 2021 BUDGET

The existing 6-year Financial Plans for Water and Wastewater were adopted by Council on June 26, 2017. They included a combined 4% increase in rate revenues. The 2021 budget revenue was built around this assumption. The rest of the budget was based upon experience, including the impact of the Financial Relief Program, and cost reduction measures.

The budgets are being presented to facilitate decision making, as in many cases the segregation of costs is arbitrary.

### Water and Wastewater consolidated budget

|                | 2020          | 2021          | change       |
|----------------|---------------|---------------|--------------|
| Fee increase   | 4.92% > 0%    | 4.00%         |              |
| Revenue        | \$ 41,702,000 | \$ 41,750,000 | \$ 48,000    |
|                |               |               |              |
| Regional costs | \$ 25,663,000 | \$ 25,550,000 | \$ - 113,000 |
| Expenses       | 6,970,000     | 7,091,000     | 121,000      |
| Support costs  | 2,268,000     | 2,291,000     | 23,000       |
| ARF            | 6,618,000     | 6,618,000     | 0            |
| Reserves       | 183,000       | 200,000       | 17,000       |
|                | \$ 41,702,000 | \$ 41,750,000 | \$ 48,000    |

Fee increase is 4% as set out in the current 6-year Financial Plan. Although the plan shows the increase applied equally to both rate groups, an unbalanced approach is recommended to account for a variance in reserve balances. The fees and charges, which will be coming to Committee of the Whole on December 7, will request no increase in Water Rates and a 7.8% increase in Wastewater Rates – a blended increase of 4.0%. For comparison, prior to the implementation of the Financial Relief Program and the reversal of the 2020 increase, the rate increases would have been 6.49% for Water and 3.45% for Wastewater – a blended increase of 4.92%.

Revenue does not change much. The 2020 budget reflects an increase to only the first 4 months of the year – the proposed 2021 rate increase will only return revenues back to their anticipated pre-COVID levels. However, \$4,000 per month has been added for late payment charges. This has been kept at a token amount as we do not have historical data to determine a more precise estimate at this time.

Regional costs include charges from the Regional Municipality of York for the purchase of water and the treatment of wastewater. The 2020 budget anticipated a 9% increase in these rates last year, but the Region did not implement an increase. Similar to revenues, the 2020 budget was not revised to reflect this change. A smaller increase is expected for 2021, resulting in a budgetary decrease.

*Expenses* include wages and operational costs, minor increases.

Support costs also include a minor inflationary increase.

ARF contributions to the Asset Replacement Fund have not been increased.

Reserves are transfers of the budgetary "surplus" to rate stabilization reserves.

Appendix "A" lists the Decision Packages recommended for inclusion in the Rate-Supported Budgets. There is one for Water and Wastewater; and two for Stormwater.

### Conclusion

The 2021 Water and Wastewater Budgets will be used as the basis for an update to their Financial Plans in 2021 and will establish their rates for 2021, which will be brought forward to Committee of the Whole on December 7, 2020.

### **Upcoming dates:**

- November 9 Special Committee of the Whole meeting dedicated to review the Tax-Supported Operating Budget and the Fiscal Strategy
- December 7 Committee of the Whole Presentation of the Draft Budgets and remaining fees & charges for approval
- December 14 this is the target date for approval of the 2021 budget and remaining fees & charges

Council may choose to extend this time for further deliberations.

There will also be opportunities for Councillors to meet with or to obtain additional information from the Treasurer or other Members of Staff.

## **Business Plan and Strategic Plan Linkages**

Consideration has been given to the recommendations of the Fiscal Strategy:

- Set water rates according to Newmarket's needs
- Commission or carry out a comprehensive rate-setting study that covers water and wastewater rates
- Ensure that the rate-setting study considers long-term asset management funding needs, inter-generational equity, water demand (impact of conservation), the cost of climate change adaptation, increased costs due to intensification, and a contingency factor for yet-to-be identified costs such as regulatory changes
- Investigate the reasons for Newmarket's historically higher than average rates and address controllable factors
- Develop a detailed financial plan that includes an analysis and forecast of capital and operating costs and incorporates the results of the rate-setting study
- Extend the time horizon of the financial plans to ten years
- The policy of pooling rate and tax-supported Asset Replacement Fund reserves should be dropped, and intra-reserve borrowing between tax and rate-supported reserves should not be permitted

### Consultation

This report builds on the presentation of the Preliminary Draft Budgets to Committee of the Whole on October 5, 2020. At the time of writing this report, there had been no comments or questions submitted on the Rate-Supported Operating Budgets.

### **Human Resource Considerations**

The Preliminary Draft Rate-Supported Operating Budgets do not include any requests for additional staff.

### **Budget Impact**

For an average residential property using 200 cubic metres of water per year, this would mean an annualized increase, based on the rates, of \$49.44.

As the first four months of 2020 were at a higher pre-Financial Relief Program rate, the actual increase in year-over-year dollars spent would be less, by approximately \$33.

### **2021 BUDGET Operating Decision Package Form Total Points** 27 Decision Package Item # SW 1 Project / Initiative Name Stormwater Master Plan Detailed Review/Update Commission: Development & Infrastructure Services **Business Unit Number: 45005** Division: Engineering - Stormwater Business Unit Name: Stormwater Service Level Maintenance/ Classification (select one): Growth Yes Mandatory/Legislative Yes Replacement Change Section 1 Description Summary Please provide a brief summary of what the proposed budget item is... In 2015 the Town initiated a Comprehensive Stormwater Management Master Plan; the Plan was approved by Council in June 2017. It is best practice to conduct a detailed formal review and update of Master Plans that were completed using a Municipal Class Environmental Assessment Approach every five years, or when there are major changes. The Master Plan addresses the: - Existing conditions of the stormwater infrastructure - includes existing development, watershed and stream inventory and condition, aquatic and terrestrial ecology, water quality and quantity - Effectiveness of the existing system - climate change lens - Future conditions from future development - Improvement and retrofit opportunities - Recommended approach to stormwater management - including legislative requirements and funding opportunities

### Classification Please provide an explanation for the classification (i.e. Growth, Service Level Change, Mandatory/Legislative) QUOTE BILL NO. OR AGREEMENT SUPPORT FOR MANDATORY

The Lake Simcoe Protection Plan (LSPP) is a legislated plan under the Lake Simcoe Protection Act, 2008, S.O. 2008, Chapter 23. The LSPP contains policies and objectives designed to reduce the phosphorus and other pollutant content in Lake Simcoe and its tributaries, and to protect and restore the ecological health of Lake Simcoe and its entire watershed.

One of the requirements of the LSPP is the development and implementation of a Master Plan to cover the management of stormwater for both existing and planned development in each municipality within the Lake Simcoe watershed. Very specific direction is provided in the LSPP on what needs to be included in the municipal Master Plans. Master Plans are seen as key vehicles for meeting the vision and objectives of the legislation under the Lake Simcoe Protection Act.

The Town initiated a Comprehensive Stormwater Master Plan (Master Plan) in 2015, and received final Council approval of the plan in June 2017, Because the Master Plan is prepared using a Class Environmental Assessment approach, it is best practice to conduct a detailed formal review and/or update every five years when there are:

- major changes to original assumptions
- major changes to components of the Master Plan
- significant new environmental effects
- major changes in proposed timing of projects within the Master Plan

Since the Town's Comprehensive Stormwater Master Plan was approved in 2017, the Tertiary Plan has been adopted, a greater focus has been placed on the future effects of Climate Change and flood risk within Newmarket, the Climate Change Resilience Assessment - Flood Vulnerabilities has been completed, and the Lake Simcoe Region Conservation Authority will complete the Holland River Watershed Stormwater Optimization Study. With these changes, it is necessary to conduct a detailed review and update of the Town's existing Master Plan.

### Priority If this item addresses a priority, please explain how it does so...

This budget item will address one of Council's strategic priorities under Environmental Stewardship wherein the Engineering Services will continue to implement programs that make Newmarket a leader in the implementation of low impact design (LID) as part of the proposed Stormwater Master Plan Detailed Review/Update

### Desired Service If this item maintains or moves toward a desired service level, please explain how it does so...

Level This item moves towards a desired service level in terms of proposed stormwater infrastructure to accommodate future development including stormwater management and drainage patterns, as well as, to ensure our existing system and processes are meeting our needs and legislated requirements. It will also take into account existing studies, like the Climate Change Risk Analysis - Flood Vulnerabilities, to ensure projects are prioritized to protect crucial Town infrastructure from the future effects of Climate Change.

### Business Case If this item provides a financial return, please explain how it does so ..

This item does not provide for a financial return, however, it will quantify future storm water projects; essential for future budgeting and rate changes.

### **Risk Mitigation**

This project ensures the direction provided by the Master Plan is based on current information and provides for best engineering practices and standards for future stormwater works and improvements. It will also ensure alterations to the existing system needed to mitigate the negative impacts of climate change are planned for, and cost estimates are realized in future changes to the Stormwater Rate.

### Section 2 Collaboration and Consultation Please identify relevant business areas for this item. An area is relevant if collaboration or consultation is required. Identify by checking all boxes that apply below **Customer Services** Building Engineering **Legislative Services** Planning Operations Legal **Finance** x Recreation & Culture Procurement **Parks** Communications **Facilities** Other

### **2021 BUDGET Operating Decision Package Form Total Points** Decision Package Item # SW 3 Project / Initiative Name | Stormwater CCTV Inspection Program **Business Unit Number:** 45004 Commission: Development & Infrastructure Services Division: Engineering - Stormwater Business Unit Name: Stormwater Service Level **Maintenance** Classification (select one): Mandatory/Legislative Growth Yes Change Replacement Section 1 Description

### Summary Please provide a brief summary of what the proposed budget item is...

CCTV inspections are the foundation of modern, risk-based management of sewer networks. The City owns 284 kilometers of stormwater sewers that convey rainwater during storm events but they are not currently inspected at an adequate level due to current funding. As the system ages, defects will increase and failures could happen such as cracking, flooding, or collapse. The only way to detect failures before they occur is through the proposed CCTV program. These defects cannot be identified through regular operations because the pipes are underground. To manage a system of the Town's size, a regular inspection program needs to be created so that the risk in the system can be managed. Without such a program, the risk of failure and the service disruption to residents is unknown. CCTV is a standard practice in all municipalities and utilities that own sewer networks. It is a standard practice to first establish baseline conditions in the entire system, at which point tactical monitoring can use risk and economics to schedule inspections or repairs. In some cases, follow up inspections may not be required for many years. This program is a minimum cost based on the Town's stormwater network size.

Contracted services will conduct inspections by feeding a camera through the sewer, and coding the defects using an international protocol (NASSCO PACP). The data point produced by the inspection is a 5 point condition rating, with 1 being very good and 5 being imminent failure. The outputs of these inspections offer significant benefit to the Town. The data that is produced will be analyzed to optimize repair methods and timing, integrate repairs with other assets (e.g. roads), and prioritize the work of staff and contractors. The risk in the system will be quantified and managed proactively. Failures such as sewer backups, flooding, and sink holes will be avoided through early detection. The data can also be aggregated to model system level deterioration, which greatly enhances the ability to forecast future replacement costs. The Town cannot conduct programs such as road resurfacing, road replacement, sewer replacement, sewer lining, I&I reduction, debris removal, or point repairs without CCTV inspections.

Classification Please provide an explanation for the classification (i.e. Growth, Service Level Change, Mandatory/Legislative) QUOTE BILL NO. OR AGREEMENT SUPPORT FOR MANDATORY

Historically, CCTV inspections have focused on the Town's wastewater system because it is older than stormwater, has a higher likelihood of failure (due to the impacts of wastewater chemistry), and was rated support. Storm sewers were only inspected as needed or to align with other project, despite being a sewer network the same size as wastewater.

This proposal is a Service Level Change because it shifts the Town's approach to storm sewer inspections from reactive to programmed. The service level change brings stormwater into alignment with wastewater, Stormwater and wastewater infrastructure systems are the same quantity (200km +). However, the storm sewers themselves are on average twice the diameter of a wastewater sewer, meaning a stormwater failure during a rain event could have a larger impact. This is a pertinent change to service levels given that the storm sewer network is beginning to age, and will improve service levels by avoiding or mitigating potentially catastrophic failures. On average, storm sewers are 6 years younger than wastewater sewers.

The proposed change enhances the Level of Service to inspecting 20% of the system per year, completing the baseline after 5 years (100%). After 5 years, the Level of Service may be reduced to 10% per year, due to the practice of placing sewers under risk management protocols driven by data, economics, and industry standards.

Priority If this item addresses a priority, please explain how it does so...

This program is required to achieve the Town's Goal #1 of Fiscal Sustainability. Current estimates suggest that a 284 kilometer network is worth approximately \$1.45 million per kilometer, or \$411 million in total replacement cost. This program maintains the Town's fiscal sustainability by ensuring that the system is kept in a good state of repair, is maintained to a level that its full value is realized, and that services can continue to be delivered sustainably. Maintaining the underground sewers also adds benefit to the surrounding assets such as roads - by using tactical programs like CCTV, trenchless repairs are more prevalent and cuts into the road surface are avoided. An annual cost of \$170K greatly improves the Town's ability to deliver on the Council Priority as it applies to a \$400 Million + sewer network.

A CCTV program is needed to complete the Council directive of an updated Asset Management Plan with strategies for funding and levels of service. Without condition data, these Plans rely on high level assumptions not adequate for the important decisions posed by asset management plans. CCTV will also greatly improve the ability to plan multi year capital and operating budgets. Once condition is observed sewers deteriorate in a fairly uniform manner, allowing maintenance to be programmed with a high level of certainty. National standards for defect coding, deterioration modelling, and risk management using economics mean that once condition is obtained, the year of capital and operating costs can be planned for each sewer segment with a high degree of certainty. Without CCTV, budgeting cannot be intelligent or on a large time scale because programs will be reactive to failures as they occur and without prior knowledge.

Desired Service If this item maintains or moves toward a desired service level, please explain how it does so...

Level This item moves the Town into a desired service level where sewers are inspected at the recommended frequency and the information is used to maintain reliability, improve planning and budget, and optimize the use of limited funds through risk management and trenchless repairs. As previously explain, the proposed service level for stormwater is fully aligned with the current wastewater sewer network, which is of a similar size and replacement value

Business Case If this item provides a financial return, please explain how it does so...

CCTV inspection costs approximately \$3.00 per meter when contracted. Conversely, the replacement cost of a sewer is \$1450 per meter, meaning CCTV is equivalent to 0.2% of the replacement value of a sewer. The value that is extracted from a very cheap CCTV inspection is considerable when the replacement cost is compared, especially in terms of risk management. This is before the premium cost of failure is applied. Studies examined by staff (e.g. City of Guelph Linear Assets Risk Management Framework) suggest that replacing a failed stormwater asset in a reactive manner can cost 25% to 30% more than replacing it under planned and controlled environments, due to mobilization and escalated cost. In a \$411M system, this would translate to an extra \$100M in potential risk exposure, if every sewer were in a failed state (which they are not). Inspecting the entire system over 5 years will cost approximately \$850K (\$170K) per year, meaning that the cost of an inspection is also less than 1% of the premium cost that would be realized by managing the entire system reactively over time. After 5 years, exposure of the entire system will be established because of the condition ratings produced by CCTV.

### **Risk Mitigation**

As explained throughout this proposal, the purpose of CCTV is to detect and avoid risk in an expansive underground sewer network. CCTV inspections with proper condition data will significantly improve the Town's understanding of risk exposure, and will provide the tools and techniques to manage it at a tactical level through repairs as well holistically over the long term through proper steps to ensure financial sustainability. CCTV is the cornerstone of avoiding risk in stormwater sewers.

# 10-Year Stormwater Financial Plan Staff Report to Council

Report Number: 2020-78

Department(s): Financial Services

Author(s): Kevin Yaraskavitch, Erik Wright and Craig Schritt

Meeting Date: October 19, 2020

### Recommendations

- 1. That the report entitled Stormwater 10-Year Financial Plan Options dated October 19, 2020 be received; and,
- 2. That Council provide direction on which option to pursue; and,
- 3. That the chosen option be used as the basis for an update of the Stormwater Financial Plan; and,
- 4. That Staff be authorized and directed to do all things necessary to give effect to this resolution.

## **Purpose**

The purpose of this report is to determine which option to use to update the financial plan for the stormwater service. This financial plan is used to monitor the overall financial health of the service and ensure a sustainable funding model.

### **Background**

The Town provides stormwater management services to protect the community and environment from stormwater runoff. Stormwater runoff is water that flows off properties mostly due to rain and snow events. The first financial plan was introduced in 2017 and covered the 2018 to 2023 planning period.

The Town is responsible for 284 kilometres of sewer, 10,851 catch basins and maintenance holes, 37 oil grit separators as well as 65 wet ponds, dry ponds, and LID features. Collectively these assets would cost over \$500 million to replace in today's dollars. This network is comparable in size to the Town's water and wastewater networks.

Stormwater management has seen several accomplishments. Many developments have been converted from ditch-based drainage to curb and sewer drainage. LID features have been successfully implemented. Staff continue to deliver a wide range of services related to the inspection, cleaning, maintenance, and storm response for ponds, catch basins, sewers, ditches, creeks, and roadways.

Stormwater management is a rapidly evolving service. It appears to be gaining greater attention, as we understand the how the service can help protect the environment, reduce risk and create attractive public spaces.

### **Discussion**

This report will discuss the cost drivers the stormwater service is facing. It will present three options on how to address these drivers and provide clarity to the level of service that Council would be adopting.

### **Cost Drivers**

Improving Environmental Protection

Stormwater carries nutrients, like phosphorus with it, as it runs off of properties. When stormwater runoff is untreated, it carries the nutrient rich water into our streams and rivers. The nutrient rich water causes algae blooms. As the algae eventually decomposes, it consumes the oxygen in the water. This lack of oxygen causes fish to suffocate.

Due to the importance of stormwater management in protecting the environment, there are several pieces of legislation directly tied to stormwater management systems. Notably, there is the Ontario Water Resources Act, with the associated Environmental Compliance Approvals (ECAs) that are granted for our stormwater facilities.

Currently different stormwater facilities need to meet different regulatory requirements. Stormwater management ponds are typically grandfathered in to the regulatory requirements in place at the time of development. The Ministry of Environment, Conservation, and Parks (MECP) is working to transition to a standardized regulatory framework where all ponds need to meet the same higher standard. The MECP has published the proposed changes to the Environmental Registry of Ontario for comments, indicating these changes could occur in the relatively near future.

For inspections and minor maintenance, the Town already operates using a best practices approach, treating all ponds as if they have the more stringent requirements. This will help ease the transition when the new system is enforced. Where the Town needs improvement is with the sediment removals.

Based on past surveys, it is estimated 11 ponds are past due for sediment cleanouts. These ponds are at risk of polluting the water entering the receiving watercourses and ultimately Lake Simcoe. There are an additional 6 ponds expected to require a sediment cleanout by 2025. The current service level of completing 2 sediment cleanouts a year will leave the Town forever playing catch-up. The Town may face fines if environmental requirements are not met in time.

### Improving Asset Management

Staff have done a detailed review of both future operating and capital requirements. The overall findings were that our current funding level is sufficient in the short term but that there are challenges that can build up over time.

Storm sewers are not proactively inspected. It is a best practice that sewers be inspected for blockages and deterioration. This is already done for wastewater sewers. The risk of not inspecting sewers is that sewers could collapse, back up, or flood without warning. Repairs will be reactive and sewers will not reach their expected service life.

Since there is a lack of reliable data on asset condition, there likely is insufficient budget to perform the necessary regular maintenance on the pipes. Regular maintenance reduces pipe failures and helps ensure the pipes reach their intended lifespan. If sewers are not repaired, deterioration will get worse, a backlog will be created, and more staff time will be spent responding to failures.

As the system ages, the cost of replacing assets is rising. As all assets were constructed in a similar time period (1980-2000), a "wave" of replacement costs will occur in approximately 30 years. Current funding levels are not sufficient to prepare for this replacement wave. This risk is not addressed by the 10-year financial plan due to its timescale. Long term risks will be addressed by the Town's Fiscal Strategy and Asset Management Plans.

### Community Building and Leading in Low Impact Development

The Town is growing and with that comes with the need to expand stormwater management services. The Town will assume 14 ponds and will also build a minimum of \$5 million in stormwater assets in the next 10 years. While the capital costs of theses assets will be covered by the development industry, the Town will be responsible for the ongoing maintenance and eventual replacement. Sufficient funding will be needed to accommodate these additional assets to maintain service levels.

"Continue to implement programs that make Newmarket a leader in the implementation of Low Impact Development (LID)" is one of the strategic priorities of Council. Under this strategic priority, the Action Item is to "Implement LID capital projects where appropriate". The ability to continue advancing this strategic priority is severely hindered by continuing with the status quo funding option.

LID's provide many benefits to the Town, residents, and our downstream neighbours in the watershed. They allow more stormwater to soak into the ground where it falls, rather than being transported to a stormwater pond, or released directly into a natural watercourse. By reducing the amount of stormwater reaching the end of the pipe, the Town becomes more resilient to the impacts of increased severe storms influenced by climate change, and we reduce the amount of sediment reaching our stormwater ponds thereby decreasing the cleanout frequency. In addition, LID's improve the quality of the stormwater being released to the natural watercourses, assists to prevent floods and erosion, improves water balance, and protects marine life.

### **Options**

This section provides options for how much Council would like to increase funding for stormwater management and explains the corresponding service level that it supports.

### Option 1: Status Quo

This option maintains the status quo level of service, but does not address increasing risks.

This option assumes the financial impact of the evolving environmental standards will be minimal. If the costs are more significant, the financial plan will have to be updated to accommodate these costs.

This option does not allow for the implementation of additional best practices for inspections and preventative maintenance to protect our assets, homes and businesses.

This option only allows for new capital projects funded through development charges and support additional maintenance costs related to the Town's new assets. However, the opportunities to implement LID projects are limited.

This option has the lowest rates over the 10-year period. See Table 1 for the projected rates over the planning period.

Table 1: Financial Consideration for Option 1

|                    | 2021      | 2022        | 2023        | 2024        | 2025        |
|--------------------|-----------|-------------|-------------|-------------|-------------|
| Increase           | 10%       | 10%         | 9%          | 7%          | 5%          |
| Revenues and       |           |             |             |             |             |
| Collections        | 2,855,000 | 3,091,000   | 3,324,000   | 3,522,000   | 3,673,000   |
| Reserve Balance    | 257,000   | - 2,381,000 | - 2,511,000 | - 2,099,000 | - 3,048,000 |
| Median Low Charge  | 9.73      | 10.71       | 11.67       | 12.49       | 13.11       |
| Median Medium      |           |             |             |             |             |
| Charge             | 46.29     | 50.92       | 55.50       | 59.39       | 62.36       |
| Median High Charge | 111.73    | 122.91      | 133.97      | 143.35      | 150.51      |

|                    | 2026        | 2027        | 2028        | 2029        | 2030      |
|--------------------|-------------|-------------|-------------|-------------|-----------|
| Increase           | 5%          | 5%          | 5%          | 5%          | 5%        |
| Revenues and       |             |             |             |             |           |
| Collections        | 3,831,000   | 3,998,000   | 4,173,000   | 4,356,000   | 4,549,000 |
| Reserve Balance    | - 3,920,000 | - 4,926,000 | - 4,103,000 | - 2,255,000 | 120,000   |
| Median Low Charge  | 13.77       | 14.46       | 15.18       | 15.94       | 16.73     |
| Median Medium      |             |             |             |             |           |
| Charge*            | 65.47       | 68.75       | 72.18       | 75.79       | 79.58     |
| Median High Charge | 158.04      | 165.94      | 174.24      | 182.95      | 192.10    |

<sup>\*</sup>typical annual residential charge

### Option 2: Incremental Improvements

# This option helps the Town build a stronger foundation to reduce risks with our stormwater management service while maintaining service levels.

This option assumes the financial impact of the evolving environmental standards will be minimal. If the costs are more significant, the financial plan will have to accommodate these costs.

This option allows for the implementation of additional best practices for inspections and preventative maintenance to protect our assets, homes and businesses. The collection of sewer condition data will help determine our needs for proper asset management. This option does not allocate additional funding for maintenance. It assumes that our current staffing resources will be more efficient in providing services with a better understanding of our infrastructure.

This option only allows for new capital projects funded through development charges and support additional maintenance costs related to the Town's new assets. However, the opportunities to implement LID projects are limited.

See Table 2 for the projected rates over the planning period.

Table 2: Financial Consideration for Option 2

|                          | 2021      | 2022        | 2023        | 2024        | 2025        |
|--------------------------|-----------|-------------|-------------|-------------|-------------|
| Increase                 | 10%       | 10%         | 9%          | 9%          | 9%          |

| Increase                 | 8%          | 8%          | 7%          | 6%          | 5%        |
| Revenues                 | 4,124,000   | 4,413,000   | 4,687,000   | 4,939,000   | 5,161,000 |
| Reserve Balance          | - 4,905,000 | - 5,799,000 | - 4,769,000 | - 2,632,000 | 82,000    |
| Median Low Charge        | 14.97       | 16.17       | 17.30       | 18.34       | 19.26     |
| Median Medium<br>Charge* | 71.22       | 76.91       | 82.30       | 87.24       | 91.60     |
| Median High Charge       | 171.90      | 185.65      | 198.65      | 210.57      | 221.10    |

<sup>\*</sup>typical annual residential charge

### Option 3: Extraordinary Improvements

## This option helps the Town to build a stronger foundation to reduce risks with our stormwater management service.

This option will likely be sufficient to address the evolving environmental standards. If the costs are more significant, priorities within the plan can be shifted or the financial plan will have to be updated to accommodate these costs.

Like option 2, this option allows for the implementation of additional best practices for inspections and preventative maintenance to protect our assets, homes and businesses. However, unlike option 2, this option allocates additional funding for maintenance to provide a higher level of service.

This option also allows for an additional \$11 million worth of new capital projects funded through the stormwater rates. This is in addition to the \$5 million amount funded by development charges and additional maintenance costs related to the Town's new assets. The opportunities for LID developments are significant.

Table 3: Financial Consideration for Option 3

|                    | 2021      | 2022       | 2023       | 2024       | 2025       |
|--------------------|-----------|------------|------------|------------|------------|
| Increase           | 55%       | 10%        | 9%         | 5%         | 5%         |
| Revenues           | 3,819,000 | 4,151,000  | 4,479,000  | 4,678,000  | 4,887,000  |
| Reserve Balance    | 490,000   | -3,000,000 | -3,815,000 | -4,288,000 | -5,590,000 |
| Median Low Charge  | 13.71     | 15.09      | 16.44      | 17.27      | 18.13      |
| Median Medium      | 65.23     | 71.75      | 78.21      | 82.12      | 86.22      |
| Charge*            |           |            |            |            |            |
| Median High Charge | 157.44    | 173.19     | 188.77     | 198.21     | 208.12     |

|                    | 2026        | 2027        | 2028        | 2029        | 2030      |
|--------------------|-------------|-------------|-------------|-------------|-----------|
| Increase           | 5%          | 5%          | 5%          | 5%          | 5%        |
| Revenues           | 5,106,000   | 5,337,000   | 5,579,000   | 5,832,000   | 6,099,000 |
| Reserve Balance    | - 5,595,000 | - 7,316,000 | - 6,083,000 | - 3,139,000 | 291,000   |
| Median Low Charge  | 19.04       | 19.99       | 20.99       | 22.04       | 23.14     |
| Median Medium      | 90.53       | 95.06       | 99.81       | 104.80      | 110.04    |

| Median High Charge | 218.53      | 229.45      | 240.93      | 252.97      | 265.62    |

<sup>\*</sup>typical annual residential charge

### Conclusion

This report outlines the cost drivers for the stormwater management service. They include improving environmental protection; improving asset management; and community building and leading in low impact development. This report outlines three options to establish the financial strategy for the service.

The chosen option will be used as the basis for an update to the Stormwater Financial Plan in 2021 and will establish the Stormwater rate for 2021 that will be brought forward to Committee of the Whole on December 7, 2020.

## **Business Plan and Strategic Plan Linkages**

Newmarket's vision of a community "Well Beyond the Ordinary" is one that provides efficient, effective and environmentally sound services to an appropriate level that achieves Council and/or Provincially mandated services levels, which meet public health and safety requirements and enhances quality of life while ensuring that system capital assets retain their value and are managed and funded according to sustainable, lifecycle based principles and practices.

This service acquisition aligns with Council's 2018-2022 Strategic Priorities of Long-term Financial Sustainability and Environmental Stewardship as the financial plan will help us provide stormwater management services.

Consideration has been given to the recommendations of the Fiscal Strategy:

- A comprehensive rate-setting study that covers stormwater rates
- Ensure that the rate-setting study considers long-term asset management funding needs, inter-generational equity, the cost of climate change adaptation, increased costs due to intensification, and a contingency factor for yet-to-be identified costs such as regulatory changes
- Develop a detailed financial plan that includes an analysis and forecast of capital and operating costs and incorporates the results of the rate-setting study
- Extend the time horizon of the financial plans to ten years
- Develop a financial plan for stormwater comparable to the plans for water and wastewater

### Consultation

Financial Services, Asset Management, Engineering Services and Public Works Services have been consulted on this report.

### **Human Resource Considerations**

Not applicable to this report.

## **Budget Impact**

This is dependent upon the option chosen and will be further detailed in the 10-Year Financial Plan.

### **Attachments**

None.

## **Approval**

Mike Mayes, Director of Financial Services/Treasurer CPA, CGA, DPA

Peter Noehammer Commissioner of Development & Infrastructure Services

### **Contact**

For more information on this report, contact Mike Mayes at 905-953-5300, ext. 2102 or via e-mail at <a href="mayes@newmarket.ca">mmayes@newmarket.ca</a> (financial related); or Craig Schritt at 905-953-5300, ext. 2506 or via e-mail at <a href="mayes@cschritt@newmarket.ca">cschritt@newmarket.ca</a> (operational related)

## **Town of Newmarket**

### **Minutes**

### **Committee of the Whole - Electronic**

Date: Monday, October 26, 2020

Time: 1:00 PM

Location: Streamed live from the Municipal Offices

395 Mulock Drive

Newmarket, ON L3Y 4X7

Members Present: Mayor Taylor

Deputy Mayor & Regional Councillor Vegh

Councillor Simon

Councillor Woodhouse Councillor Twinney Councillor Morrison Councillor Kwapis Councillor Broome Councillor Bisanz

Staff Present: J. Sharma, Chief Administrative Officer

E. Armchuk, Commissioner of Corporate Services

P. Noehammer, Commissioner of Development & Infrastructure

Services

I. McDougall, Commissioner of Community Services

K. Saini, Deputy Town Clerk

F. Scott, Manager of Regulatory Services

J. Unger, Acting Director of Planning & Building Services

A. Cammaert, Acting Manager of Planning Services

P. Chow, Senior Planner - Policy

A. Walkom, Legislative Coordinator

J. Grossi, Legislative Coordinator

For consideration by Council on November 2, 2020.

The meeting was called to order at 1:02 PM.

Mayor Taylor in the Chair.

The Committee of the Whole recessed at 3:10 PM and reconvened at 3:23 PM.

### 1. Notice

Mayor Taylor advised that the Municipal Offices were closed to the public and that this meeting was streamed live at Newmarket.ca/meetings. Residents who would like to provide comment on an item on this agenda were encouraged to provide their feedback in writing through email to Legislative Services at clerks@newmarket.ca or by joining the meeting electronically through video or telephone. He advised residents that their comments would form part of the public record.

### 2. Additions & Corrections to the Agenda

The Deputy Clerk advised of the following addition to the agenda:

 Item 5.4: Remote Deputation - Urban Centres Secondary Plan and Zoning By-law Technical Amendments - Final Recommendations provided by Kayly Robbins, Jones Consulting Group Ltd.

Moved by: Councillor Broome Seconded by: Councillor Twinney

1. That the addition to the agenda be approved.

**Carried** 

### 3. Conflict of Interest Declarations

None.

### 4. Presentations & Recognitions

### 4.1 Established Neighbourhood Compatibility Study

The Director (Acting) of Planning & Building Services provided an introduction to the presentation regarding Established Neighbourhood Compatibility Study, advised that this report and presentation represented the conclusion to the study, and thanked Staff for their work over the last year and a half.

The Senior Planner - Policy outlined the purpose of the Established Neighbourhood Compatibility Study, and further explained the revisions in the Official Plan Amendment including character areas, angular plan policies and transition policies. She also reviewed the revisions in the Zoning By-law Amendment including definition updates, exterior wall height versus building height, and side yard setbacks.

Members of Council queried Staff regarding angular plane policy, noncomplying maximum finished first floor height provisions, side yard setbacks and front yard setbacks.

Moved by: Councillor Woodhouse Seconded by: Councillor Kwapis

 That the presentation provided by the Senior Planner - Policy regarding Established Neighbourhood Compatibility Study be received.

Carried

### 5. Deputations

# 5.1 Remote Deputation - Established Neighbourhood Compatibility Study and Policy Recommendations

Nick Pileggi of Macaulay Shiomi Howson Ltd. provided a deputation on behalf of the owners of 16756 and 16764 Bayview Avenue. He requested that application of the Established Neighbourhoods Compatibility Study be deferred from these lands pending discussions of incorporation into the Mulock Station Secondary Plan Area.

Moved by: Councillor Kwapis
Seconded by: Councillor Woodhouse

 That the remote deputation provided by Nick Pileggi regarding the Established Neighbourhood Compatibility Study and Policy Recommendations be received.

## 5.2 Remote Deputation - Established Neighbourhood Compatibility Study and Policy Recommendations

Nancy Fish provided a remote deputation regarding the Established Neighbourhood Compatibility Study which specifically addressed her concerns related to side yard setbacks and lot splitting.

Moved by: Councillor Kwapis Seconded by: Councillor Broome

 That the remote deputation provided by Nancy Fish regarding the Established Neighbourhood Compatibility Study and Policy Recommendations be received.

Carried

### 5.3 Remote Deputation - Community Support

Ross Carson of Concerned Citizens for the Homeless provided a remote deputation regarding the community support program listed on the Outstanding Matters List. He provided an overview of the community support programs related to homelessness in Newmarket and the current difficulties due to the COVID-19 pandemic. He requested that the Community Support item remain on the Outstanding Matters List.

Moved by: Councillor Woodhouse Seconded by: Deputy Mayor & Regional

Councillor Vegh

1. That the remote deputation provided by Ross Carson regarding Community Support be received.

Carried

5.4 Remote Deputation - Urban Centres Secondary Plan and Zoning Bylaw Technical Amendments - Final Recommendations Kayly Robbins of Jones Consulting Group Ltd. provided a remote deputation on behalf of her client who owns 460 Davis Drive. She advised that her client objects to the designation of the land as 'Parks and Open Space' and 'Mixed Use' in the zoning by-law and official plan amendments.

Moved by: Councillor Kwapis Seconded by: Councillor Twinney

That the remote deputation provided by Kayly Robbins, Jones
 Consulting Group Ltd. regarding Urban Centres Secondary Plan and
 Zoning By-law Technical Amendments - Final Recommendations be
 received.

**Carried** 

### 6. Consent Items

Moved by: Councillor Morrison Seconded by: Councillor Simon

1. That sub-items 6.4, 6.7, 6.8 and 6.9 be adopted on consent. See following sub-items 6.1, 6.2, 6.3, 6.5, and 6.6 for motions.

Carried

### 6.1 Established Neighbourhood Compatibility Study and Policy Recommendations

An alternate motion was presented and is noted below in bold.

Moved by: Councillor Twinney Seconded by: Councillor Simon

1. That staff be directed to amend the Established Neighbourhood Compatibility Study and Policy Recommendations with the amendments identified by the Committee of the Whole for consideration at the Council meeting of November 2, 2020.

6.1.1 Correspondence - Humphries Planning Group Inc.

Moved by: Councillor Broome Seconded by: Councillor Morrison

1. That the correspondence provided by Humphries Planning Group Inc. regarding Established Neighborhood Compatibility Study and Policy Recommendations be received.

Carried

### 6.2 Urban Centres Secondary Plan and Zoning By-law Technical Amendments - Final Recommendations

An alternate motion was presented and is noted below in bold.

Moved by: Councillor Twinney
Seconded by: Councillor Morrison

- 1. That the amendments concerning the lands located at 460 Davis Drive be referred back to staff for further discussions between staff and the owners of the property; and,
- 2. That the report entitled Urban Centres Secondary Plan and Zoning By-law Technical Amendments Final Recommendations dated October 26, 2020 be referred to staff for notification of the property owners as identified by Committee of the Whole.

Carried

### 6.3 Construction Vibration

An alternate motion was presented and is noted below in bold.

Moved by: Councillor Bisanz

Seconded by: Councillor Morrison

1. That staff be directed to provide Council with information on a proposed permit process for non-Planning Act matters, and further information on the historical complaints regarding vibration issues at the Council meeting of November 2, 2020.

Carried

6.3.1 Correspondence - Stuart Hoffman

Moved by: Councillor Bisanz
Seconded by: Councillor Morrison

1. That the correspondence provided by Stuart Hoffman regarding Construction Vibration be received.

Carried

### 6.4 Zoning By-law Amendment - 1250 Gorham Street

- 1. That the report entitled Zoning By-law Amendment 1250 Gorham Street dated October 26, 2020 be received; and,
- That the application for Zoning By-law Amendment, as submitted by 2011378 Ontario Limited (Cummins Hydraulics Ltd.), for lands known municipally as 1250 Gorham Street, be approved, and that staff be directed to present the Zoning By-law amendment to Council for approval, substantially in accordance with Attachment 1; and,
- 3. That Howard Freidman, of HBR Planning Centre, 30 Waymount Avenue, Richmond Hill, ON, L4S 2G5, be notified of this action; and,
- 4. That Staff be authorized and directed to do all things necessary to give effect to this resolution.

### 6.5 Third Quarterly Update to the Outstanding Matters List for 2020

An alternate motion was presented and is noted below in bold.

Moved by: Councillor Woodhouse Seconded by: Councillor Broome

- 1. That the report entitled Third Quarterly Update to the Outstanding Matters List for 2020 dated October 26, 2020 be received; and,
- 2. That Item 13 of the Outstanding Matters List regarding City of Markham Resolution Single Use Plastic Reduction Strategy Phase 1 be deleted; and,
- That Council adopt the updated Outstanding Matters List as amended; and,
- 4. That Staff be authorized and directed to do all things necessary to give effect to this resolution.

Carried

### 6.6 Parking Petition - Clematis Drive

Moved by: Councillor Twinney
Seconded by: Councillor Woodhouse

1. That the petition regarding Parking Restrictions on Clematis Drive be referred to Staff.

Carried

### 6.7 Appointment Committee Meeting Minutes of January 15, 2020

- 1. That the Appointment Committee Meeting Minutes of January 15, 2020 be received.
- 6.8 Accessibility Advisory Committee Meeting Minutes of January 16, 2020

1. That the Accessibility Advisory Committee Meeting Minutes of January 16, 2020 be received.

## 6.9 Newmarket Economic Development Advisory Committee Meeting Minutes of February 6, 2020 and June 30, 2020

1. That the Newmarket Economic Development Advisory Committee Meeting Minutes of February 6, 2020 and June 30, 2020 be received.

### 7. Action Items

None.

### 8. Notices of Motion

None.

### 9. Motions Where Notice has Already been Provided

None.

### 10. New Business

### 10.1 Traffic Calming Measures on Stonehaven Avenue

Councillor Simon introduced a motion to direct staff to review options for traffic calming measures on Stonehaven Avenue.

Moved by: Councillor Simon Seconded by: Councillor Broome

- 1. That Council direct Staff to review and report back to Council with options for temporary and permanent traffic calming measures or features to be added to Stonehaven Avenue; and,
- That Council direct Staff to review and report back to Council regarding a three way stop to be added to the west side of Best Circle and Stonehaven Avenue.

**Carried** 

### 10.2 Public Petitions during the COVID-19 Pandemic

Councillor Kwapis queried staff on options for residents to gather signatures for a public petition, without the need for a paper copy of the petition to be circulated and signed during the COVID-19 pandemic. The Commissioner of Development & Infrastructure advised that staff were examining options and would advise of possible solutions.

### 10.3 Planning and Building Department

Councillor Woodhouse commended the hard work and responsiveness of the Planning and Building department staff.

### 11. Closed Session

Mayor Taylor advised there was no requirement for a Closed Session.

### 12. Adjournment

Moved by: Councillor Twinney Seconded by: Councillor Broome

1. That the meeting be adjourned at 4:30 PM.

# Established Neighbourhood Compatibility Study Official Plan and Zoning By-law Amendments

Prepared by: Phoebe Chow

Planning Services

Date: October 26, 2020

# Purpose

 Highlight changes to the draft Official Plan Amendment and Zoning By-law Amendment since the September 22, 2020 Special Committee of the Whole meeting

# Revisions in draft OPA

- General characteristics of each Character Area are now descriptions of the Character Area instead of Official Plan policies
- Clarified compatibility policies relating to angular plane are only applicable to mid and high-rise developments (=>5 storeys) that are adjacent to Residential Areas

# Revisions to draft OPA

 Added a Transition policy that recognizes any OPA, ZBLA, draft Plan of Subdivision, draft Plan of Condo, and Site Plan applications that have been deemed complete and under review are not subject to the proposed OPA

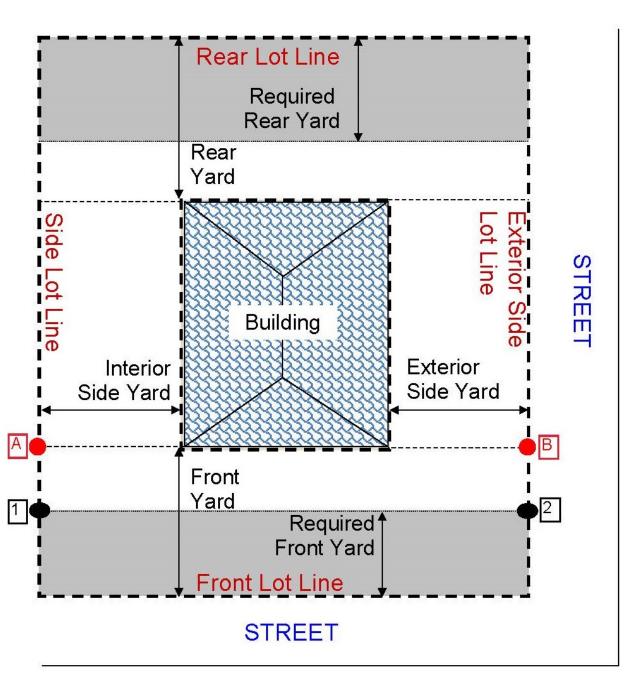

# Revisions in draft ZBLA

- Added a provision to recognize buildings or structures with non-complying max. finished first floor height can be enlarged, renovated, or repaired
- Updated definition of "Grade, Established or Finished"

Previous definition of "Grade, Established or Finished" = (1+2)/2

Revised definition of "Grade, Established or Finished" = (A+B)/2

# Revisions in draft ZBLA

- Exterior Side Yard Setbacks may also be within a range of +/- 1m of the average of adjacent dwellings (same as Front Yard Setback)
- Specified "adjacent" in the above provision means "dwellings within 60 metres on the same street"

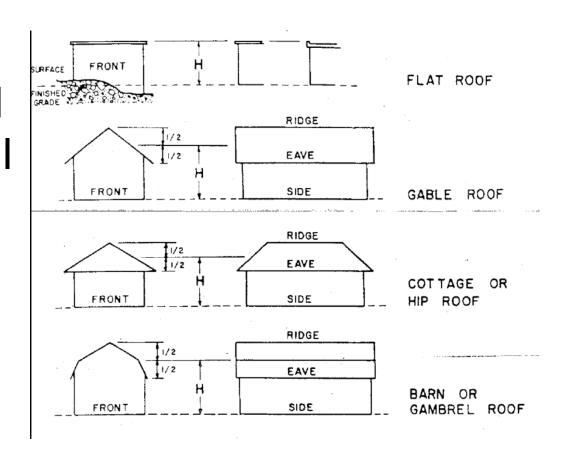

FYS = Front Yard Setback; ESYS = Exterior Side Yard Setback

The above image and measurements are for illustration purposes only and do not represent actual dimensions.

# Revisions in draft ZBLA

 Use "building height" instead of "exterior wall height" in determining interior side yard setback

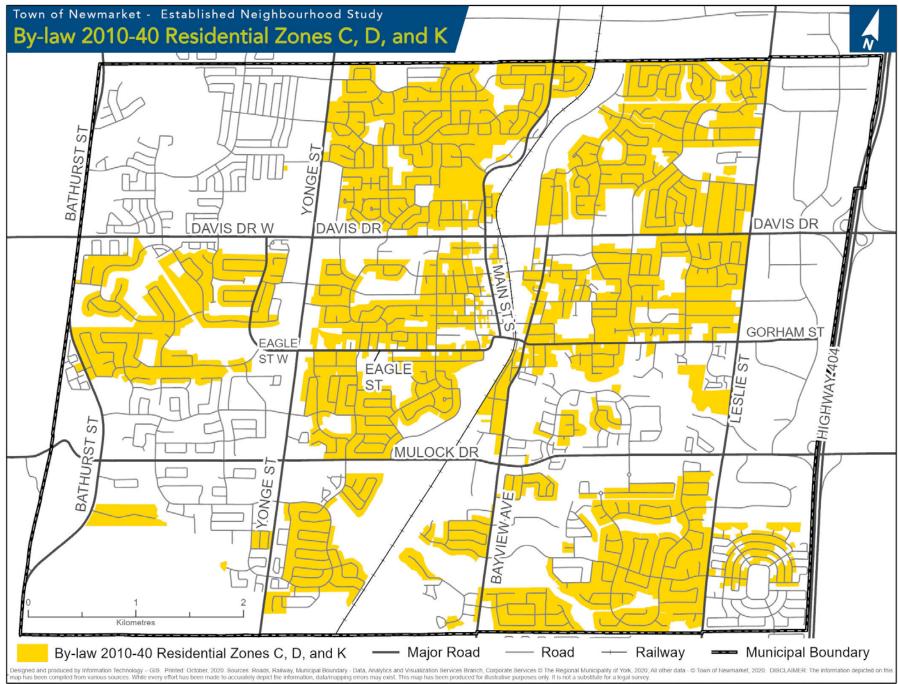

# Thank you

Town of Newmarket

**RE:** Newmarket Established Neighbourhoods Community Study and Mulock

Station Area Secondary Plan

16756 and 16764 Bayview Avenue

North of Mulock Drive

Macaulay Shiomi Howson Ltd. are the planning consultants for the Owners of 16756 and 16764 Bayview Avenue, located on the west side of Bayview Avenue, just north of Mulock Drive, in the Town of Newmarket. The subject lands are currently home to a single detached dwelling (one on each property).

The property is within the boundaries of the Newmarket Established Neighbourhoods Study Area and just outside of the Mulock Station Secondary Plan Area. The Owners of these properties have an interest in both of these planning processes that are underway.

The properties are currently designated Stable Residential, in the Town of Newmarket Official Plan, which would permit single and semi-detached dwelling along with townhouses (subject to certain criteria).

The draft Official Plan policies outlined as part of the Established Neighbourhoods Study include additional policies related to uses, including:

Rowhouses and townhouses are also permitted provided that a review and analysis of such densities be undertaken as part of an application process including the submission of a planning justification report to the satisfaction of the Town.

Townhouse units on a Private Road shall be a permitted use in the Residential Area for the lands subject to Official Plan Amendment No.12. (OPA #12) (955 & 995 Mulock Drive)

While these draft policies seek to enhance the permitted uses on the subject lands, in our view, they do not adequately address the unique characteristics of the subject lands:

- The lands are 'double-wide' lots, meaning, compared to the property lot pattern to the north, they are approximately twice as wide;
- They back onto a former commercial/industrial site and side onto a commercial site to the south:
- They are located on a major street and in proximity to an arterial road;
- The building form across Bayview Ave. to the east are townhouses that back onto Bayview, along with a relatively new, three storey commercial/medical building further south;
- The lands are located immediately adjacent to the Mulock Station Secondary Plan, which proposes building heights on neighbouring properties, of up to six (6) storeys, with a minimum of three (3) storeys and includes a medium density designation that calls for a maximum FSI of 1.75, with a minimum of 1.25.

In addition, the Established Neighbourhoods Study seeks to incorporate the lands into the 'Historic Core Character Area', however, the lands are far removed from the historic core and share no real connection to it. The single detached homes to the north, fronting on Bayview Avenue (south of Penrose Street) are examples of circa 1960's bungalow dwellings. It is our view that the subject lands should not be considered part of this 'character' area.

As noted, the Town is also undertaking a Secondary Plan for the Mulock Station transit area and has drafted Secondary Plan policies for that area. It is our view that the subject lands relate more to this Secondary Plan Area, than they do to the historic core or the Stable Residential area.

Therefore, we would request the following:

- As part of the Established Neighbourhoods Study and the removal of the related Interim Control By-law, incorporate a site-specific policy or recommendation to remove the lands from the 'Established Neighbourhoods' Official Plan Amendment;
- 2) Incorporate the lands into the Mulock Station Secondary Plan Area and include a land use designation similar to the property to the south (medium density) which would allow for similar height and density.

We would be more than happy to review and discuss the above points and recommendations directly with staff. In addition, I would ask that I be added to the notification/contact list for both of these planning processes.

Should you have any questions regarding the information contained herein, please contact me directly, thank you.

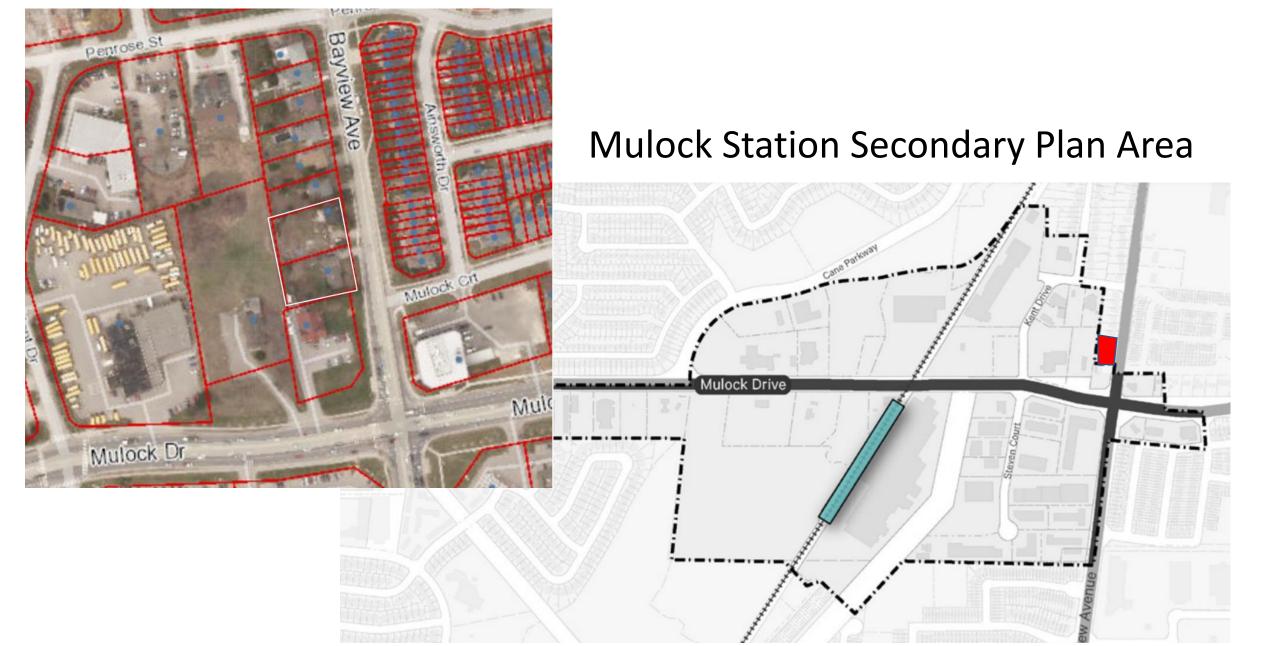

Sincerely, MACAULAY SHIOMI HOWSON LTD.

Nick Pileggi, MCIP, RPP. Principal

## 16756 and 16764 Bayview Avenue

Dear Mayor, Council and Planning Department:

RE: Established Neighbourhoods Compatibility Study

I would like to respond and provide feedback to the Mayor's request for more information regarding (1) side yard setbacks, and (2) the reference to lot-splitting on my section of Millard Avenue (west of Forest Glen Road) and Srigley Street as raised at the Established Neighbourhoods Compatibility Study on September 22, 2020.

Please excuse any ignorance or misinterpretation of policy recommendations on my part as I am not a professional in this area. I am very pleased and proud that the Town initiated this important study and it is my hope to assist the Town in creating its plan to preserve our historical established neighbourhoods, especially as it relates to my section of Millard Avenue.

Please note, as an active and engaged resident, I have attended all public consultations on this study. In fact, during the first meeting I drew and submitted a drawing of what I love about my neighbourhood which included vast green space, large lots and mature trees. This is what I cherish about my "unique" and historic neighbourhood. I am proud to live in what I call 'old Newmarket'. Preservation of green space and mature trees is very important to me and my quality of life. My family has resided in our home on Millard Avenue for 64 years and most of my neighbours average 50+ years. We are a community and for the most part homeownership is passed-down through generations.

1) Side lot measurements (Planning Department input please): As I understand it, side yard setbacks will be dependent upon house height as defined in an existing Zoning By-Law and include a 1.8m maximum width. I propose an exemption for wider setbacks for front yards exceeding 30m frontage regardless of house height.

My reasons are twofold: 1) the Key Findings of the Study (p. 28) only acknowledges front yard widths up to 30m (90°). Lots in this section of Millard Avenue are 33.3m x 43.3m (100° x 130°); and 2) the proposed 1.8m setback in Section 6.2.2. is only 5°9°. Currently existing setbacks on my section of the street vary from 4m (12°) and 7.62 (25°).

Section 6.2.2. of the Study proposes: "Interior Side Lot Lines Measurements have been given (ranging from 1.2-1.8m) for interior side lot line setbacks, which are dependent on height This rule retains the relationship that the side-yard setbacks for houses increase with height (of existing Zoning By-law), but uses measurement as a clearer measure, rather than storeys."

I imagine lot coverage maximums will prevent new-builds/additions from encompassing the entire yard's width, but I believe the setbacks for properties exceeding 30m should be increased to accommodate exceptional properties/lots in historical Newmarket. A setback of 1.8m is simply too narrow and would damage the cherished green space aesthetics of our neighbourhood.

2) **Lot-Splitting:** In my opinion, permitting lot-splitting of our properties must not be allowed under any circumstance. In simple terms, it goes against the very essence of the Study's intent "to preserve the character of our established neighbourhoods". It would severely and irrevocably change the character, aesthetics and quality of life in our neighbourhood. It would ruin our street's unique and historical charm.

To paraphrase the Mayor at the September meeting, "one might argue against this because of the historic characteristic of the street; that it's a really important character area in our town and we must preserve the historical context from which it was developed." - My thoughts exactly.

If the purpose of creating neighbourhood compatibility guidelines is to protect established neighbourhoods and their distinctive characteristics, one must address and preserve the very factors that contribute to the successful and harmonious nature of specific areas. Factors include: land use, heritage, lot size (including frontage and side yard set-backs), and trees. To do this Newmarket must maintain the traditional range of building-to-lot relationships by ensuring houses are in proportion to their lot size and maintaining the openness of yards surrounding the dwelling. It must preserve the lush and mature vegetation which is a key component of our character.

While one might argue that we need to minimize the impacts of restrictive guidelines for increased size and scale of rebuilds or extensions on properties to meet owners changing needs, it remains the same: lot-splitting would irrevocably change the character of the neighbourhood.

In conclusion, the potential of lot-splitting has caused much distress among my neighbours. Most of us have lived here 50+ years. We bought our homes because of the street's unique aesthetics. We have paid taxes and been for the most part, exemplary citizens through our actions and volunteering opportunities. We are a community. There is a sense of identity, comfort and safety in our neighbourhood that is cherished and is very much worth protecting.

Sincerely, Nancy Fish 188 Millard Avenue Newmarket, On L3Y 1Z2

Subject: public input Town Council meeting on Monday, October 26

**Date:** October 22, 2020 9:56:07 AM

From: Ross Carson, chairperson, Concerned Citizens for the Homeless in Newmarket

To: The Town Clerk, Town of Newmarket, York Region

Re: Speaking to the topic of Community Support on the Outstanding Matters List

Dear Sir or Madam,

I write to request the opportunity to speak at the Committee of the Whole Meeting on Monday, October 26 at 1:00 p.m.

I wish to address the topic of Community Support when the review of the list of Outstanding Matters occurs in the agenda.

My role will be to speak as the chairperson of the unincorporated association, Concerned Citizens for the Homeless in Newmarket.

Our fifteen member group meets on-line every second Tuesday morning. Our meetings began in mid-April 2020.

Your assistance in arranging my opportunity to speak on Monday during the afternoon meeting is very much appreciated.

sincerely,

Ross Carson

# Established Neighbourhood Compatibility Study and Policy Recommendations Staff Report to Council

Report Number: 2020-72

Department(s): Planning and Building Services
Author(s): Phoebe Chow, Senior Planner - Policy

Meeting Date: October 26, 2020

### Recommendations

- 1. That the report entitled Established Neighbourhood Compatibility Study and Policy Recommendations dated October 26, 2020 be received; and,
- 2. That the Policy Recommendations Report prepared by SvN dated September 2020 attached as Attachment 1 be received; and,
- 3. That the attached draft Official Plan Amendment No. 28 be adopted; and,
- 4. That the attached draft Zoning By-law be enacted; and,
- 5. That Staff be authorized and directed to do all things necessary to give effect to this resolution.

### **Executive Summary**

The Established Neighbourhood Compatibility Study (Study), which is intended to address development compatibility within existing neighbourhoods, has been completed. This report summarizes the findings of the Study and provide recommendations to the Council on the proposed amendments to the Official Plan and Zoning By-law 2010-40, as amended.

Staff and the Town's consultant, SvN Planners + Architects, have consulted Council and members of the public on this matter on numerous occasions over the past two years. Comments received have been considered and addressed in the proposed amendments, where appropriate. Staff is now seeking Council's approval of the

proposed Official Plan Amendment No. 28 and Zoning By-law Amendment, which have been attached to this report.

### **Purpose**

The purpose of this report is twofold:

- To present the findings of the Established Neighbourhood Study to Council;
- To seek Council approval of the proposed Official Plan Amendment and Zoning By-law Amendment to implement the findings of the Established Neighbourhood Study.

### **Background**

The matter of development/redevelopment compatibility within existing neighbourhoods is not new and it is becoming an increasingly prevalent planning issue as municipalities respond to increasing development pressures.

In 2013, Council approved Zoning By-law 2013-30 and amended standards from Zoning By-law 2010-40 that affect siting of a dwelling on a lot to start addressing the issue of compatibility within existing residential neighbourhoods. Specifically, By-law 2013-30 reduced the maximum permitted height, reduced the maximum permitted coverage, and modified the way in which front yard setback is determined. Subsequently, staff also conducted research on <u>best practices</u> in addressing issue of perceived overbuilding in established residential areas. It then became clear that the amended zoning standards were not sufficient to address the development pressures the Town were experiencing.

After presenting best practices from other municipalities at a Council workshop in 2018, Council reiterated their clear goal of having policies in place for existing stable residential areas that will ensure any development (including additions to existing homes) must contribute to the neighbourhood's character and that the Town's Official Plan policies need to be updated to mandate compatibility. The Established Neighbourhood Study (the Study) is intended to address this goal focusing in redevelopment or additions to existing dwelling of a single lot.

The initiation of the Study began in mid 2018, when Council directed staff to engage services of a consultant to assist in reviewing Official Plan policies and Zoning By-law regulations to address changes in established residential neighbourhoods. Figure 1 below shows some of the milestones of the Study since 2019.

Figure 1 Project Milestones

| January 2019   | <ul> <li>Council passed Interim Control By-law 2019-04, which<br/>prohibited development in the majority of the Town's<br/>residential area</li> </ul>                |

### **Discussion**

The following subsections provide an overview of some of the key findings of the Study and proposed changes to the Town's Official Plan and Zoning By-law 2010-40, as amended.

### **Key Findings**

- Lands currently designated "Emerging Residential" in the Town's Official Plan are nearly built-out; therefore, the designation and policies are proposed to be updated:
- The Town's existing residential areas can be classified into four Residential Character Areas: Historic Core; Traditional Suburban; Contemporary Suburban, and Estate;
- Each Character Area can generally be defined by a set of characteristics that any new construction or additions to existing dwellings should respect;
- The Estate Character Area and Contemporary Suburban Character Area are fully built out and are not anticipated to undergo significant changes. The Study has focused more on the Historic Core Area and Traditional Suburban Character Area and therefore only regulations affecting the Historic Core and Traditional Suburban Character Areas have been created;
- Existing Zoning By-law regulations generally permit dwellings that would be larger than the existing building stock, which may result in compatibility issues. The

Study recommends various amendments to protect for compatibility between new construction/additions and existing dwellings in an area.

### **Proposed Official Plan Amendment**

The draft Official Plan Amendment is attached to this report as Attachment 1. The main themes of the proposed amendment are:

- Combining existing "Stable Residential" designation and "Emerging Residential designation" as a single "Residential" designation and updating relevant policies
- Establishing Character Areas and policies for each Character Area
- Adding more details to the Compatibility policies of the Official Plan to strengthen the section

### **Proposed Zoning By-law Amendment**

The draft Zoning By-law Amendment is attached to this report as Attachment 2. Below is a summary of some of the proposed zoning changes. Illustrations of the proposed changes can be found in the <a href="September 22">September 22</a>, 2020 Special Committee of the Whole presentation. It should be noted that the proposed changes are intended to regulate developments such that they will respect and be compatible with their surrounding areas. It is not the intent of this study or amendment to have regulations that ensure consistent development standards across the Town. The existing zoning by-law is structured such that it recognizes different zones within the Town have different requirements. Variations within each zone can be desirable to a neighbourhood if they are done in a respectful and compatible manner.

- Updating development regulations for residential zones new lot coverage schedule; reduced maximum building height for zones that permit single detached and semi-detached; relating interior side yard setback to building height in metres instead of number of storeys for Zones C, D and K; and changing how front yard setback and exterior side yard setback are determined;
- Adding transition clauses to recognize applications in process, while acknowledging those that are recently approved are not subject to the proposed provisions;
- Changing definitions to tighten up some of the controls used to ensure compatibility - basement; dormer; building height; established or finished grade; finished first floor height; storey; flat/pitched roof, and residential garage, and
- Adding general provisions to permit driveway encroachments in any yard and to clarify 0.3m (1 foot) reserves are considered part of the lot when determining setbacks and coverage, but are not considered as a lot line.

### Conclusion

As directed by Council, Planning staff and the Town's planning consultant have completed the Study to address neighbourhood compatibility issues. Findings of the

Study inform the draft Official Plan Amendment and draft Zoning By-law Amendment, which have been attached for Council's consideration and approval.

### **Business Plan and Strategic Plan Linkages**

• Extraordinary Places and Spaces

### Consultation

Planning staff and the Town's Planning consultant have hosted numerous engagement sessions with Council and members of the public throughout the course of the Established Neighbourhood Study. Examples of engagement sessions include: special committee of the whole meetings; public information centres; a farmers market engagement session, and online/social media including HeyNewmarket. All comments received have been considered, and where appropriate, incorporated in the attached draft Official Plan Amendment and Zoning By-law Amendment.

### **Comments Received from Council and Members of the Public**

Comments received from Council and members of the public and staff's recommendations are summarize in the Table 1. Other detailed technical comments have been considered and addressed in the attached amendments, where appropriate.

Table 1 Comment Matrix

| Comments Received                                                                                                      | Staff's Recommendation                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Clarify what "adjacent" mean                                                                                           | The term generally means more than immediately abutting. For the purpose of determining Front Yard Setback, which the proposed zoning provision states: "One metre less than the average of the front yard setback of <b>adjacent</b> dwellings", the term "adjacent" has been quantified to mean "within 60 metres on the same road". This is based on the existing Established Building Line provision in the zoning by-law, which uses 60 metres to qualify adjacencies. |
| Explore options in determining minimum side yard setbacks on properties that abut existing generous side yard setbacks | Zones that currently require large side yard setbacks such as Zones A and B are not subject to the proposed side yard setbacks zoning regulations. The proposed changes are only applicable to Zones C, D and K where the existing requirement is determined by the number                                                                                                                                                                                                  |

|                                                                                               | of storeys of the dwelling rather than actual height of the dwelling. Some properties within Zones C, D and K may have side yard setbacks that exceed the minimum requirement, but where these situations exist, the proposed minimum side yard setback requirements are still considered to be compatible with those existing situations. Staff and the Town's consultant have further reviewed some lots in Zones C and D against the proposed side yard setback requirements and note that in many cases, maximizing the dwelling width by providing minimum side yard setbacks would not support a desirable layout of the house. This is especially true on smaller lots with a two-storey dwelling (see Attachment 4). Having varying minimum side yard setback requirements within a zone would be overly burdensome from an implementation /administrative standpoint. Staff is of the opinion that the proposed minimum setback requirements combined with the maximum height and lot coverage provisions is a balanced approach to address compatibility. |
|-----------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Apply the same approach that is proposed for Front Yard Setback to Exterior Side Yard Setback | Staff has no objection to provide some flexibility to the minimum Exterior Side Yard Setback requirement. The proposed zoning by-law has been revised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Tree Protection should be addressed as part of the study                                      | Tree protection is being reviewed under the Private Tree By-law project. Staff will report to Council on this matter separately in the future.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Missing middle should be addressed                                                            | Housing types such as townhouse and rowhouse are currently permitted in certain residential area of the Town, subject to policies of the Official Plan. This permission will be carried forward through the proposed Official Plan                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

Amendment by strengthening the policy to require the applicant to submit a Compatibility Analysis Study that demonstrates how the proposed development will be compatible with the surrounding area. Development of other forms of housing such as duplex, triplex, and quadruplex, which are currently permitted in the zoning by-law, will also be permitted in the Residential Areas subject to the Compatibility Analysis Study.

### **Regional Comments**

Background reports and draft policy options were also circulated to York Region for review and comment. Regional staff has advised that the proposed Official Plan Amendment is exempt from Regional approval; therefore, the proposed Official Plan Amendment will come into effect following Council's adoption and the expiration of the 20-day appeal period.

A - Draft Official Plan Amendment

B - Draft Zoning By-law Amendment

## EXECUTIVE SUMMARY

#### **Study Purpose and Process**

The Established Neighbourhood Compatibility
Study aims to develop recommendations for an
Official Plan Amendment and implementing Zoning
By-law Amendment to ensure compatibility of new
development within established residential areas in the
Town of Newmarket. These recommendations will guide
and encourage new infill development which respects
and responds to existing built form and community
character.

The study focuses on residential neighbourhoods across the Town of Newmarket and was undertaken over a 22-month period, from January 2019 to October 2020. It comprises the following three phases:

- Phase 1: Background Review and Analysis;
- Phase 2: Policy Options; and
- Phase 3: Policy Recommendations & Amendments.

The study has incorporated robust and comprehensive community engagement into all three phases of work. These include public information meetings, interactive kiosks at community events, online surveys and social media engagement.

This report summarizes the results from Phase 3, which included an iterative process of conditions testing and analysis, which informed the preparation of final policy recommendations for the draft Official Plan and Zoning By-law Amendments.

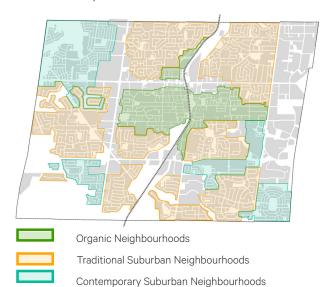

# Neighbourhood Classifications and Emerging Directions

During Phase 2, a Neighbourhood Classification System, categorizing all residential neighbourhoods across Newmarket, was developed. These classifications were informed by visual analysis of existing conditions in residential neighbourhoods to understand indicative conditions and common trends. Images from 65 individual sites, spatially distributed across the Town and representing each era of Newmarket's development, were selected and for the purpose of analyzing a range of building design, site design and streetscape design conditions. The results, which were tabulated, highlighted shared characteristics amongst emerging neighbourhood typologies.

These typologies were further refined through consideration of additional criteria such as land use patterns, property boundaries, applicable designations and by-law regulations, and servicing capacity. As a result, five Preliminary Neighbourhood Classifications were identified. After the removal of outliers, three Preferred Neighbourhood Classifications were confirmed as the primary focus of the study. These included:

- Organic Neighbourhoods (later renamed to Historic Core in draft OPA);
- 2. Traditional Suburban Neighbourhoods; and
- 3. Contemporary Suburban Neighbourhoods.

The study identified the delineated boundaries for each Neighbourhood Classification, as well as the pre-dominant built form and public realm characteristics of each.

#### **Conditions Analysis and Testing**

Following the removal of the Contemporary
Suburban Neighbourhood Character Area from the
Interim Control By-law in December of 2019, the
Organic Neighbourhood and Traditional Suburban
Neighbourhood Character Areas were subject to a
four-step process of additional research and analysis
in Phase 3. This was undertaken to help inform
the recommendations for the draft Official Plan
Amendment and implementing draft Zoning By-law
Amendment. This process included:

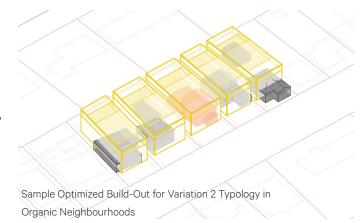

- The identification and delineation of variations to predominant built form and public realm conditions;
- 2. The sampling of prototypical site and adjacency conditions within each variation and generally;
- 3. The preparation of virtual three-dimensional modelling to demonstrate the differences between existing and potential build-out conditions within the sampled prototypical site and adjacency conditions to illustrate the impacts of maximized as-of-right development vs. optimized development to reflect predominant built form and public realm conditions within the variation; and
- 4. The evaluation of optimized development against contemporary architectural and constructions standards, with consideration for existing and anticipated market conditions and demographic patterns, and the need for appropriate buffering to establish an updated Zoning envelope.

The analysis found five unique and definable variations, existing at the street and block-scale in the case of the Organic Neighbouhood Character Area, and at the subdivision scale for the Traditional Suburban Neighbourhood Character Area.

A total sample of 84 sites and adjacent properties were selected for detailed examination. For each of the samples, a set of data regarding site and adjacency conditions was collected. This included the variation type, building height, finished first floor height number of storeys, front yard setback, location of established building face relative to adjacent properties, lot coverage, and roof type. This information was then analyzed to determine how existing conditions compared against the as-of-right zoning envelope.

The analysis found that in both Organic
Neighbourhoods and Traditional Suburban
Neighbourhoods, existing heights and lot coverages
were found to be significantly less than the permitted
standards in current Zoning By-laws. Generally, it
found a positive correlation between the length of
the setback and the lot size, but no relationship
between the height of the house and the length of
the setback. Additionally, it found that dwellings in
the Traditional Suburban Neighbourhoods had more
uniform conditions in comparison to the Organic
Neighbourhood, which was more varied.

Following this, 3D modelling for prototypical sites were developed in order to illustrate three varying conditions: existing conditions; maximized build-out conditions based on Zoning By-law regulations; and optimized build out conditions based on potential ability to address neighbourhood compatibility.

These models indicated that the maximized buildout conditions based on existing as-of-right Zoning
By-law regulations generally allow for built forms
which are not in keeping with adjacent properties,
and the character of surrounding neighbourhoods. It
indicated that greater consideration of lot coverage,
height and setback requirements of adjacent and/or
surrounding properties could be used to help support
more contextually-appropriate infill development.
Additionally, the analysis demonstrated that the way in
which parameters such as building height are defined
could be improved to better regulate built form.

Finally, the optimized building conditions were evaluated against architectural and construction standards, including the applicable Ontario Building Code regulations, in order to help inform potential changes to the Zoning By-law.

At the conclusion of the conditions testing and analysis process, the terminology of the Neighbourhood Classifications was revised for improved clarity and specification. Organic Neighbourhoods, Traditional Suburban Neighbourhoods and Contemporary Suburban Neighbourhoods were revised to Historic Core Character Area, Traditional Suburban Character Area and Contemporary Suburban Character Area.

#### **Policy Recommendations**

The current Official Plan includes an outdated land use designation structure delineating Stable Residential Areas and Emerging Residential Areas, as both are at full build-out. Furthermore, permissions for higher-density forms such as triplexes, fourplexes, townhouses and row-houses are limited to Emerging Residential Areas only. The current Zoning By-law is not reflective of current conditions and includes standards which permit built forms that are incompatible with existing properties in residential neighbourhoods.

Based on the findings of the research and analysis, this report makes a series of recommendations intended to support an Official Plan Amendment and implementing Zoning By-law Amendment.

Recommendations for the Official Plan include:

- Removing references to Stable and Emerging Residential Areas land use designations and consolidate these into a combined Residential Areas designation;
- Introducing new policies that recognize the built form patterns of each neighbourhood while acknowledging the value of diverse housing types throughout all residential neighbourhoods;
- Implementing a neighbourhood-level framework delineating Residential Areas within four Residential Character Areas: Historic Core Character Area, Traditional Suburban Character Area, Contemporary Suburban Character Area, and Estate Character Area; and
- Identifying a defined list of pre-dominant characteristics for each, requiring development in Residential Areas to be compatible with existing built form and public realm conditions.

Recommendations for the Zoning By-law include:

- Introducing a series of new and/or revised definitions in order to more effectively and accurately regulate built form, including but not limited to the definition of basement, grade (established or finished), roof (flat, pitched), height and storey; and
- Presenting changes to front yard setbacks, interior side yard setbacks, maximum lot coverage, and maximum height requirements.

These proposed amendments will support new development which respects the prevailing physical character of existing established neighbourhoods while allowing for gradual, context-sensitive growth and change within the Town of Newmarket.

## 1.0 INTRODUCTION

#### 1.1 Study Purpose

Residential trends in Newmarket are changing, increasingly shifting from suburban growth to urban infill and redevelopment. As the supply of greenfield lands becomes exhausted, Newmarket is seeing increasing development and redevelopment within existing built-up areas to accommodate current and projected growth.

Within Newmarket, infill development is occurring across a number of residential neighbourhoods. The sensitive redevelopment of these areas can add significant value to the community by boosting the housing stock, taking advantage of existing hard and soft infrastructure systems, and enriching local communities. However, recent development has also triggered concerns from residents regarding the compatibility of new homes or additions in established neighbourhoods.

In 2013, municipal staff introduced Zoning By-law 2013-30, which modified the maximum permitted height, maximum permitted coverage, and front yard setback requirements for older established areas of Newmarket in order to combat incompatible development. Concerns of perceived incompatible development persisted and, as a result, the Town of Newmarket enforced an Interim Control By-law (2019-

O4), to allow for a more extensive study. The purpose of this Established Neighbourhoods Compatibility Study is to advance the Town's efforts by developing an Official Plan Amendment and implementing Zoning By-law Amendment for established residential neighbourhoods.

This study identifies residential neighbourhoods based on pre-dominant characteristics and introduces a suite of policy recommendations that enable context-sensitive development in line with the existing built form. It recognizes where the existing policy framework can be improved and adapted to reflect current on-the-ground conditions and broader planning goals. The objective is to introduce policy recommendations that acknowledge, respect and are compatible with the existing physical neighbourhood character, while retaining flexibility for residential infill where appropriate to accommodate future growth.

This study focuses on amendments to the Official Plan and Zoning By-law. However, additional planning tools may be considered by Town Staff and Council following the conclusion and final recommendations of this study to help implement these policy amendments. Such tools could include Urban Design Guidelines, enhanced Site Plan Control measures, and a Streetscape Analysis Process.

### 1.2 Study Area

The study area includes all residential neighbourhoods within the Town of Newmarket (Figure 1). The Town is bounded by Aurora to the south, King to the west, East Gwillimbury to the north, and Whitchurch–Stouffville to the east.

The study area includes all Stable and Emerging Residential Areas from the Town of Newmarket Official Plan, excluding non-residential uses and individual residential properties which have been exempt from Interim Control By-law 2019-04.

Figure 1. Aerial Map - Study Area

#### 1.3 Study Process

The study was undertaken over a 22-month period from January 2019 to October 2020. It was structured in the three following phases (Figure 2):

#### Phase 1: Background Review and Analysis

Phase 1 involved study commencement, review of the policy and regulatory context, analysis of existing neighbourhood conditions, precedent and best practices review, and initial public engagement with residents to identify their priorities, values and concerns with respect to their neighbourhoods.

Findings from this phase of work can be found in the Background Report, which was presented to Town Council / Committee of the Whole in the late summer of 2019.

#### **Phase 2: Policy Options**

Phase 2 involved the development of a draft Neighbourhood Classification System through a set of key evaluation criteria and determination of draft policy options. Public consultation was undertaken to collect feedback on the draft Neighbourhood Classification System, and specifically on how accurately they reflected residents' perceptions and experiences of their neighbourhoods.

Findings from this phase of work were captured in the Draft Policy Options Report, which was presented to Town Council/Committee of the Whole in the fall of 2020

#### Phase 3: Policy Recommendations & Amendments

Phase 3 involved the refinement and finalization of the Neighbourhood Classification System. This included a four-step process of additional research and analysis, which involved detailed conditions testing, modelling and evaluation. Based on the findings of the research and analysis, a set of recommendations was identified to inform the preparation of an Official Plan Amendment and implementing Zoning By-law Amendment.

Draft Final Policy Recommendations were presented at a Statutory Public Meeting on August 31, 2020. Subsequently, a Special Committee of the Whole meeting was held on September 22, 2020.

Figure 2. Study Process

#### 1.4 Document Structure

This report is organized into the following sections:

**Section 1: Introduction** provides an overview of the study purpose, study process and study area to serve as general information and context-setting for the report.

Section 2: Neighbourhood Classifications and **Emerging Directions** outlines the Neighbourhood Classification System as developed through the end of Phase 2 of the study. This includes a summary of public engagement feedback received during consultation activities to date, as well as the rationale behind the methodology and criteria used to shape the classification system. Finally, Section 2 provides an overview of the identified character statements and pre-dominant characteristics for each of the Organic Neighbourhoods, Traditional Suburban Neighbourhoods, and Contemporary Suburban Neighbourhoods classifications, as well as the Emerging Policy Directions that began to form the basis of the Policy Recommendations presented in Section 4 of this report.

Section 3: Conditions Analysis and Testing contains the approach, methodology and research findings of the four-step process used to further inform the Neighbourhood Classification Systems and final policy recommendations. This analysis included identifying and delineating variations in identified Character Areas, sampling prototypical site and adjacency conditions, demonstrating existing and potential built-out conditions, and evaluating optimized development against contemporary design and construction standards. This analysis provided more detailed insight into the minor variations that exist within and between properties in each Neighbourhood Classification, specifically as they relate to building height, lot width and depth, setbacks, and lot coverage.

Section 4: Policy Recommendations covers the existing policy structure and final policy recommendations. This includes proposed changes to the Official Plan, including revisions to land use designations and policy language, and the Zoning Bylaw, including new and updated definitions, regulations and standards. It concludes by presenting a series of demonstration plans which visualize the proposed regulations as applied to real-world examples of neighbourhood infill in other GTA municipalities.

# 2.0 NEIGHBOURHOOD CLASSIFICATION SYSTEM & EMERGING DIRECTIONS

#### 2.1 Overview

Throughout Phases 1 and 2, a detailed existing conditions analysis was undertaken to begin to identify patterns in the existing built form and public realm conditions within residential neighbourhoods across Newmarket. An image-based analysis of building design, site design and streetscape design characteristics, coupled with additional inputs including land use designations, streets and property boundaries, municipal servicing data and applicable by-laws, informed the development of five preliminary neighbourhood classifications. Through further analysis and identification of outliers, this was refined to consist of three preferred Neighbourhood Classifications: Organic Neighbourhoods; Traditional Suburban Neighbourhoods.

Additionally, a detailed planning policy review helped identify gaps in the current framework. This contributed to a set of emerging policy directions centred around retaining neighbourhood character and physical stability while allowing for sensitive infill where appropriate.

#### 2.2 Public Engagement Feedback

A robust process of public consultation and engagement was conducted over the course of the study. These engagement activities included: two Public Information Centre events where study findings were shared with residents through presentations and visual storyboards; a pop-up booth at the Saturday Farmer's Market where residents were engaged in a more informal setting; and online engagement including an interactive project website, online survey and social media handles providing project updates. Engagement activities were designed with the intent to reach a broad spectrum of residents, including participants from a wide range of demographic groups and residential neighbourhoods across Newmarket.

Public feedback generated insights into residents' neighbourhood perceptions, including the elements and characteristics that they value most. The study found that residents' perception of their local "neighbourhood" typically does not exceed a 5-hectare area. Residents highly value the trees, parks and open spaces in their neighbourhoods, often more than the built form. Generally, residents in older areas had more positive perceptions of their neighbourhood. The majority of residents feel a strong sense of community and appreciate their overall quality of life.

Conversely, concerns were raised over the height, massing, scale and density of specific infill developments (including 'monster houses'), and the negative implications such developments have had on the physical character of the neighbourhood. Concerns were also raised regarding management of new development. Participants generally supported introducing new policies and regulations to enable future development that fits harmoniously within the context of existing residential neighbourhoods.

# 2.3 Existing Conditions Analysis and Classification Process

The existing conditions review included an iterative process of identifying, analyzing and documenting the current character of Newmarket's neighbourhoods. Images of 65 sites across Newmarket's residential neighbourhoods were collected and analyzed (Figure 3). A spatially-distributed sampling of streetscapes and adjacent properties from all major eras of the Town's development was used to capture a representative range of building types, street types, and subdivision types. Each site was assessed on the basis of 22 building, site and streetscape design characteristics, which were logged in a comprehensive spreadsheet.

Analysis of the tabulated data revealed that Newmarket's neighbourhoods contain a range of building types, as well as built form and public realm characteristics. It identified clear similarities and differences between neighbourhoods, broadly based on their era of development. The following key elements were identified as informing neighbourhood character in Newmarket:

#### **Built Form**

- Lot dimensions;
- Front, side and rear yard setbacks;
- Siting and orientation;
- Lot coverage;
- Parking and vehicular access;
- Pedestrian access;
- Building entrance location;

- Private landscaping;
- Architectural style and expression;
- Materiality;
- Building height;
- Massing;
- Building depth;
- Ground floor height.

#### Public Realm

- Street and block pattern;
- Street width:
- Sidewalk continuity;
- Sidewalk width;
- Landscaped boulevards;
- Street tree canopy;
- Utility placement.

Figure 5. Four of the key evaluation criteria in the boundary delineation process

Taking into account these built form and public realm characteristics, Phase 2 involved the preparation of a Neighbourhood Classification System to delineate neighbourhood areas recognized as characteristically distinct from one another. This delineation was informed by a set of key evaluation criteria (Figures 4 and 5). These criteria emerged out of Phase 1 findings and were informed by discussions with the public and key stakeholders. These are:

#### Age of Development

Built form is intimately linked to neighbourhood evolution over time, reflecting conditions and preferences during particular periods of development. In earlier years of development, greater availability of land and costly building construction resulted in typical built forms that reflected smaller buildings on larger lots. Over time, economies of scale, advanced building technologies and increased housing demand resulted in a shift towards larger buildings on smaller lots.

#### **Existing Major Streets and Property Boundaries**

The location of existing major streets was considered to respect the existing urban structure. Property boundaries were integrated in an effort to avoid splitting properties in half and assigning one property multiple classifications.

#### **Existing Urban Centres Boundary**

The Urban Centres area is a unique neighbourhood classification within the Town of Newmarket, with significant future growth and intensification expected around the Yonge Street and Davis Drive corridors. The boundary for the Urban Centres was taken from the Urban Centres land use designation, as identified in the Town of Newmarket Official Plan and Urban Centres Secondary Plan.

#### **Well and Septic Data**

The Town of Newmarket provided data on the location of well and septic-serviced properties which do not

have access to municipal servicing infrastructure. This informed the classification system as it pertains to the potential of different residential areas to accommodate future infill. Specifically, this data informed the Estate Neighbourhood boundaries.

#### **Applicable Land Use Designations**

Only residential areas were included in Neighbourhood Classification System; non-residential areas are not addressed in this study. Schedule A of the Town of Official Plan was referenced to ensure that all 'Stable Residential' and 'Emerging Residential' land use areas were included under the classification system.

#### **Applicable Zoning By-Law Regulations**

Relevant zoning by-laws and amendments, including Zoning By-law 2010-40, Zoning By-law 2013-30, Zoning By-law 1979-50 and Zoning By-law 1981-96 informed the development of the classification system by identifying varying built form permissions across Newmarket. Where particular area-specific by-law regulations are in-place, the Neighbourhood Classification System sought to mirror those boundaries in the identification of character areas.

#### Interpretation of the Built Form

The classification process involved visual interpretation of the current built form, with an eye towards identifying similarities and differences between neighbourhoods. This involved interpretation of built form features including height, setbacks, materiality, architectural expression and others as listed earlier in Section 2.3.

#### Interpretation of the Public Realm

The classification process involved visual interpretation of streetscape and the public realm, with an eye towards identifying similarities and differences between neighbourhoods. This involved interpretation of public realm features such as street and block pattern, right of way composition, sidewalks, public boulevards, and others as described in Section 2.3.

Building upon the analysis of existing conditions and taking into account the evaluation criteria, five Preliminary Neighbourhood Classifications were identified (Figure 6), which included:

- 1. Organic Neighbourhoods;
- 2. Traditional Suburban Neighbourhoods;
- 3. Contemporary Suburban Neighbourhoods;
- 4. Urban Centres; and,
- 5. Estate Neighbourhoods.

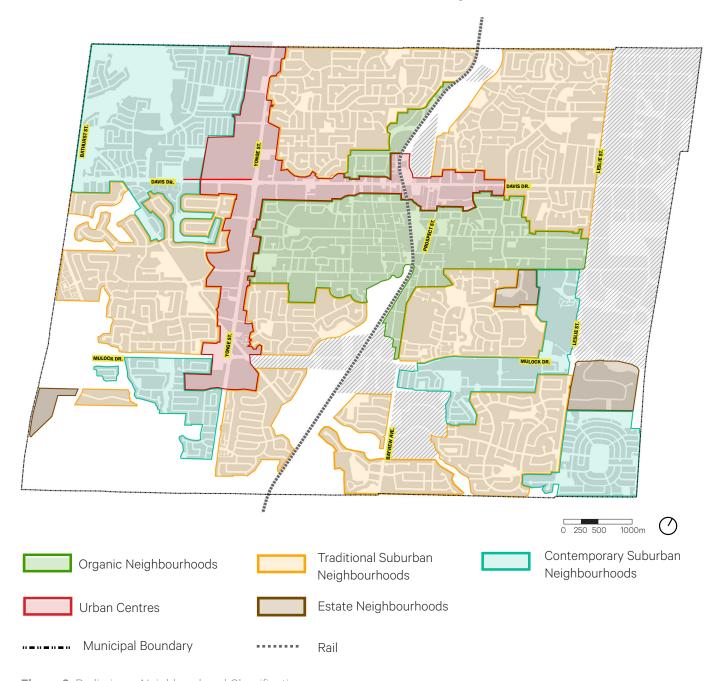

Figure 6. Preliminary Neighbourhood Classifications

The Urban Centres is a mixed-use area permitting a wide range of residential, office, commercial and community uses, focused on the major corridors of Yonge Street and Davis Drive (Figure 7). The area is expected to accommodate a significant amount of future growth. The Urban Centres is already subject to an area-specific Urban Centres Secondary Plan and Urban Centres Zoning By-law. As such, it will not be subject to further study.

The Estate Neighbourhoods are lands generally situated at the periphery of Newmarket, Developed between the 1940's and 1960's, these areas are characterized by curvilinear street patterns, long and often undefined discontinuous blocks, deep setbacks, and large lots, and are distributed among large sections of naturalized or wooded areas (Figure 8). They are not anticipated to accommodate future growth, due to constrained capacity of existing servicing infrastructure. Therefore, they will not be subject to further study.

Figure 7. Aerial of Intersection of Yonge Street and Davis Drive - Urban Centres

Figure 8. Aerial View Southeast towards Kingdale Road - Estate Neighbourhoods

As a result of these exclusions, three Preferred Neighbourhood Classifications were brought forward and identified as areas of focus for this study (Figure 9).

#### These include:

- 1. Organic Neighbourhoods;
- 2. Traditional Suburban Neighbourhoods; and,
- 3. Contemporary Suburban Neighbourhoods.

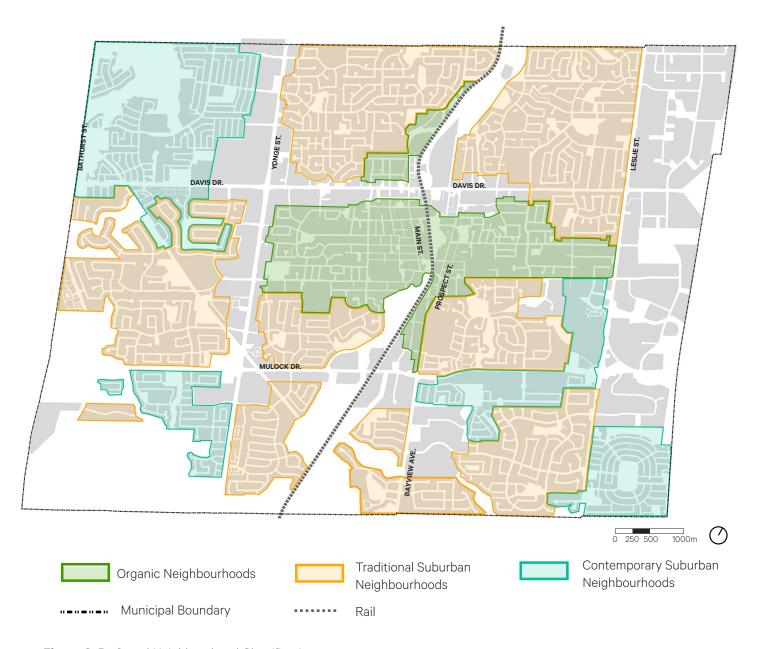

Figure 9. Preferred Neighbourhood Classifications

#### 2.4 Neighbourhood Classifications

#### 2.4.1 Organic Neighbourhoods

Organic Neighbourhoods are situated within and surrounding the historic core of the Town of Newmarket (Figure 10). They were generally developed prior to the 1940's and the advent of subdivision-based planning. They are characterized by smaller blocks with an interconnected grid of narrow streets, continuous sidewalks, varied landscaping, mature tree canopies, varied lot patterns, front and side-yard driveways with a variety of parking configurations, varied setbacks, and 1-2 storey building heights. Figure 11 illustrates the typical form of these neighbourhoods.

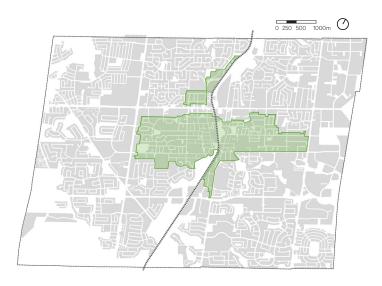

Figure 10. Locational Map for Organic Neighbourhoods

Figure 11. Organic Neighbourhoods Illustrative Typology

#### **Predominant Public Realm Characteristics**

Predominant public realm characteristics of the Organic Neighbourhoods include:

- A traditional fine-grain street pattern, with an interconnected grid of short blocks that is highly walkable;
- Narrow street widths;
- Continuous sidewalks on one or both sides of the street, typically 1-1.5m width,
- Narrow to moderate landscaped boulevards, typically 1-3m in width;
- An extensive canopy of established mature trees;
- An abundance of soft landscaping and accent planting; and,
- Overhead utilities with streetlights added on to utility poles.

#### **Predominant Built Form Characteristics**

Predominant built form characteristics of the Organic Neighbourhoods include:

- 1 to 2-storey building heights;
- Rectangular and irregular lots, with lot sizes and dimensions that vary significantly;
- Varied front yard and side yard setbacks, of a shallow to significant depth;
- Front porches of a shallow depth;
- Pitched roofs:
- Weather protection features including canopies, overhangs and some awnings;
- Solid masonry or wood cladding,
- Varied vehicular access configurations, including front and side yard driveways of narrow to moderate width, and an inconsistent rhythm in driveway placement along the street;
- A diverse range of parking configurations, including parking pads, detached garages, and attached garages; and,
- Significant range of architectural expressions and styles, with a focus on Victorian-era architecture.

Figure 12. Select Characteristics in Organic Neighbourhoods

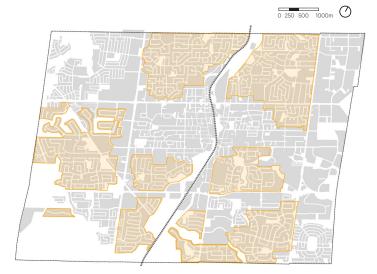

Built form featuring 2-storey building height, front porch, and shallow front yard setback

#### 2.4.2 Traditional Suburban Neighbourhoods

Traditional Suburban Neighbourhoods are generally situated between the historic core of the Town of Newmarket, and the Contemporary Suburban Neighbourhoods, which traverse the periphery of the Town (see Figure 13). They were generally developed between the 1940's and 1990's, following the advent of subdivision-based planning. They are characterized by longer and often disconnected blocks of curvilinear streets, discontinuous sidewalks, varied landscaping, evolving and maturing tree canopies, varied lot patterns, front and side-yard driveways with attached garages, varied setbacks, and 1-2 storey building heights. Figure 14 illustrates the typical form of these neighbourhoods.

**Figure 13.** Locational Map for Traditional Suburban Neighbourhoods

Figure 14. Organic Neighbourhoods Ilustrative Typology

#### **Predominant Public Realm Characteristics**

Predominant public realm characteristics of the Traditional Suburban Neighbourhoods include:

- Curvilinear street patterns, including crescent streets and cul-de-sacs, with few intersections;
- Moderate to significant street widths;
- Discontinuous network of sidewalks on one side of the street, typically 1-1.5m in width, with the exception of cul-de-sacs which commonly have no sidewalks:
- Moderate landscaped boulevards, typically 2-4m in width:
- A moderate to significant canopy of maturing street trees;
- Some soft landscaping and accent planting;
- Consistent placement of streetlights as independent fixtures; and,
- Buried utilities.

#### **Predominant Built Form Characteristics**

Predominant built form characteristics of the Traditional Suburban Neighbourhoods include:

- 1 to 2-storey building heights;
- Rectangular and pie-shaped lots, with consistent dimensions, of a moderate to significant size;
- Consistent front yard setbacks, of a moderate to significant depth;
- Consistent side yard setbacks, of a shallow to moderate depth;
- Front porches of a shallow to moderate depth;
- Weather protection features including canopies, overhangs, recessed entrances and some awnings;
- Consistent vehicular access configurations, characterized by front yard driveways of narrow to significant width;
- Pitched roofs:
- Consistent parking configurations, characterized by integral garages;
- Masonry veneer or vinyl cladding; and,
- Limited range of architectural expressions/styles.

Streetscape with significant street widths and discontinuous sidewalk network

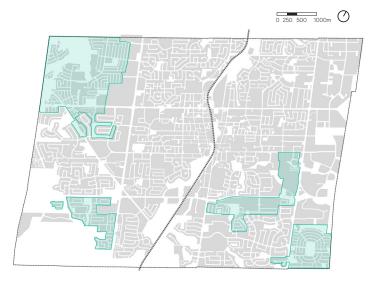

and uniform front yard driveways

Figure 15. Select Characteristics in Traditional Suburban Neighbourhoods

# 2.4.3 Contemporary Suburban Neighbourhoods

Newmarket's Contemporary Suburban
Neighbourhoods are generally situated at the periphery of the Town, beyond the Traditional
Suburban Neighbourhoods, and adjacent to the Estate
Neighbourhoods (see Figure 16). They were generally developed following the 1990's. They are characterized by moderately sized blocks with an interconnected modified grid of moderately sized streets, continuous sidewalks and landscaping, recently planted and emerging tree canopies, consistent lot patterns, front yard driveways with attached garages, consistent setbacks, and 2-storey building heights. Figure 17 illustrates the typical form of these neighbourhoods.

**Figure 16.** Locational Map for Contemporary Suburban Neighbourhoods

Figure 17. Contemporary Suburban Neighbourhoods Ilustrative Typology

#### **Predominant Public Realm Characteristics**

Predominant public realm characteristics of the Contemporary Suburban Neighbourhoods include:

- Modified street grid patterns, with short blocks and frequent intersections;
- Moderate street widths;
- Narrow landscaped boulevards, typically 1-2m in width:
- Modest to limited amount of soft landscaping and accent planting;
- A minimal canopy of newly established street trees;
- Continuous sidewalks on one or both sides of the street, typically 1.3-1.7m in width;
- Street lights as independent fixtures, complemented by pedestrian lighting; and,
- Buried utilities.

#### **Predominant Built Form Characteristics**

Predominant built form characteristics of the Contemporary Suburban Neighbourhoods include:

- 2-storey building heights;
- Rectangular and pie-shaped lots, with consistent dimensions, of a small to moderate size;
- Consistent front yard setbacks, of a shallow to moderate depth;
- Consistent side yard setbacks, of a shallow to moderate depth;
- Consistent vehicular access configurations, characterized by front yard driveways of narrow to moderate width;
- Consistent parking configurations, characterized by integral garages;
- Masonry veneer or vinyl cladding; and,
- A limited range of architectural expressions and styles.

Figure 18. Select Characteristics in Contemporary Suburban Neighbourhoods

#### 2.5 Emerging Policy Directions

#### Overview

Informed by a review of the existing municipal planning policy and insights from the process of categorizing and delineating the various Neighbourhood Classifications, a number of emerging policy directions were identified at the end of Phase 2. These emerging policies, summarized below, were eventually brought forward for more detailed exploration in Phase 3 and formed the basis of final recommendations for both the proposed Official Plan Amendment and Zoning By-law Amendment.

#### **Existing Municipal Planning Policy Framework**

Development throughout Newmarket's established neighbourhoods is guided by a hierarchy of provincial, regional and municipal land use policies. In terms of regulating built form, the municipal Official Plan and Zoning By-law are the most relevant documents guiding and controlling residential character.

The Town of Newmarket's Official Plan designates all residential neighbourhoods under one of two Residential Areas land use categories: Stable Residential Areas and Emerging Residential Areas.

The Stable Residential Areas designation applies to all existing neighbourhoods and is largely a delineation of established residential areas in 2006, when the Official Plan was created. The Emerging Residential Areas designation applies to the delineation of designated greenfield lands in 2006, which were identified as future residential areas that were in the process of being developed or were anticipated to be developed.

In Stable Residential Areas, permitted residential forms are restricted to single-detached and semi-detached dwellings, with the intent of the policy to sustain and enhance the character and identity of existing neighbourhoods. Intensification is limited to accessory dwelling units and infill units through the creation of new lots consistent with the size and form of housing as a whole. Increased variety is encouraged In Emerging Residential Areas. Through the pre-dominant use of land is still identified as single-detached and semi-detached dwellings, rowhouses and townhouses are also permitted.

The Town of Newmarket Comprehensive Zoning Bylaw 2010-40 contains specific use regulations and building performance standards for each lot within the municipality. The majority of Residential Areas are zoned under the Residential Zone Category, composed of five zones (R1, R2, R3, R4, R5) with increasing permissions for higher-density residential types.

The Comprehensive Zoning By-law is subject to variations through Zoning By-law Amendments. One such example is By-Law 2013-30, which reduces maximum permitted height and coverage in areas generally within Newmarket's older organic core.

#### **Key Issues and Challenges**

As the study progressed, there were a number of key issues and challenges that emerged out of the existing conditions analysis, planning policy review, public consultation and discussions with Town staff. The project identified gaps in the current framework, as well as potential opportunities that could inform a more comprehensive, forward-thinking and inclusive treatment of growth and development within Newmarket's residential neighbourhoods.

Some of these key issues included:

- Outdated binary land use designations of Stable Residential Areas and Established Residential Areas, which no longer reflect on-the-ground conditions as almost all of the lands designated as Emerging Residential Areas have been developed;
- A lack of recognition within the current Official Plan for the variation in built form and public realm character between residential neighbourhoods and the treatment of all residential areas as one homogenous whole;
- Inconsistency between zoning permissions
  contained within the Comprehensive Zoning Bylaw and existing built form conditions, particularly
  in older neighbourhoods where homes built in
  the 1940's and 50's pre-date the modern zoning
  by-law, meaning that new infill developments
  being constructed as-of-right are not physically
  compatible with their older counterparts;
- A significant number of disparate and complex in-force Zoning By-laws across the Town of Newmarket, which have been developed, enacted and/or partially repealed over time. These include Zoning By-law 2010-40, Zoning By-law 2013-30, Zoning By-law 1981-61 and Zoning By-law 1979-50; and.
- Recognition that current site-specific by-laws, which aim to regulate for neighbourhood compatibility, are stop-gap measures, and that a comprehensive town-wide approach is needed.

Some key opportunities identified include:

- Maintaining the stability of Residential Areas, while allowing for redevelopment and contextuallysensitive infill which demonstrates compatibility with the established character of a neighbourhood;
- Adding physical and intrinsic value through new development; including but not limited to: an expanded customer base for local shops, more participation in local community and residents groups, increased property values, and greater provision of community facilities and infrastructure;
- Defining neighbourhood character through updates to the Official Plan, to identify specific qualities which contribute to neighbourhood character and open up opportunities to protect and enhance these features;
- Providing additional policy direction on the elements of neighbourhood character that should be protected and enhanced, leaving less ambiguity in the interpretation of what constitutes 'compatible' development;
- Simplifying the existing collection of in-force
   Zoning By-laws to allow Zoning By-law 2010-40 to
   cover all areas of the Town, streamlining planning
   processes for both Town staff and applicants by
   reducing the need to consult and cross-reference
   several by-laws; and,
- Introducing zoning regulations which more accurately reflect the existing built form in neighbourhoods across the Town of Newmarket, such as adopting more context-specific permissions.

#### **Emerging Policy Directions**

A number of policy options emerged as a result of findings from Phases 1 and 2 of the study. This was informed by the analysis of existing conditions, development of the Preferred Neighbourhood Classification System, and public and stakeholder feedback (Figure 19).

The emerging directions from Phases 1 and 2 indicated that any policy changes should retain neighbourhood character and physical stability while allowing for sensitive infill and supporting broader housing goals. Changes should recognize the distinct built form and public realm conditions across residential neighbourhoods. Analysis indicated that introducing a series of Residential Character Areas was be a potential solution to ensuring that defining characteristics are acknowledged and maintained.

At the Official Plan level, preliminary findings indicated that consideration should be given to replacing the Stable Residential Areas and Emerging Residential Areas land use designations with a singular Residential Areas land use designation. In addition, findings indicated that consideration should be given to introducing a new layer of Official Plan policy to provide specific direction for new development within individual Residential Character Areas. This new section would define the boundaries of the Residential Character Areas, provide a neighbourhood character statement and list of predominant considerations for each, and acknowledge that within each Character Area development shall demonstrate compatibility with the existing neighbourhood.

At the Zoning By-law level, preliminary findings indicated that consideration should be given to pursuing one of three potential policy options to regulate building and lot standards within each of the three Residential Character Areas. This included:

- Option 1: three area-specific Zoning By-law
   Amendments, one for each of the Residential
   Character Areas, with rigid zone standards specific to the distinct conditions which present themselves within the three areas.
- Option 2: a town-wide Zoning By-law Amendment for all residential zones, with flexible standards that require properties to respond to adjacent and surrounding properties, within the context of town-wide minimum and maximum standards and a specified tolerance for variation. This option was identified as the preferred approach following Phase 2.
- Option 3: a hybrid solution combining Options 1 and 2, consisting of three area-specific Zoning By-law Amendments with flexible standards that require properties to respond to adjacent and surrounding properties, within the context of Character Areaspecific minimum and maximum standards and a specified tolerance for variation.

These emerging policy directions helped inform the conditions testing that was undertaken in Phase 3 of the study. In combination with results from the conditions testing, they also formed the basis of the final policy recommendations, detailed in Section 4 of this report.

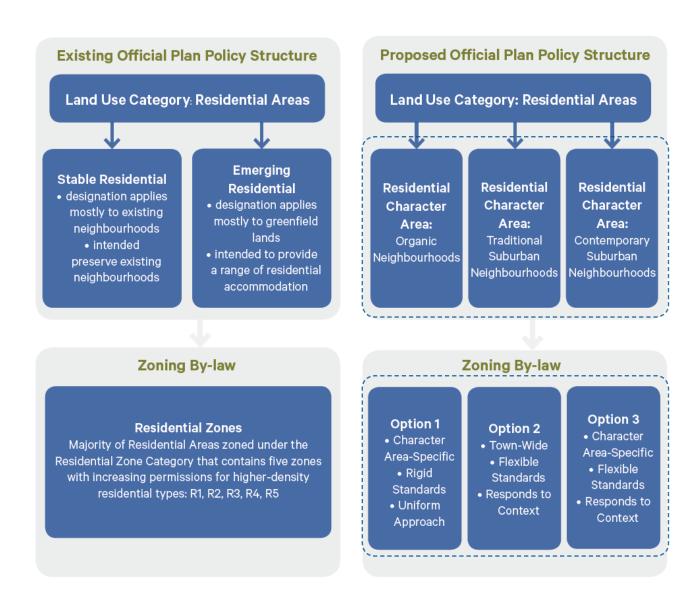

Figure 19. Summary of Existing Policy Framework and Emerging Policy Directions - Phase 2

## 3.0 CONDITIONS ANALYSIS AND TESTING

#### 3.1 Purpose

Following the results of Phases 1 and 2, additional analysis was undertaken to inform the preparation of the draft Official Plan Amendment and implementing draft Zoning By-law Amendment.

The purpose of this additional analysis was to move beyond general Neighbourhood Classifications and towards identifying the variations within them. This included an additional degree of specificity, including numerical standards and/or averages of existing built realm characteristics as compared against the as-of-right zoning envelope.

#### 3.2 Approach and Methodology

The Town of Newmarket's Contemporary Suburban Neighbourhoods are fully built-out, and are not anticipated to undergo significant change over planning horizon associated with this study. Because of this, the Contemporary Suburban Neighbourhoods were removed from the boundaries of the Interim Control By-law in December of 2019, and were not subject to additional study.

With respect to the Organic Neighbourhood and Traditional Suburban Neighbourhood Character Areas, a four-step process of additional research and analysis was undertaken to help inform the preparation of the draft Official Plan Amendment and implementing draft Zoning By-law Amendment. This process included:

- 1. The identification and delineation of variations to predominant built form and public realm conditions;
- The sampling of prototypical site and adjacency conditions within each variation and generally throughout the Character Areas;

- 3. The preparation of virtual three-dimensional modelling to demonstrate the differences between existing and potential build-out conditions within the sampled prototypical site and adjacency conditions to illustrate the impacts of maximized as-of-right development vs. optimized development to reflect predominant built form and public realm conditions within the variation; and.
- 4. The evaluation of optimized development against contemporary architectural and constructions standards, with consideration for existing and anticipated market conditions and demographic patterns, and the need for appropriate buffering to establish an updated Zoning envelope.

# 3.3 Identification and Delineation of Variations in Character Areas

While the Organic Neighbourhood and Traditional Suburban Neighbourhood Character Areas are classified according to predominant built-form and public realm characteristics, minor variations in these conditions exist throughout each neighbourhood classification. For the purpose of defining these variations, the following built-form and public realm elements were examined:

- Lot width and depth;
- Type of dwelling;
- Landscaping conditions;
- Setback conditions:
- Existing vs. permitted building height;
- Existing finished first floor height; and,
- Existing vs. permitted lot coverage.

Through this analysis, the following five variations were identified (Figure 20). These variations and a summary of their consistent and varying conditions are summarized in the table below.

| Variation 1                                                                                                                                                                                        | Variation 2                                                                                                                                                                                   | Variation 3                                                                                                                                                                      | Variation 4                                                                                                                                                                                     | Variation 5                                                                                                                                                                                            |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

#### **Key Findings**

Through this analysis, it was determined that definable variations exist at the street and block-scale in the case of the Organic Neighbouhood Character Area, and at the subdivision scale in the case of the Traditional Suburban Neighbourhood Character Area.

It was also determined that the geographic boundaries associated with variations situated within the

Traditional Suburban Neighbourhoods more closely align with that of existing Zone Categories.

Finally, it was determined that Organic Neighbourhoods generally contain a larger gap between existing vs. as-of-right lot coverage and building height, and possess a greater potential for infill.

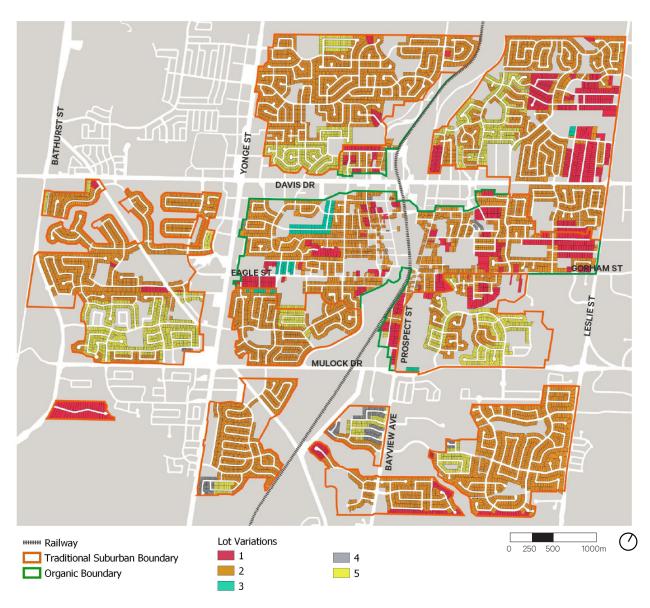

Figure 20. Variations in Organic and Traditional Suburban Neighbourhoods

# 3.4 Sampling of Prototypical Site & Adjacency Conditions

#### 3.4.1 Sampled Sites and Conditions

Throughout the Organic Neighbourhood and Traditional Suburban Neighbourhood Character Areas, a total sample of 84 sites and adjacent properties were selected for detailed examination, including 39 samples within the Organic Neighbourhoods (Figure 21) and 45 samples within the Traditional Suburban Neighbourhoods (Figure 22). In order to ensure that the analysis was reflective of overall conditions, consideration was given to selecting sites which represent:

- A relatively fair geographical distribution across each of the neighbourhoods which comprise the Organic Neighbourhood and Traditional Suburban Neighbourhood Character Areas; and,
- A representative allocation of sites within each identified variation.

For each of the samples, the following data was collected:

- Municipal address;
- Variation type;
- Building height from established grade to the ultimate height of the roof;
- Building height from established grade to median height of pitched roof / ultimate height of flat roof;
- Finished first floor height above established grade;
- Number of storeys;
- Setback from the front lot line:
- Relative location of established front building face relative to adjacent properties;
- Lot coverage; and
- Roof type.

The data was compiled into a spreadsheet, and the information was analyzed to determine how existing conditions compared against the as-of-right Zoning envelope. In order to synthesize existing conditions, the mean (average), median and mode of all data were calculated relative to the overall sample, by building height, and by variation number.

#### 3.4.2 Key Findings

#### **Organic Neighbourhoods**

Height Analysis

When examining the heights of the sample, it is clear that they are significantly under the permitted height of 10.7m and 10.0m in current zoning by-laws (valid for zones R1, regulatory sets A-D and exception 119). The average height for two-storey dwellings in the sample was 7.2m as measured from grade to the highest point of the roof. This is higher than the median at 7.0m, but lower than the most common height of 8.0m (mode). However, when the average height was measured according to the definition of height in current zoning by-laws (the distance between the average finished grade to mean roof distance), it was lower at 5.9m, though the most common height was 6.5m (mode) and the median height was 6.0m. With an average current height that is at 55-59% of the permitted height, this data suggests that current zoning permissions promote a taller form than current conditions.

The average height for 1-storey dwellings in the sample was 5.0m when measured from grade to the highest point of the roof, and 4.0m when measured using the definition of height in current zoning by-laws. The median and mode heights were the same with the exception that the median height was lower at 4.0m. While height for 1-storey dwellings was only dictated in Exception 119, which states the maximum height as 7.5m, this was significantly taller than many of the 1-storey dwellings found in Organic Neighbourhoods. The average current height of 5.0m is 67% of the 7.5m height permitted in the exception, which also suggests that current zoning permissions promote a form that is taller than current conditions.

#### Lot Coverage Analysis

Lot coverage permissions in the existing zoning by-law were also significantly above the current lot coverage average of the sample. Overall, the average lot coverage of the entire sample was 19% with both the median and mode slightly lower at 18%. While this was over the lot coverage permitted for R1-A (at 15%) and almost at the lot coverage allowed for R1-B zones (20%), it was significantly under the 35% allowed for R1-C and R1-D zones. As most dwellings in the Organic Neighbourhoods fall under R1-C and R1-D zones, it can be assumed that most existing dwellings are significantly underneath lot coverage permissions, whether it is the 35% allowed for R1-C and R1-D zones.

When observing the lot coverage allowed under Exception 119 against the sampled dwellings, 2-storey dwellings were the only group that are close to the permitted 25% lot coverage, where the most common lot coverage was at 23% and the average lot coverage was 21%. While 35% is permitted for 1-storey buildings under this exception, 1-storey dwellings generally had smaller lot coverages rather than larger, with an average of 19% and a mode of 8%.

| 2-storey Dwelling Lot Coverage (%) - Organic |      |        |                     |      |                 |  |

#### Setback Analysis

The average front lot line setback for the sampled dwellings was 7.2m though the most common setback was 4.6m (mode). While there did not appear to be a relationship between the height of the house and the length of the setback, the length of the setback had a positive correlation with the lot size. Generally, Variation 1 and Variation 3 lots were larger than Variation 2 lots, with a width of 20-24m and 25-30m respectively. These two Variations contained larger average front lot line setbacks in comparison with Variation 2.

The front lot line setbacks were relatively consistent between neighbours in the sample, with 24 of the 39 (62%) dwellings having a setback that was between a 1.0m range of their neighbours' front lot line setbacks.

#### Other Considerations

- The greater the pitch of the roof, the taller the dwelling could be since the height is measured from finished average grade to the mean roof distance.
- Larger lots actually have smaller lot coverages, suggesting that dwelling sizes remained somewhat consistent regardless of lot size (i.e. Variation 1 sites are generally larger than Variation 2 sites, but the sample averages show that they have lower lot coverages)

 Some dwellings varied greatly compared to their neighbours, for example, 109 Arden Ave, 111 Arden Ave, and 115 Arden Ave are adjacent dwellings ranging from 1-3 storeys, and contain different setbacks. However, most adjacent dwellings had similar conditions.

#### **Traditional Suburban Neighbourhoods**

#### Height Analysis

When examining the heights of the sample, it is clear that they are also significantly under the permitted height of 10.7m and 10.0m in current zoning by-laws (valid for zones R1, regulatory sets A-D and exception 119). The average height for two-storey dwellings in the sample was 7.8m when measured from grade to the highest point of the roof. The median height was slightly higher at 8.0m, and the most common height was 7.0m (mode). However, when the average height was measured according to the definition of height in current zoning by-laws (the distance between the average finished grade to mean roof distance), it was lower at 6.6m. Likewise, the median and mode height was lower at 6.00m. With an average current height that is at 62-67% of the permitted height, this data suggests that current zoning permissions promote a taller form than current conditions.

The average height for 1-storey dwellings in the sample was 4.9m when measured from grade to the highest point of the roof, and 3.9m when measured using the definition of height in current zoning by-laws. The median and mode measurements were generally only slightly higher than the average.

While height for 1-storey dwellings was only dictated in Exception 119, which states the maximum height as 7.5m, this was still significantly taller than many of the 1-storey dwellings found in Traditional Suburban Neighbourhoods. The average current height of 3.9m and the most common height of 3.5m were between 47-52% of the 7.5m height permitted in the exception, which suggests that current zoning permissions

promote a form that is taller than current conditions.

Though existing zoning by-laws do not permit for 2.5-storey buildings, the sample included several 2.5-storey dwellings. These were naturally all taller than the 2-storey dwellings, with an average height of 9.6m, and median and mode height of 10.0m. These heights were lower by approximately 2.0m when measured using the definition of height in the by-law. The permitted maximum height is 10.0-10.7m for the R1 zones and are envisioned for only 2-storey dwellings. Furthermore, the 10.0-10.7m height does not include the ultimate height of the roof, meaning that heights of over 11m are currently permitted. The permitted height under current zoning by-laws promote a form that is beyond the typical 2-storey and 2.5-storey dwelling.

#### Lot Coverage Analysis

Similar to Organic Neighbourhoods, lot coverage permissions in the existing zoning by-law are also above the current lot coverage average of the sample. Overall, the average and median lot coverage of the entire sample was 25%, while the most common lot coverage was 27%. While this is over the lot coverage

permitted for R1-A (at 15%) and R1-B zones (20%) and was around the percentage allowed for 2-storey dwellings under Exception 119, it was significantly under the 35% allowed for R1-C, R1-D, and R1-K zones. As most dwellings in the Traditional Suburban Neighbourhoods sample fall under R1-C, R1-D, and R1-K zones (since Variations 4 and 5 were excluded), it can be assumed that most existing dwellings are significantly underneath lot coverage permissions.

The dwellings also generally had higher lot coverages as the height increased. 2.5-storey dwellings had an average and median lot coverage of 29%, while 2-storey dwellings generally had lower coverages, with an average of 24%, a median of 25% and a mode of 28%. 1-storey dwellings were contained the lowest lot coverages, with an average of 19% and median of 14%.

#### Setback Analysis

The average front lot line setback for the sampled dwellings was 7.58m though the most common setback was 6.10m (mode). Similar to dwellings in Organic Neighbourhoods, there does not appear to be a relationship between the height of the house and the length of the setback. Also similar to the Organic Neighbourhood sample, the length of the setback had a positive correlation with the lot size. Variation 2 of the Traditional Suburban Neighbourhoods had the smallest lots with the narrowest widths; they contained the shortest front lot line setbacks at an average of 5.7m and median and mode of 6.3m. In contrast, Variation

1 had the largest lots and contained the largest front lot line setbacks, at an average of 9.58m and median and mode of 10.30m. Variation 3, which was the predominant variation, contained setbacks that were in between the ranges of the other two Variations, at an average of 7.35m and median and mode of 7.15m.

When comparing the front lot line setbacks to neighbouring houses in Traditional Suburban Neighbourhoods, they were more consistent than those in the Organic Neighbourhoods. In fact, 39 of the 45 (87%) dwellings were relatively consistent (within a 1m range of neighbouring dwellings' setbacks).

#### Other Considerations

- Similar to Organic Neighbourhoods, larger lots actually have smaller lot coverages, suggesting that dwelling sizes remained somewhat consistent regardless of lot size (i.e. Variation 1 sites are generally the largest sites).
- The setbacks in the Traditional Suburban
   Neighbourhoods were much more consistent with
   their neighbours Comparison between Organic and
   Traditional Suburban Neighbourhoods.

When comparing the data between Organic and Traditional Suburban Neighbourhoods, the height and lot coverage found in the Traditional Suburban Neighbourhoods are generally greater than those in Organic Neighbourhoods. This can be seen in the fact that the Traditional Suburban Neighbourhoods contain

| 2.5-storey Dwelling Lot Coverage (%) - Traditional Sub. |      |        |                     |      |                 |  |  |

| 1-storey Dwelling Lot Coverage (%) - Traditional Sub. |      |        |                     |      |           |  |
|-------------------------------------------------------|------|--------|---------------------|------|-----------|--|
| Mean                                                  | Mode | Median | Permitted by Zoning |      |           |  |
| (Average)                                             |      |        | R1-A                | R1-B | R1-C/R1-D |  |
| 19                                                    | -    | 14     | 15                  | 20   | 35        |  |

a significantly larger number of dwellings at 2-storeys or taller (71% of sample) compared to Organic Neighbourhoods, where 33% of the sample are 2-storeys. Additionally, the average height (from grade to top of roof) of 2 and 2.5-storey dwellings in the Traditional Suburban Neighbourhoods sample (7.80m and 9.57m) are taller than 2-storey dwellings found in the Organic Neighbourhoods sample (7.23m). While a number of dwellings in the Traditional Suburban Neighbourhood sample were at the permitted lot coverage (25% in Exception 119), almost none of the sampled dwellings in Organic Neighbourhoods were at permitted levels of lot coverage.

The dwellings in the Traditional Suburban Neighbourhoods sample also had more uniform conditions in comparison to the Organic Neighbourhood sample. The setbacks were definitely much more consistent, where 87% of dwellings in the Traditional Suburban Neighbourhoods were in-line with their neighbours, in comparison to only 62% of dwellings in the Organic Neighbourhoods. Additionally, many of average, median, and mode measurements were the same.

Lastly, commonalities shared included the finding that larger lots did not always correlate to larger dwellings. However, front lot line setbacks had a positive correlation to the width of the lot, where larger lots (typically with wider lots) usually contained larger setbacks.

# 3.5 Demonstrating Existing & Potential Built-Out Conditions

Once the analysis and synthesis of data was complete, one prototypical site and adjacent conditions were selected from each of the five variations for further testing. Each sample was virtually modelled in three-dimensions to illustrate:

- Existing conditions;
- Maximized build-out conditions, based on existing as-of-right Zoning By-law regulations; and,
- Optimized build-out conditions, based on potential amendments to Zoning By-law regulations to address neighbourhood compatibility.

Three example iterations (Variation 1, Variation 2, Variation 3) of this conditions testing are illustrated and described in this section of the report.

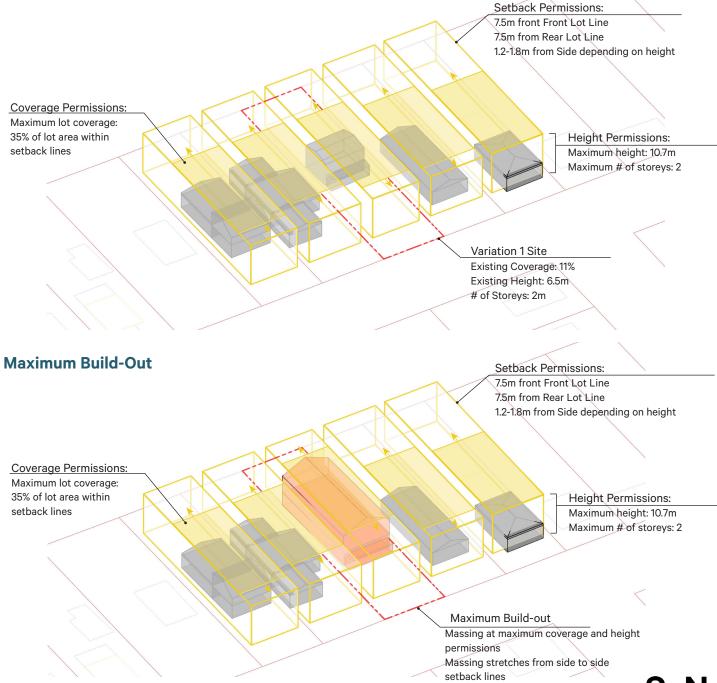

#### **Variation 1 - Conditions Testing**

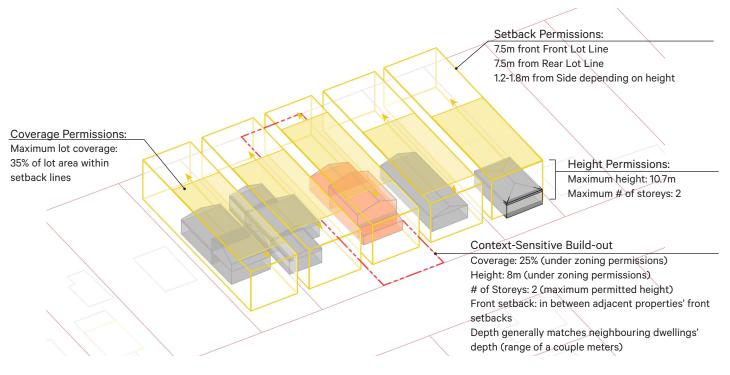

The following is a testing of a Variation 1 site within the Organic Neighbourhoods. The testing included two adjacent properties to either side of the chosen site.

All five properties were zoned R1-D (Residential Detached Dwelling 15m Zone).

#### **Existing Condition**

#### **Optimized Build-Out**

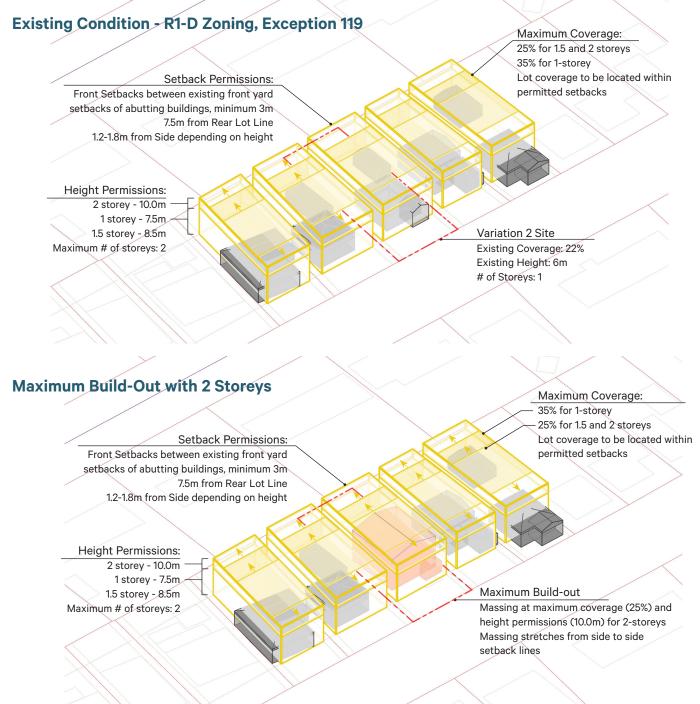

#### **Key Observations**

- Typical Variation 1 conditions are under lot coverage and height permissions in existing zoning by-laws;
- The maximum built-out form is significantly larger in height and coverage in comparison to the prevailing built-form conditions;
- The more context-sensitive approach considered the adjacent properties' lot coverages, front setbacks, height, and general building width and depth; and,
- While the context-sensitive build-out is underneath the permitted height, lot coverage, and setback minimums, it exceeds these permissions in comparison to neighbouring dwellings without compromising the overall character.

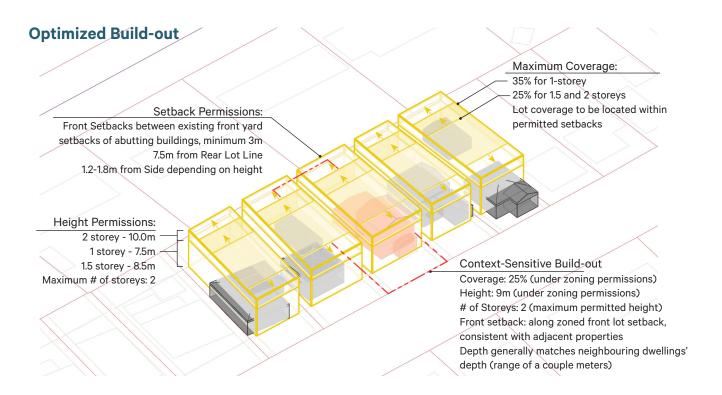

#### **Variation 2 - Conditions Testing**

The following is a testing of a Variation 2 site within the Organic Neighbourhoods. The testing included two adjacent properties to either side of the chosen site. All five properties were zoned R1-D (Residential Detached Dwelling 15m Zone). Additionally, they are all subject to exception 119, where coverage and height allowances are dictated by the number of storeys proposed and front setbacks are influenced by adjacent properties.

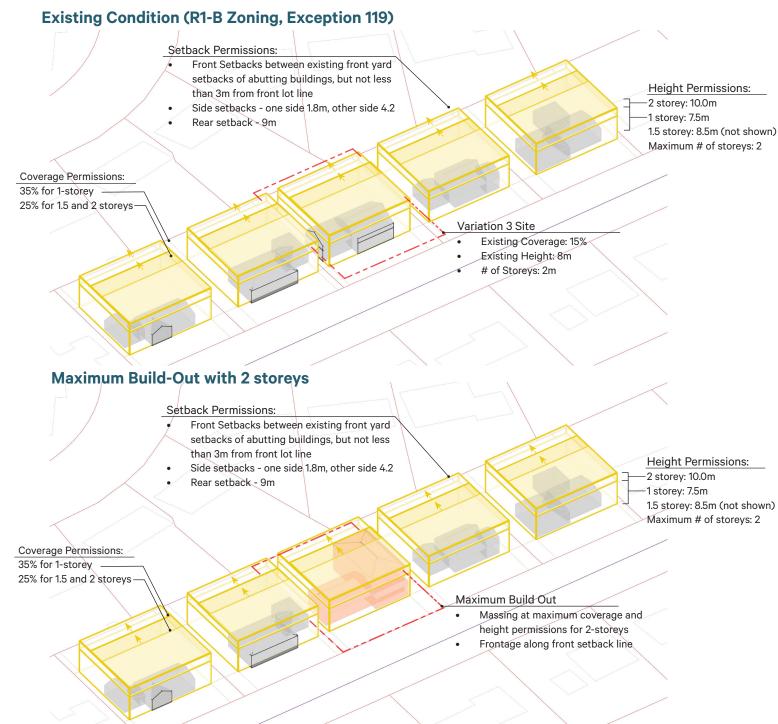

#### **Key Observations**

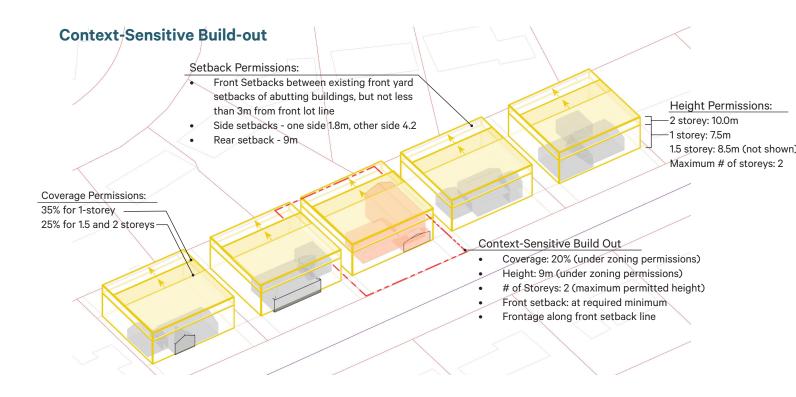

- Typical Variation 2 conditions are generally under lot coverage permissions, though they contain higher lot coverages than Variation 1. Height permissions were not exceeded;
- The maximum built-form for 2-storeys, which permits 25% lot coverage and 10.7m in height, appears to be more compatible to the prevailing conditions than the maximum built-form allowed for 1-storey, which allows a 35% lot coverage and 7.5m height;
- The existing zoning already requires the front lot setback of any proposed development to consider adjacent front setbacks; and,
- The oprimized massing takes into account lot coverage and height of adjacent properties in addition to the front lot setbacks.

#### **Variation 3 - Conditions Testing**

The following is a testing of a Variation 3 site within the Organic Neighbourhoods. The testing included two adjacent properties to either side of the chosen site. All five properties were zoned R1-B (Residential Detached Dwelling 30m Zone). Additionally, they are all subject to exception 119, where coverage and height allowances are dictated by the number of storeys proposed and front setbacks are influenced by adjacent properties.

#### **Key Observations**

- Typical Variation 3 conditions are under lot coverage and height permissions of existing zoning by-laws;
- The maximum built-out form is significantly larger in height and coverage in comparison to the prevailing built-form conditions;
- A more context-sensitive approach includes consideration of nearby properties' lot coverages, front setbacks, height, and general building width and depth; and,
- While the context-sensitive build-out is underneath the permitted height, lot coverage, and setback minimums, it exceeds these permissions in comparison to neighbouring dwellings without compromising the overall character.

#### **Key Findings**

The findings of this analysis indicate:

- Generally, it appears that existing dwellings are below the maximum lot coverage and height permissions contained in the R1-B, R1-C and R1-D Zones;
- The maximum built form of multiple variations demonstrates that the permitted lot coverage and density allow for a form that is generally not in keeping with adjacent properties, and the character of surrounding neighbourhoods;
- While some Zoning exceptions consider adjacent properties (e.g. exception 119 references front lot setbacks relative to adjacent properties), there is potential to also consider lot coverage and heights within the context of adjacent and/or surrounding properties, and/or the broader neighbourhood;
- Because of the way building height is defined in the Zoning By-law, buildings with pitched roofs may project beyond maximum permitted heights (commonly 10.7m); and,
- The optimization of building envelopes generally incorporated lot coverages between 20% - 25%, maximum building heights between 8.0m - 9.0m, and maximum finished floor heights of 1.0m - 1.2m.

# 3.6 Evaluating Optimized Development Against Contemporary Design & Construction Standards

Finally, the optimized build-out conditions for each prototypical site were evaluated against contemporary architectural and construction standards, with consideration for existing and anticipated market conditions and demographic patterns, and the need for appropriate buffering in order to establish a desirable and appropriate envelope to inform the draft Zoning By-law Amendment. This analysis incorporated a review of applicable Ontario Building Code regulations.

# 4.0 POLICY RECOMMENDATIONS

### 4.1 Existing Policy Structure

In consideration of the cumulative findings of the study through Phases 1 to 3, this report puts forth a number of policy recommendations for the Town of Newmarket's Official Plan and Zoning By-law.

As previously described in Section 2.2, the existing policy structure includes a number of gaps relating to the definition and regulation of neighbourhood character. The Official Plan currently contains two designations for Residential Areas, Stable Residential and Emerging Residential; however all Emerging Residential lands have since been developed and fully built-out. Furthermore, the Official Plan does not currently define neighbourhood character and compatibility, including any recognition of the differing character of residential areas across the Town. It does not sufficiently address modern housing needs and the diverse range of housing types which are necessary to accommodate them. Similarly, the Zoning By-law does not address neighbourhood character or compatibility. Zoning parameters are not reflective of the unique existing built form context of different residential areas.

# 4.2 Recommended Changes to the Official Plan

#### **Changes in Terminology**

Following the conditions testing and analysis and for the purpose of the policy recommendations, the names of the Neighbourhood Classifications were revised for improved clarity and specification. These revisions are as summarized in the table below:

| Previous Name          | Revised Name                 |
|------------------------|------------------------------|
| Organic Neighbourhoods | Historic Core Character Area |
| Traditional Suburban   | Traditional Suburban         |
| Neighbourhoods         | Character Area               |
| Contemporary Suburban  | Contemporary Suburban        |
| Neighbourhoods         | Character Area               |

#### Intent of Recommended Changes

This report recommends that the Official Plan be amended to accomplish the following key objectives:

- Reflect changes in residential development that have occurred since the Official Plan was adopted;
- Remove references to Stable and Emerging
  Residential Areas and instead include policies
  that recognize the built form patterns of each
  neighbourhood while acknowledging the value of
  diverse housing types throughout all residential
  neighbourhoods;
- Implement a neighbourhood-level framework delineating Residential Areas within four Residential Character Areas: Historic Core Character Area, Traditional Suburban Character Area, Contemporary Suburban Character Area, and Estate Character Area; and.
- Propose a defined list of pre-dominant characteristics for each, requiring development in Residential Areas to be compatible with existing built form and public realm standards.

#### Changes to Land Use Designations

It is recommended that the existing Stable Residential Areas and Emerging Residential Areas designations be deleted and replaced by a combined Residential Areas designation (Figure 23). This designation would cover all residential neighbourhoods across the Town of Newmarket.

A consolidated designation for all residential areas would more accurately reflect on-the-ground conditions. Almost all of the lands previously designated as Emerging Residential Areas have been built-out, and it is no longer appropriate to refer to them as greenfield lands and direct new residential development solely to these areas. The new combined

designation allows for a uniform approach and shared criteria regarding future development within all residential neighbourhoods across Newmarket.

#### Changes to Policies for Residential Areas

It is recommended that new policies be introduced in the Official Plan to articulate updated objectives, permitted uses, and development criteria for Residential Areas.

#### Objectives:

- Maintain the stability of Residential Areas by establishing zoning standards that acknowledge and respect the prevailing physical character of the surrounding neighbourhood;
- Provide for a range of residential accommodation by housing type, tenure, size, location and price range;

#### **Existing Official Plan Structure**

#### **Zoning By-law**

#### **Residential Zones**

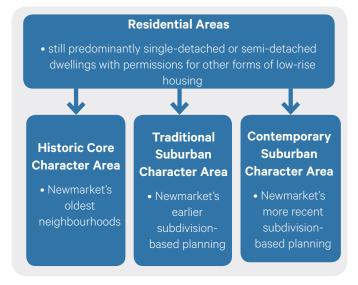

Majority of Residential Areas are zoned under the Residential Zone Category, composed of five zones with increasing permissions for higher-density residential types: R1, R2, R3, R4, R5

- Allow contextually-sensitive infill development and limited intensification to permit development which contributes towards the establishment of a desirable urban structure, diversified housing stock, and optimized use of existing municipal services and infrastructure; and.
- Encourage a range of innovative and affordable housing types, zoning standards and subdivision designs.

#### Permitted Uses:

 Retain single-detached and semi-detached dwellings as the predominant use of lands, while also permitting rowhouses, townhouses, duplexes, triplexes and quadruplexes in Residential Areas so long as they demonstrate compatibility with the existing character of the neighbourhood through a Compatibility Analysis Study;

#### **Recommended Official Plan Structure**

#### **Zoning By-law**

#### Residential Zones

Retains existing Residential Zone Categories (R1, R2, R3, R4, R5), with introduction of new definitions and select revised permissions based on existing condition of adjacent properties

Figure 23. Summary of Existing Policy Structure and Proposed Changes

#### Development Criteria:

- Ensure that development is compatible with the various elements which contribute to the physical character of the wider neighbourhood, including:
  - lot dimensions:
  - front, side and rear yard setbacks;
  - siting and orientation;
  - lot coverage;
  - building entrance location;
  - private landscaping;
  - building height, massing and depth; and,
  - ground floor height.
  - Acknowledge and respect the prevailing physical character of surrounding neighbourhood properties, particularly those properties with frontage along the same street segment;
  - Require that consideration of development proposals in Residential Areas involves an assessment of the proposed development and it's ability to enhance and build upon desirable established patterns of built form and open spaces, and consider its contribution to the maintenance and achievement of a balance of housing types and tenures.

These proposed policies aim to balance the need for an expanded range of innovative and affordable housing types, including more multi-unit dwelling forms, to meet growing housing needs in residential areas while also ensuring that new development respects the prevailing physical character of the surrounding neighbourhood. The following policy changes are intended advance both objectives by taking a contextually-sensitive approach while recognizing that gradual and ongoing change within established residential neighbourhoods is not only inevitable, but also beneficial. The policies will ensure that future development respects existing

neighbourhood character while explicitly encouraging flexibility and innovation in responding to unique site and contextual conditions.

#### Introduction of Residential Character Areas

It is recommended that a new layer of policy be introduced to implement a neighbourhood-level framework that recognizes the varied built form and public realm conditions within different Residential Character Areas across Newmarket.

These policies would establish the following four Residential Character Areas; their delineations are informed by the analysis completed in Phases 1 and 2 of this study.

- 1. Historic Core Character Area: developed prior to the 1940's, and the advent of subdivision-based planning, lands within the Historic Core Character Area are located within and surrounding the historic core of the Town of Newmarket, and is generally bounded by properties fronting Davis Drive to the north, Leslie Street to the east, Gorham Street and Eagle Street to the south, and properties fronting onto Yonge Street to the west.
- 2. Traditional Suburban Character Area: developed between the 1940's and 1990's, following the advent of subdivision-based planning, lands within the Traditional Suburban Character Area are generally found between the historic core of the Town of Newmarket, and the Contemporary Suburban Character Area, which traverse the periphery of the Town.
- 3. Contemporary Suburban Character Area: developed following the 1990's, lands within the Contemporary Suburban Character Area are generally situated at the periphery of the Town, beyond the Traditional Suburban Character Area, and adjacent to the Estate Character Area.

4. Estate Character Area: developed between the 1940's and 1990's, these lands are scattered throughout Newmarket, but are generally situated at the periphery of the Town, beyond the Traditional Suburban Character Area, and adjacent to the Contemporary Suburban Character Area.

It is recommended that the Official Plan identify a detailed list describing the unique physical characteristics found in each of these Character Areas. These changes will support an formal acknowledgement within the municipal planning framework of the distinct elements which define neighbourhood character across different residential areas in Newmarket

#### **Changes to Policy Language Regarding**

#### **Development and Compatibility**

Changes to Official Plan policy language should be implemented to broaden direction on the ways through which development will be permitted, including allowances for:

- A range of building and unit types including accessory dwelling units, single-detached dwellings and semi-detached dwellings on an as-of-right basis and townhouses and rowhouses on a sitespecific basis;
- Infill development through the construction of new residential dwellings and buildings on vacant land, additions and structural alterations to existing dwellings, and the demolition and redevelopment of existing dwellings; and,
- The consent of lands resulting in the introduction of additional residential dwellings, where appropriate.

Furthermore, the Official Plan should introduce greater specificity and clarity to the term 'compatibility', including a list of requirements that development applications will be evaluated against. It is recommended that development be required to demonstrate how its design fits with the existing character of the surrounding area in the context of:

- setbacks, heights and transition;
- façade and roofline articulation;
- colours and materials;
- architectural elements, including windows, doors and projections;
- pre- and post-construction grades on site; and,
- incorporating elements and details of common characteristics of the area.

Furthermore, all applications for development should take into account the impact of proposed development and/or additions to surrounding land use patterns and streetscape conditions. This should consider factors such as land use adjacencies and transitions, orientation towards public and private streets, accentuations of building entrances, continuity of street frontages, and relationship to the public realm.

By establishing these new urban design and compatibility practices for new developments, the Official Plan will support the explicit identification of specific physical elements which will be considered in the municipality's evaluation of development applications, providing more certainty and clarity for developers and homeowners alike.

#### **New and Revised Schedules**

In parallel with the above mentioned changes to policy text, it is recommended that two updates to the Official Plan schedules be implemented. This includes:

- An updated land use schedule (Schedule A)
   which removes 'Stable Residential' and 'Emerging
   Residential' and replaces them with a single
   'Residential' land use designation; and
- A new schedule showing the boundaries of the new Residential Character Areas as identified above.

# 4.3 Recommended Changes to the Zoning By-law

The Town of Newmarket's Zoning By-law should be amended to change the way that houses are regulated, so as to allow for optimize the development of properties, without jeopardizing the character of the

surrounding neighbourhood. These exterior built form and/or massing changes can be achieved while still allowing for greater flexibility in the interior layout.

Recommended changes to the Zoning By-law fall under two categories: Creating and Updating Definitions and Creating and Updating Regulations and Standards. The proposed new and/or updated definitions, regulations and standards are summarized below (Figure 24).

#### **Creating and Updating Definitions**

- Basement
- Grade, Established or Finished
- Roof, Flat
- Roof, Pitched
- Height, Building
- Height, Finished First Floor
- Storey
- Garage, Residential
- Dormers

#### **Updating and Creating Regulations & Standards**

- Max. Finished First Floor Height
- Interior Side Lot Lines C & D Zone Standards
- Required Front Yard Setback C, D, E, F, G, H, J, K, L and M Standards
- Repeal Exception 119 enacted by By-law 2013-30
- Max. Lot Coverage
- Max. Building Height
- Interior Side Yard Setbacks
- Reserve
- Non-Complying Building or Structure
- Transition

Figure 24. Summary of Recommended Changes to Zoning By-law

### **Creating and Updating Definitions**

| Key Change and/or Proposed Definition                                                                                                                                                                                                                                                                                          | Rationale                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Amend the definition of Basement  Basement:  Means a portion of a building that is underground, which has more than one third of its height above finished grade but where the height above finished grade does not exceed:  1. 1.2 metres for lots Zoned R1, R2 and R3; or,  2. 1.8 metres for lots containing all other Zone | The zoning by-law currently limits the maximum height of a basement to be 1.8m above grade, and exempts basements that meet this rule from being considered a storey. This allows a basement to have a height above grade greater than the height of an average adult.  By lowering the maximum height of basements above grade, we can still have ample window size while ensuring that basements are not visually a storey.  This change is part of a broader comprehensive |
| designations.                                                                                                                                                                                                                                                                                                                  | change in the way that the height of houses is regulated that will slightly lower the overall maximum permitted building height while allowing for greater flexibility of interior layout.                                                                                                                                                                                                                                                                                    |
| Amend the definition of Grade, Established or Finished  Grade, Established or Finished:  Means:                                                                                                                                                                                                                                | The current way of measuring grade takes the average of all areas around a house. This can be challenging to accurately measure, and leaves grade open to manipulation by adding or removing soil.                                                                                                                                                                                                                                                                            |
| 1. For single detached dwellings, semi-detached dwellings, duplex dwellings, triplex dwellings, and fourplex dwellings, the average elevation of the ground, measured at the two points where the minimum front yard setback meets adjacent side lot lines; and                                                                | By changing the way grade is measured for most residential dwellings and instead measuring at the front setback along the side property lines, we can reduce the ability to manipulate grade.  This change will also make for an easier way to measure grade, and will focus the regulation of grade                                                                                                                                                                          |
| 2. For all other structures, the average of the levels of the finished ground surface at every location of change of grade along the exterior walls of a building or structure.                                                                                                                                                | and height on the way that a building appears from the street.                                                                                                                                                                                                                                                                                                                                                                                                                |

|     | Key Change and/or Proposed Definition                                                                                                                                     | Rationale                                                                                                                                                                                                    |
|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|     | ld definitions of types of roof<br>of, Flat:                                                                                                                              | The zoning by-law has long included rules that measured height differently depending on whether the roof was flat or pitched.                                                                                |
| for | eans a roof with a slope of less than 1.0 vertical units every 4.0 horizontal units, occupying an area greater an or equal to 50% of the total horizontal roof area.      | However, the by-law did not include definitions of how to determine what a flat, pitched, or mansard roof was. This allowed for greater height for new houses                                                |
| Ro  | of, Pitched:                                                                                                                                                              | that were built with roofs that appeared like flat roofs                                                                                                                                                     |
| un  | eans a roof with a slope of greater than 1.0 vertical its for every 4.0 horizontal units, occupying an area eater than or equal to 50% of the total horizontal roof ea.   | but included cosmetic sloping elements.                                                                                                                                                                      |
| Ar  | nend the definition of Height                                                                                                                                             | See above rationale regarding roof defnitions.                                                                                                                                                               |
|     | eight: Retitle definition –<br>e <b>ight, Building</b>                                                                                                                    |                                                                                                                                                                                                              |
| 1   | eans the vertical distance measured between the tablished or finished grade and any of the following:                                                                     |                                                                                                                                                                                                              |
| 1.  | On a flat roof, the highest point of the roof surface or the parapet, whichever is greater;                                                                               |                                                                                                                                                                                                              |
| 2.  | On a mansard roof, the highest point of the roof surface or the parapet, whichever is greater;                                                                            |                                                                                                                                                                                                              |
| 3.  | On a gable, hip or gambrel roof, or any other type of pitched roof, the mean distance between the eaves and ridges of the roof; or,                                       |                                                                                                                                                                                                              |
| 4.  | The highest point of a structure without a roof.                                                                                                                          |                                                                                                                                                                                                              |
| Ac  | ld the definition of Height, Finished First Floor                                                                                                                         | The first floor of a house is a visually distinctive                                                                                                                                                         |
| Не  | eight, Finished First Floor:                                                                                                                                              | element. The common pattern of houses across  Newmarket's neighbourhoods has a first floor that is                                                                                                           |
| inc | eans the finished height of the first floor of a building, clusive of the entryway or landing, occupying an area eater than or equal to 50% of the total horizontal first | close to the ground, which provides opportunities for porches and a close relationship between the house and the street.                                                                                     |
|     | or area, and measured relative to the elevation of tablished or finished grade.                                                                                           | New developments are more commonly seeking to place the first storey higher, occasionally above a garage. This leads to a large number of steps leading to the house, and a very different front appearance. |

| Amend definition of Storey                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | A storey is a fundamental way of thinking about how                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Storey: Means:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | a house is laid out. The zoning by-law has long limited houses in most parts of Newmarket to two storeys, and limited the maximum height of a storey to 3.6m.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| For single detached dwellings, semi-detached dwellings, duplex dwellings, triplex dwellings, and fourplex dwellings a level of a building located between the surface of a floor and the ceiling or roof immediately above it, and includes a mezzanine but does not include a basement or cellar. Any portion of a building partly below grade shall be deemed a storey where its ceiling is more than 1.2m above established grade.  For all other structures, a level of a building located between the surface of a floor and the ceiling or roof immediately above it, and includes a mezzanine but does not include a basement or cellar. Any portion of a building partly below grade shall be deemed a storey where its ceiling is more than 1.8m above established grade. Any portion of a storey exceeding 3.6 metres in height shall be deemed to be an additional storey. | However, this regulation has had unintended consequences of limiting the way that residents can use and design their homes. Namely, the two-storey limit means that the space in the pitched roof of a two-storey house cannot become a half-storey, even if that space in the roof already exists. Similarly, if one wanted to remove a hanging ceiling to have a cathedral ceiling, the 3.6m storey limit would prevent this.  This proposed rule change would remove the maximum 3.6m storey height limit for most low-rise residential buildings. This would allow for houses to be more flexibly designed, and would focus the rules on the exterior appearance of the house instead of controlling how the inside is laid out. |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | This change is part of a broader comprehensive change in the way that the height of houses is regulated that will slightly lower the overall maximum permitted height while allowing for greater flexibility of interior layout.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Amend the definition of Garage, Residential                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | The zoning by-law contains a number of rules about                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Garage, Residential:  Means an enclosed building or part thereof, accessed via a driveway, located within a Residential Zone that is used for the storage of private motor vehicles, recreational vehicles and trailers.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | where a garage or a driveway can be. These rules seek to make sure that garages are in places where they are compatible and commonly found, to avoid the impact on private yards of vehicular access. This change to the definition of a garage clarifies that a garage is accessed via a driveway to reinforce this principle.                                                                                                                                                                                                                                                                                                                                                                                                      |
| Add the definition of Dormer:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | The zoning by-law does not currently have any                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Means a roof structure, often containing a window, which projects both vertically and horizontally beyond the plane of a pitched roof, occupying an area equal to or less than 30% of the total horizontal roof area.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | standards related to dormers that project through a roof. In order that a roof maintain its appearance and not have an entire additional storey within it, this rule would limit how much of the length of a roof could be projecting dormers.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

### Creating and Updating Regulations and Standards

| New/Updated<br>Regulation or<br>Standard              | Key Change                                                                                                                                                                                                          | Rationale                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|-------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Section 6.2.2.<br>Max. Finished First<br>Floor Height | Revise max. finished first floor<br>height to 1.2 metres (Applied to<br>Zone Standards for A, B, C, D, E,<br>F, G, H, and J                                                                                         | This rule would require that the first floor for most residential buildings like single and semi-detached dwellings be no higher than 1.2m above grade.  The intent is to ensure that the front appearance of a house is compatible and consistent with the neighbourhood and to prevent basements from visually appearing as a storey.                                                                                                                                                    |
| Section 6.2.2.<br>Interior Side Lot<br>Lines          | Revise interior side lot line (Applied to Zone Standards for C and D):  Up to 4.2m Building Height = 1.2m  Up to 5.7m Building Height = 1.5m  Beyond 5.7m Building Height = 1.8m                                    | The zoning by-law has long required increased width of side-yard setbacks for houses as they increase in height. However, this has always been achieved based on the number of storeys of the house.  This rule change would retain the same relationship, but instead tie the increase in side yard setback to an increase in absolute building height. This makes for a clearer measure, and works with the overall proposed changes to the way that the height of houses is controlled. |
| Section 6.2.2.<br>Interior Side Lot<br>Lines          | Add (*17) to interior side-yard setbacks  (*17) For a semi-detached dwelling the interior side yard setback shall not be required where a side lot line extends from a common wall dividing attached dwelling units | Many semi-detached dwellings in Newmarket were built on one lot, which was then divided. The zoning standards for semi-detached lots reflect this, and so they don't indicate that there is a zero metre setback from the shared wall property line.  This rule change will clarify that semi-detached dwellings do not need a setback from the wall they share with their neighbour.                                                                                                      |

| New/Updated<br>Regulation or<br>Standard                                                                                                                                                     | Key Change                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Rationale                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| Section 6.2.2<br>Maximum Lot<br>Coverage                                                                                                                                                     | Retain existing maximum lot coverage regulations, and add new Schedule D illustrating maximum lot coverage (Applied to Zone Standards for A, B, C, D, E, F, G, H and J)  Notwithstanding the above, where a lot is subject to a site or areaspecific lot coverage regulation, indicated as a numerical percentage with corresponding colour overlay, as illustrated in Schedule D – Lot Coverage, that site or area-specific lot coverage regulation shall apply. | Most single detached lots in Newmarket can cover up to 35% of their lot with the main building, regardless of size. A review of the existing amount of coverage of lots has revealed a wide range of existing coverages. In some areas, the houses are very close to or at their maximum coverage. In other areas, most houses have less than 10% coverage.  This means that in some areas that are characterized by houses of a consistent size, a house three or more times the size could be built. While it's important to allow houses to be changed and upgraded, it is also worth ensuring that change is within a reasonable level of similarity to the surrounding area.  This rule proposes to use a series of maps to create new maximum coverage rules for many neighbourhoods. The proposed maximum coverage |
|                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | will still generally allow for growth and change, but will seek to ensure that change is more compatible with the existing neighbourhood.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Section 6.2.2.<br>Required Front<br>Yard Setback                                                                                                                                             | Amend regulation of required<br>front yard setback (Applied to<br>Zone Standards for C, D, E, F, G,<br>H, J, K, L, M)                                                                                                                                                                                                                                                                                                                                             | In the older parts of Newmarket, the zoning by-law has required since 2013 that houses be built within the range of the front yard setback of the houses on either side. This helps to keep the front walls roughly in line, which makes for a consistent streetscape.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Within a range of one metre of the average of the front yard setback of adjacent dwellings abutting the same road, provided that the setback not exceed the greater of the adjacent setbacks | However, this rule hasn't worked well for lots where the abutting houses have very similar setbacks, as it leaves very little room for change. It also has not worked well for lots with very large differences in the setbacks of abutting houses, as it gives a lot of flexibility.                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|                                                                                                                                                                                              | nor be closer to the street line than 3m.                                                                                                                                                                                                                                                                                                                                                                                                                         | This recommendation would maintain the principle of ensuring the front walls are generally consistent by tying the required setback to the average of the neighbours, then giving an additional metre of range. It would also be applied to almost all low-rise residential lots, most of which do not currently have this rule but were built with the same rules as their neighbours so are very similar in setback. For where there is some variety in setbacks, Section 4.13 of the by-law also provides flexibility to consider the average of a wider set of lots on the street.                                                                                                                                                                                                                                    |

|-----------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Section 6.2.2.<br>Max. Height                             | Retitle regulation from 'Max<br>Height to 'Max. Building Height'<br>Revise Regulation -8.5m<br>(Applied to Zone Standards for<br>A, B, C, D, E, F, G, H, and J)                                                                                                                                                                               | The zoning by-law has long limited the maximum height of most dwellings to 10.7m. However, other rules have limited the number of storeys to two, and the maximum height of a storey to 3.6m. The effect of this is that the 10.7m maximum height limit is of little effect, and the limit on the number of storeys has unintended consequences that are discussed elsewhere in this table. |
|                                                           |                                                                                                                                                                                                                                                                                                                                               | If the limit on the maximum height of a storey was the only change, it would then be possible to build houses that are 10.7m tall, which is significantly taller than most houses in Newmarket.                                                                                                                                                                                             |
|                                                           |                                                                                                                                                                                                                                                                                                                                               | A review of existing building heights and modern construction standards has indicated that a maximum height of 8.5 is compatible with most low-rise residential areas. Combined with a removal of the control on how storeys are arranged within the house, this will allow for more flexibility in design along with heights that are in keeping with Newmarket neighbourhoods.            |
| Exception 119                                             | Repeal Exception 119 enacted<br>by By-law 2013-30                                                                                                                                                                                                                                                                                             | Other amendments within this overall set of recommendations accomplish the objectives of this exception, which was adopted in 2013 to try to manage the pace of change in older neighbourhoods. The current set of recommendations uses similar tools, and goes into finer neighbourhood-byneighbourhod sets of rules.                                                                      |
| 6.2.3 Additional<br>Requirements for<br>Residential Zones | The following additional requirements apply to the regulatory sets for the Residential Zones as shown throughout Section 6.2.2. Where marked by an asterisk and number, that number refers to the standard that is varied by the clause. Where indicated as a regulation (i) (ii) (iii) that regulation describes its effect and application. | This is a technical clarification to how the regulations in 6.2.3 are laid out. It indicates that where a regulation includes a numerical asterisk (*), that rule applies to where that asterisk appears, and that where a regulation has a standard roman numeral (i, ii, iii, iv), its application is found in the text of the rule itself.                                               |

| New/Updated<br>Regulation or<br>Standard | Key Change                                                                                                                                                                                                                                                                                                                                                                                                           | Rationale                                                                                                                                                                            |
|------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                          | Add 6.2.3 (ii)                                                                                                                                                                                                                                                                                                                                                                                                       | This is a clarification that does not change any                                                                                                                                     |
|                                          | For residential lots, the minimum amount of soft landscaping in a yard is the area of the yard less any existing permitted                                                                                                                                                                                                                                                                                           | permissions. The zoning by-law currently controls how much of a yard can be covered by paving or brick or structures, but it can be difficult to determine what that requirement is. |
|                                          | encroachments and required driveway.                                                                                                                                                                                                                                                                                                                                                                                 | This proposed change is meant to be a concise statement of how to arrive at how much soft                                                                                            |
|                                          | Explanatory text that does not form part of the by-law                                                                                                                                                                                                                                                                                                                                                               | landscaping is required, paired with an explanatory text.                                                                                                                            |
|                                          | For example, in an R1 lot, the front yard extends across the full width of the lot between the front lot line and the closest wall of the principal building. This front yard can be partially occupied by the features listed in Section 4.2 (Encroachments into Required Yards), where they are identified in the table as being permitted in the front yard. A front yard could be partially occupied by a porch, | This clause does not change any permissions about yards or driveways, only explains the existing rules.                                                                              |
|                                          | steps, a landing from the steps,<br>a driveway, and a residential<br>walkway. The remaining portion of                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                      |
|                                          | the front yard cannot be occupied by any structure or feature.                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                      |

| New/Updated<br>Regulation or<br>Standard                                             | Key Change                                                                                                                                                                                                                                                      | Rationale                                                                                           |
|--------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------|
| Section 4.24<br>Reserve                                                              | Introduce a new reserve to determine lot lines and setbacks.                                                                                                                                                                                                    | During development, the Town will sometimes temporarily take 0.3m of land from a development        |
|                                                                                      | For the purposes of this By-law, a 0.3 m reserve shall:                                                                                                                                                                                                         | as a way to control when it is ready to be built<br>and connected to municipal roads. However, this |
| 1. be considered to be part of the abutting road for the purposes of determining lot | can lead to an odd situation of determining other elements of zoning, as usually zoning begins from first principles of figuring out which lot line is the front based on which lot line touches a street – but if that line doesn't touch a street and instead |                                                                                                     |
|                                                                                      | be considered part of the adjacent lot for the purposes                                                                                                                                                                                                         | touches a 0.3m strip of land, the application of the zoning by-law rules becomes challenging.       |
|                                                                                      | of determining setbacks and coverage.                                                                                                                                                                                                                           | This clarification is a common rule in other municipalities that seeks to avoid this confusion.     |
|                                                                                      | This regulation does not deem the lot to abut a street from which it is separated by a 0.3 metre reserve.                                                                                                                                                       |                                                                                                     |

| New/Updated<br>Regulation or<br>Standard | Key Change                                                                                                                                                                                                                                                                                                                                                                                                                  | Rationale                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Section 4.24<br>Reserve                  | Introduce a reserve to determine lot lines and setbacks.  For the purposes of this By-law, a 0.3 m reserve shall:  1. be considered to be part of the abutting road for the purposes of determining lot lines;  2. be considered part of the adjacent lot for the purposes of determining setbacks and coverage.  This regulation does not deem the lot to abut a street from which it is separated by a 0.3 metre reserve. | During development, the Town will sometimes temporarily take 0.3m of land from a development as a way to control when it is ready to be built and connected to municipal roads. However, this can lead to an odd situation of determining other elements of zoning, as usually zoning begins from first principles of figuring out which lot line is the front based on which lot line touches a street – but if that line doesn't touch a street and instead touches a 0.3m strip of land, the application of the zoning by-law rules becomes challenging.  This clarification is a common rule in other municipalities that seeks to avoid this confusion. |
| 4.2 Encroachments into Required Yards    | Revise permissions for encroachments into yards by driveways.  Revise permitted encroachment table to include:  Driveway  Permitted feature in any yard of a residential zone  Subject to:  i. Limits of Section 6.2  ii. Limits of Section 5.5                                                                                                                                                                             | This is a technical amendment to the by-law. Driveways are permitted, and required, for all residential dwellings. However, they do not appear as a feature that is permitted to be in a required yard. This rule change would clarify that driveways are permitted in yards, subject to the existing limits on size and location.                                                                                                                                                                                                                                                                                                                           |

|                                          | ii. Site Plan Approval Applications  Nothing in this By-law will prevent the erection or use of a building or structure for a project for which a complete application for site plan approval was filed on or prior to the date of passing By-law 2020-XX, if the project in question complies with the provisions of the applicable zoning by-law on that date, or obtains necessary relief from the zoning by-law through a minor variance under Section 45 of the Planning Act.      | This section is intended to protect applications that were underway, or that were previously granted permissions, from being caught by these new rules. |
|                                          | Where a project qualifies under this Section:                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                         |
|                                          | a) site plan approval may be granted if the project complies with the provisions of the applicable zoning by-law as it read on the date it was amended by By-law 2020-XX and all requirements of the Planning Act.                                                                                                                                                                                                                                                                      |                                                                                                                                                         |
|                                          | b) after final site plan approval is received for a project that qualifies under Section 1.10 (iii), a building permit for that project may be issued if the project in question complies, or the building permit application for the project is amended to comply, with the provisions of the applicable zoning by-law as it read on the date it was amended by By-law 2020-XX, the site plan approval, and all finally approved minor variances.  For the purposes of this section, a |                                                                                                                                                         |
|                                          | "complete application for site plan<br>approval" means an application which<br>satisfies the requirements set out in the<br>Town of Newmarket Official Plan.                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                         |

| New/Updated<br>Regulation or<br>Standard | Key Change                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Rationale                                                                                                                                               |
|------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                          | iii. Building Permit Applications  Nothing in this By-law will prevent the erection or use of a building or structure for which an application for a building permit was filed on or prior to the date of passing By-law 2020-XX, if the project in question complies, or the building permit application for the project is amended to comply, with the provisions of the zoning by-law as amended as it existed on the date of passing By-law 2020-XX.  An "application for a Building permit" means an application for a Building permit that satisfies the requirements set out in Building By-law 2015- 58 or its successor by-law. | This section is intended to protect applications that were underway, or that were previously granted permissions, from being caught by these new rules. |
|                                          | iv. Transition Clause Duration  Nothing in this By-law applies so as to continue the application of Section 1.10 beyond the issuance of the building permit upon which the exemptions are founded.                                                                                                                                                                                                                                                                                                                                                                                                                                       | This section is intended to protect applications that were underway, or that were previously granted permissions, from being caught by these new rules. |

# 4.4 Visualizations of Neighbourhood Infill

This section of the report presents a series of visualizations of the proposed regulations, and the range of built form conditions that they would and/ or would not permit. In doing so, they draw on real world examples outside of the Town of Newmarket. The demonstration diagrams are focused on three regulations - height, setbacks and lot coverage, which have been determined to be the three most significant elements contributing to built form compatibility.

For the Historic Core and Traditional Suburban Character Areas, one example which fully complies with these three criteria is included, in addition to additional examples which partially comply, or largely do not comply.

Selected examples which reflect the range of conditions one might see in these character areas. The examples include a combination of pitched and flat roof styles, small, moderate and large lots, a variety of vehicle access and parking conditions, and a range of architectural styles.

#### **Demonstration Diagram 1**

This demonstration (Figure 31) shows a contemporary infill development, situated within an Historic Core Character Area. It is located on a moderately sized lot and has a combination flat / pitched roof with side yard driveway and detached garage.

The demonstration fully complies with all three criteria. The building height complies with the maximum 8.5m requirement and is consistent with adjacent buildings. The finished floor height complies with the maximum 1.2m requirement. It also has compatible finished ground floor height, floor to floor heights, datums and rooflines when compared with the associated adjacent properties. Similarly, the front yard setback is consistent with adjacent properties and the side yard setback compiles with the minimum 1.5m setback, required for building walls up to 5.7m. Finally, the lot coverage complies with maximum permissions typical in this area (determined through aerial comparison of the surrounding block).

Figure 31. Demonstration Diagram 1 - Historic Core Character Area

#### **Demonstration Diagram 2**

This demonstration (Figure 32) features a contemporary renovation and addition to historic home, situated in an Historic Core Character Area. Sitting on a small lot, the property has a pitched roof, side yard driveway and pad parking.

The demonstration largely complies with the three criteria. The building height complies of 7.5m complies with the maximum 8.5m requirement and is consistent with

adjacent buildings. The finished floor height complies with maximum 1.2m requirement. The finished ground floor height, floor to floor heights, datums and roof lines are also generally consistent with adjacent properties. The front yard setback complies with the 1.5 metre requirement and is consistent with adjacent properties. One side yard setback complies with the minimum 1.5m setback required for building walls up to 5.7m, while the other side yard does not. The lot coverage complies with maximum permissions typical in this area.

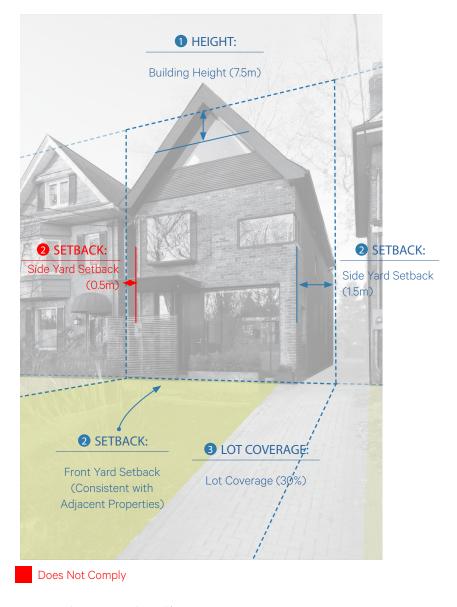

Figure 32. Demonstration Diagram 2 - Historic Core Character Area

Complies

This demonstration (Figure 33) shows a contemporary infill development, situated in an Historic Core Character Area, resulting from lot severance. It has a flat roof, integral garage and raised ground floor. It is located on a small lot.

The demonstration complies with the three criteria. The building height complies with the maximum 8.5m requirement, representing a modest increase over the adjacent building to the right. The datum does not

align to adjacent properties. The finished first floor height exceeds the maximum 1.2m requirement, as more than 50% of the ground floor is at a height of 2.5m. The entry and foyer are lower, with internal stairs.

The front yard setback complies and is consistent with those of the of adjacent properties. Side yards do not meet the minimum 1.8m setback required for building walls higher than 5.7m. The lot coverage does not comply with maximum permissions which would be typical in this area.

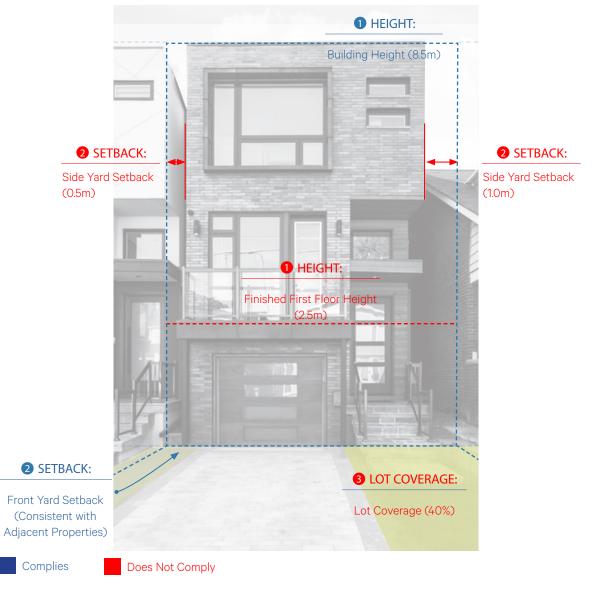

Figure 33. Demonstration Diagram 3 - Historic Core Character Area

This demonstration (Figure 34) shows a contemporary infill development on a moderately-sized lot, situated in an Historic Core Character Area, with a flat roof and integral garage.

The demonstration largely does not comply with the three criteria. The building height exceeds maximum permissions of 8.5m. The finished first floor height

exceeds the maximum 1.2m requirement, as more than 50% of the ground floor is at a height of 2.5m. The entry and foyer are lower, with internal stairs.

-While the front yard setback complies with the standards set by the adjacent properties, neither side yard meets the minimum 1.8m setback required for building walls higher than 5.7m. The lot coverage complies with maximum permissions which would be typical in this area.

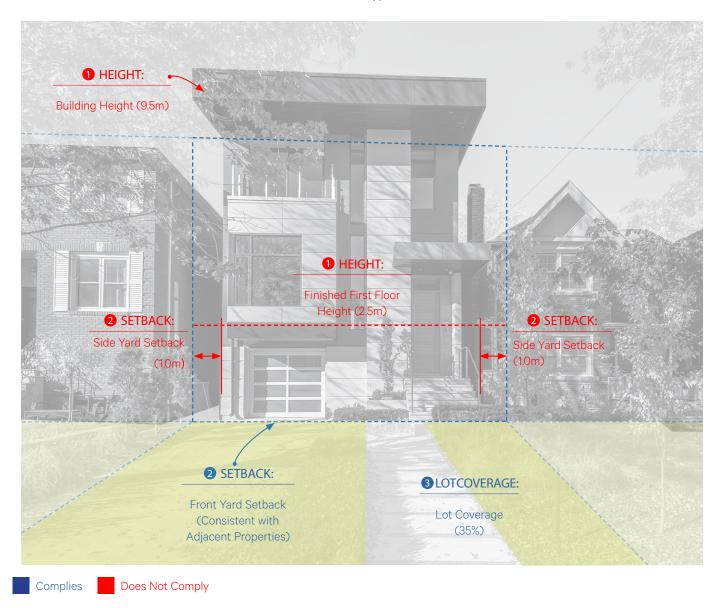

Figure 34. Demonstration Diagram 4 - Historic Core Character Area

This demonstration (Figure 35) illustrates a contemporary infill development, situated within a Traditional Suburban Character Area. The property features a flat roof, internal garage and raised ground floor with side-to-side split, on a fairly large lot.

The demonstration fully complies with all three criteria. The building height complies with max. 8.5m requirement and is consistent with adjacent buildings.

The finished floor height complies with maximum 1.2m requirement, as more than 50% of ground floor area falls under this height. It is also compatible with the finished floor height, floor to floor heights and datums of adjacent buildings. The front yard setback complies, with a minor change relative to adjacent building but within the required 1.0m range. Finally, the side yard setbacks comply with the minimum 1.8m requirement and lot coverage complies with maximum permissions which would be typical in this area.

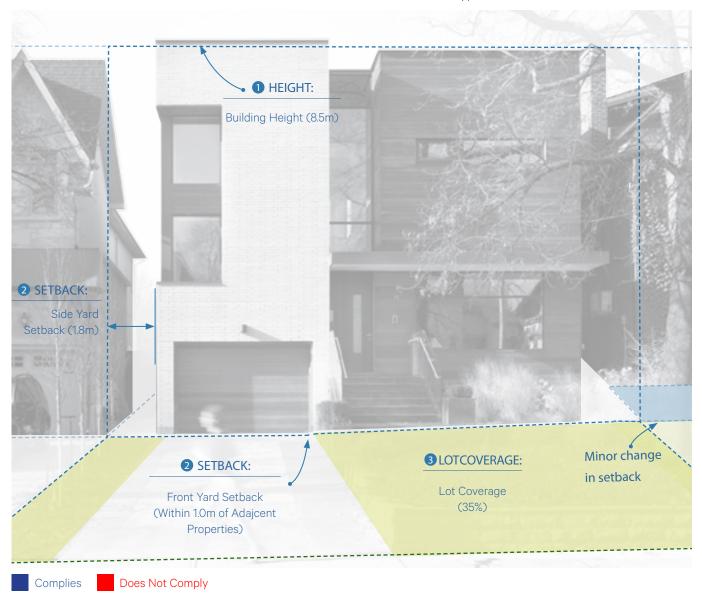

Figure 35. Demonstration Diagram 5 - Traditional Suburban Character Area

This demonstration (Figure 36) shows a contemporary infill development on a large lot, situated in a Traditional Suburban Character Area, with a flat roof, integral garage and raised ground floor. This particular condition is increasingly being seen in infill developments throughout municipalities across the Greater Toronto Area.

The demonstration largely complies with the three criteria. The building complies with the maximum 8.5m requirement. It is generally consistent, and slightly

shorter, with the adjacent two-storey building to the left. To a degree, it establishes a height transition to the adjacent bungalow to the right. The finished floor height does not comply with the maximum 1.2m requirement, as over 50% of the floor area is at 2.25m.

The front yard setback is in compliance. It features a minor change relative to adjacent building to the right, but is within required 1.0m range. The side yards comply with the minimum 1.8m setback required for building walls beyond 5.7m. The lot coverage also complies with maximum permission which would be typical in this area.

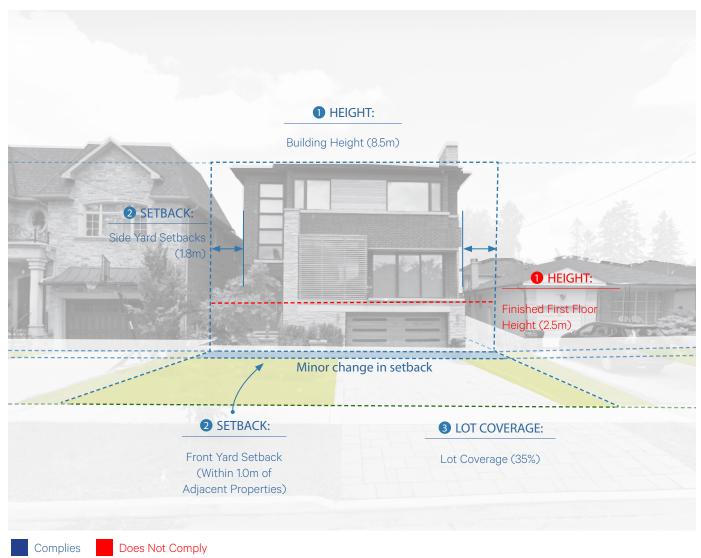

Figure 36. Demonstration Diagram 6 - Traditional Suburban Character Area

This demonstration (Figure 37) illustrates a contemporary infill development on a small lot, resulting from severance, situated in a Traditional Suburban Character Area. Features include a flat roof, integral garage and raised ground floor.

The demonstration largely does not comply with the three criteria. The building height marginally exceeds the maximum permission of 8.5m. The finished first

floor height exceeds the maximum 1.2m requirement, as more than 50% of the ground floor is at a height of 2.75m. The entry and foyer are lower, with internal stairs.

While the front yard setback complies and is consistent with adjacent properties, the side yard setbacks do not meet the minimum 1.8m requirement for building walls higher than 5.7m. The lot coverage complies with maximum permission which would be typical in this

Figure 37. Demonstration Diagram 7 - Traditional Suburban Character Area

This demonstration (Figure 38) illustrates a neotraditional infill development, situated in a Traditional Suburban Character Area. Situated on a large lot, it features a mansard roof, integral garage and raised ground floor.

The demonstration largely does not comply with the three criteria. The building height exceeds the maximum permission of 8.5m. The assessment of building height is impacted due to the fact that this development features a mansard roof, as this increases the perception of height and massing. It is treated as a flat roof rather than a pitched roof.

The finished first floor height exceeds the maximum 1.2m requirement, as more than 50% of the ground floor is at a height of 2.75m. The entry and foyer are lower, with internal stairs.

The front yard setback Is consistent with adjacent properties. The side yards meet the minimum 1.8m setback, required for building walls higher than 5.7m. The lot coverage exceeds and does not comply with maximum permissions which would be typical in this area.

#### PART A THE PREAMBLE

The Preamble provides an explanation of the amendment, including the location and purpose of the proposed amendment, basis of the amendment and a summary of the changes to the Town of Newmarket Official Plan, but does not form part of this amendment.

# 1. Purpose of the Amendment

The purpose of this amendment is to amend policies and schedules of the Town of Newmarket Official Plan to:

- Reflect changes in residential development that have occurred since the Official Plan was adopted;
- Remove references to Stable and Emerging Residential Areas and instead include policies that recognize the built form patterns of each neighbourhood while acknowledging the value of diverse housing types throughout all residential neighbourhoods;
- Implement a neighbourhood-level framework delineating Residential Areas within four Residential Character Areas: Historic Core Character Area, Traditional Suburban Character Area, Contemporary Suburban Character Area, and Estate Character Area; and,
- Propose a defined list of predominant characteristics for each, requiring development in Residential Areas to be compatible with existing built form and public realm standards.

#### 2. Location

The proposed amendments are made to the text and schedules of the Official Plan and are applied to the residential area of the Official Plan as described in the text and indicated on the Schedules.

#### 3. Basis

In January 2019, the Council of the Town of Newmarket directed staff to undertake a study on development and change in established residential areas, while adopting an Interim Control By-law pursuant to Section 38 of the *Planning Act*. Since then, staff have researched best practices in regulating growth and change in established areas, reviewed applicable Regional and Provincial planning policy documents, and consulted with the public.

#### PART B THE AMENDMENT

#### 1. Format of the Amendment

PART B – THE AMENDMENT describes the additions, deletions and/or modifications to the Town of Newmarket Official Plan and constitutes Official Plan Amendment Number 28.

Official Plan Amendment Number 28 consists of the following proposed modifications to the text and Schedules to the Newmarket Official Plan. Sections and Schedules of the Newmarket Official Plan proposed for modifications are identified as "Items".

#### 2. Details of the Amendment

#### Item 1 Section 2.0 Urban Structure

Delete the description of Residential Areas under the second paragraph and replace with the following:

"Encompassing the majority of lands throughout the Town of Newmarket, Residential Areas are low-rise residential neighbourhoods which accommodate a range of housing and tenure types, interspersed with ancillary convenience commercial and institutional uses."

# Item 2 Section 2.1 Managing Growth

Delete the first paragraph of Section 2.1 Managing Growth and replace it with the following:

A key principle reinforced throughout this Plan is the commitment to protect and strengthen existing neighbourhoods. Residential Areas are intended to remain stable. However, they may accommodate contextually-sensitive infill development and intensification, provided it contributes towards the establishment of a desirable urban structure, optimizes the use of existing municipal services and infrastructure, and is compatible with and complementary to the surrounding neighbourhood.

#### Item 3 Section 3.0: Residential Areas

Delete Section 3.0: Residential Areas and replace with the following:

#### 3.0 Residential Areas

As the supply of greenfield lands becomes exhausted, residential development trends in Newmarket are shifting from suburban growth to urban intensification and redevelopment of existing built-up areas to accommodate current and projected population growth.

While the majority of this growth is directed to the Urban Centres, a limited amount of development that is compatible with the residential character of existing neighbourhoods is anticipated to occur throughout Residential Areas.

While Residential Areas are primarily comprised of single-detached and semi-detached dwellings, they also contain a mix of duplexes, triplexes, fourplexes, townhouses, rowhouses, and low-rise apartment buildings up to 4 storeys.

Sensitive development of Residential Areas can add value to the community by boosting and diversifying the housing stock, taking advantage of existing hard and soft infrastructure systems, and enriching the local community. However, such development must be undertaken in a manner which acknowledges, respects, and is compatible with the existing predominant physical neighbourhood character.

Residential Areas may also contain limited convenience commercial and institutional uses which are compatible with residential uses.

#### Item 4 Section 3.1: General Residential Areas Policies

- a. Delete Policies 1 and 2 under Section 3.1 General Residential Area Policies.
- b. Rename the title "Section 3.1: General Residential Area Policies" to "Section 3.1: Residential Areas Policies".
- c. Add the following sections and policies after Section 3.1 Residential Areas Policies:

#### 3.1.1 Objectives

 a. Provide for a range of residential accommodation by housing type, tenure, size, location and price range to help satisfy the Town of Newmarket's housing needs.

- Maintain the stability of Residential Areas by establishing zoning standards that acknowledge and respect the prevailing physical character of the surrounding neighbourhood.
- c. Recognize the desirability of gradual ongoing change by allowing for contextually-sensitive development through *Planning Act* applications, to permit development which contributes towards the establishment of a desirable urban structure, diversifies housing stock, optimizes the use of existing municipal services and infrastructure, and is compatible with and complementary to the surrounding neighbourhood.
- d. Encourage a range of innovative and affordable housing types, zoning standards and subdivision designs.

#### 3.1.2 Permitted Uses

#### **Policies**

- 1 The predominant use of land in Residential Areas shall be residential in the form of single-detached and semi-detached dwellings.
- 2 Rowhouses, townhouses, duplex, triplex, and quadruplex are also permitted provided that the applicant can demonstrate to the satisfaction of the Town, how the proposed development is compatible with the existing character of the neighbourhood through a Compatibility Analysis Study.
  - 2.1 For the purpose of Policy 3.1.2.2, a Compatibility Analysis Study, which may form part of a Planning Justification Report, shall at a minimum, address policies of Section 12.4 Compatibility.
- Secondary and/or complementary permitted uses include those local institutional uses serving the immediate area such as Town of Newmarket Official Plan 27 elementary schools, group homes and special needs housing. In addition, home occupations, accessory dwelling units in single-detached and semi-detached dwellings, and convenience commercial uses are permitted. Conservation uses, parks and open space areas are also permitted in the Residential Areas (OPA #4).
- 4 Townhouse units on a Private Road shall be a permitted use in the Residential Area for the lands subject to Official Plan Amendment No. 12. (OPA #12) (955 & 995 Mulock Drive).

Within Residential Areas located on Davis Drive, immediately west of the Bus Terminal, permitted uses shall also include 4 to 6 storey apartment buildings and mixed use "live-work" units (OPA #16).

## 3.1.3 Development Criteria

#### **Policies**

- 1. Throughout Residential Areas, development shall be compatible with the prevailing physical character of the surrounding neighbourhood, with consideration for the following:
  - lot dimensions;
  - lot frontage;
  - front, side and rear yard setbacks;
  - siting and orientation;
  - lot coverage;
  - building entrance location;
  - private landscaping;
  - building height, massing, and depth; and,
  - ground floor height.
- 2. Development in Residential Areas shall acknowledge and respect the prevailing physical character of the surrounding properties, particularly those properties with frontage along the same street segment, subject to the Urban Design and Compatibility policies of Section 12.
- 3. When considering development proposals in Residential Areas, the Town will:
  - Assess the compatibility of the proposed development as it relates to the existing built form so that it enhances and builds upon desirable established patterns of built form and open spaces, and
  - b. Consider its contribution to the maintenance and achievement of a balance of housing types and tenures to provide a full range of housing for a variety of demographic profiles.
- 4. All Residential Areas shall be developed or maintained on full municipal sanitary sewer, water supply and storm sewer services, with the exception of the existing Kingdale Road, Old Bathurst Estates and Premier Place Estate Neighbourhoods.

#### Item 5 Section 3.2: Residential Character Areas

- a. Delete Section 3.2: Stable Residential Areas and Section 3.3: Emerging Residential Areas.
- b. Add the follow sections and policies under the new Section 3.2: Residential Character Areas and renumber subsequent sections accordingly.

#### Section 3.2 Residential Character Areas

#### 3.2.1 Objective

The Residential Character Area boundaries are illustrated in Schedule I: Residential Character Areas. It is the objective of the Residential Area policies to maintain the stability and unique quality of Residential Character Areas, while allowing for contextually-sensitive development, which demonstrates compatibility with the prevailing built form and public realm features of the surrounding neighbourhood.

#### 3.2.2 Historic Core Character Area

Newmarket's Historic Core Character Area were developed prior to the 1940's, and the advent of subdivision-based planning. The Historic Core Character Area is situated within and surrounding the historic core of the Town of Newmarket, and is generally bounded by properties fronting Davis Drive to the north, Leslie Street to the east, Gorham Street and Eagle Street to the south, and properties fronting onto Yonge Street to the west.

Newmarket's Historic Core Character Area is generally characterized by:

- Traditional street grid patterns;
- Short blocks with many intersections;
- Landscaped boulevards and an extensive canopy of established mature trees;
- · Continuous sidewalks on one or both sides of the street;
- Varied lot shapes and configurations;
- Varied front yard and side yard setbacks, of a shallow to significant depth;
- Varied building heights, ranging between 1 and 2-storeys;
- Varied vehicular access configurations, including front and side yard driveways;

- Varied parking configurations, including parking pads, detached garages, and attached garages;
- Range of architectural expressions and styles, with a significant focus on Victorian-era Architecture; and,
- Significant concentration of Listed and Designated Heritage Properties.

#### **Policy**

 Development within the Historic Core Character Area shall acknowledge and respect the general physical characteristics as outlined in Section 3.2.2, while responding to unique site and contextual conditions, and demonstrating compatibility with the existing neighbourhood.

#### 3.2.3 Traditional Suburban Character Area

Newmarket's Traditional Suburban Character Area was developed between the 1940's and 1990's, following the advent of subdivision-based planning. The Traditional Suburban Character Area is generally situated between the historic core of the Town of Newmarket, and the Contemporary Suburban Character Area, which traverse the periphery of the Town.

Newmarket's Traditional Suburban Character Area is generally characterized by:

- Curvilinear street patterns, including crescent streets and cul-desacs:
- Long blocks with few intersections;
- Landscaped boulevards and a moderate and evolving canopy of maturing street trees;
- Discontinuous sidewalks on one side of the street, with the exception of cul-de-sacs, many of which are absent of sidewalks;
- Rectangular and pie-shaped lots, with consistent dimensions, of a moderate to significant size;
- Consistent front and side yard setbacks;
- Varied building heights, ranging between 1 and 2-storeys;
- Consistent vehicular access configurations, characterized by front yard driveways;
- Consistent parking configurations, characterized by integral garages; and
- Limited range of architectural expressions and styles.

#### **Policy**

 Development within Traditional Suburban Character Area shall acknowledge and respect the general physical characteristics as outlined in Section 3.2.3, while responding to unique site and contextual conditions, and demonstrating compatibility with existing neighbourhood.

#### 3.2.4 Contemporary Suburban Character Area

Newmarket's Contemporary Suburban Character Area was developed following the 1990's, and is generally situated at the periphery of the Town, beyond the Traditional Suburban Character Area, and adjacent to the Estate Character Area.

Newmarket's Contemporary Suburban Character Area is generally characterized by:

- Modified street grid patterns;
- Short blocks with many intersections;
- Landscaped boulevards and a minimal canopy of newly established street trees;
- Continuous sidewalks on one or both sides of the street;
- Rectangular and pie-shaped lots, with consistent dimensions, of a small to moderate size;
- Consistent front and side yard setbacks, of a shallow to moderate depth;
- Consistent building heights of 2-storeys;
- Consistent vehicular access configurations, characterized by front yard driveways;
- Consistent parking configurations, characterized by integral garages; and
- Limited range of architectural expressions and styles.

#### **Policy**

 Development within Contemporary Suburban Character Area shall acknowledge and respect the general physical characteristics as outlined in Section 3.2.4, while responding to unique site and contextual conditions, and demonstrating compatibility with the existing neighbourhood.

#### 3.2.5 Estate Character Area

Newmarket's Estate Character Area was developed between the 1940's and 1990's, and are scattered throughout Newmarket, but are generally situated at the periphery of the Town, beyond the Traditional

Suburban Character Area, and adjacent to the Contemporary Suburban Character Area.

Estate Character Area is generally characterized by:

- Curvilinear street patterns, including crescent streets and cul-desacs;
- Long and often undefined discontinuous blocks;
- Landscaped boulevards with paved or gravel shoulders, swales and moderate and evolving canopy of maturing street trees;
- No sidewalks;
- Rectangular and pie-shaped lots, with consistent dimensions, or a significant size;
- Consistent front yard setbacks, of a significant depth;
- Consistent side yard setbacks, of a moderate to significant depth;
- Varied building heights, ranging between 1 and 2-storeys;
- Varied vehicular access configurations, characterized by front yard driveways with one or more curb-cuts, and occasionally turnaround facilities of moderate to significant width;
- Varied parking configurations, characterized by parking pads, attached front and side garages, detached garages, and outdoor parking enclosures; and
- Significant range of architectural expressions and styles.

#### **Policies**

- Development within the Estate Character Area shall acknowledge and respect the general physical characteristics as outlined in Section 3.2.5, while responding to unique site and contextual conditions, and demonstrating compatibility with the existing neighbourhood.
- 2. Within Estate Character Area, no new residential lot shall be created through consent until such time as municipal services are provided throughout the neighbourhood.
- Nothing in this Plan shall prevent the Kingdale Road, Old Bathurst Estates and Premier Place Estate Residential subdivisions from being provided with full municipal services, if deemed appropriate and/or necessary, by the Region of York or the Town of Newmarket.

#### Item 6 Section 3.9 Intensification

a. Renumber Section 3.9: Intensification to Section 3.8: Intensification.

- b. Replace Policy 1 with the following:
  - 1. Throughout Residential Areas, intensification is permitted through the introduction of the following:
    - A range of building and unit types including accessory dwelling units, single-detached dwellings and semi-detached dwellings.
    - A range of building and units types including townhouses and rowhouses on a site-specific basis.
    - Infill development through the construction of new residential dwellings and buildings on vacant land, additions and structural alterations to existing dwellings, and the demolition and redevelopment of existing dwellings.
    - The consent of lands resulting in the introduction of additional residential dwellings, where appropriate and subject to other policies of this Plan.
- c. Add the following policies after Policy 1:
  - 2. Standards for accessory dwelling units, will be established in the Zoning By-law and shall be consistent with Section 3.6, Accessory Dwelling Units.
  - 3. Limited intensification through consents will be permitted subject to the zoning by-law and compatibility with the scale of the surrounding neighbourhood, the physical suitability of the site to accommodate the proposed infill or intensification, availability of services and road access requirements.

#### Item 7 Section 12.4: Compatibility

- a. Number the first paragraph as Policy 1 and delete the list following the second sentence in paragraph 1 and replace the list with the following:
  - Existing built form of the area;
  - Policies of the Residential Character Area, if applicable;
  - Nature of fenestration and sun reflection impacts;
  - Nature of shadow impacts; and,
  - Existing and emerging built-form elements such as height, massing, setbacks, materials and finishes that are incorporated into surrounding buildings.
- b. Add the following policies to Section 12.4 Compatibility after Policy 1:

- Development will be required to demonstrate how its design fits with the existing character of the surrounding area in the context of:
  - Setbacks, heights and transition;
  - Façade and roofline articulation;
  - Colours and materials;
  - Architectural elements, including windows, doors and projections;
  - Pre- and post-construction grades on site; and
  - Incorporating elements and details of common characteristics of the area.
- c. Delete the second paragraph and replace it with the following as Policy 3:
  - 3. Building heights of mid-rise and high-rise buildings immediately adjacent to a Residential Area should provide an appropriate transition and achieve suitable visual angular planes. Where a building height greater than the existing adjacent context or adjacent public open space is proposed, the development shall demonstrate that an effective transition in height and massing, such as a stepping down or variation in building form has been incorporated into the design.
- d. Number the third paragraph as Policy 4.

#### Item 8 Section 16.0 Implementation

Add the following section and policy as **Section 16.6 Transition** 

#### **Section 16.6 Transition**

#### **Policy**

1. Notwithstanding the policies of OPA No. 28, applications for Official Plan Amendment, Zoning By-law Amendment, Draft Plan of Subdivision or Condominium approval or Site Plan approval which were deemed complete and still in process prior to approval of OPA No. 28, or which were approved by the Town or the Local Planning Appeal Tribunal, are required to conform only with the policies in force at the time of the complete application or approval until the date OPA No. 28 is approved.

#### Item 9 Schedule A: Land Use

Schedule A: Land Use is revised by removing "Stable Residential" and "Emerging Residential" Land Use Designations, combining those lands previously designated as "Stable Residential" and "Emerging Residential" and replacing them with a single "Residential" Land Use Designation as shown on Schedule 1 attached.

#### Item 10 Schedule I: Residential Character Areas

Add the attached Schedule 2 as Schedule I: Residential Character Areas to the Newmarket Official Plan.

# 3. Schedules

Schedule 1 – Schedule A: Land Use

Schedule 2 – Schedule I: Residential Character Areas

# APPENDIX B

# Corporation of the Town of Newmarket

# **By-law 2020-XX**

A By-law to amend By-law Number 2010-40, as amended, being the Town of Newmarket Zoning By-law.

Whereas it is deemed advisable to amend By-law Number 2010-40;

Therefore be it enacted by the Council of the Corporation of the Town of Newmarket as follows:

- 1. That Exception 119 enacted by By-law 2013-30 is hereby repealed.
- 2. That By-law Number 2010-40, as amended, is hereby amended as follows:
  - i. Section 1: Interpretation and Administration is amended by adding Section 1.10 Transition and the following:

This section applies to:

i. <u>Site-Specific Zoning By-law Amendments</u>
All site-specific zoning by-law amendments approved and came into full force and effect pursuant to Section 34 of the *Planning Act* prior to the passing of By 2020-xx shall remain in force.

#### ii. Minor Variances

All minor variances applied for prior to the passing of By-law 2020-XX and approved pursuant to Section 45 of the *Planning Act* continue to apply and remain in force as if they are variances to this By-law for lawfully **existing lots**, **buildings** or **structures**.

Nothing in this By-law shall prevent the erection or use of a **building** or **structure**, for which:

- a. a complete application for a minor variance under Section 45 of the Planning Act was filed on or prior to the date of passing By-law 2020-XX and approved prior to or after the passing of By-law 2020-XX; or
- b. a complete application for a minor variance under Section 45 of the Planning Act was filed and approved after to the date of passing By-law 2020-XX based on a building permit application filed on or prior to the date of passing By-law 2020-XX.

For the purposes of this section, a "complete application for a minor variance" means an application which satisfies the requirements of Section 2 of Ontario Regulation 200/96 (Minor Variance Applications) under the *Planning Act*.

By-law ## Page 1 of 6

#### iii. Building Permit Applications

Nothing in this By-law shall prevent the erection or use of a **building** or **structure** for which an application for a building permit was filed on or prior to the date of passing By-law 2020-XX, if the project in question complies, or the building permit application for the project is amended to comply, with the provisions of the zoning by-law as amended as it existed on the date of passing By-law 2020-XX.

An "application for a Building permit" means an application for a Building permit that satisfies the requirements set out in Building By-law 2015-58 or its successor by-law.

#### iv. Site Plan Approval Applications

Nothing in this By-law shall prevent the erection or use of a **building** or **structure** for a project for which a complete application for site plan approval was filed on or prior to the date of passing By-law 2020-XX, if the project in question complies with the provisions of the applicable zoning by-law on that date, or obtains necessary relief from the zoning by-law through a minor variance under Section 45 of the *Planning Act*.

Where a project qualifies under this Section:

- a. site plan approval may be granted if the project complies with the provisions of the applicable zoning by-law as it read on the date it was amended by By-law 2020-XX and all requirements of the *Planning Act*.
- b. after final site plan approval is received for a project that qualifies under Section 1.10 (iii), a building permit for that project may be issued if the project in question complies, or the building permit application for the project is amended to comply, with the provisions of the applicable zoning by-law as it read on the date it was amended by By-law 2020-XX, the site plan approval, and all finally approved minor variances.

For the purposes of this section, a "complete application for site plan approval" means an application which satisfies the requirements set out in the Town of Newmarket Official Plan.

#### v. <u>Transition Clause Duration</u>

Nothing in this By-law applies so as to continue the application of Section 1.10 beyond the issuance of the building permit upon which the exemptions are founded.

# ii. Section 3: Definitions is amended as follows:

a. Delete the definition of **Basement** and replace it with the following:

Means a portion of a building that is underground, which has more than one third of its height above finished grade but where the height above finished grade does not exceed:

- 1.2 metres for lots Zoned R1, R2 or R3; or,
- 1.8 metres for lots in all other Zones.

b. Add the term **Dormer** and the following definition:

Means a roof structure, often containing a window, which projects both vertically and horizontally beyond the plane of a pitched roof, occupying an area equal to or less than 30% of the total horizontal roof area on each side of the roof.

c. Delete the definition of **Grade**, **Established or Finished** and replace it with the following:

#### "Means

For single detached dwellings, semi-detached dwellings, duplex dwellings, triplex dwellings, and fourplex dwellings, the average elevation of the ground, measured at the two points where the front yard meets adjacent side lot lines;

For all other structures, the average of the levels of the finished ground surface at every location of change of grade along the exterior walls of a building or structure."

d. Revise the term **Height** to **Height**, **Building** and replace the definition with the following:

"Means the vertical distance measured between the established or finished grade and any of the following:

- On a flat roof or mansard roof, the highest point of the roof surface or the parapet, whichever is greater;
- On a gable, hip or gambrel roof, or any other type of pitched roof, the mean distance between the eaves and ridges of the roof; or,
- The highest point of a structure without a roof."
- e. Add the term **Height, Finished First Floor** and the following definition:

"Means the finished height of the first floor of a building, inclusive of the entryway or landing, occupying an area greater than or equal to 50% of the total horizontal first floor area, and measured relative to the elevation of established or finished grade."

f. Add the term **Roof**, **Flat** and the following definition:

"Means a roof with a slope of less than 1.0 vertical units for every 4.0 horizontal units, occupying an area greater than or equal to 50% of the total horizontal roof area."

g. Add the term Roof, Pitched and the following definition:

"Means a roof with a slope of greater than 1.0 vertical units for every 4.0 horizontal units, occupying an area greater than or equal to 50% of the total horizontal roof area."

h. Revise the term **Garage**, **Residential** by adding "accessed via a driveway" after "Means an enclosed building or part thereof", as follows:

"Means an enclosed building or part thereof, accessed via a driveway, located within a Residential Zone that is used for the storage of private motor vehicles, recreational vehicles and trailers."

i. Delete the definition of **Storey** and replace it with the following:

#### "Means

For single detached dwellings, semi-detached dwellings, duplex dwellings, triplex dwellings, and fourplex dwellings a level of a building located between the surface of a floor and the ceiling or roof immediately above it, and includes a mezzanine but does not include a basement or cellar. Any portion of a building partly below grade shall be deemed a storey where its ceiling is more than 1.2m above established grade.

For all other structures, a level of a building located between the surface of a floor and the ceiling or roof immediately above it, and includes a mezzanine but does not include a basement or cellar. Any portion of a building partly below grade shall be deemed a storey where its ceiling is more than 1.8m above established grade. Any portion of a storey exceeding 3.6 metres in height shall be deemed to be an additional storey."

#### iii. Section 4: General Provisions is amended as follows:

Add the following to the table in Section 4.2 Encroachments into Required Yards:

| Permitted<br>Structure or<br>Feature | Applicable<br>Required<br>Yard(s)           | Required Setback or Permitted Encroachment                      |  |  |  |
|--------------------------------------|---------------------------------------------|-----------------------------------------------------------------|--|--|--|
| STRUCTURAL AND ORNAMENTAL FEATURES:  |                                             |                                                                 |  |  |  |
| Driveway                             | Permitted in any yard of a residential zone | Subject to:  i. Limits of Section 6.2 ii. Limits of Section 5.5 |  |  |  |

b. Add the following provision as **Section 4.9.2 Exception** and renumber Valid Building Permit in Effect as Section 4.9.3:

## Section 4.9.2 Exception

Notwithstanding Section 4.9.1 (iii), a building or structure having a non-complying maximum finished first floor height may be enlarged, repaired or renovated, but the reconstruction of such building or structure shall comply with the maximum finished first floor height in accordance with Section 6.2.2.

- c. Delete **Section 4.13 Conformity with an Established Building Line**.
- d. Add **Section 4.24 0.3m Reserve** and the following provisions:

# Section 4.24 0.3m Reserve

For the purposes of this By-law, a 0.3 m reserve shall:

- i. be considered to be part of the abutting road for the purposes of determining lot lines, and
- ii. be considered part of the adjacent lot for the purposes of determining setbacks and coverage.

This regulation does not deem the lot to abut a street from which it is separated by a 0.3 metre reserve.

#### iv. Section 6.2.2 Zone Standards is amended as follows:

a. Delete column Ex. 119 from the table.

- b. In the row **Maximum Lot Coverage**, add "Refer to Schedule D" in the columns for Zones A, B, C, D, E, F, G, H, J and K.
- c. Replace the term Max. Height with Max. Building Height.
- d. Delete the **Max. Building Height** provisions for Zones A, B, C, D, E, F, G, H, J and K and replace them with "8.5m".
- e. Add a row to the table for **Max. Finished First Floor Height** and insert "1.2m" in the columns for Zones A, B, C, D, E, F, G, H and J.
- f. Delete "Each Side 1 Storey"; "Each Side 1.5 Storeys", and "Each Side 2 Storeys" in the table under **From Interior Side**Lot Line and replace them with "Up to 4.2m Building Height"; "Up to 5.7 Building Height" and "Beyond 5.7m Building Height" respectively.
- g. Delete the **Min. Yard Setback from Front Lot Line** provisions for Zones C, D, E, F, G, H, J, K, L and M and replace them with (\*16).
- h. In the row **Exterior Side Lot Line,** add (\*18) for Zones C, D, E, F, G, H, J and K.
- v. Section 6.2.3 Additional Requirements for Residential Zones is amended as follows:
  - a. Delete the first paragraph and replace it with the following:
    - i. The following additional requirements apply to the regulatory sets for the Residential Zones as shown throughout Section 6.2.2. Where marked by an asterisk and number, that number refers to the standard that is varied by the clause. Where indicated as a regulation (i) (ii) (iii) that regulation describes its effect and application.
  - b. Add the following provision after the first paragraph:
    - ii. For residential lots, the minimum amount of soft landscaping in a yard is the area of the yard less any permitted encroachments.
  - c. Add the following additional requirements after (\*15):
    - (\*16) The minimum front yard setback shall be one metre less than the average of the front yard setback of adjacent dwellings located within 60 metres on the same road, but shall not be closer to the street line than 3m.

In addition to the above, the proposed front yard setback shall not be further from the street line than one metre greater than the average of the front yard setback of adjacent dwellings located within 60 metres on the same road.

- (\*17) For a semi-detached dwelling the setback shall not apply where a side lot line extends from a common wall dividing attached dwelling units.
- (\*18) The minimum exterior side yard setback requirement shall be one metre less than the average of the front yard or exterior side yard setbacks of the adjacent dwelling(s) located within 60 metres on the same side of the road as the exterior side lot line, but it shall not be less than the minimum prescribed in Section 6.2.2.

In addition to the above, the proposed exterior side yard setback shall not be further from the exterior side lot line than one metre greater than the average of the front yard or exterior side yard setbacks of the adjacent dwelling(s) located within 60 metres on the same side of the road as the exterior side lot line.

# vi. Schedule A (Maps)

- a. Add the attached Schedule 1 as Schedule D: Lot Coverage to By-law 2010-40, as amended.
- b. Delete Schedule A Maps 10 and 13 and replacing them with Schedules 2 and 3 attached as new Schedule A Maps 10 and 13.
- 3. That Schedules 1, 2 and 3 attached to this by-law are declared to form part of this by-law.

Enacted this xxx day of xxx, 2020.

John Taylor, Mayor

Lisa Lyons, Town Clerk

# Amendment No. 28 to the Town of Newmarket Official Plan

#### PART A THE PREAMBLE

The Preamble provides an explanation of the amendment, including the location and purpose of the proposed amendment, basis of the amendment and a summary of the changes to the Town of Newmarket Official Plan, but does not form part of this amendment.

# 1. Purpose of the Amendment

The purpose of this amendment is to amend policies and schedules of the Town of Newmarket Official Plan to:

- Reflect changes in residential development that have occurred since the Official Plan was adopted;
- Remove references to Stable and Emerging Residential Areas and instead include policies that recognize the built form patterns of each neighbourhood while acknowledging the value of diverse housing types throughout all residential neighbourhoods;
- Implement a neighbourhood-level framework delineating Residential Areas within four Residential Character Areas: Historic Core Character Area, Traditional Suburban Character Area, Contemporary Suburban Character Area, and Estate Character Area; and,
- Propose a defined list of predominant characteristics for each, requiring development in Residential Areas to be compatible with existing built form and public realm standards.

#### 2. Location

The proposed amendments are made to the text and schedules of the Official Plan and are applied to the residential area of the Official Plan as described in the text and indicated on the Schedules.

#### 3. Basis

In January 2019, the Council of the Town of Newmarket directed staff to undertake a study on development and change in established residential areas, while adopting an Interim Control By-law pursuant to Section 38 of the *Planning Act*. Since then, staff have researched best practices in regulating growth and change in established areas, reviewed applicable Regional and Provincial planning policy documents, and consulted with the public.

#### PART B THE AMENDMENT

#### 1. Format of the Amendment

PART B – THE AMENDMENT describes the additions, deletions and/or modifications to the Town of Newmarket Official Plan and constitutes Official Plan Amendment Number 28.

Official Plan Amendment Number 28 consists of the following proposed modifications to the text and Schedules to the Newmarket Official Plan. Sections and Schedules of the Newmarket Official Plan proposed for modifications are identified as "Items".

#### 2. Details of the Amendment

#### Item 1 Section 2.0 Urban Structure

Delete the description of Residential Areas under the second paragraph and replace with the following:

"Encompassing the majority of lands throughout the Town of Newmarket, Residential Areas are low-rise residential neighbourhoods which accommodate a range of housing and tenure types, interspersed with ancillary convenience commercial and institutional uses."

# Item 2 Section 2.1 Managing Growth

Delete the first paragraph of Section 2.1 Managing Growth and replace it with the following:

A key principle reinforced throughout this Plan is the commitment to protect and strengthen existing neighbourhoods. Residential Areas are intended to remain stable. However, they may accommodate contextually-sensitive infill development and intensification, provided it contributes towards the establishment of a desirable urban structure, optimizes the use of existing municipal services and infrastructure, and is compatible with and complementary to the surrounding neighbourhood.

#### Item 3 Section 3.0: Residential Areas

Delete Section 3.0: Residential Areas and replace with the following:

#### 3.0 Residential Areas

As the supply of greenfield lands becomes exhausted, residential development trends in Newmarket are shifting from suburban growth to urban intensification and redevelopment of existing built-up areas to accommodate current and projected population growth.

While the majority of this growth is directed to the Urban Centres, a limited amount of development that is compatible with the residential character of existing neighbourhoods is anticipated to occur throughout Residential Areas.

While Residential Areas are primarily comprised of single-detached and semi-detached dwellings, they also contain a mix of duplexes, triplexes, fourplexes, townhouses, rowhouses, and low-rise apartment buildings up to 4 storeys.

Sensitive development of Residential Areas can add value to the community by boosting and diversifying the housing stock, taking advantage of existing hard and soft infrastructure systems, and enriching the local community. However, such development must be undertaken in a manner which acknowledges, respects, and is compatible with the existing predominant physical neighbourhood character.

Residential Areas may also contain limited convenience commercial and institutional uses which are compatible with residential uses.

#### Item 4 Section 3.1: General Residential Areas Policies

- a. Delete Policies 1 and 2 under Section 3.1 General Residential Area Policies.
- b. Rename the title "Section 3.1: General Residential Area Policies" to "Section 3.1: Residential Areas Policies".
- c. Add the following sections and policies after Section 3.1 Residential Areas Policies:

#### 3.1.1 Objectives

 a. Provide for a range of residential accommodation by housing type, tenure, size, location and price range to help satisfy the Town of Newmarket's housing needs.

- Maintain the stability of Residential Areas by establishing zoning standards that acknowledge and respect the prevailing physical character of the surrounding neighbourhood.
- c. Recognize the desirability of gradual ongoing change by allowing for contextually-sensitive development through *Planning Act* applications, to permit development which contributes towards the establishment of a desirable urban structure, diversifies housing stock, optimizes the use of existing municipal services and infrastructure, and is compatible with and complementary to the surrounding neighbourhood.
- d. Encourage a range of innovative and affordable housing types, zoning standards and subdivision designs.

#### 3.1.2 Permitted Uses

#### **Policies**

- 1 The predominant use of land in Residential Areas shall be residential in the form of single-detached and semi-detached dwellings.
- 2 Rowhouses, townhouses, duplex, triplex, and quadruplex are also permitted provided that the applicant can demonstrate to the satisfaction of the Town, how the proposed development is compatible with the existing character of the neighbourhood through a Compatibility Analysis Study.
  - 2.1 For the purpose of Policy 3.1.2.2, a Compatibility Analysis Study, which may form part of a Planning Justification Report, shall at a minimum, address policies of Section 12.4 Compatibility.
- Secondary and/or complementary permitted uses include those local institutional uses serving the immediate area such as Town of Newmarket Official Plan 27 elementary schools, group homes and special needs housing. In addition, home occupations, accessory dwelling units in single-detached and semi-detached dwellings, and convenience commercial uses are permitted. Conservation uses, parks and open space areas are also permitted in the Residential Areas (OPA #4).
- 4 Townhouse units on a Private Road shall be a permitted use in the Residential Area for the lands subject to Official Plan Amendment No. 12. (OPA #12) (955 & 995 Mulock Drive).

Within Residential Areas located on Davis Drive, immediately west of the Bus Terminal, permitted uses shall also include 4 to 6 storey apartment buildings and mixed use "live-work" units (OPA #16).

## 3.1.3 Development Criteria

#### **Policies**

- 1. Throughout Residential Areas, development shall be compatible with the prevailing physical character of the surrounding neighbourhood, with consideration for the following:
  - lot dimensions;
  - lot frontage;
  - front, side and rear yard setbacks;
  - siting and orientation;
  - lot coverage;
  - building entrance location;
  - private landscaping;
  - building height, massing, and depth; and,
  - ground floor height.
- 2. Development in Residential Areas shall acknowledge and respect the prevailing physical character of the surrounding properties, particularly those properties with frontage along the same street segment, subject to the Urban Design and Compatibility policies of Section 12.
- 3. When considering development proposals in Residential Areas, the Town will:
  - Assess the compatibility of the proposed development as it relates to the existing built form so that it enhances and builds upon desirable established patterns of built form and open spaces, and
  - b. Consider its contribution to the maintenance and achievement of a balance of housing types and tenures to provide a full range of housing for a variety of demographic profiles.
- 4. All Residential Areas shall be developed or maintained on full municipal sanitary sewer, water supply and storm sewer services, with the exception of the existing Kingdale Road, Old Bathurst Estates and Premier Place Estate Neighbourhoods.

#### Item 5 Section 3.2: Residential Character Areas

- a. Delete Section 3.2: Stable Residential Areas and Section 3.3: Emerging Residential Areas.
- b. Add the follow sections and policies under the new Section 3.2: Residential Character Areas and renumber subsequent sections accordingly.

#### Section 3.2 Residential Character Areas

#### 3.2.1 Objective

The Residential Character Area boundaries are illustrated in Schedule I: Residential Character Areas. It is the objective of the Residential Area policies to maintain the stability and unique quality of Residential Character Areas, while allowing for contextually-sensitive development, which demonstrates compatibility with the prevailing built form and public realm features of the surrounding neighbourhood.

#### 3.2.2 Historic Core Character Area

Newmarket's Historic Core Character Area were developed prior to the 1940's, and the advent of subdivision-based planning. The Historic Core Character Area is situated within and surrounding the historic core of the Town of Newmarket, and is generally bounded by properties fronting Davis Drive to the north, Leslie Street to the east, Gorham Street and Eagle Street to the south, and properties fronting onto Yonge Street to the west.

Newmarket's Historic Core Character Area is generally characterized by:

- Traditional street grid patterns;
- Short blocks with many intersections;
- Landscaped boulevards and an extensive canopy of established mature trees;
- · Continuous sidewalks on one or both sides of the street;
- Varied lot shapes and configurations;
- Varied front yard and side yard setbacks, of a shallow to significant depth;
- Varied building heights, ranging between 1 and 2-storeys;
- Varied vehicular access configurations, including front and side yard driveways;

- Varied parking configurations, including parking pads, detached garages, and attached garages;
- Range of architectural expressions and styles, with a significant focus on Victorian-era Architecture; and,
- Significant concentration of Listed and Designated Heritage Properties.

#### **Policy**

 Development within the Historic Core Character Area shall acknowledge and respect the general physical characteristics as outlined in Section 3.2.2, while responding to unique site and contextual conditions, and demonstrating compatibility with the existing neighbourhood.

#### 3.2.3 Traditional Suburban Character Area

Newmarket's Traditional Suburban Character Area was developed between the 1940's and 1990's, following the advent of subdivision-based planning. The Traditional Suburban Character Area is generally situated between the historic core of the Town of Newmarket, and the Contemporary Suburban Character Area, which traverse the periphery of the Town.

Newmarket's Traditional Suburban Character Area is generally characterized by:

- Curvilinear street patterns, including crescent streets and cul-desacs:
- Long blocks with few intersections;
- Landscaped boulevards and a moderate and evolving canopy of maturing street trees;
- Discontinuous sidewalks on one side of the street, with the exception of cul-de-sacs, many of which are absent of sidewalks;
- Rectangular and pie-shaped lots, with consistent dimensions, of a moderate to significant size;
- Consistent front and side yard setbacks;
- Varied building heights, ranging between 1 and 2-storeys;
- Consistent vehicular access configurations, characterized by front yard driveways;
- Consistent parking configurations, characterized by integral garages; and
- Limited range of architectural expressions and styles.

#### **Policy**

 Development within Traditional Suburban Character Area shall acknowledge and respect the general physical characteristics as outlined in Section 3.2.3, while responding to unique site and contextual conditions, and demonstrating compatibility with existing neighbourhood.

#### 3.2.4 Contemporary Suburban Character Area

Newmarket's Contemporary Suburban Character Area was developed following the 1990's, and is generally situated at the periphery of the Town, beyond the Traditional Suburban Character Area, and adjacent to the Estate Character Area.

Newmarket's Contemporary Suburban Character Area is generally characterized by:

- Modified street grid patterns;
- Short blocks with many intersections;
- Landscaped boulevards and a minimal canopy of newly established street trees;
- Continuous sidewalks on one or both sides of the street;
- Rectangular and pie-shaped lots, with consistent dimensions, of a small to moderate size;
- Consistent front and side yard setbacks, of a shallow to moderate depth;
- Consistent building heights of 2-storeys;
- Consistent vehicular access configurations, characterized by front yard driveways;
- Consistent parking configurations, characterized by integral garages; and
- Limited range of architectural expressions and styles.

#### **Policy**

 Development within Contemporary Suburban Character Area shall acknowledge and respect the general physical characteristics as outlined in Section 3.2.4, while responding to unique site and contextual conditions, and demonstrating compatibility with the existing neighbourhood.

#### 3.2.5 Estate Character Area

Newmarket's Estate Character Area was developed between the 1940's and 1990's, and are scattered throughout Newmarket, but are generally situated at the periphery of the Town, beyond the Traditional

Suburban Character Area, and adjacent to the Contemporary Suburban Character Area.

Estate Character Area is generally characterized by:

- Curvilinear street patterns, including crescent streets and cul-desacs;
- Long and often undefined discontinuous blocks;
- Landscaped boulevards with paved or gravel shoulders, swales and moderate and evolving canopy of maturing street trees;
- No sidewalks;
- Rectangular and pie-shaped lots, with consistent dimensions, or a significant size;
- Consistent front yard setbacks, of a significant depth;
- Consistent side yard setbacks, of a moderate to significant depth;
- Varied building heights, ranging between 1 and 2-storeys;
- Varied vehicular access configurations, characterized by front yard driveways with one or more curb-cuts, and occasionally turnaround facilities of moderate to significant width;
- Varied parking configurations, characterized by parking pads, attached front and side garages, detached garages, and outdoor parking enclosures; and
- Significant range of architectural expressions and styles.

#### **Policies**

- Development within the Estate Character Area shall acknowledge and respect the general physical characteristics as outlined in Section 3.2.5, while responding to unique site and contextual conditions, and demonstrating compatibility with the existing neighbourhood.
- 2. Within Estate Character Area, no new residential lot shall be created through consent until such time as municipal services are provided throughout the neighbourhood.
- Nothing in this Plan shall prevent the Kingdale Road, Old Bathurst Estates and Premier Place Estate Residential subdivisions from being provided with full municipal services, if deemed appropriate and/or necessary, by the Region of York or the Town of Newmarket.

#### Item 6 Section 3.9 Intensification

a. Renumber Section 3.9: Intensification to Section 3.8: Intensification.

- b. Replace Policy 1 with the following:
  - 1. Throughout Residential Areas, intensification is permitted through the introduction of the following:
    - A range of building and unit types including accessory dwelling units, single-detached dwellings and semi-detached dwellings.
    - A range of building and units types including townhouses and rowhouses on a site-specific basis.
    - Infill development through the construction of new residential dwellings and buildings on vacant land, additions and structural alterations to existing dwellings, and the demolition and redevelopment of existing dwellings.
    - The consent of lands resulting in the introduction of additional residential dwellings, where appropriate and subject to other policies of this Plan.
- c. Add the following policies after Policy 1:
  - 2. Standards for accessory dwelling units, will be established in the Zoning By-law and shall be consistent with Section 3.6, Accessory Dwelling Units.
  - 3. Limited intensification through consents will be permitted subject to the zoning by-law and compatibility with the scale of the surrounding neighbourhood, the physical suitability of the site to accommodate the proposed infill or intensification, availability of services and road access requirements.

#### Item 7 Section 12.4: Compatibility

- a. Number the first paragraph as Policy 1 and delete the list following the second sentence in paragraph 1 and replace the list with the following:
  - Existing built form of the area;
  - Policies of the Residential Character Area, if applicable;
  - Nature of fenestration and sun reflection impacts;
  - Nature of shadow impacts; and,
  - Existing and emerging built-form elements such as height, massing, setbacks, materials and finishes that are incorporated into surrounding buildings.
- b. Add the following policies to Section 12.4 Compatibility after Policy 1:

- Development will be required to demonstrate how its design fits with the existing character of the surrounding area in the context of:
  - Setbacks, heights and transition;
  - Façade and roofline articulation;
  - Colours and materials;
  - Architectural elements, including windows, doors and projections;
  - Pre- and post-construction grades on site; and
  - Incorporating elements and details of common characteristics of the area.
- c. Delete the second paragraph and replace it with the following as Policy 3:
  - 3. Building heights of mid-rise and high-rise buildings immediately adjacent to a Residential Area should provide an appropriate transition and achieve suitable visual angular planes. Where a building height greater than the existing adjacent context or adjacent public open space is proposed, the development shall demonstrate that an effective transition in height and massing, such as a stepping down or variation in building form has been incorporated into the design.
- d. Number the third paragraph as Policy 4.

#### Item 8 Section 16.0 Implementation

Add the following section and policy as **Section 16.6 Transition** 

#### **Section 16.6 Transition**

#### **Policy**

1. Notwithstanding the policies of OPA No. 28, applications for Official Plan Amendment, Zoning By-law Amendment, Draft Plan of Subdivision or Condominium approval or Site Plan approval which were deemed complete and still in process prior to approval of OPA No. 28, or which were approved by the Town or the Local Planning Appeal Tribunal, are required to conform only with the policies in force at the time of the complete application or approval until the date OPA No. 28 is approved.

#### Item 9 Schedule A: Land Use

Schedule A: Land Use is revised by removing "Stable Residential" and "Emerging Residential" Land Use Designations, combining those lands previously designated as "Stable Residential" and "Emerging Residential" and replacing them with a single "Residential" Land Use Designation as shown on Schedule 1 attached.

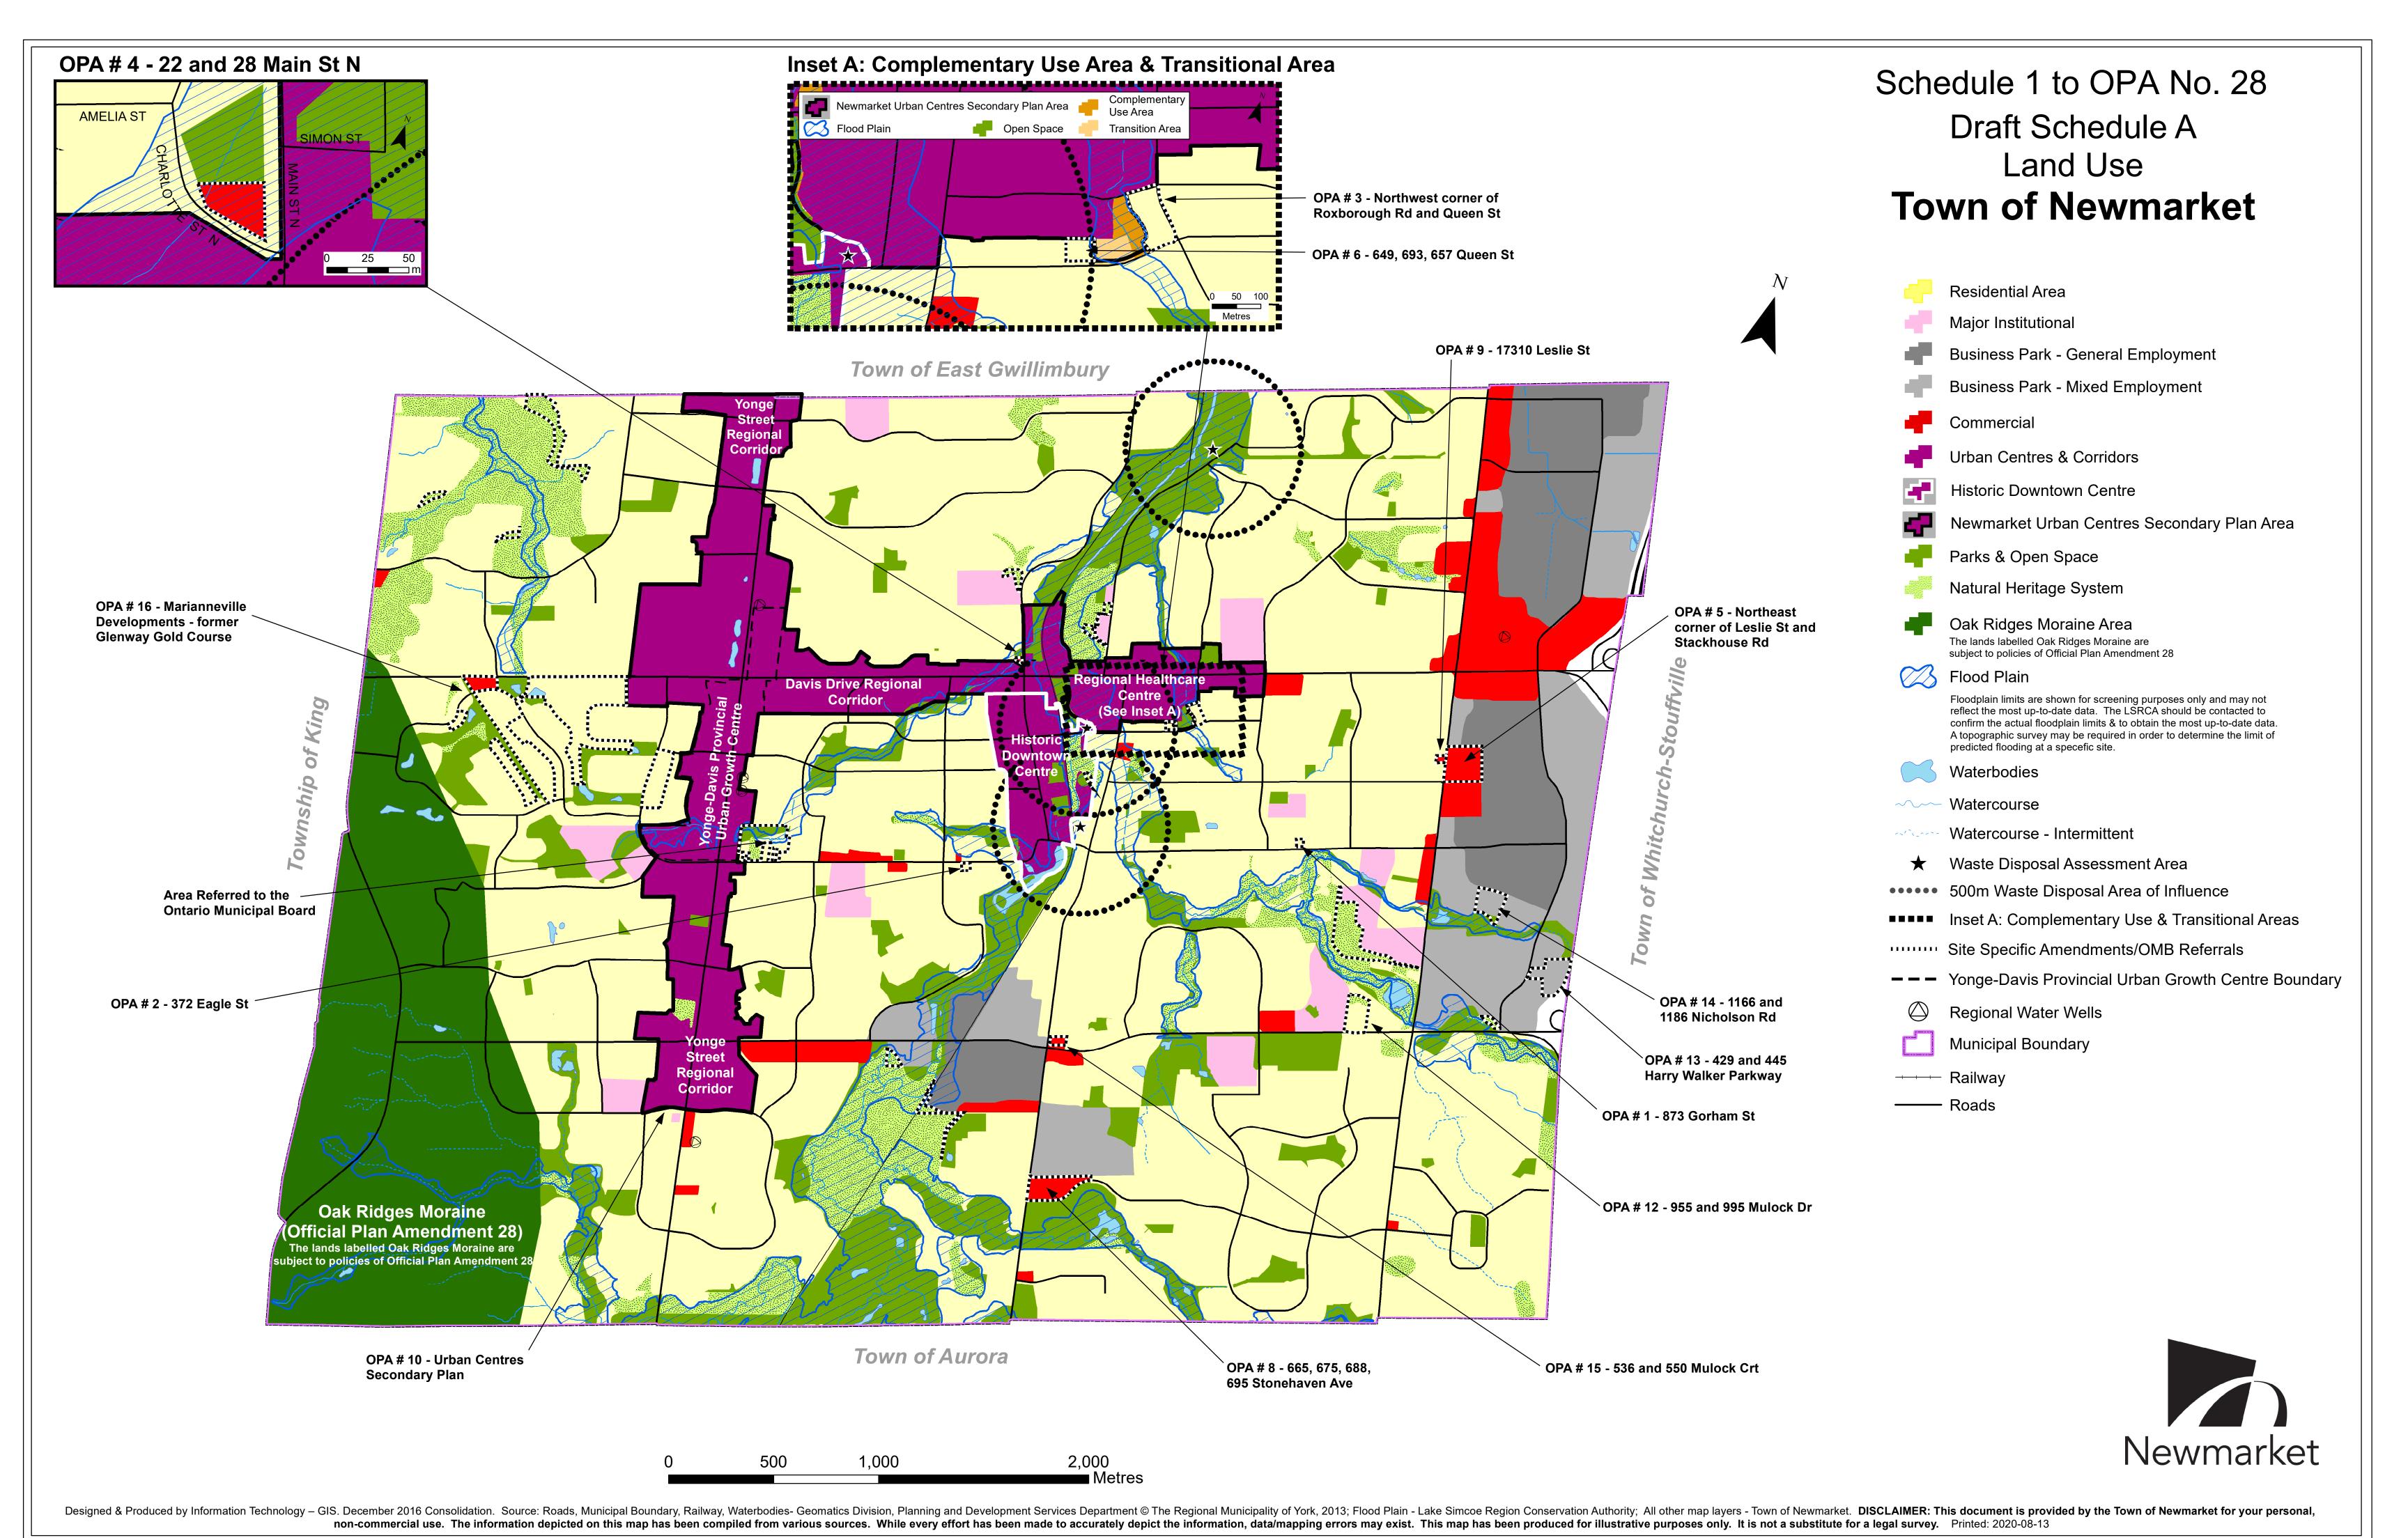

#### Item 10 Schedule I: Residential Character Areas

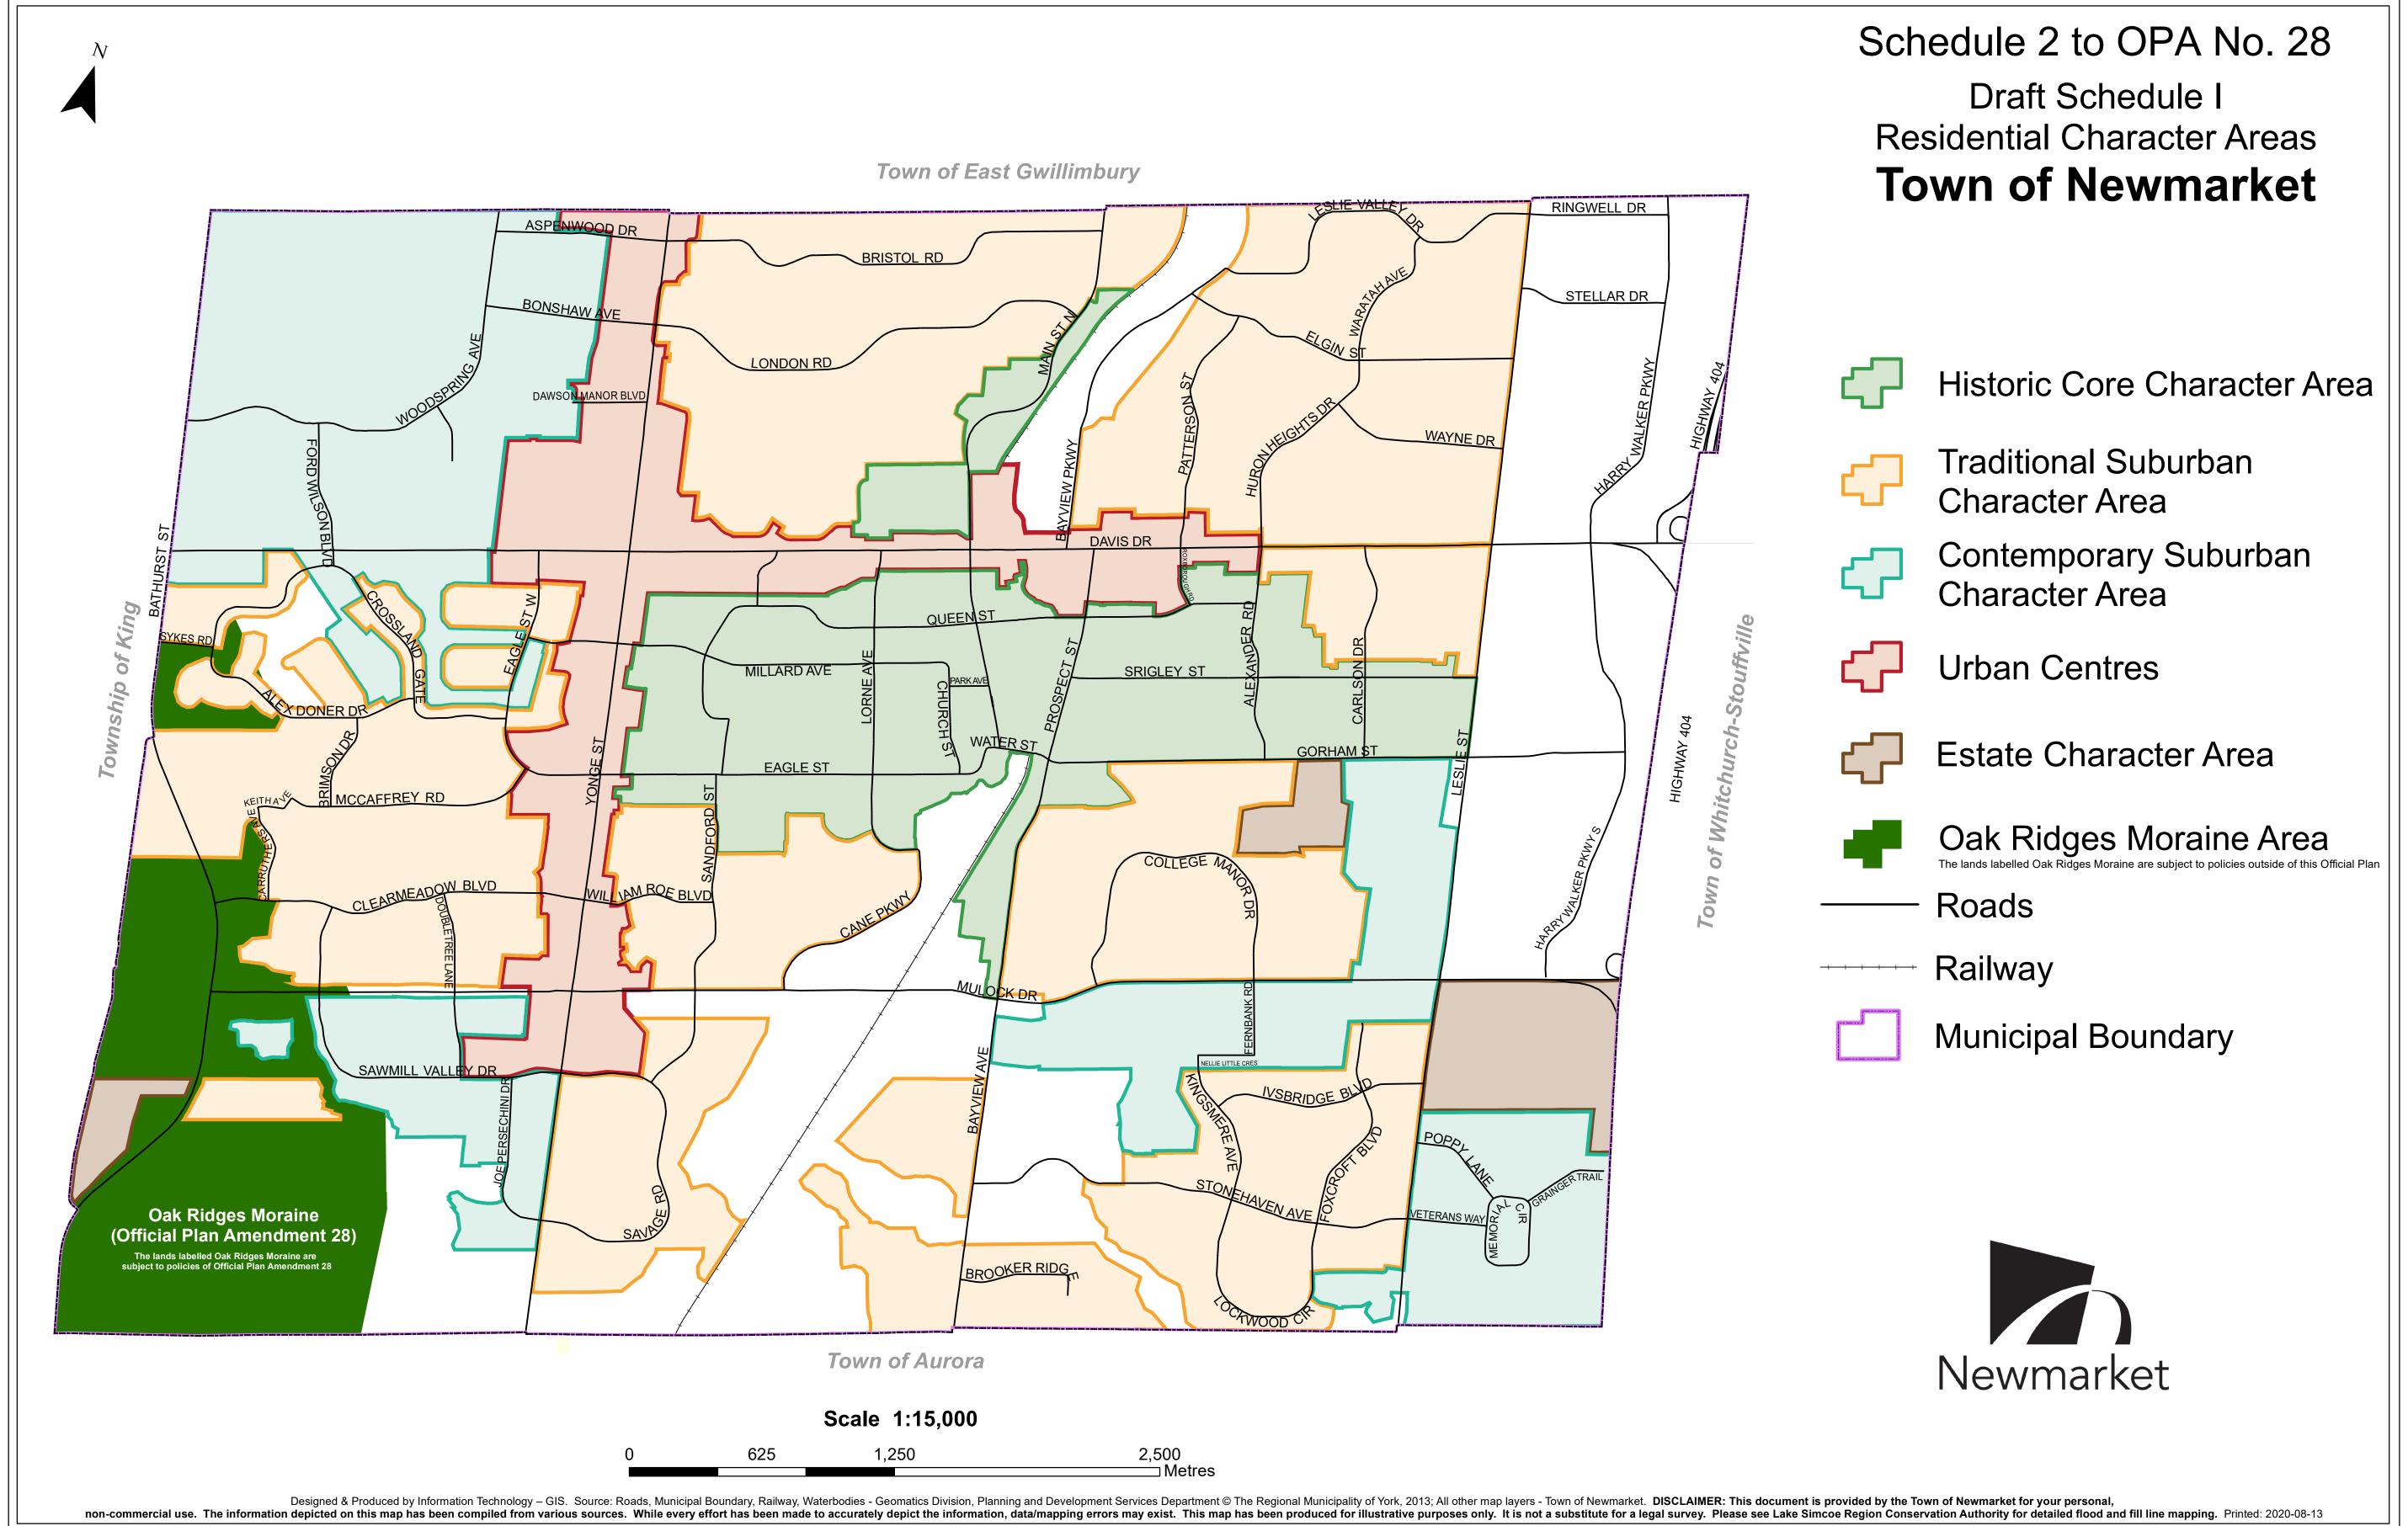

Add the attached Schedule 2 as Schedule I: Residential Character Areas to the Newmarket Official Plan.

#### 3. Schedules

Schedule 1 – Schedule A: Land Use

Schedule 2 – Schedule I: Residential Character Areas

### Corporation of the Town of Newmarket

#### **By-law 2020-XX**

A By-law to amend By-law Number 2010-40, as amended, being the Town of Newmarket Zoning By-law.

Whereas it is deemed advisable to amend By-law Number 2010-40;

Therefore be it enacted by the Council of the Corporation of the Town of Newmarket as follows:

- 1. That Exception 119 enacted by By-law 2013-30 is hereby repealed.
- 2. That By-law Number 2010-40, as amended, is hereby amended as follows:
  - i. **Section 1: Interpretation and Administration** is amended by adding **Section 1.10 Transition** and the following:

This section applies to:

i. <u>Site-Specific Zoning By-law Amendments</u>
All site-specific zoning by-law amendments approved and came into full force and effect pursuant to Section 34 of the *Planning Act* prior to the passing of By 2020-xx shall remain in force.

#### ii. Minor Variances

All minor variances applied for prior to the passing of By-law 2020-XX and approved pursuant to Section 45 of the *Planning Act* continue to apply and remain in force as if they are variances to this By-law for lawfully **existing lots**, **buildings** or **structures**.

Nothing in this By-law shall prevent the erection or use of a **building** or **structure**, for which:

- a. a complete application for a minor variance under Section 45 of the Planning Act was filed on or prior to the date of passing By-law 2020-XX and approved prior to or after the passing of By-law 2020-XX; or
- b. a complete application for a minor variance under Section 45 of the Planning Act was filed and approved after to the date of passing By-law 2020-XX based on a building permit application filed on or prior to the date of passing By-law 2020-XX.

For the purposes of this section, a "complete application for a minor variance" means an application which satisfies the requirements of Section 2 of Ontario Regulation 200/96 (Minor Variance Applications) under the *Planning Act*.

By-law ## Page 1 of 6

#### iii. Building Permit Applications

Nothing in this By-law shall prevent the erection or use of a **building** or **structure** for which an application for a building permit was filed on or prior to the date of passing By-law 2020-XX, if the project in question complies, or the building permit application for the project is amended to comply, with the provisions of the zoning by-law as amended as it existed on the date of passing By-law 2020-XX.

An "application for a Building permit" means an application for a Building permit that satisfies the requirements set out in Building By-law 2015-58 or its successor by-law.

#### iv. Site Plan Approval Applications

Nothing in this By-law shall prevent the erection or use of a **building** or **structure** for a project for which a complete application for site plan approval was filed on or prior to the date of passing By-law 2020-XX, if the project in question complies with the provisions of the applicable zoning by-law on that date, or obtains necessary relief from the zoning by-law through a minor variance under Section 45 of the *Planning Act*.

Where a project qualifies under this Section:

- a. site plan approval may be granted if the project complies with the provisions of the applicable zoning by-law as it read on the date it was amended by By-law 2020-XX and all requirements of the *Planning Act*.
- b. after final site plan approval is received for a project that qualifies under Section 1.10 (iii), a building permit for that project may be issued if the project in question complies, or the building permit application for the project is amended to comply, with the provisions of the applicable zoning by-law as it read on the date it was amended by By-law 2020-XX, the site plan approval, and all finally approved minor variances.

For the purposes of this section, a "complete application for site plan approval" means an application which satisfies the requirements set out in the Town of Newmarket Official Plan.

#### v. <u>Transition Clause Duration</u>

Nothing in this By-law applies so as to continue the application of Section 1.10 beyond the issuance of the building permit upon which the exemptions are founded.

#### ii. Section 3: Definitions is amended as follows:

a. Delete the definition of **Basement** and replace it with the following:

Means a portion of a building that is underground, which has more than one third of its height above finished grade but where the height above finished grade does not exceed:

- 1.2 metres for lots Zoned R1, R2 or R3; or,
- 1.8 metres for lots in all other Zones.

b. Add the term **Dormer** and the following definition:

Means a roof structure, often containing a window, which projects both vertically and horizontally beyond the plane of a pitched roof, occupying an area equal to or less than 30% of the total horizontal roof area on each side of the roof.

c. Delete the definition of **Grade**, **Established or Finished** and replace it with the following:

#### "Means

For single detached dwellings, semi-detached dwellings, duplex dwellings, triplex dwellings, and fourplex dwellings, the average elevation of the ground, measured at the two points where the front yard meets adjacent side lot lines;

For all other structures, the average of the levels of the finished ground surface at every location of change of grade along the exterior walls of a building or structure."

d. Revise the term **Height** to **Height**, **Building** and replace the definition with the following:

"Means the vertical distance measured between the established or finished grade and any of the following:

- On a flat roof or mansard roof, the highest point of the roof surface or the parapet, whichever is greater;
- On a gable, hip or gambrel roof, or any other type of pitched roof, the mean distance between the eaves and ridges of the roof; or,
- The highest point of a structure without a roof."
- e. Add the term **Height, Finished First Floor** and the following definition:

"Means the finished height of the first floor of a building, inclusive of the entryway or landing, occupying an area greater than or equal to 50% of the total horizontal first floor area, and measured relative to the elevation of established or finished grade."

f. Add the term **Roof**, **Flat** and the following definition:

"Means a roof with a slope of less than 1.0 vertical units for every 4.0 horizontal units, occupying an area greater than or equal to 50% of the total horizontal roof area."

g. Add the term Roof, Pitched and the following definition:

"Means a roof with a slope of greater than 1.0 vertical units for every 4.0 horizontal units, occupying an area greater than or equal to 50% of the total horizontal roof area."

h. Revise the term **Garage**, **Residential** by adding "accessed via a driveway" after "Means an enclosed building or part thereof", as follows:

"Means an enclosed building or part thereof, accessed via a driveway, located within a Residential Zone that is used for the storage of private motor vehicles, recreational vehicles and trailers."

i. Delete the definition of **Storey** and replace it with the following:

#### "Means

For single detached dwellings, semi-detached dwellings, duplex dwellings, triplex dwellings, and fourplex dwellings a level of a building located between the surface of a floor and the ceiling or roof immediately above it, and includes a mezzanine but does not include a basement or cellar. Any portion of a building partly below grade shall be deemed a storey where its ceiling is more than 1.2m above established grade.

For all other structures, a level of a building located between the surface of a floor and the ceiling or roof immediately above it, and includes a mezzanine but does not include a basement or cellar. Any portion of a building partly below grade shall be deemed a storey where its ceiling is more than 1.8m above established grade. Any portion of a storey exceeding 3.6 metres in height shall be deemed to be an additional storey."

#### iii. Section 4: General Provisions is amended as follows:

Add the following to the table in Section 4.2 Encroachments into Required Yards:

| Permitted<br>Structure or<br>Feature | Applicable<br>Required<br>Yard(s)           | Required Setback or Permitted Encroachment                      |  |  |
|--------------------------------------|---------------------------------------------|-----------------------------------------------------------------|--|--|
| STRUCTURAL AND ORNAMENTAL FEATURES:  |                                             |                                                                 |  |  |
| Driveway                             | Permitted in any yard of a residential zone | Subject to:  i. Limits of Section 6.2 ii. Limits of Section 5.5 |  |  |

b. Add the following provision as **Section 4.9.2 Exception** and renumber Valid Building Permit in Effect as Section 4.9.3:

#### Section 4.9.2 Exception

Notwithstanding Section 4.9.1 (iii), a building or structure having a non-complying maximum finished first floor height may be enlarged, repaired or renovated, but the reconstruction of such building or structure shall comply with the maximum finished first floor height in accordance with Section 6.2.2.

- c. Delete **Section 4.13 Conformity with an Established Building Line**.
- d. Add **Section 4.24 0.3m Reserve** and the following provisions:

#### Section 4.24 0.3m Reserve

For the purposes of this By-law, a 0.3 m reserve shall:

- i. be considered to be part of the abutting road for the purposes of determining lot lines, and
- ii. be considered part of the adjacent lot for the purposes of determining setbacks and coverage.

This regulation does not deem the lot to abut a street from which it is separated by a 0.3 metre reserve.

#### iv. Section 6.2.2 Zone Standards is amended as follows:

a. Delete column Ex. 119 from the table.

- b. In the row **Maximum Lot Coverage**, add "Refer to Schedule D" in the columns for Zones A, B, C, D, E, F, G, H, J and K.
- c. Replace the term Max. Height with Max. Building Height.
- d. Delete the **Max. Building Height** provisions for Zones A, B, C, D, E, F, G, H, J and K and replace them with "8.5m".
- e. Add a row to the table for **Max. Finished First Floor Height** and insert "1.2m" in the columns for Zones A, B, C, D, E, F, G, H and J.
- f. Delete "Each Side 1 Storey"; "Each Side 1.5 Storeys", and "Each Side 2 Storeys" in the table under **From Interior Side**Lot Line and replace them with "Up to 4.2m Building Height"; "Up to 5.7 Building Height" and "Beyond 5.7m Building Height" respectively.
- g. Delete the **Min. Yard Setback from Front Lot Line** provisions for Zones C, D, E, F, G, H, J, K, L and M and replace them with (\*16).
- h. In the row **Exterior Side Lot Line,** add (\*18) for Zones C, D, E, F, G, H, J and K.
- v. Section 6.2.3 Additional Requirements for Residential Zones is amended as follows:
  - a. Delete the first paragraph and replace it with the following:
    - i. The following additional requirements apply to the regulatory sets for the Residential Zones as shown throughout Section 6.2.2. Where marked by an asterisk and number, that number refers to the standard that is varied by the clause. Where indicated as a regulation (i) (ii) (iii) that regulation describes its effect and application.
  - b. Add the following provision after the first paragraph:
    - ii. For residential lots, the minimum amount of soft landscaping in a yard is the area of the yard less any permitted encroachments.
  - c. Add the following additional requirements after (\*15):
    - (\*16) The minimum front yard setback shall be one metre less than the average of the front yard setback of adjacent dwellings located within 60 metres on the same road, but shall not be closer to the street line than 3m.

In addition to the above, the proposed front yard setback shall not be further from the street line than one metre greater than the average of the front yard setback of adjacent dwellings located within 60 metres on the same road.

- (\*17) For a semi-detached dwelling the setback shall not apply where a side lot line extends from a common wall dividing attached dwelling units.
- (\*18) The minimum exterior side yard setback requirement shall be one metre less than the average of the front yard or exterior side yard setbacks of the adjacent dwelling(s) located within 60 metres on the same side of the road as the exterior side lot line, but it shall not be less than the minimum prescribed in Section 6.2.2.

In addition to the above, the proposed exterior side yard setback shall not be further from the exterior side lot line than one metre greater than the average of the front yard or exterior side yard setbacks of the adjacent dwelling(s) located within 60 metres on the same side of the road as the exterior side lot line.

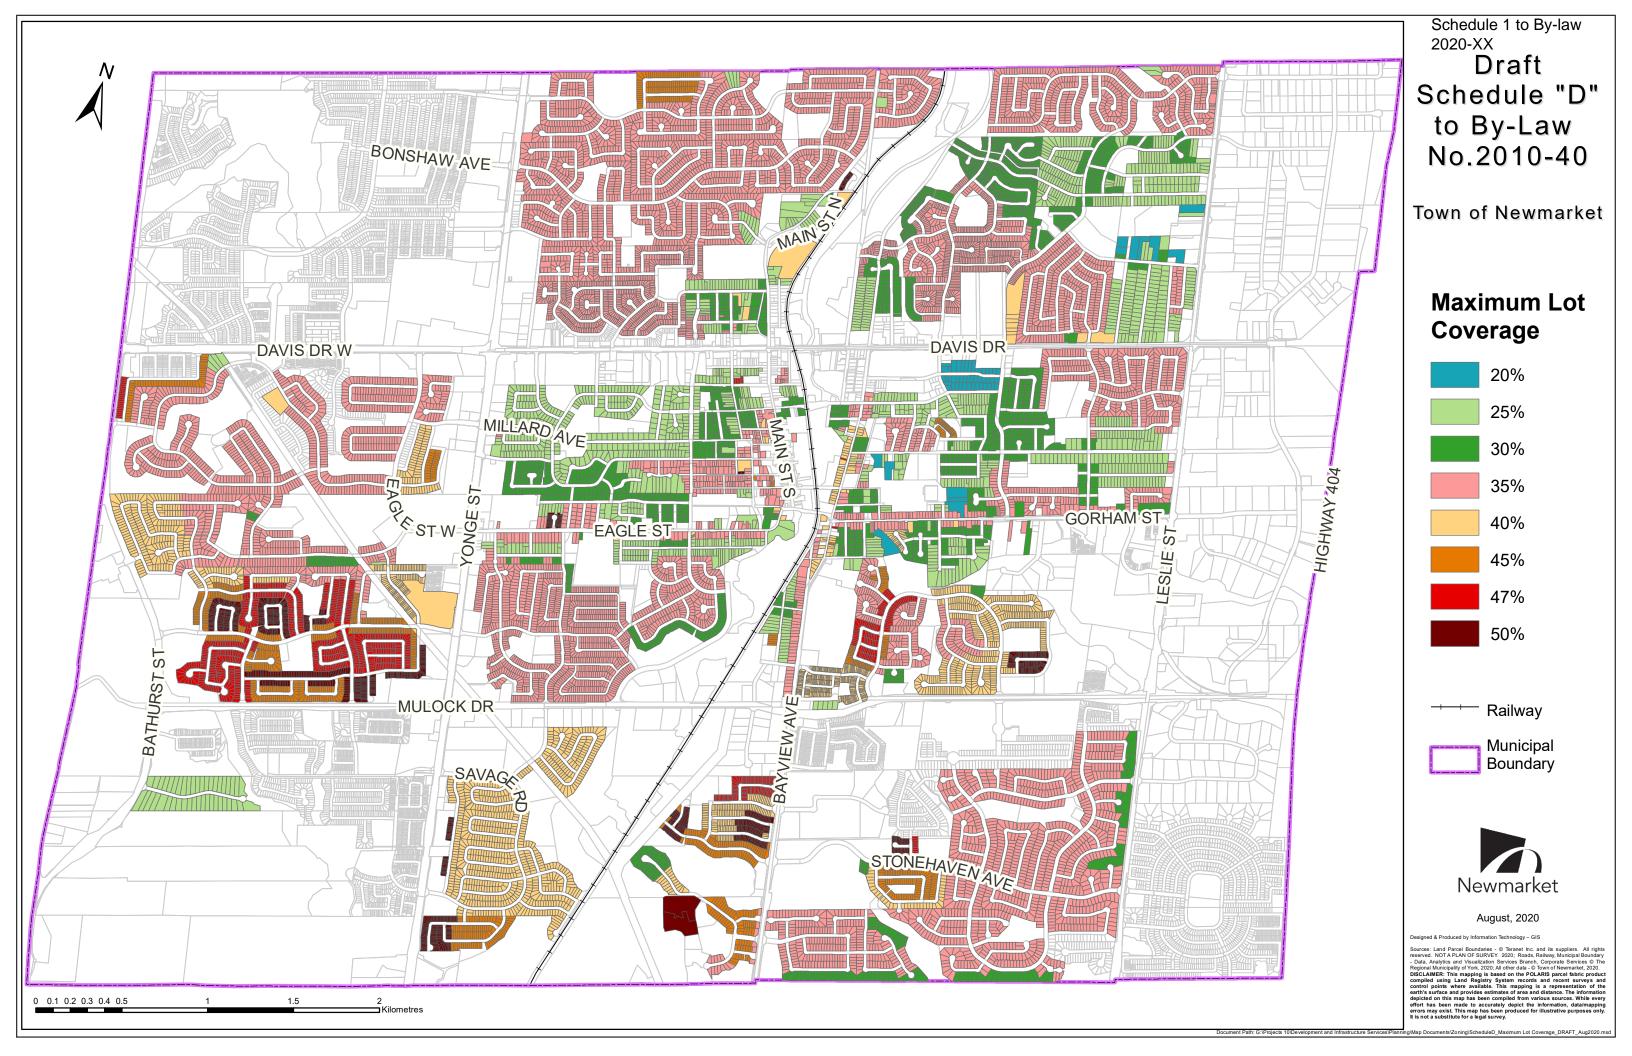

#### vi. Schedule A (Maps)

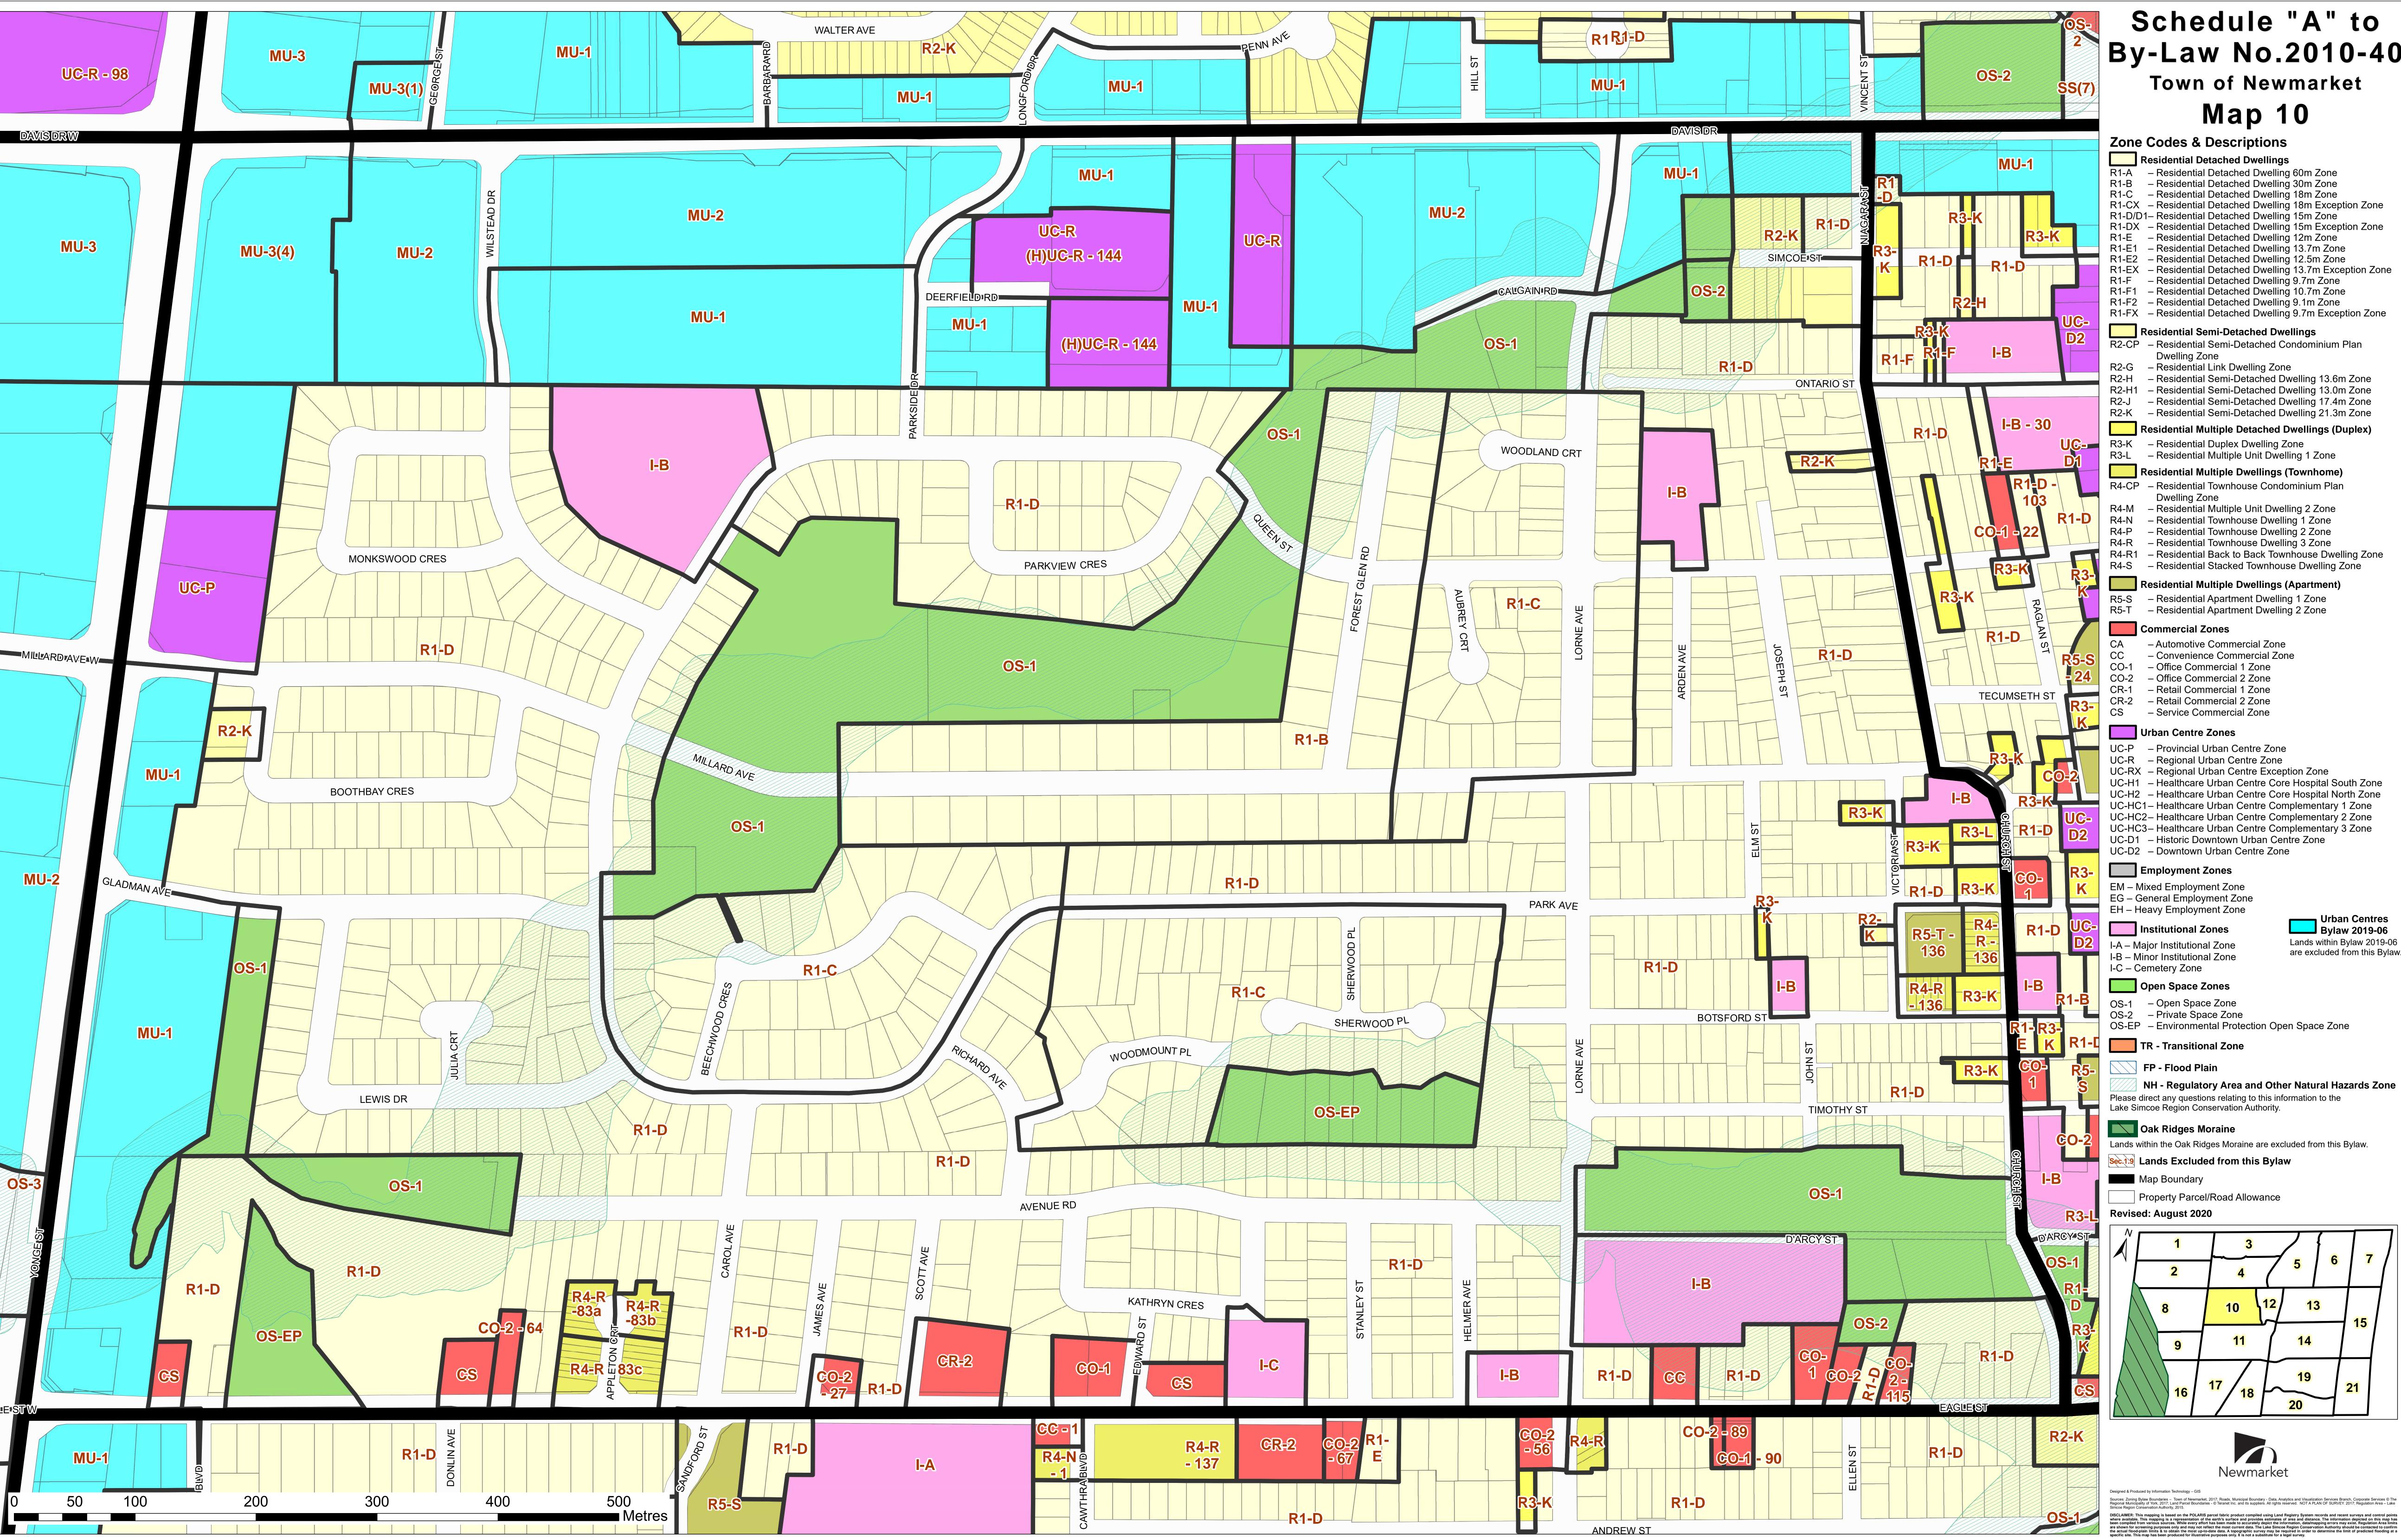

- a. Add the attached Schedule 1 as Schedule D: Lot Coverage to By-law 2010-40, as amended.
- b. Delete Schedule A Maps 10 and 13 and replacing them with Schedules 2 and 3 attached as new Schedule A Maps 10 and 13.
- 3. That Schedules 1, 2 and 3 attached to this by-law are declared to form part of this by-law.

Enacted this xxx day of xxx, 2020.

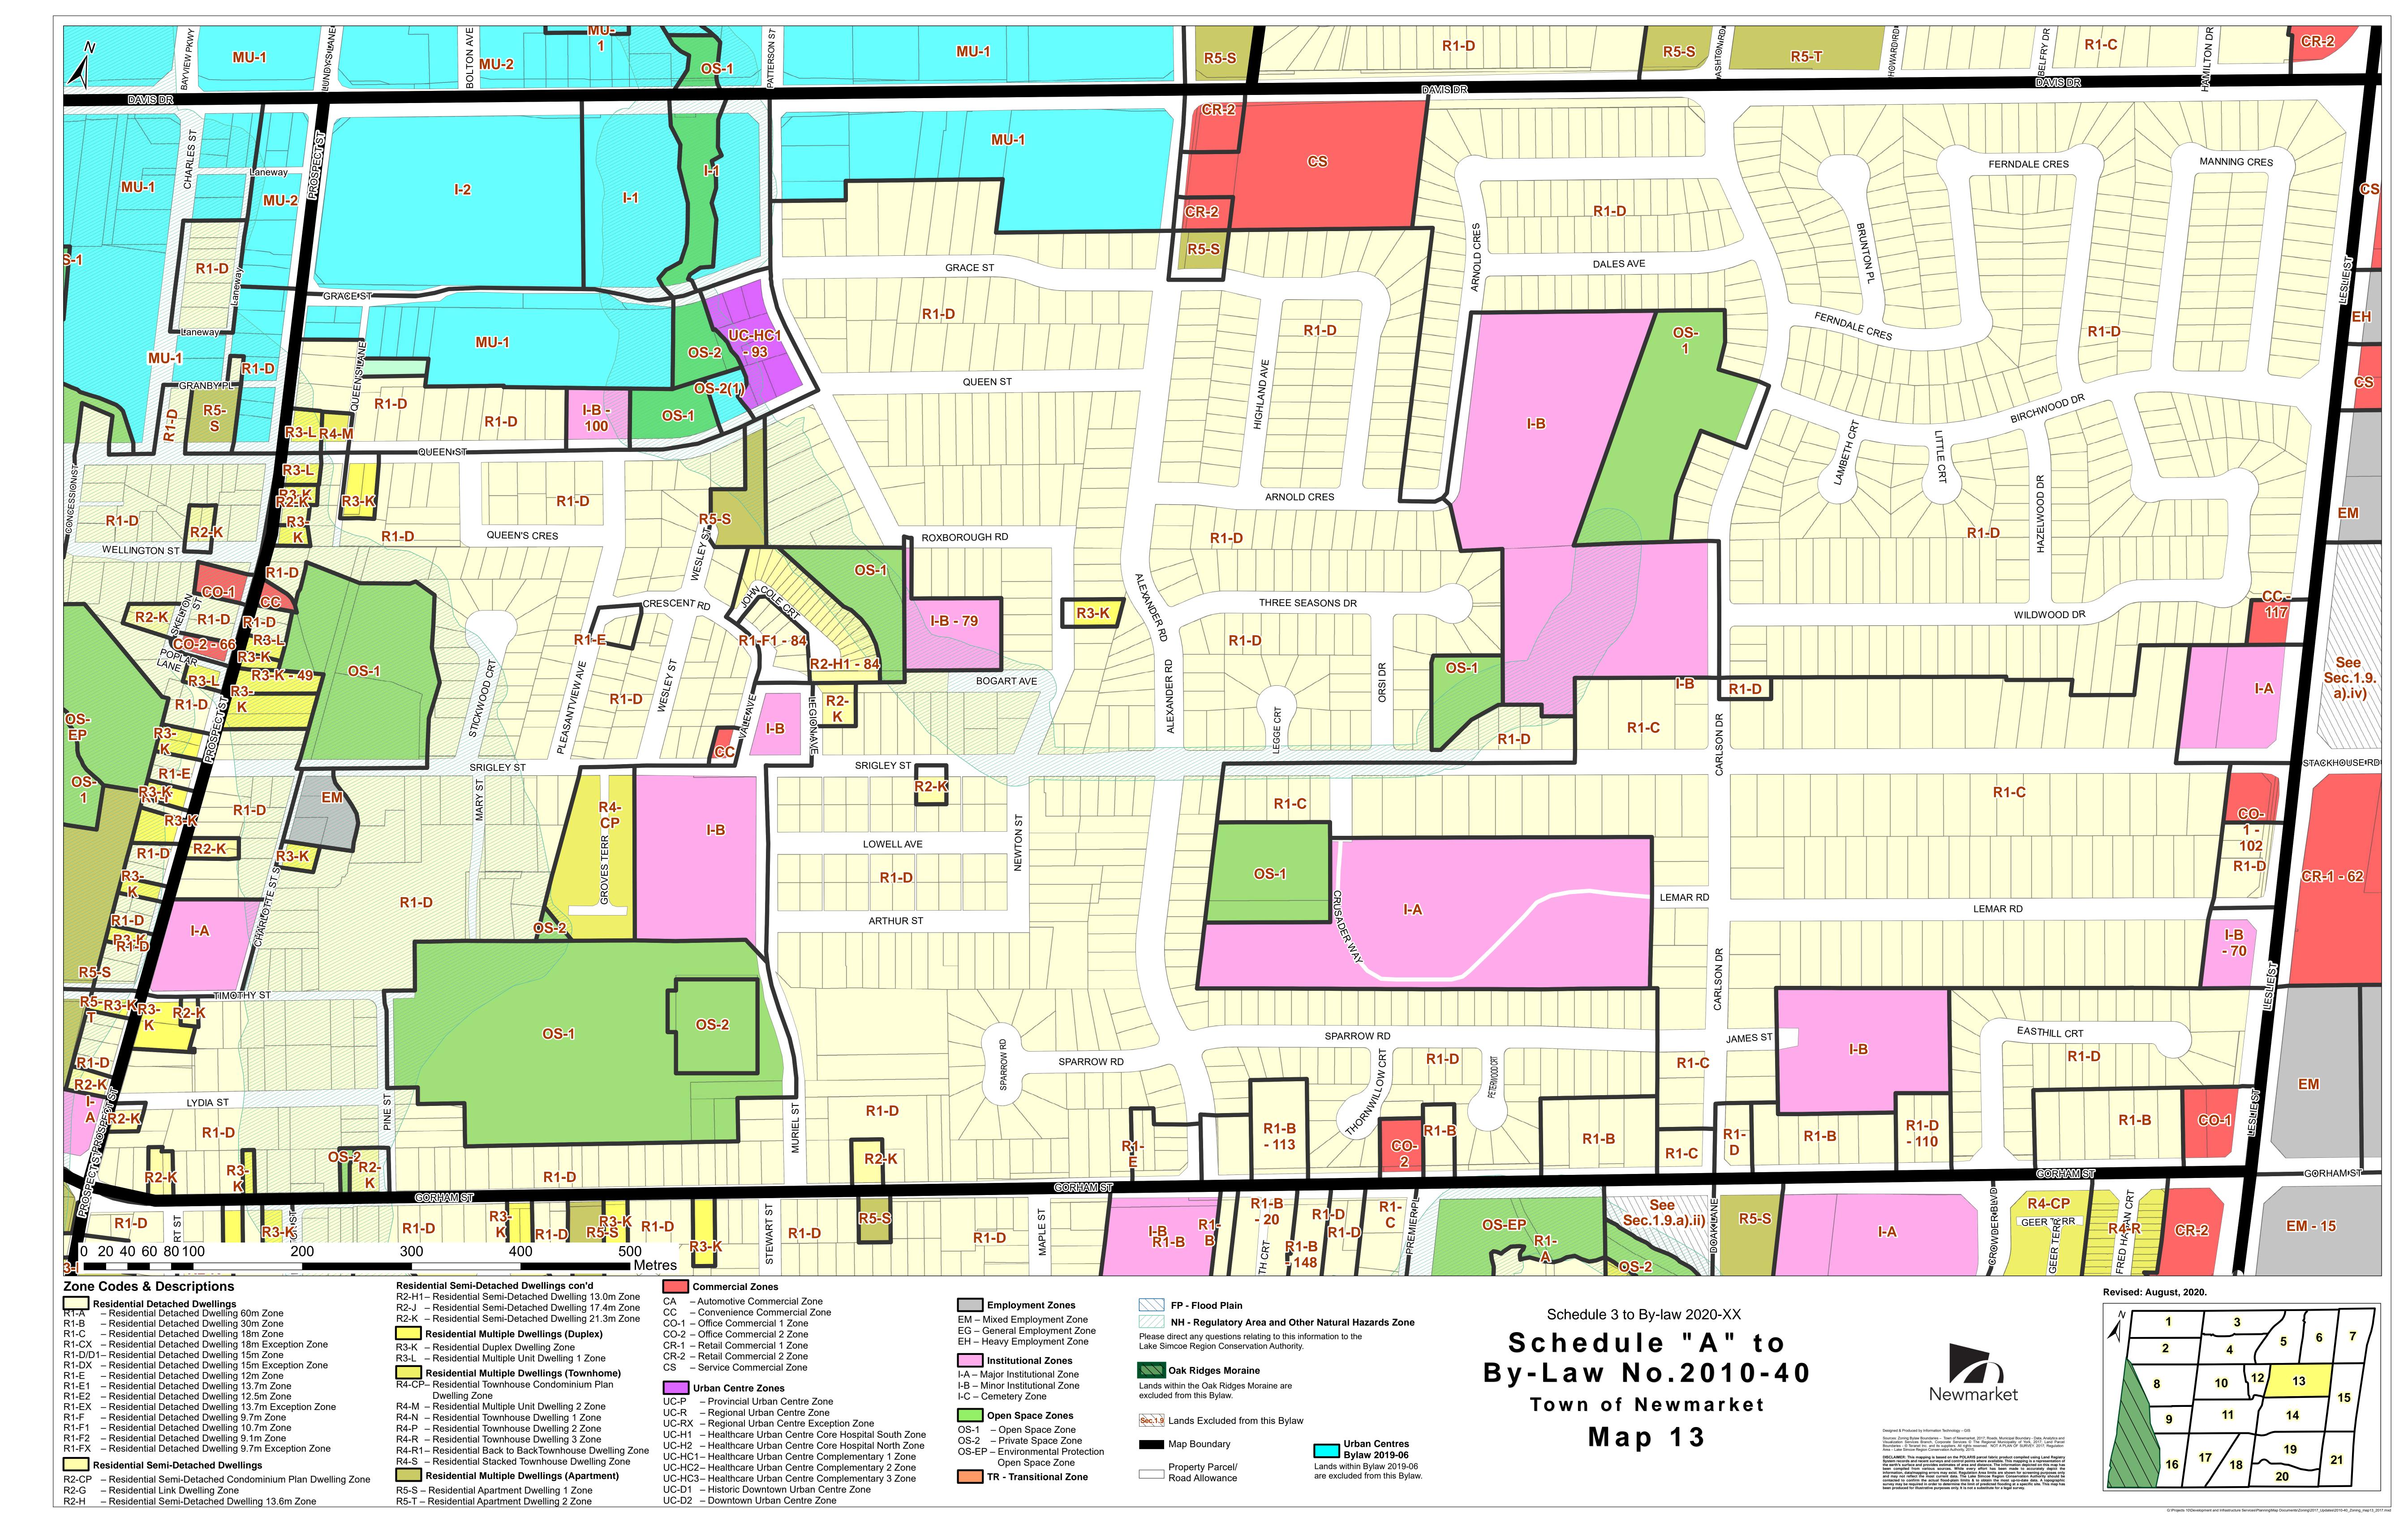

John Taylor, Mayor

Lisa Lyons, Town Clerk

# TOWN OF NEWMARKET ESTABLISHED NEIGHBOURHOODS COMPATIBILITY

## SIDE YARD DEMONSTRATION WITHIN NEWMARKET

STUDY

**OPTIMIZED BUILT OUT** 

OPTION 1

- » Coverage: 30%
- **» Height:** 1 storey < 4.2m
- **Front Setback:** Within the 1m range of the average of adjacent dwellings.
- **» Side Setback:** Within 1.8m and 4.2m minimum as per Regulatory Set B requirements.
- **Depth of Dwelling:** Within the 7.5m minimum and aligns with adjacent dwellings.

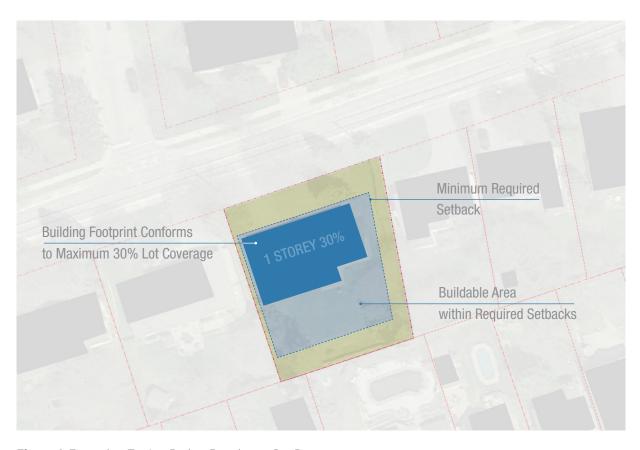

Figure 1. Example - Zoning By-law Regulatory Set B

The above example illustrates the maximum build-out potential of a 1 storey dwelling, with a maximum 30% lot coverage permission, in a Zoning By-law Regulatory Set B condition. The development generally respects, and is compatible with, the prevailing rhythm of existing frontages, side yard setbacks, building depths, and building heights.

**OPTIMIZED BUILT OUT** 

**OPTION 2** 

- » Coverage: 25%
- **» Height:** 1 storey < 4.2m
- **Front Setback:** Within the 1m range of the average of adjacent dwellings.
- **» Side Setback:** Within the 1.2m minimum for 1 storey dwelling < 4.2m.
- **Depth of Dwelling:** Within the 7.5m minimum and aligns with adjacent dwellings.

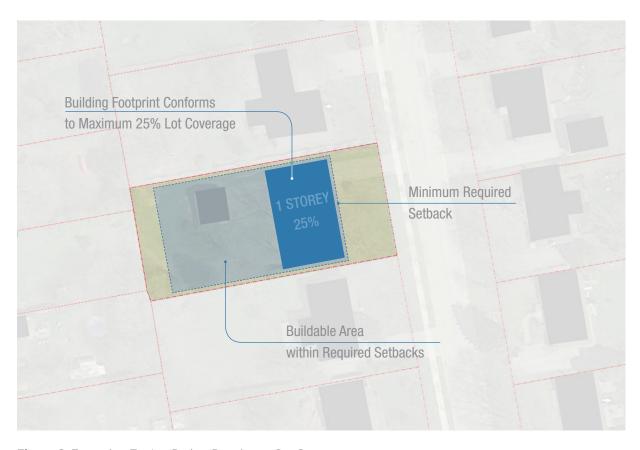

Figure 2. Example - Zoning By-law Regulatory Set C

The above example illustrates the maximum build-out potential of a 1 storey dwelling, with a maximum 25% lot coverage permission, in a Zoning By-law Regulatory Set C condition. The development generally respects, and is compatible with, the prevailing rhythm of existing frontages, side yard setbacks, building depths, and building heights. While it results in a reduction in side yard setbacks, relative to existing adjacent development, these impacts are minor in nature, and do not compromise the character of the surrounding neighbourhood.

**OPTIMIZED BUILT OUT** 

**OPTION 3** 

**» Coverage:** 35%

» Height: 1 storey < 4.2m</p>

**Front Setback:** Within the 1m range of the average of adjacent dwellings.

**» Side Setback:** Within the 1.2m minimum for 1 storey dwelling < 4.2m.

**Depth of Dwelling:** Within the 7.5m minimum and aligns with adjacent dwellings.

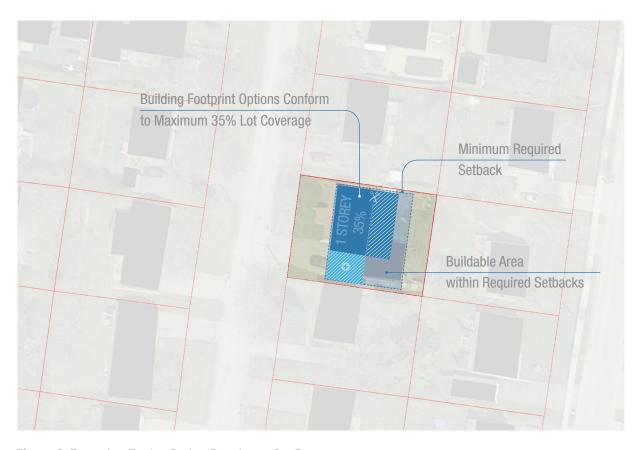

Figure 3. Example - Zoning By-law Regulatory Set D

The above example illustrates the maximum build-out potential of a 1 storey dwelling, with a maximum 35% lot coverage permission, in a Zoning By-law Regulatory Set D condition. Option 1, which is illustrated in dark blue, generally respects, and is compatible with, the prevailing rhythm of existing frontages, side yard setbacks, building depths, and building heights. Option 2, which is illustrated in light blue, also generally reflects prevailing site and building design conditions, but is less in keeping with developments which are immediately adjacent in terms of side yard setback conditions. However, its shallow depth does not generally reflect modern design standards, and does not allow for the optimization of interior layouts. Therefore, it is unlikely to be utilized as the basis of designing a new residential dwelling.

**Town Clerk** 

Re: Comment Letter re: Established Neighbourhood Compatibility Study

Item 6.1 - Committee of the Whole Meeting - Oct. 26, 2020

**NSD2M Corporation** 

Humphries Planning Group Inc. ('HPGI') is the planning consultant for NSD2M Corporation the legally registered owner of the land described as Lot 11, Plan 344, and municipally known as 66 Roxborough Road, in the Town of Newmarket (the "Subject Site"). Further to our previous comment letter, we provide herein a further request to the Town in relation to the Established Neighbourhood Compatibility Study (ENCS) in which an update will brought forward to the Committee of the Whole on October 26, 2020.

In the latest Official Plan Amendment (OPA) and Zoning By-law Amendment (ZBLA) documents issued by the Town, we note that the Town has provided Transition policies that recognize that any OPA, ZBLA, Draft Plan of Subdivision, Draft Plan of Condominium and Site Plan applications that have been deemed to be 'complete' and are currently under review would not be subject to the proposed OPA. We appreciate that the Town has taken consideration in recognizing ongoing planning applications, with status, that were deemed complete prior to the implementation of the OPA 28 and we support the change to the transition policies.

The purpose of this letter is to request that Town staff to provide further clarification on the proposed revisions to the draft OPA with regard to the transition policies. Particularly, it is unclear how the proposed Transitional policies might be applied to future planning applications to implement the proposed Official Plan Amendment and Zoning By-law Amendment applications after approval. We respectfully request staff please clarify such.

190 Pippin Road Suite A Vaughan ON L4K 4X9 Page 2 of 2

to include specific wording to recognize subsequent implementing planning applications which may include; Site Plan Approval, Draft Plan of Subdivision, Draft Plan of Condominium, and Part Lot Control, for the OPA and ZBLA applications currently in place.

Further to our comments above, the Town should also consider the following wording added, as section 16.6.2, in order to appropriately implement the Transitional policies for ongoing and future planning applications. The following wording is based on utilizing the Greenbelt Plan (2017) transition policies as an example and reads as follows:

16.6.2

"Where an Official Plan Amendment or Zoning By-law Amendment under Section 16.6.1 was submitted and deemed complete or amended prior to approval of OPA 28, any further applications required under the *Planning Act* or the *Condominium Act*, 1998 to implement the Official Plan Amendment or Zoning By-law Amendment approval are not subject to the OPA 28."

To conclude, we request that the Town undertake further review of the Transitional policies in order to recognize future implementing planning applications. We ask that this request be considered by Town planning staff as part of the Established Neighbourhood Compatibility Study.

Yours truly,

HUMPHRIES PLANNING GROUP INC.

# Urban Centres Secondary Plan and Zoning By-law Technical Amendments - Final Recommendations Staff Report to Council

Report Number: 2020-75

Department(s): Planning and Building Services Author(s): Phoebe Chow, Senior Planner - Policy

Meeting Date: October 26, 2020

#### Recommendations

- 1. That the report entitled Urban Centres Secondary Plan and Zoning By-law Technical Amendments Final Recommendations dated October 26, 2020 be received; and,
- 2. That the attached Official Plan Amendment No. 25 be adopted; and,
- 3. That Staff be directed to forward the attached Official Plan Amendment No. 25 to the Regional Municipality of York for approval; and,
- 4. That upon Regional approval of Official Plan Amendment No. 25, Staff be directed to bring the attached Zoning By-law Amendment to a future Council meeting for approval; and,
- 5. That Staff be authorized and directed to do all things necessary to give effect to this resolution.

#### **Executive Summary**

The Urban Centres Secondary Plan and Zoning By-law came into effect in 2015 and 2019, respectively. The proposed technical amendments are necessary to provide clarity and to correct inconsistencies between and within these documents.

The proposed changes were circulated to internal departments and external agencies for review. The draft amendments were also presented at a Statutory Public Meeting on

Urban Centres Secondary Plan and Zoning By-law Technical Amendments – Final Recommendations

July 27, 2020. All comments received have been addressed in this report and/or in the attached Official Plan Amendment and Zoning By-law Amendment.

#### **Purpose**

The purpose of this report is to recommend adoption of the attached Official Plan Amendment (OPA No. 25) and to seek Council's direction to forward the same to York Region for approval. In addition, this report also seeks direction from Council that upon the approval of OPA No. 25, staff be directed to bring the attached Zoning By-law Amendment to a future Council meeting for approval.

#### **Background**

The Urban Centres Secondary Plan (Secondary Plan) came into effect on April 30, 2015. Subsequently, the Town prepared a zoning by-law for the secondary plan area and Zoning By-law 2019-06 came into effect on June 10, 2019. When applying these policies and zoning provisions to development proposals in the Urban Centres, staff have identified a number of technical amendments that are necessary to implement the vision and intent of the Secondary Plan and Zoning By-law 2019-06. The majority of the proposed changes were outlined in <a href="staff-report 2019-85">staff-report 2019-85</a>. A statutory public meeting was held on July 27, 2020.

#### **Discussion**

The proposed Official Plan Amendment and Zoning By-law Amendment are attached to this report as Attachments 1 and 2. The following subsections summarizes the proposed amendments.

#### **Proposed Official Plan Amendment**

The proposed changes to the Official Plan (Urban Centres Secondary Plan) are described in Part A - Preamble of OPA No. 25 in Attachment 1. Generally, the proposed changes can be summarized as follows:

- Revise language to align with Provincial and Regional planning documents or to clarify intent of policies;
- Revise designations of certain properties to clarify intended development permissions in supporting the goal of the Secondary Plan;
- Add new policy to permit temporary stand-alone surface parking lots within the Regional Healthcare Centre, subject to the following:
  - Obtaining Council's approval for a temporary zoning by-law;
  - Providing a Built Out Demonstration Plan to show how the development will not preclude full built-out in accordance with the Secondary Plan in the future; and,

Urban Centres Secondary Plan and Zoning By-law Technical Amendments - Final Recommendations Page 2 of 7

- Provide adequate screening from the public street;
- Update schedules to reflect current Lake Simcoe Region Conservation Authority's Floodplain mapping; and,
- Refine land use designations and density permissions for a limited number of identified properties.

#### **Proposed Zoning By-law Amendment**

The proposed Zoning By-law Amendment (see Attachment 2) can be summarized in Table 1 below:

Table 1 Summary of Proposed Zoning Changes

#### Clerical

• Correct the effective date and by-law number of other by-laws referenced in Section 1.9 Transition Clause and Section 1.10 Repeal of Former By-law sections.

#### Update definitions and diagrams to clarify terms in the by-law

- Update the definition of Floor Space Index to align with the proposed definition of "Land Area" in OPA No. 25, and
- Update the diagram that describes the definition of Daylighting Triangle to provide clarity.

#### Clarify permitted uses, minimum setbacks and parking requirements

#### Permitted Uses

- Add "Place of Assembly" and "Medical Office" as permitted uses in Mixed Use Zone, and
- Remove "Convenience Store" as permitted use in Institutional Zone.

#### Parking

- Clarify the number of required carpooling parking spaces for non-residential uses;
- · Add parking requirements for Retirement Residence, and
- Clarify that parking spaces can only be permitted in side yard or rear yard for lots front onto Davis Drive or Yonge Street.

#### Podium Height

 Clarify podium height requirements based on the overall height of the particular building.

#### Setbacks

- Clarify setback requirements from Yonge Street or Davis Drive and in corner lot situation, setback from the other public street, and
- Replace and add diagrams to clarify setback requirements.

#### Revise zoning to conform with the Secondary Plan

#### 22 and 23 Bolton Avenue and 27 Lundy's Lane

Rezone all three properties from "Mixed Use 1 (MU-1) Zone" to "Mixed Use 2 (MU-2) Zone" to be in conformity with the density permission in OPA No. 25.

#### 460 Davis Drive

 Rezone the northern half of the property from "Mixed Use 1 (MU-1)" to "Open Space 2 (OS-2). The southern half of the property will remain as MU-1 Zone. The proposed zoning will be in conformity with OPA No. 25.

#### 200 Lancaster Avenue

 Rezone the entire property from "Site-Specific (1) (SS(1)) Zone" to "Mixed Use 1 (MU-1) Zone" to be in conformity with the Mixed Use designation in the Secondary Plan.

#### **Holding Zones**

• Remove Holding (H) Zone from lands that have been identified in the Secondary Plan in the locations of future private road/laneways.

#### **Update Schedules/Maps**

- Reflect current Lake Simcoe Region Conservation Floodplain mapping;
- Align zoning and height permissions with Secondary Plan Land Use and Density permissions, and
- Remove holding provisions on lands that have identified to provide future private street/laneways.

Click or tap here to enter text.

#### Conclusion

The proposed amendments to the Urban Centres Secondary Plan and Zoning By-law 2019-06 address a number of technical issues that have been identified since these documents came into effect. The amendments are intended to provide greater clarity and consistency to guide development in the Urban Centres.

#### **Business Plan and Strategic Plan Linkages**

- Extraordinary Places and Space
- Vibrancy on Yonge, Davis and Mulock

#### Consultation

 The proposed draft amendments were circulated to commenting agencies for review.

Urban Centres Secondary Plan and Zoning By-law Technical Amendments - Final Recommendations Page **4** of **7** 

- The statutory public meeting was held on July 27, 2020.
- Staff met with various landowners and interested parties and gathered their input on the proposed amendments. All comments received to date and staff's recommendations have been summarized in the following subsections.
- As per Council's direction, supplementary information packages were sent to local councillors where the proposed amendments may be of increased interest.

#### **Public Comments**

Comments received from members of the public and how they have been addressed are summarized in Table 2 below.

Table 2 Comment Matrix - Public Comments

| Comment received                                                                                                                                                                                                                                             | Staff's Recommendation                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Do not refine the Natural Heritage Systems (NHS) designation on the Criterion north site (north of Mulock Estate)                                                                                                                                            | The proposed refinement to the NHS designation is to align the designation with the existing zoning. The existing Open Space (OS-3) Zone boundary on the property was based on a Natural Heritage Assessment that determined the limits of the woodland, which was reviewed by the Lake Simcoe Region Conservation Authority. The Natural Heritage Assessment also recommended an additional 3m buffer to be protected. The proposed NHS designation boundary will include the woodland and the 3m buffer. |
| Revise OPA No. 25 to require new development to <u>address</u> recommendations from the Community Energy Plan in a Sustainability Development Report, instead of requiring new development to <u>implement</u> recommendation from the Community Energy Plan | Staff have no objection to this comment and revision has been made to OPA No. 25.                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Provide additional language to clarify uses permitted by the zoning-by are permitted prior to the removal of Holding (H) zone                                                                                                                                | Staff have no objection to this comment and revision has been made to the draft Zoning By-law Amendment.                                                                                                                                                                                                                                                                                                                                                                                                   |

| Comment received                                                                                                                                                                                            | Staff's Recommendation                                                                                                                                                                                                                                                                                                                                                                                                                          |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Private Street/Laneway policy is overly prescriptive in that it requires new private access to provide connectivity within the Urban Centres                                                                | Staff acknowledge that not all private laneways/streets will provide connectivity to adjacent properties. The intent of this policy applies to the private streets/laneways as shown on Schedule 5. Revision has been made to OPA No. 25 to clarify the intent.                                                                                                                                                                                 |
| Carpooling parking space requirement is overly prescriptive for uses that are smaller in nature. Staff should consider a threshold under which carpooling parking space requirement would not be applicable | Uses that are required to provide carpooling spaces include: financial institution, hospital, library, medical clinic, medical office building, medical/dental laboratory, office, elementary school, secondary school, or post-secondary school. Given the size of these facilities and the parking that would be required, staff is of the opinion that the existing carpooling requirement (minimum of 2 carpooling spaces) can be achieved. |

#### **Regional Comments**

Regional staff are generally supportive of the proposed OPA. Table 3 below outlines the Region's comments and how they have been addressed.

Table 3 Comment Matrix - Regional Comments

| Region's Comment                                                                                       | Staff's Recommendation                                                                                                                                 |
|--------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| Incorporate parking management policies and standards                                                  | Parking management policies already existing in the Secondary Plan. No further amendments are required.                                                |

# Corporation of the Town of Newmarket

### **By-law 2020-XX**

A By-law to amend By-law Number 2019-06 being a zoning by-law for the Urban Centres Secondary Plan area (Technical Amendment).

Whereas it is deemed advisable to amend By-law Number 2019-06;

Therefore be it enacted by the Council of the Corporation of the Town of Newmarket as follows:

- 1. That By-law Number 2019-06 is hereby amended by:
  - a. Deleting the year "2017" in Provision 1.9.2 iii)a) Minor Variance Applications replacing it with "2018".
  - b. Revising the date "September 4<sup>th</sup>, 2018" in Provision 1.9.3 iii)b) to "September 24<sup>th</sup>, 2018".
  - c. Revising the by-law number "1989-96" in Provision 1.10 i)b) to "1981-96".
  - d. Deleting Diagram 3-6 under definition of Daylighting Triangle in Section 3 Definitions and replacing it with the diagram shown in Schedule 1 to this by-law.
  - e. Adding the following text to the definition of Floor Space Index in Section 3 Definitions:

"For the purpose of calculating Floor Space Index, the following lands shall be excluded from *lot area*:

- Natural Heritage System and identified significant natural heritage areas;
- Floodplain and Hazard Lands, unless development exists or has been permitted by the Lake Simcoe Region Conservation Authority, and
- Public infrastructure such as hydro facilities and pumping stations.

For greater certainty, lands used for the following purposes shall be included as part of *lot area* when calculating Floor Space Index:

- off-street parking and servicing areas;
- private streets and driveways;
- public streets conveyed to the Town or the Regional Municipality of York;
- parks and open space dedicated to the Town or a public authority;
- lands conveyed to the Town for underground hydro
- private landscaped areas, including private squares that are designed to be used by the public."
- f. Deleting the definition of "Width of Driveway" in Section 3.

By-law 2020-XX Page **1** of **4** 

- g. Deleting the words "which is designated on Schedule "F" to this Bylaw" in Section 4.12 Planned Width of Street Allowance and replacing them with the word "that".
- h. Adding Retirement Residence to Section 5.3.1.2 Parking Standards Non-Residential Uses and adding the following Minimum Off-Street Parking Requirement and Maximum Off-Street Parking Requirement for Retirement Residence:

| Type or Nature of       | Minimum Off-Street                           | Maximum Off-Street                           |  |
|-------------------------|----------------------------------------------|----------------------------------------------|--|
| Use                     | Parking                                      | Parking<br>Requirements                      |  |
|                         | Requirements                                 |                                              |  |
| Retirement<br>Residence | 0.5 parking space per unit plus 0.25 parking | 1.0 parking space per unit plus 0.25 parking |  |
| Nesidence               | spaces per unit for                          | spaces per unit for                          |  |
|                         | visitor                                      | visitor                                      |  |

i. Deleting the text in Section 5.3.1.4 Carpooling Parking Space for certain Non-residential Uses and replacing with the following:

"Notwithstanding Section 5.3.1.2 of this By-law, the required parking for developments involving *financial institution*, *hospital*, *library*, *medical clinic*, *medical office building*, *medical/dental laboratory*, *office*, *elementary school*, *secondary school*, or *post-secondary school* uses must provide carpooling *parking spaces* at a rate of 5% of the total required parking supply for any of these non-residential uses, but shall not be less than 2.0 spaces."

- j. Adding "Place of Assembly" and "Medical Office" as permitted uses under Non-Residential Uses in Table 6.2.2.1 Mixed Use Zone Permitted Uses.
- k. Deleting the text of footnote 4 under Section 6.2.2.1 and replacing it with the following:

"Stand-alone surface *parking lot* shall not be located on *lot*s that front onto Yonge Street or Davis Drive. Where a stand-alone surface *parking lot* is permitted, it shall be subject to Section 5.4.1 of this By-law."

- I. Deleting the words "38.0 metres" after "at least 66% of the *Building* frontage above the" in Provision 6.2.4.2(ii)(a) Height Podiums and replacing it with "podium height".
- m. Deleting the text in Provision 6.2.4.2(ii)(b) Height Podiums and replacing it with the following:
  - ii)b) "If a building with a height greater than 26.0 metres but less than 38.0 metres contains a podium, the podium shall not exceed 17.0 metres in height and the building above the podium shall be set back a minimum of 1.5 metres from the edge of the podium for a length of at least 66% of the building frontage above the podium height adjacent to the public street."
- n. Deleting the text in Provision 6.2.4.5(i) Setback and replacing it with the following:
  - i) "Any *building* with a frontage on Yonge Street or Davis Drive shall be setback a minimum of 3.0 metres from the *lot line* that abuts Yonge Street or Davis Drive."

- o. Adding the following text as Provision 6.2.4.5(ii) Setback and renumbering subsequent provisions:
  - ii) "Any building with a frontage on Yonge Street or Davis Drive, located on a corner lot, shall be setback a minimum of 3.0 metres from the lot line that abuts a public street other than Yonge Street or Davis Drive."
- p. Deleting the text in the renumbered Provision 6.2.4.5 iv) and replacing it with the following:
  - iv) "The wall of any tall *building* located above the podium height in accordance with Provision 6.2.4.2 ii) shall be set back a minimum 12.5 metres from any *lot line* that does not abut a *public street*."
- q. Deleting Diagram 6-3 in Section 6.2.4.5 Setback and replacing it with the diagram shown in Schedule 2 to this by-law as Diagram 6-3a.
- r. Adding the diagram shown in Schedule 3 to this by-law as Diagram 6-3b to Section 6.2.4.5 Setback.
- s. Deleting the text in Provision 6.2.4.9 ii) Parking and Access to Lot and replacing it with the following:
  - ii) "Parking may be provided within a *building* or *structure* or on the surface, but shall only be located in a *side yard* or *rear yard* on *lots* that front onto Davis Drive or Yonge Street."
- t. Deleting the text in Provision 6.2.4.9 iii) Parking and Access to Lot and replacing it with the following:
  - iii) "Parking for motorized vehicles shall not be permitted in the yard that abuts Davis Drive or Yonge Street."
- u. Deleting the text in Provision 6.2.4.9 iv) and replacing it with the following:
  - iv) "Notwithstanding provision 6.2.4.9 (i), vehicular access may be located in the *yard* that abuts Davis Drive or Yonge Street if access to the *lot* is only from Davis Drive or Yonge Street."
- v. Deleting "Convenience Store" as a permitted use from Table 6.3.2.1 Institutional Zone Permitted Uses.
- w. Deleting SS(1) in Section 8.1 Site Specific Exceptions.
- x. Deleting the text in Section 8.2.1 Holding Zones and Exceptions to Permit Development and replacing it with the following:
  - "For any *lot* that is subject to a Holding Zone (H) on Maps 13 through 18 of this By-law (for example (H)-1), *uses* permitted by this By-law shall be permitted prior to the removal of the Holding Zone (H) and the provisions under Section 6.2.1.2, Section 6.2.5, Section 6.3.1.2, Section 6.3.5, Section 6.4.1.2, Section 6.4.5 and Section 8.1 shall prevail."
- y. Deleting the first paragraph in Section 8.2.2 Requirement to Remove the (H) Symbol and replacing it with the following:
  - "Notwithstanding Section 8.2.1, for any lot that is subject to a Holding Zone (H), no development as defined by the Planning Act and/or Site Plan Application Process Manual may occur without an application to remove the (H) symbol from the lot."

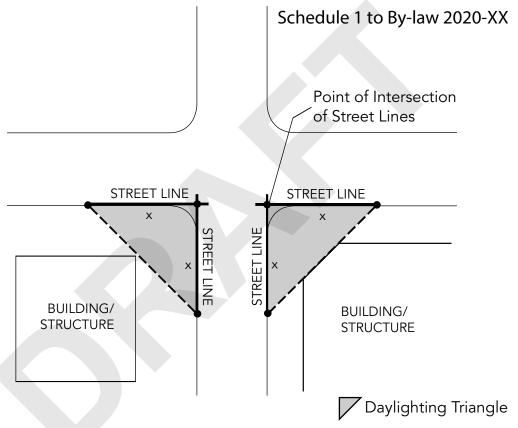

- z. Deleting Schedule A; Schedule A Maps 1 to 6; Schedule B; Schedule B Maps 7 to 12; Schedule C; Schedule C Maps 13 to 18; Schedule D, and Schedule E, and replacing them with Schedules 4 to 26 attached to this by-law.
- 2. That Schedules 1 to 26 inclusive attached to this by-law are declared to form part of this by-law.

Enacted this xxx day of xxx, 2020.

John Taylor, Mayor

Lisa Lyons, Town Clerk

### **APPENDIX**

Map 1 – Location Map

### PART A THE PREAMBLE

The Preamble provides an explanation of the amendment, including the location and purpose of the proposed amendment, basis of the amendment and a summary of the changes to the Town of Newmarket Official Plan, but does not form part of this amendment.

### 1. Purpose of the Amendment

The purpose of this amendment is to amendment policies and schedules of Section II of the Town of Newmarket Official Plan (OPA No. 10), also known as the Newmarket Urban Centres Secondary Plan (Secondary Plan) to:

- Clarify the original intent of the policies;
- Implement recommendations of recently approved planning documents;
- Update land use permissions or requirements to address inconsistency between polices; and
- Resolve mapping inconsistencies.

### 2. Location

The proposed amendments are made to the text and schedules of the Secondary Plan and are applied to the Secondary Plan area as shown on Map 1 to this amendment.

#### 3. Basis

The majority of the Secondary Plan came into effect on April 30, 2015 save and except sections that were appealed to the Local Planning Appeal Tribunal (LPAT) (formerly Ontario Municipal Board). All appeals were subsequently dealt with by the LPAT and the Secondary Plan came into full force and effect on October 18, 2018. Since then, staff have identified a number of technical anomalies that should be addressed to guide development in the Secondary Plan area. More specifically, the proposed amendments aim to clarify intent of policies and schedules of the Secondary Plan and to achieve greater alignment between various sections of the Secondary Plan. In addition, Council has adopted other planning documents since 2015 which also necessitate changes to the Secondary Plan.

#### Item 1 Section 5.0 Land Use

- Revise the designation "Neighbourhood Parks and Open Space" to "Parks and Open Space" to be consistent with the term used in all schedules;
- Replace the term "natural heritage areas" with "Lands within the Natural Heritage System and identified significant natural heritage areas" to align with Provincial and Regional planning documents; and

 Revise Policy 5.3.4(ii)(e) Regional Shopping Centre Study Area to recognize the Mobility Hub Study has been completed and integration of transit to the GO bus terminal is no longer applicable.

#### Item 2 Section 6.4 Development Policies

- Amend Policy 6.4.4(i) Rental Housing to reference York Region's Financial Incentives for Complete Communities, and
- Remove Policy 6.4.5(vi) General Building Height and Density (which speaks
  to where there is discrepancy between number of storeys and height in
  metres, height in metres identified on Schedule 4 shall prevail) because it is
  no longer needed. Numerical height values (metres) is proposed to be
  removed from Schedule 4 as part of this amendment.

### Item 3 Section 7.3 Urban Design Polices

- Amend Policy 7.3.4(iv) Low-rise Residential Buildings to clarify which lot line setback shall be taken from;
- Revise Policy 7.3.5(i) High and Mid-rise Buildings to clarify that new public space or publicly accessible private space will be required as part of high and mid-rise development in accordance with the Town's Parkland Dedication By-law;
- Delete Policy 7.3.5.1(vi) from the Podium section as the policy does not relate to podiums;
- Incorporate the term "district energy ready" and "electric vehicle ready" in Policies 7.3.7(xi) and (xii) to align with the adopted Community Energy Plan; and
- Add a policy and associated criteria to Section 7.3.12 to permit temporary surface parking area on lands fronting onto Davis Drive within the Regional Healthcare Centre.

#### Item 4 Section 8.3 Block Structure and Street Network Policies

- Amend Section 8.3.3 and Table 2 to reflect appropriate right-of-way width requirements, and
- Amend Section 8.3.4 to clarify that reduction of private laneway width may be permitted and the main purpose of private laneway is to provide access to properties that front onto Yonge Street or Davis Drive.

### Item 5 Section 8.3.7 North/South and East/West Network Study

 Amend Policy 8.3.7(i) to state that a north/south and east/west study road network study may be conducted in the future, separate from the Mobility Hub Study, while acknowledging that the study may draw from the Mobility Hub Study's findings.

#### Item 6 Section 9.3.3 Newmarket GO Rail Mobility Hub Study Area

 Revise Policy 9.3.3(ii) to recognize the completion of the Mobility Hub Station Area Plan and delete Policy 9.3.3(iii) as it is no longer required.

### Item 7 Section 10.0 Parks, Open Space and Natural Heritage

- Update designation of "Neighbourhood Parks and Open Space" to "Parks and Open Space" to be consistent with all schedules;
- Replace the term "natural heritage areas" with "lands within the Natural Heritage System and identified significant natural heritage areas" to align with Provincial and Regional planning documents;
- Specify in Policy 10.3.1(i) that parks and open space required for development in the Urban Centres shall be provided in accordance with the Town's Parkland Dedication by-law;
- Replace the term "urban squares" in Policy 10.3.1(v) with "open space"; and
- Remove reference to "pioneer village" in Policy 10.3.2(ii)(c).

### Item 8 Section 13.3.4 Energy and Underground Utilities Policies

 Amend Policy 13.3.4(i) to acknowledge the completion of Community Energy Plan and that development applications must address applicable recommendations from the Community Energy Plan in Sustainable Development Reports

#### Item 9 Section 17.0 Glossary

- Add a definition for the term "District Energy Ready"
- Add a definition for the term "Electric Vehicle Ready", and
- Revise the definition of "Land Area" to exclude public streets conveyed to the Town or the Regional Municipality of York and parkland dedicated to the Town or a public authority as part of the Floor Space Index (FSI) calculation to incentivize these benefits.

#### Item 10 Schedule 3: Land Use

The following changes are proposed to Schedule 3: Land Use to provide updated mapping information, align with approved planning documents, provide clarity and recognize physical site conditions:

- Incorporate the updated 2019 floodplain mapping from the Lake Simcoe Region Conservation Authority (LSRCA);
- Remove the driveway at the Tannery Mall which was shown as local road;
- Remove the eastward extension of Penn Avenue from Main Street North to the driveway at Tannery Mall;
- Replace "Future Local Road" connection at Hillview Drive and Davis Drive with a Pedestrian Mews Connection symbol. The Future Local Road connection has been deemed unsuitable due to steep grades in the area;
- Rename "Planned Viva Rapidway Station" with "Existing and planned vivastation/curbside vivastation" to recognize that some stations have been constructed;
- Correct land use designation at 11 Main Street South from Parks and Open Space to Mixed Use;
- Refine limits of Parks and Open Space designation and Mixed Use designation for property at southeast corner of Main Street and Davis Drive;
- Update Natural Heritage System limits;
- Replace conceptual mobility hub station study area with the Newmarket GO Station Mobility Hub Study boundary, and
- Refine the extent of the Parks and Open Space designation at 460 Davis
   Drive to the northern half of the property and redesignate the southern half
   of the property to Mixed Use.

#### Item 11 Schedule 4: Height and Density

In addition to changes listed in Item 10, which are also applicable to Schedule 4: Height and Density, the following changes are proposed to Schedule 4: Height and Density to provide clarity and allow appropriate flexibility in setting height permissions:

- Remove numeric height values (metres) as shown in Schedule 4 as exact value in metres are appropriate to be governed in zoning by-laws;
- Remove the portion of Franklin Street that does not exist;
- Extend Medium-High Density Designation to include full extents of 22
   Bolton Avenue and 27 Lundy's Lane;
- Refine limits of Medium Density permission on property at the southeast corner of Main Street and Davis Drive; and
- Correct mapping at 11 Main Street South from Parks and Open Space to Medium Density.

#### Item 12 Schedule 5: Street Network

In addition to changes listed in Item 10, which are also applicable to Schedule 5: Street Network, the following changes are proposed to Schedule 5: Street Network:

- Remove the portion of Franklin Street that does not exist;
- Add "Existing Signal" symbol at existing entrance to the Upper Canada Mall on Yonge Street, north of the red "potential" light;
- Add "Potential Future Assessment for Signal" symbol at the intersection of Penn Avenue and Main Street North;
- Revise limits of green space for property at southeast corner of Main Street and Davis Drive to reflect revised designation as noted in Items 10 and 11, and
- Remove green space at 11 Main Street South to reflect revised designation as noted in Items 10 and 11.

#### Item 13 Schedule 6: Parks, Open Space and Natural Heritage

In addition to changes listed in Item 10, which are also applicable to Schedule 6: Parks, Open Space and Natural Heritage, the following change are proposed to Schedule 6: Parks, Open Space and Natural Heritage for consistency purposes:

• Correct the "NP/OS" symbol to the corresponding label in the legend;

- Revise limits of green space for property at southeast corner of Main Street and Davis Drive to reflect revised designation as noted in Items 10 and 11, and
- Remove green space at 11 Main Street South to reflect revised designation as noted in Items 10 and 11.

#### PART B THE AMENDMENT

The Amendment describes the additions, deletions and/or modifications to the Town of Newmarket Official Plan and constitutes Official Plan Amendment No. 25.

#### 1. Format of the Amendment

Official Plan Amendment No. 25 consists of the following proposed modifications to the text and Schedules to Section II of the Newmarket Official Plan, also known as Newmarket Urban Centres Secondary Plan (Secondary Plan). Sections and Schedules of the Secondary Plan proposed for modifications are identified as "Items".

Where additions to the existing text are proposed, they are identified in "**bold**". Where the text is proposed to be deleted, it is shown in "<del>strikethrough</del>". Where appropriate, unchanged text has been included for context and does not constitute part of Official Plan Amendment No. 25.

#### 2. Details of the Amendment

#### Item 1 Section 5.0 Land Use

- a) Revise land use designation "Neighbourhood Parks and Open Space" in Section 5.1 Introduction to "Parks and Open Space".
- b) Revise the second last sentence in the last paragraph of Section 5.1 Land Use Introduction as follows:
  - "Land uses within the Urban Centres also include potential school sites, a parks and open space system, and natural heritage lands within the Natural Heritage System and identified significant natural heritage areas."
- c) Revise Policy 5.3.4(ii)(e) Regional Shopping Centre Study Area as follows:
  - "mobility hub study considerations including, but not limited to, findings and recommendations in the *mobility hub study* including, but not limited to, integration of transit into the site and/or between this site and the Yonge-Davis **Drive** Rapidway, the—GO-Bus Terminal and GO-train Station in accordance with the Metrolinx Mobility Hub Guidelines;"
- d) Revise heading of Policy 5.3.6 to Neighbourhood Parks and Open Space.

#### Item 2 Section 6.4 Development Policies

a) Revise Policy 6.4.4 Rental Housing as follows:

"Development of new rental accommodation will be promoted through programs such as the Region's Financial Incentives for Complete Communities to incentivize purpose-built rental housing, and the retention of existing medium and high density rental housing stock will be encouraged in accordance with Policy 3.10.2 of the Official Plan."

b) Delete Policy 6.4.5(vi) General Building Height and Density and renumber subsequent policies.

#### **Item 3** Section 7.3 Urban Design - Policies

a) Revise Policy 7.3.4(iv) Low-rise Residential Buildings as follows:

"Where at-grade residential buildings units front on a public or private street, setbacks of a minimum of 3 metres and a maximum of 5 metres from the property line will be required to provide for a front yard transition between the front doors of private residences and the public sidewalk. The setback area should be designed to contain low decorative fencing and/or landscaping to distinguish the private space. Where lands are dedicated to the Town for the future burying of hydro, the setback is subject to Policy 13.3.4."

b) Revise Policy 7.3.5(i) High and Mid-rise Buildings as follows:

"Where high or mid-rise buildings are permitted, new public or publicly accessible private spaces such as parks, urban squares and plazas or forecourts will be required to be provided as part of the development in accordance with the Town's Parkland Dedication By-law."

- c) Delete Policy 7.3.5.1(vi) Podiums.
- d) Revise Policy 7.3.7(xi) Sustainability as follow:

"All commercial, institutional, mixed use and multi-unit residential buildings are encouraged to consider options for district energy, and design features that would enable the future implementation of district energy be district energy ready and electric vehicle ready."

e) Revise Policy 7.3.7(xii) Sustainability as follows:

"Applications for development in the Urban Centres will be required to include a Sustainable Development Report that describes how the applicant has endeavoured to incorporate any or all of the following, as deemed appropriate and applicable through the pre-application consultation process:

- a) energy efficiency measures;
- b) water conservation measures;
- c) alternative energy use and Solar design strategy;
- d) heat Island mitigation;
- e) indoor air quality enhancement;
- f) Low Impact Development (LID) stormwater management; and
- g) solid and construction waste reduction and management-;
- h) the level to which a proposed development is district energy ready or electric vehicle ready (if applicable)."
- f) Add the following as Policy 7.3.12(ii) after Policy 7.3.12(i) Parking Facility Design and renumber subsequent policies:

"Notwithstanding Policy 7.3.12(i), surface parking may be permitted on lots fronting onto Davis Drive in the Regional Healthcare Centre character area as delineated in Schedule 2, provided that:

- a) the surface parking area is temporary in nature and subject to a temporary use by-law;
- b) the applicant shall submit a *Built Out Demonstration Plan* as part of a temporary use by-law application; and
- c) the surface parking area is adequately screened from public street to the satisfaction of York Region and the Town."

#### Item 4 Section 8.3 Block Structure and Street Network

a) Revise Policy 8.3.3(i) Minor Collectors and Local Roads as follows:

"New or upgraded streets identified as Minor Collectors on Schedule 5 will be designed with a mid-block right-of-way of a minimum of 20-28 26 metres, with potential for increased ROW at intersections."

b) Revise Policy 8.3.3(ii) Minor Collectors and Local Roads as follows:

"New streets identified as Local Roads in Schedule 5 will be designed with a mid-block right-of-way of a minimum of 18-23 21 metres, with potential for increased ROW at intersections."

c) Revise Policy 8.3.4(i) Private Roads/Lanes as follows:

"Private roads/lanes shown on Schedule 5 will generally be designed with minimum mid-block rights-of-way of approximately 16 metres. Any reductions in the planned width may be permitted provided it is would require demonstration demonstrated, to the satisfaction of the Town, that the planned function of the private street for vehicular and pedestrian access will be achieved."

d) Revise Policy 8.3.4(ii) Private Roads/Lanes as follows:

"In addition to the street network shown on Schedule 5, new private streets, laneways and pedestrian linkages may be required to support development and facilitate traffic and pedestrian circulation in the Urban Centres. Private streets, laneways and pedestrian linkages associated with new development as shown on Schedule 5 will be designed to provide additional connectivity within the Urban Centres, where appropriate, and to reduce vehicular movements provide access to properties that front onto Yonge Street and or Davis Drive. This may require coordination across adjacent parcels as well as public easements to ensure continued access."

e) Revise Table 2: Right-of-way Requirements for Streets in the Urban Centres as follows:

| Road Classification                                                                                                 | Minimum ROW (mid-<br>block section)   |
|---------------------------------------------------------------------------------------------------------------------|---------------------------------------|
| Minor Collector – Double Loaded with no on-<br>street parking and with bike facility on the<br>boulevard            | 22 <del>- 25</del> metres             |
| Minor Collector – Double Loaded with on-<br>street parking on one side and with bike<br>facility on the boulevard   | <del>24.6 – 28</del> <b>23</b> metres |
| Minor Collector – Double Loaded with on-<br>street parking on both sides and with bike<br>facility on the boulevard | 26 metres                             |
| Minor Collector – Single Loaded with no on-<br>street parking and bike facility on the<br>boulevard                 | 20 <del>- 24</del> metres             |

| Local Street with no on-street parking and bike sharrow          | 18 <del>- 20</del> metres             |
|------------------------------------------------------------------|---------------------------------------|
| Local Street with on-street parking on one side and bike sharrow | <del>20.6 – 23</del> <b>21</b> metres |
| Private Street or Laneway                                        | Approx. 16 metres                     |

#### Item 5 Section 8.3.7 North/South and East/West Network Study

Revise the last sentence in Policy 8.3.7(i) as follows:

"The study will include a detailed analysis to identify a preferred option for a direct connection between Prospect Street and Bayview Parkway and any necessary modifications to signalized intersections. The study may be conducted in parallel with the Mobility Hub Station Area Plan referred to in Policy 9.3.3, Findings from the Mobility Hub Station Area Plan referred to in Section 9.3.3 may be used to inform the study."

#### Item 6 Section 9.3.3 Newmarket GO Rail Mobility Hub Station Area

a) Revise the first paragraph of Policy 9.3.3(ii) as follows:

"The Town of Newmarket will encourage with Metrolinx to partner with the Town, the Region and other relevant partners to have prepared a Mobility Hub Station Area Plan for the area around the Newmarket GO Rail Station, as delineated in Schedules 3, 4, 5 and 6. The Mobility Hub Station Area Plan should has addressed as a minimum, the following:"

b) Revise item d) under Policy 9.3.3(ii) as follows:

"integration between the GO Rail Station, the Rapidway, the future GO bus services and the GO Bus Terminal;"

c) Delete Policy 9.3.3(iii).

#### Item 7 Section 10.0 Parks, Open Space and Natural Heritage

a) Revise the second bullet in the second last paragraph of Section 10.1 Parks,
 Open Space and Natural Heritage – Introduction as follows:

"7.2 hectares of new Neighbourhood Parks (excluding Natural Heritage

Areas lands within Natural Heritage System and identified significant

natural heritage areas, flooplain and stormwater management ponds); and"

b) Revise Policy 10.3.1(i) as follows:

"Development in the Urban Centres will provide for a parks and open space system that contributes to, enhances and connects to the broader parks and open space system in accordance with the Town's Parkland Dedication Bylaw."

c) Remove reference to "pioneer village" in the fourth sentence in Policy 10.3.2(ii)(c) Neighbourhood Parks as follows:

"Consideration may be given to cultural heritage and civic uses including, but not limited, to a pioneer village."

d) Revise Policy 10.3.1(v) as follows:

"In addition to the Parks and <del>Urban Squares</del> **Open Space** identified on Schedule 6, additional Neighborhood Parks and <del>Urban Squares</del> **Open Space** or enlargements to those identified on Schedule 6 will be achieved through parkland dedication in conjunction with development applications, in accordance with the Town's Parkland Dedication By-law."

#### Item 8 Section 13.3.4 Energy and Underground Utilities

Revise Policy 13.3.4(i) under Energy as follows:

"The Town will-has developed a Community Energy Plan that will include the Urban Centres. Applications for development within the Urban Centres shall address applicable recommendations of the Community Energy Plan in a Sustainable Development Report."

#### Item 9 Section 17.0 Glossary

a) Add the following definition of "District Energy Ready":

"District Energy Ready – The physical structuring of buildings and internal areas as to enable future connection to a district energy system with minimal additional cost to the building owner."

b) Add the following definition of "Electric Vehicle Ready":

"Electric Vehicle Ready – The inclusion of electric vehicle supply equipment rough in that conforms to section 86 of the electrical safety code to enable future installation of electric vehicle charging stations with minimal additional cost to the building owner."

c) Revise the definition of "Land Area" as follows:

"The land area to be used for calculating FSI shall include all land used for:

- buildings;
- off-street parking and servicing areas;
- public streets conveyed to the Town or the Regional Municipality of York;
- parks and open space dedicated to the Town;
- private streets and driveways;
- lands conveyed to the Town for underground hydro in accordance with Policy 13.3.4; and
- private landscaped areas, including private squares that are designed to be used by the public

but shall exclude all land used for:

- public streets;
- parks and open space that is dedicated to the Town;
- natural heritage areas lands within the Natural Heritage System and identified significant natural heritage areas;
- Floodplain and Hazard Lands, unless development exists or has been permitted by the Lake Simcoe Region Conservation Authority,
- schools; and
- public infrastructure such as hydro facilities and pumping stations."

#### Item 10 Schedule 3: Land Use

Delete Schedule 3: Land Use and replace with the attached Schedule A to this amendment as Schedule 3 to the Secondary Plan.

#### Item 11 Schedule 4: Height and Density

Delete Schedule 4: Height and Density and replace with the attached Schedule B to this amendment as Schedule 4 to the Secondary Plan.

#### Item 12 Schedule 5: Street Network

Delete Schedule 5: Street Network and replace with the attached Schedule C to this amendment as Schedule 5 to the Secondary Plan.

# Item 13 Schedule 6: Parks, Open Space & Natural Heritage

Delete Schedule 6: Parks, Open Space & Natural Heritage and replace with the attached Schedule D to this amendment as Schedule 6 to the Secondary Plan.

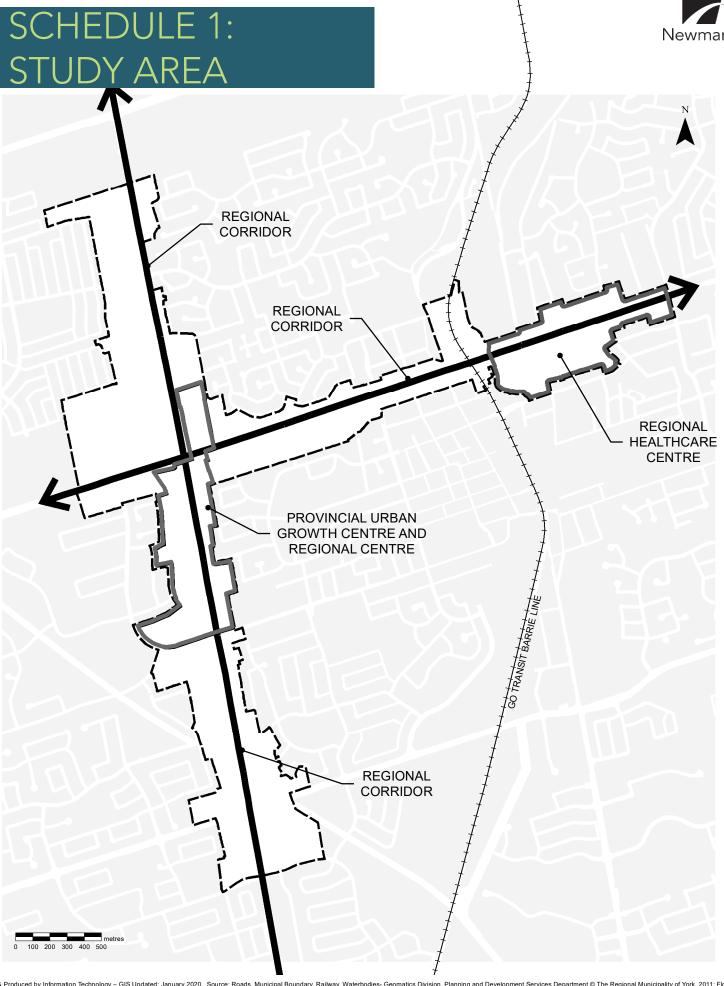

# 3. Schedules

Schedule A – Schedule 3: Land Use

Schedule B – Schedule 4: Height and Density

Schedule C – Schedule 5: Street Network

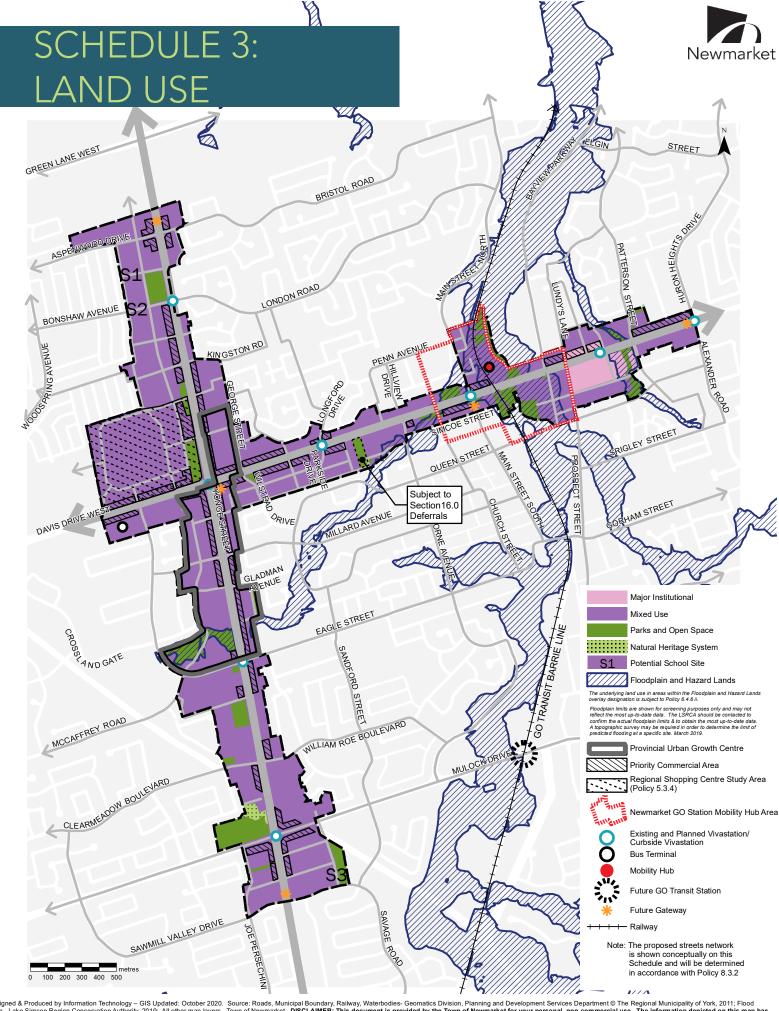

Schedule D – Schedule 6: Parks, Open Space & Natural Heritage

# **Construction Vibration Staff Report to Council**

Report Number: 2020-74

Department(s): Legislative Services and Planning and Building Services

Author(s): Flynn Scott, Manager of Regulatory Services and Patricia Cho, Planner

Meeting Date: October 26, 2020

#### Recommendations

1. That the report entitled Construction Vibration dated October 26, 2020 be received;

- That Council directs staff to prepare an amended version of Noise By-law 2017-76 to include provisions relating to vibration (Option #3) for non-Planning Act development, for Council's consideration at a later date;
- 3. That direction be provided to staff to revise the Town's current Vibration Policy's sections specifically dealing with maximum vibration limits, zones of influence, and applicability only to Planning Act developments; and,
- 4. That Staff be authorized and directed to do all things necessary to give effect to this resolution

# **Executive Summary**

Impact of vibrations emanating from construction sites in or adjacent to residential areas has been identified by Council as a concern. Report 2019-29 proposed an approach to address vibration impacts during Planning Act development applications. Council directed staff to further investigate options to address vibration impacts for non-Planning Act development (e.g. driveway or parking lot paving).

This report recommends that Council amend the Town's current Noise By-law to include provisions relating to vibration. In addition, staff intend to make technical revisions to the Town's existing Vibration Policy for greater clarity.

Construction Vibration Page 1 of 8

# **Purpose**

The purpose of this report is to provide options for Council's consideration in regard to how best to address issues relating to vibration impacts from non-Planning Act developments (e.g. repaving of driveways or parking lots).

# **Background**

On March 18, 2019, Report 2019-19 was presented to Committee of the Whole related to Construction Vibration Issues. The report laid out a proposed approach to assessing the potential impact of vibration during construction by requiring vibration assessments as part of complete Planning Act applications for development proposals. This report will refer to this approach as the "Vibration Policy".

Following adoption, staff began to implement the Vibration Policy. However, alongside this implementation, staff pursued Council's direction to further investigate the regulation of construction vibrations for non-Planning Act developments. After extensive research and review, there are several options available to Council to further mitigate concerns relating to vibration from these specific developments.

#### **Discussion**

Vibrations emanate from two general types of development: i) development that is permitted under the Planning Act (e.g., residential subdivisions and any other large developments), and ii) non-Planning Act development (e.g., driveway repaving, parking lot repaving).

The Town currently has a Vibration Policy to address vibration issues from Planning Act developments. However, the Town does not currently have means to address vibration from non-Planning Act developments.

The following outlines three options for consideration to address vibration from non-Planning Act developments.

# Options for Council's consideration relating to non-Planning Act Development:

# Options 1: Take no action and continue to monitor vibration complaints

# **Customer Service Vibration Complaint Data**

The Town's Customer Services department compiled data on the number and description of complaints received related to vibrations from 2016 to 2020. There had been roughly 52 complaints received since January 1, 2016, equating to roughly 15 formal complaints per year. Of these, the vast majority were for private developments under the Planning Act, with numerous complaints lodged against one specific

development. However, we now have the Vibration Policy to address these types of complaints. The remaining, a minority number of complaints, were for public works projects commenced by either the Town or the Region, such as road repaving on Yonge Street and Eagle Street and sewer replacement. Most of the complaints on vibrations are tied with noise as being the offending element.

Due to the low number of vibration complaints received for non-Planning Act developments, no further action may be necessary from the Town at this time. Town staff would continue to monitor complaints received in relation to vibration for non-Planning Act developments and assess the need to report back with proposed changes. Staff would continue to take an educational approach to vibration complaints to achieve voluntary compliance with contractors or property owners directly. In the event that damage is sustained to an adjacent property due to vibration, property owners would have an opportunity to pursue civil litigation for remediation or financial recovery.

# Option 2: Increase enforcement through monitoring devices and training for Property Standard Officers (not recommended)

For Planning Act developments, vibration assessments are conducted by the developer's consulting engineer, who has noise and vibration monitoring devices available and has the expertise to read these meters correctly.

Non-Planning Act developments could require a similar level of monitoring to ensure vibration levels are in order to accurately monitor the levels of vibration. In order to properly enforce vibration levels, vibration monitoring devices would be required to be obtained. Vibration monitoring devices cost approximately \$1,000 - \$2,000 per device. Along with equipment to be purchased, there will be training requirements for officers to be certified to read these meters correctly. Training for each officer will be approximately \$750 - \$1,000, with a requirement to renew certifications on an annual basis.

It is relevant to note that there will also be a significant service level change, as Property Standards Officers do not currently monitor or enforce vibration complaints to this extent. Under this option, Property Standard Officers would be required to be on-site more frequently and for a longer duration, which will ultimately have service level interruptions to other residents' complaints received.

Considering the complaint data received from Customer Service, with the low number of vibration complaints related to non-Planning Act developments, Town staff do not believe this would be the best use of resources available to the Town.

# Option 3: Amend Noise By-law 2017-76 (Recommended)

# Jurisdictional Scan of York Region Municipalities

Over the course of the review, staff researched numerous municipalities to determine how they deal with vibration issues from construction activities on non-Planning Act developments within their communities. The following municipalities regulate sound, vibration, or nuisance that cause disturbance to residents directly through their Noise By-laws:

| Municipal Comparison of Vibration in Non-Planning Act Developments |              |       |  |
|--------------------------------------------------------------------|--------------|-------|--|
| Municipality                                                       | Noise By-law | Other |  |
| City of Vaughan                                                    | •            |       |  |
| Township of King                                                   | •            |       |  |
| Town of Aurora                                                     |              | N/A   |  |
| City of Richmond Hill                                              | •            |       |  |
| City of Markham                                                    | •            |       |  |
| Town of Whitchurch-Stouffville                                     | •            |       |  |
| Town of East Gwillimbury                                           | •            |       |  |

Additionally, the City of Toronto has established a Vibration Control Bylaw 514-2008, Chapter 363 – Building Construction and Demolition, enacted under the Toronto Municipal Code, which requires a Vibration Control Form as part of the building permit application package. However, speaking with the Deputy Chief Building Official and Director at Toronto Building – Scarborough District, the Vibration Control Form is primarily for building and structures from construction and demolition and does not address vibration impacts from non-Planning Act development (e.g. driveway or parking lot paving). For residential driveway/parking lot repaving, a paving permit is required to be obtained from Transportation Services, to ensure that the driveway width complies with zoning regulations but does not deal with construction vibrations.

Other municipalities, such as Toronto, Markham, and Vaughan directly licence driveway paving contractors through their business licensing divisions. Any driveway paving work is required to be completed by a licensed contractor, where they have regulations to properly control the work they complete in terms of insurance, noise monitoring, etc. This is an additional tool used to further mitigate or prevent the potential for vibration or noise complaints that relate to paving or repaving directly.

Overall, By-law Enforcement Officers at the Township of King and City of Vaughan were able to provide insight on how they regulate vibrations. Vibration complaints they received were generally correlated to noise and the permitted construction time which was resolved through the Noise By-law. Concerns about the impact of vibration, such as structural damage to the foundation of adjacent properties, are considered a civil matter

and recourse for damage is pursued by private landowner against the other property owner. If the complaint is part of a Planning Act development or building permit process, the matter gets referred to the Engineering Department.

# Amending the Town's Noise By-law

In accordance with the <u>Municipal Act</u>, Council adopted <u>Noise By-law 2017-76</u>. This by-law is designed to regulate noises and sounds that disturb residents of the Town. The definition of "sound" within the by-law is, "the sensation produced by stimulation of the organs of hearing by vibrations transmitted through the air or other medium." In order to properly enforce vibration under the Noise By-law, an amendment to the definition of "sound" will be required. In addition to this amendment, new regulations will need to be proposed to meet the compliance objectives of the by-law.

If Council elects this option, the Noise By-law will be amended to mirror the existing practices that Property Standards Officers follow in relation to noise. This process includes the following:

- A formal complaint is received in relation to vibration;
- Complainants will be provided a Noise/Vibration Log to monitor these occurrences;
- A Property Standards Officer will review the complainant's log to determine if the reported vibrations are in contravention of the Noise By-law (e.g. time of day, length of time, and location of where the vibration is occurring);
- If a violation is confirmed, Property Standards Officers will take an education-first approach to resolve any complaints; and
- If voluntary compliance cannot be reached, an AMPS ticket will be issued and further action may be taken.

Under this option, Council would also have an opportunity to increase regulations specifically pertaining to vibration. This could include by-law provisions which requires vibration to be monitored on large sites that employ construction methods which can result in vibrations being transmitted to neighbouring properties. Other vibration-producing activities (e.g. pile driving) on smaller residential sites could also be clearly established within the regulations of the by-law.

It is relevant to note that the process for measuring noise within Newmarket is currently subjective, as the Property Standards Officer enforces the Noise By-law by considering the logs that are provided by the resident. However, the noise level is not being measured (i.e. decibel readings) as the appropriate tools are not available and the by-law does not specifically identify measurable restrictions. Should Council wish to establish more objective standards for measuring noise or vibration, then Option #2 would be the proposed solution for doing so.

Should Option #3 be pursued as per the recommendations of this report, an updated Noise By-law would be prepared and presented to Council at a future date.

# Planning Act Applications: The Vibration Policy (already in place)

The Town's Vibration Policy applies only to Planning Act development. It discusses the activities that can cause vibrations, the impacts that vibrations can have, the challenges of regulating vibrations, and the range of sensitivity to vibration that people can experience. The Policy sets vibration limits depending on the types of structures that may be impacted by the anticipated vibrations.

Under this Policy, proponents of development applications are required to provide a "Vibration Impact Assessment", prepared by a professional engineer. Based on the construction methods that would be employed, this assessment estimates the vibrations that would be caused. The assessment would demonstrate what vibrations might be expected within a "zone of influence".

According to the Vibration Policy, when complaints regarding vibration are received, development applicants are required to cease construction, measure vibrations, meet with complainants, and reduce the vibration-causing activities to below the thresholds of the Vibration Policy.

The Policy sets limits on vibration as set out in Table 1, which varied depending on whether the vibrations caused were expected to impact buildings which are considered more sensitive to vibration impacts.

| Type of Structure                                                                                   | Vibration limit at the foundation |
|-----------------------------------------------------------------------------------------------------|-----------------------------------|
| Dwelling with concrete     foundations, wood framed,     drywall finish or equivalent               | 5 mm/sec                          |
| Structures that are particularly sensitive to vibrations due to their age or construction technique | 3 mm/sec                          |

# **Proposed Revisions to the Vibration Policy**

At this time, staff are taking the opportunity to update specific parts of our current Vibration Policy in order to strengthen policies associated with maximum vibration limits and zones of influence, as well as further clarify the Policy's applicability only to Planning Act developments. These changes are technical in nature and are intended to result in greater clarity and ease of implementation.

# Conclusion

To address the issue of the impact of vibrations on properties arising from non-Planning Act developments, Town staff has provided three (3) options within this report for Council's consideration. In addition, staff intend to make technical revisions to the Town's existing Vibration Policy for greater clarity.

# **Business Plan and Strategic Plan Linkages**

Extraordinary Places and Spaces

### Consultation

- Building Services
- Legal Services

### **Human Resource Considerations**

If Council elects to introduce vibration monitoring equipment (Option #2), there will be significant impacts to service levels pertaining to Regulatory Services and the availability of staff to respond to other complaints received. Again, this is largely due to the necessity for staff to remain onsite and monitor vibration levels during construction projects.

If regulatory amendments are made to the Noise By-law (Option #3), Regulatory Services will have greater responsibility for investigating and enforcing complaints relating to vibration.

# **Budget Impact**

If Council directs staff to move forward with Option #2, there will be budget implications for purchasing vibration monitoring devices and training costs associated for proper certifications to be obtained.

#### **Attachments**

None.

Thanks you for sending this notice and Vibration report. I would like to state that although it is discussed in the report that any damage resulting from vibrations within a zone of influence are dealt with in civil remedies, the fact is that without a prior "home inspection report" detailing the before shape of a property it is almost impossible to ever prove causation due to vibration. The cost of such a before and after for a homeowner wanting to protect their homes is approximately \$3,000-\$3,500. In a report provided and done by the builder on the glenway lands in my deposition of this matter confirmed that it is impossible to tell causation without such a report. It is extremely unfair and inequitable for the town to expect each homeowner within a zone of influence to incur this cost which would not be incurred but for the town's approval and the builders actions. Without this report a homeowner really has no provable remedy to prevent possible damage.

regards

Stuart Hoffman

Town of Newmarket 395 Mulock Drive P.O. Box 328, Newmarket, Ontario, L3Y 4X7

# Zoning By-Law Amendment – 1250 Gorham Street Staff Report to Council

Report Number: 2020-73

Department(s): Planning and Building Services

Author(s): Patricia Cho

Meeting Date: October 26, 2020

#### Recommendations

- 1. That the report entitled Zoning By-law Amendment 1250 Gorham Street dated October 26, 2020 be received; and,
- 2.That the application for Zoning By-law Amendment, as submitted by 2011378 Ontario Limited (Cummins Hydraulics Ltd.), for lands known municipally as 1250 Gorham Street, be approved, and that staff be directed to present the Zoning By-law amendment to Council for approval, substantially in accordance with Attachment 1; and,
- 3. That Howard Freidman, of HBR Planning Centre, 30 Waymount Avenue, Richmond Hill, ON, L4S 2G5, be notified of this action; and,
- 4. That Staff be authorized and directed to do all things necessary to give effect to this resolution.

# **Executive Summary**

Staff have reviewed the application to amend Zoning By-law 2010-40 to permit the development of a rear addition to the existing one-storey industrial building and an outdoor storage area on the subject lands known municipally as 1250 Gorham Street.

Staff have reviewed the development proposal against the relevant Provincial, Regional and local policy documents and have concluded that the proposal is in general conformity with the policy frameworks.

This report provides (1) the context of the site, (2) the details of the proposal, (3) a discussion of the relevant planning policies and how the application addresses them, and (4) an outline of feedback received.

# **Purpose**

This report serves to provide information and recommendations on the application for Zoning By-law Amendment for subject property 1250 Gorham Street.

This report discusses the application as it has been received and reviewed by staff from the Town and its development review partners, along with members of Council and the public. The recommendations of the report, if adopted, would result in amendments to Zoning By-law 2010-40 to permit the proposed development.

# **Background**

# **Subject Lands**

The subject lands are located along Gorham Street, east of Leslie Street and west of Harry Walker Parkway South. The subject lands currently contain a one-storey industrial building. The lands have an area of approximately 6,184 square metres and a lot frontage of approximately 90.57 square metres along Gorham Street. The surrounding land uses are as follows:

North: General Employment

East: General Employment - currently

York Region District School Board (YRDSB) – Facilities Management Centre/Plant Services

South: General Employment – currently YRDSB – Centre for Leadership and Learning

West: General Employment

The subject lands are currently zoned General Employment Exception 12 (EG-12) Zone under Zoning By-law 2010-40, and are designated Business Park – General Employment under the Town's Official Plan.

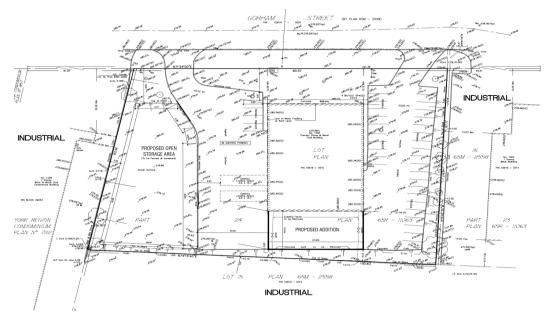

# **Proposal**

The applicant is proposing to amend the zoning from the General Employment Exception 12 (EG-12) Zone to facilitate the expansion of the existing industrial building and an outdoor storage area. The proposed rear addition is approximately 359 square metres and will have a rear yard setback of 2.0 metres, whereas the By-law requires a rear yard setback of 12.0 metres. Additionally, the existing EG-12 Zone does not allow outdoor storage and the applicant is proposing to add Open Storage as a permitted use.

The proposed open storage area would be approximately 1,094 square metres (approximately 17.7% of the site area), and would be fenced and screened.

A future application for site plan approval will be required, should the application for rezoning be approved.

# **Discussion**

The following section will review the development proposal against applicable planning policy.

# **Provincial Policy Statement**

The Provincial Policy Statement (PPS) 2020 provides policy direction on matters of provincial interest related to land use planning and development. The PPS sets the policy foundation for regulating the development and use of land.

The PPS provides for appropriate development while protecting resources of provincial interest, public health and safety, and the quality of the natural environment.

The PPS promotes efficient development and the accommodation of an appropriate range and mix of residential, employment, recreation, park and open space and other uses to meet long term goals.

The Town of Newmarket is considered a "Settlement Area" within the PPS, which is a focus area for growth and development. The PPS indicates that land use patterns within settlement areas shall be based on densities and a mix of land uses which include efficiently use of land and resources.

The proposed development is consistent with the PPS as it supports the efficient use of land and resources through the use of existing infrastructure and services, and supports the mix of land use by strengthening employment base and helping to achieve a complete community.

#### A Place to Grow - Growth Plan for the Greater Golden Horseshoe

The Growth Plan for the Greater Golden Horseshoe 2019 (Growth Plan) provides a framework for implementing the Government of Ontario's vision for building stronger, prosperous communities by managing growth throughout the Greater Golden Horseshoe. It demonstrates the ways in which our cities, suburbs, towns and villages will grow over the long term. The Growth Plan guides decisions on a wide range of issues, including transportation, infrastructure planning, land-use planning, urban form, housing, natural heritage and resource protection.

Within the Growth Plan, one of the guiding principles is to provide flexibility to capitalize on new economic and employment opportunities as they emerge, while providing certainty for traditional industries. Also, the Growth Plan indicates that applying the policies of this Plan will support the achievement of complete communities that feature a diverse mix of land uses, including residential and employment uses, and convenient access to local stores, services and public service facilities.

The proposed development is consistent with the Growth Plan as it supports the growth of the existing business and retaining the business within the local community.

# York Region Official Plan

The York Region Official Plan (YROP) designates the subject lands as part of the "Urban Area", which is the primary area for accommodating growth and diverse mix of land uses. The mix of land uses includes providing for employment lands. The proposed

development is consistent with the YROP by supporting the growth of the existing local business.

#### **Newmarket Official Plan**

The subject property is designated Business Park – General Employment on Schedule A – Land Use Plan of the Town's Official Plan. The main objectives of the Business Park designation is to encourage the provision of an adequate and appropriate supply of employment lands to accommodate opportunities for economic development, contribute to the Town's population to employment ratio target of 2:1, and support and encourage a wide range of industrial operations.

Section 16.1.1 of the Official Plan discusses the items that need to be considered by Council when considering an amendment to the Zoning By-law:

## a. the proposed change is in conformity with this Plan;

The General Employment designation permits manufacturing, processing, assembling, storage, warehousing, fabricating and wholesaling (except to the general public) of goods and materials. Also, outdoor storage of goods, materials and equipment may be permitted in accordance with the following policies:

- all storage areas shall be located away from adjacent designated residential areas, or have adequate buffering;
- ii. all buffering, fencing and screening shall visually enhance the site and be of a permanent nature; and,
- iii. where natural landscaping is utilized as part of the buffering, it shall be adequate in size and nature to screen the outdoor storage.

The proposed use of the subject lands conforms to the Official Plan. The outdoor storage area is not located near any residential areas and will be fenced around its perimeter with visual screening. Due to the height of the fence, landscaping is not proposed as a screen for the open storage area and instead, a fence screen will be constructed. The proposal of a rear addition to the existing industrial building and the outdoor storage area is in-keeping within the General Employment designation.

# the proposed uses are compatible with adjacent uses, and where necessary, buffering is provided to ensure visual separation and compatibility between uses;

The existing industrial use is similar to the surrounding land uses. The proposed outdoor storage area will be fenced with visual screening to ensure compatibility between uses.

#### c. potential nuisance effects upon adjacent uses are mitigated;

The adjacent uses (general employment/industrial) are similar to those currently on the subject lands and thus nuisance effects are expected to be minimal.

### d. adequate municipal services are available;

The applicant has provided a functional servicing report that has been reviewed by Engineering Services, and this report concluded that there are no issues from a servicing standpoint.

### e. the size of the lot is appropriate for the proposed uses;

The subject lot is approximately 6,184 square metres and will be sufficient to accommodate the proposed rear addition to the existing building and outdoor storage area without affecting the functionality of the existing business or surrounding land uses. The maximum lot coverage of 50% will not be exceeded.

# f. the site has adequate road access and the boundary roads can accommodate the traffic generated;

The site has two existing driveway access points onto Gorham Street that have adequately served the use to date, no additional access onto the street is required.

# g. the on-site parking, loading and circulation facilities are adequate; and,

The existing on-site parking will sufficiently meet the zoning requirements, no additional parking spaces are required for the proposed addition. In addition, there are two (2) existing loading space and four (4) proposed bicycle parking spaces to service the site, which meets the requirements of the zoning by-law. The proposed addition will have an entrance from the east side which vehicles will be able to flow through to the west side of the proposed addition to exit.

### h. public notice has been given in accordance with the Planning Act.

Notice has been provided in accordance with the Planning Act.

The proposed development would meet the relevant provisions of the official Plan, including Section 16.1.1 as analyzed above.

# **Zoning By-law Considerations**

The subject property is currently zoned General Employment Exception 12 (EG-12) Zone. The General Employment zone permits the Manufacturing and Light Manufacturing uses, and the Exception 12 permits a maximum building height of fifteen (15) metres. The applicant is proposing a 9.5 metres high rear addition to the existing building and an outdoor storage area. Site-specific zoning is required for 1) the reduced rear yard setback, and b) the outdoor storage component.

Below is a summary of the required and proposed zoning standards applicable to the site:

| Zone Standard        | General Employment<br>Zone (EG)               | Proposed                                                   | Complies? |
|----------------------|-----------------------------------------------|------------------------------------------------------------|-----------|
| Min. Lot Area        | 2787 m <sup>2</sup>                           | 6,184.23 m <sup>2</sup>                                    | Yes       |
| Min. Lot Frontage    | 45.0 m                                        | 90.57m                                                     | Yes       |
| Min. Front Yard      | 12.0 m                                        | 12.08 m                                                    | Yes       |
| Min. Rear Yard       | 12.0 m                                        | 2.81 m<br>(addition)<br>2.0 m<br>(outdoor<br>storage area) | No        |
| Min. Side Yard       |                                               |                                                            |           |
| One Side             | 3.0 m                                         | 21.16 m                                                    | Yes       |
| Other Side           | 6.0 m                                         | 34.12 m                                                    | Yes       |
| Max. Lot Coverage    | 50%                                           | 22.2%                                                      | Yes       |
| Max. Building Height | 15m<br>By-law 1986-117 and<br>By-law 1986-118 | 9.50 m                                                     | Yes       |

# **Agency and Public Comments**

The development proposal has been circulated to the public and the Town's internal and external review partners.

# York Region

Staff from the Regional Municipality of York note that they have no objections on the proposed Zoning By-law Amendment.

#### **Central York Fire Services**

Central York Fire Services have reviewed the application and stated they have no objection to the proposed application.

# **Engineering Services**

The Town's Greenspace Coordinator has reviewed the application and stated that they have no comments to the proposed application.

## **Lake Simcoe Region Conservation Authority**

The Lake Simcoe Region Conservation Authority (LSRCA) has reviewed the application in accordance with the Natural Heritage and Natural Hazard policies of the Provincial Policy Statement (PPS), the Greenbelt Plan, the Lake Simcoe Protection Plan (LSPP), and Ontario Regulation 179/06 under the Conservation Authorities Act, and have provided the following comments:

- The subject property is currently outside of an area that is regulated by the LSRCA under Ontario Regulation 179/06. Accordingly, a permit from the LSRCA under Ontario Regulation 179/06 will not be required prior to any development taking place.
- The proposal is generally consistent and in conformity with the applicable Provincial Plans. As such, they have no further requirements related to the approval of the application.

#### **Other Review Partners**

- Canada Post has advised that no changes are required for mail delivery for this application.
- Rogers Communications has advised that they do not have any comments or concerns on this application.
- The Southlake Regional Health Centre has advised that they do not have any comments on this application.

#### **Effect of Public Input**

A virtual/electronic statutory public meeting was held in September of 2020. Comments were received at the statutory public meeting and the comments centered on the following themes:

- Reduced Rear Yard Setback
  - A review has been completed by staff relative to reduced rear yard setbacks for other industrial buildings in the general area of the subject site. There are numerous examples of properties in the employment lands that have reduced rear yard setbacks in order to maximize efficiency of such development and serve specific business needs. In addition, many existing properties do not have drive aisles all the way around the building, similar to what is being proposed. On the proposed addition, there will be an entrance on the east side which vehicles will be able to flow through to the west side of the addition to exit.
  - The proposed reduced rear yard setback does not appear to have any significant impacts on the property to the south, as it is currently a parking lot and the adjacent building is located approximately sixty (60) metres away from the property line. Any future use of the south adjacent lands, would need to meet the zone standard for the interior side yard of the zone, which is currently 3.0 metres. These collective setbacks would

provide sufficient building separation distance and allow access for maintenance, and airflow.

#### Landscaping

- The applicant has provided a Tree Preservation, Protection, Replacement Plan and Landscape Plan that has been reviewed by the Engineering Department. The report identified a total of eighteen (18) existing trees on and within six (6) metres of the subject property. The removal of trees will not be required to accommodate the proposed development and tree protection measures will be implemented prior to construction.
- The outdoor storage area is not located near any residential areas and will be fenced around its perimeter with visual screening. New coniferous and deciduous trees will be planted along the front of the subject property to screen the outdoor storage area from the street.
- Outdoor Storage Area Size and Environmental Concerns
  - A review of the general area of the subject site has been completed by staff relative to the size of the outdoor storage area. The size is relatively smaller than those that already exist in the surrounding area.
  - The applicant has provided a Phase 1 Environmental Site Assessment (ESA) that has been reviewed by the Engineering Department. This report concluded that actual or potential contamination is not present on the subject property and that a Phase 2 ESA is not required.
  - Given appropriate screening and limits on the nature of outdoor storage to limit it to materials related to the principal use on the lot, outdoor storage is compatible with the area, and is currently a permitted use on many properties in the nearby area.
  - Screening, fencing, landscaping and material permitted to be stored within the outdoor storage area will be addressed through the Site Plan Approval Process.

#### Conclusion

The zoning by-law amendment application meets the intent of, and is consistent with, the Provincial Policy Statement, Growth Plan for the Greater Golden Horseshoe, York Region Official Plan and Town's Official Plan.

Staff recommend approval of the application. Further refinement of the application will take place as part of the site plan approval application.

# **Business Plan and Strategic Plan Linkages**

• Economic Leadership and Job Creation

#### Consultation

As detailed in this report, public and agency notice was completed as per the requirements of the Planning Act.

Notice has been provided to persons and bodies as required by Ontario Regulation 545/06 of the Planning Act.

A statutory public meeting was held in September of 2020.

#### **Human Resource Considerations**

N/A

# **Budget Impact**

The appropriate planning application fees have been received for the Zoning By-law Amendment. The Town will also receive increased assessment revenue with the development of this proposal in the event the application is approved.

# Corporation of the Town of Newmarket By-law 2020-XX

A By-law to Amend Zoning By-law 2010-40, with respect to the lands located at 1250 Gorham Street, Newmarket.

Whereas the Council of the Town of Newmarket has the authority pursuant to Section 34, of the *Planning Act*, R.S.O. 1990, c.P.13, as amended, to pass this By-law; and

Whereas the Council of the Town of Newmarket has provided adequate information to the public and has held at least one public meeting in accordance with the *Planning Act*; and

Whereas it is deemed advisable to amend By-law Number 2010-40;

Therefore be it enacted by the Municipal Council of the Corporation of the Town of Newmarket as follows:

- 1. That the lands subject to this amendment are illustrated on Schedule 1 attached hereto.
- 2. Amending Section 8.1.1 List of Exceptions as it relates to lands located at 1250 Gorham Street by adding the following regulations relating to the EG-12 Zone:

| Exception | Zoning | Мар | By-Law Reference | File Reference |
|-----------|--------|-----|------------------|----------------|
| 12        | EG-12  | 15  | 1986-117;        | D14-NP-2010    |
|           |        |     | 1986-118;        |                |
|           |        |     | 2020-XX          |                |

i) Location: 1250 Gorham Street

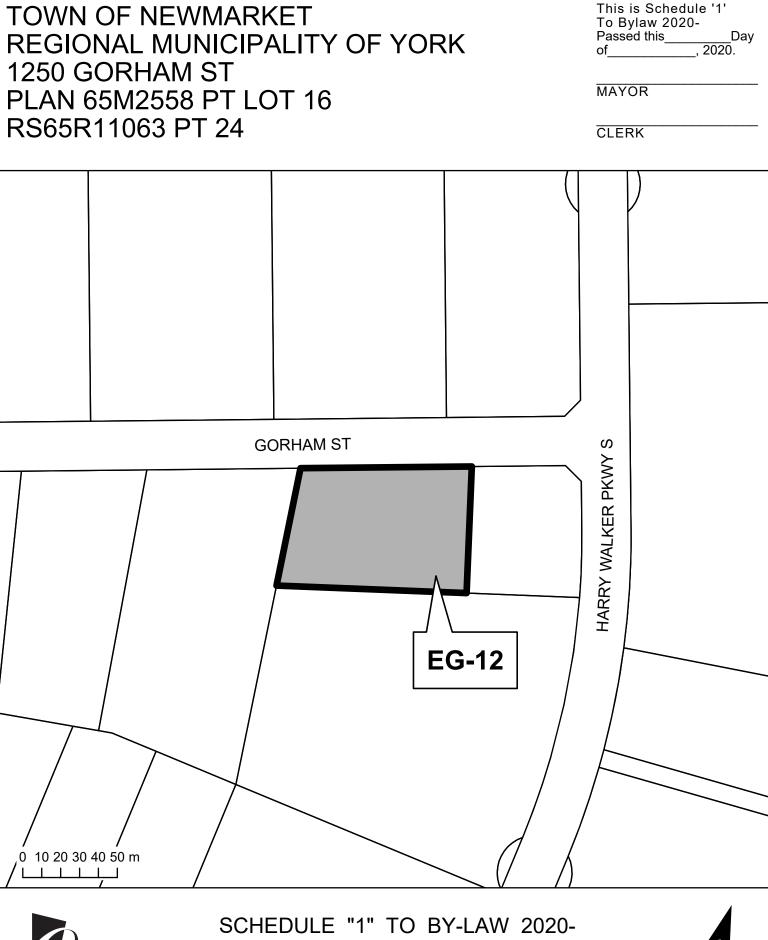

ii) Legal Description: Part Lot 16, Plan 65M-2558, Town of Newmarket

iii) Notwithstanding any other provision of the by-law to the contrary, the following provisions shall apply to the lands located at 1250 Gorham Street shown on Schedule 1 attached hereto.

Uses permitted in addition to uses otherwise permitted by the EG Zone:

| Outdoor open storage.                                            |
|------------------------------------------------------------------|
| iv) Development Standards:                                       |
| (a) Building Height (maximum): 15 m                              |
| (b) Rear yard building setback (south lot line): 2.0 m (minimum) |
| Enacted this day of 2020.  John Taylor, Mayor                    |
| Lisa Lyons, Town Clerk                                           |

# Third Quarterly Update to the Outstanding Matters List for 2020 Staff Report to Council

Report Number: 2020-77

Department(s): Legislative Services

Author(s): Jaclyn Grossi, Legislative Coordinator

Meeting Date: October 26, 2020

#### Recommendations

- 1. That the report entitled Third Quarterly Update to the Outstanding Matters List for 2020 dated October 26, 2020 be received; and,
- 2. That Council adopt the updated Outstanding Matters List, included as **Attachment 1** to this report; and,
- 3. That Staff be authorized and directed to do all things necessary to give effect to this resolution.

# **Purpose**

The purpose of this report is to present Council with the third quarterly update to the Outstanding Matters List in 2020.

# **Background**

Council adopted the <u>first quarterly</u> update at their May 19, 2020 Special Council – Electronic meeting, and the <u>second quarterly</u> update at their August 31, 2020 Council – Electronic meeting. This report serves to present the third quarterly report.

#### Discussion

An updated Outstanding Matters List (**Attachment 1**) has been provided and is presented to Council for adoption. As a reminder, the items included in Attachment 1 are only items from the Outstanding Matters List, which require Council decision or

consideration. The chart does not depict other projects or work that staff continue to dedicate resources towards. It also does not include the Council-approved action items contained in the REV it Up Campaign or within Council's Strategic Priorities.

Corresponding item numbers have been enumerated to ensure that Council has ease of reference for specific matters should there be questions about associated timeframes or the subject matter itself.

# **Items Removed from the Outstanding Matters List**

The following items have been removed from the List:

# (1) Downtown Parking Report - 500 Water Street Parking Information Report 2018-11 (Cachet Parking Lot)

#### Recommendation:

That the Community Centre Lands Task Force work form the basis of a report back to Council, to be brought forward in Q1/Q2, 2019.

This item was removed as Council endorsed Downtown Parking options at its meeting Council Meeting - Electronic on August 31, 2020, and further directed Staff to report back in Q1 2021 regarding the 30 Minute Parking on Main Street, and in Q2 2021 regarding Parking Wayfinding.

# (2) Financial Update

#### Recommendations:

That staff be directed to further investigate mitigating measures to lessen the financial impact of the pandemic on the Town, and to report back on the results.

This item was removed as Council received a Financial Update at their August 31, 2020 Council Meeting - Electronic.

#### (3) Derelict Properties

#### Recommendations:

That Staff circulate an information report related to derelict properties, including information regarding demolition requirements and any impediments that may apply.

This item was removed as an Information Report was distributed to Council on September 11, 2020, and Mayor Taylor requested that this item be placed on the October 5, 2020 Committee of the Whole Meeting - Electronic. At their Council Meeting -

Electronic on October 13, 2020, Council directed Staff to report back with options for a Vacant Building Registry Program by Q1 2021.

#### (4) Community Support

Recommendations:

That Council direct Staff to provide further information related to other gaps in meeting community needs and the potential role of the Town in addressing those.

This item was removed as a detailed summary and update was provided to Council via email on June 23, 2020 (Attachment 2).

#### Conclusion

Staff will continue to provide Council with an updated List quarterly to reflect the current status of items which Staff have been directed to report back to Council on.

# **Business Plan and Strategic Plan Linkages**

As this report highlights an updated Outstanding Matters List for the Corporation, this report aligns with all six pillars of Council's Strategic Priorities.

#### Consultation

Members of the Strategic Leadership Team and Operational Leadership Team were consulted in this report.

# **Human Resource Considerations**

There are no human resource considerations specific to this report. However, individual projects within the List may have associated human resources impacts, and any such considerations will be noted in the individual reports on those matters.

# **Budget Impact**

There are no budget impacts specific to this report. However, individual projects within the List may have associated budget impacts, and any such considerations will be noted in the individual reports on those matters.

#### **Attachments**

Attachment 1 – Third Quarterly Update to the Outstanding Matters List for 2020

**Attachment 2** - Email to Council dated June 23, 2020 regarding the Item Removed from the Outstanding Matters List entitled (4) Community Support

# **Approval**

Kiran Saini, Deputy Clerk
Esther Armchuk, Commissioner, Corporate Services
Ian McDougall, Commissioner, Community Services
Peter Noehammer, Commissioner, Development and Infrastructure Services
Jag Sharma, Chief Administrative Officer

# **Contact**

For more information about individual projects contained in Attachment 1, please contact the responsible Department Director or respective Commissioner.

| 16.  | Atkins Drive and Quick Street All-way Stop Request | Meeting Date: Committee of the Whole – February 24, 2020  Recommendation: 6. That the Town continue to apply Category 1 traffic calming measures to educate motorists to comply with the speed limits and that Staff explore options for Category 2 traffic calming measures; and,  7. That Staff provide Council with data regarding All-Way Stop warrants related to Bob Gapp Drive and Atkins Drive, including modelling the anticipated near-term growth; and,  Responsible Departments:  • Engineering Services | Q4 2020                      | Q1 2021                                | Staff require time to complete the fieldwork and measurements for this study.  The timing of this report will depend on when traffic patterns resume back to normal after the Pandemic (i.e., if school returns to normal in September 2020). Traffic measurements will need to be a true representation of the traffic patterns to correct the field situation.  As schools are returning in the Fall, Staff will conduct appropriate studies in Q3 & Q4 of 2020, as the weather allows. A Staff Report will be issued in Q1 2021. |
| 17.  | Traffic & Parking Petitions                        | Meeting Date: Committee of the Whole - August 26, 2019  Recommendations:  1. That the petition regarding Traffic Calming Measures/Speed Mitigation on Flagstone Way be referred to Staff; and, 2. That the petition regarding Traffic Calming Measures/Speed Mitigation on Simcoe Street be referred to Staff.  Responsible Departments:  • Engineering Services                                                                                                                                                     | Q1 2020                      | Q1 2021                                | As schools are returning in the Fall, Staff will conduct appropriate studies in Q3 & Q4 of 2020, as the weather allows. A Staff Report will be issued in Q1 2021.                                                                                                                                                                                                                                                                                                                                                                   |
| 18.  | Traffic & Parking Petitions                        | Recommendation:  1. That the Helmer Avenue Parking Review be referred back to Staff.  Responsible Departments:  • Engineering Services                                                                                                                                                                                                                                                                                                                                                                               |                              | Q1 2021                                | As schools are returning in the Fall, Staff will conduct appropriate studies in Q3 & Q4 of 2020, as the weather allows. | 22.  | Heritage Designations - York<br>Region Administrative Building<br>and Newmarket Canal System | Meeting Date: Committee of the Whole - April 30, 2018  Recommendations:  2. The Strategic Leadership Team/Operational Leadership Team recommend that the following be referred to staff for review and report:  a. That the Heritage Newmarket Advisory Committee propose to the Region of York that the Administration Centre building be designated, due to its noted architect; and,  b. That the Heritage Newmarket Advisory Committee recommend the Town of Newmarket designate the Newmarket Canal system.  Responsible Department:  • Planning and Building Services | Q3 2020<br>Q1 2020           | Q1 2021                                | Additional time was needed to retain Cultural Heritage Consultant via Procurement process.  Consultant retained and Designation Reports are now being prepared.  This item must first go to Heritage Newmarket, so it is tied to timing of that Committee resuming their meeting schedule. Staff are prepared to bring a report to a Heritage Newmarket Committee Meeting in September 2020.  Staff distributed an information report on September 10, 2020 which provided an explanation as to amending the proposed reporting timeframe. |
| 23.  | Downtown Parking Review                                                                      | Meeting Date: Council Meeting - August 31, 2020  Recommendation: 6. That staff be directed to consult with the BIA and report to Council by Q1 2021 on potential permanent 30 minute parking restrictions on Main Street including a review of other options; and, 8. That Council direct staff to present a report on parking wayfinding in the downtown area for Council consideration in Q2 2021; and,  Responsible Departments:  • Innovation & Strategic Initiatives                                                                                                   |                              | Q1 & Q2 2021                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| 26.  | Parking Enforcement Initiative -<br>Pay It Forward Program | Meeting Date: Committee of the Whole - November 4, 2019  Recommendation: 3. That Staff report back to Council within 18 months  Responsible Department:  • Legislative Services                                                                                                                                                                               | Q2 2020                         | Q3 2021                                  | Council previously request that staff require donations to the Newmarket CARE program, however online donations cannot be accepted. Given that resources will be committed to recovery from the Pandemic this initiative is not deemed a priority item in 2020 and will be presented to Council as an Information Report in 2021.                                    |
| 27.  | Short Term Rentals & Municipal Accommodation Tax           | Meeting Date: Committee of the Whole – February 3, 2020  Recommendations: 3. That Council direct Staff to proceed with Option 3 as described in the report.  Option 3 would require the adoption of a Licensing By-law, presented to Council in April or May 2020 and amendments to the Zoning By-law, presented to Council by August 2020.                   | Q3/Q4 2020                      | Q2 and Q3 2021 – see additional comments | Licensing framework could be ready for a Workshop with Council in June 2020, with a program with zoning framework in Q3/Q4. Current considerations being given to the Pandemic and restrictions on short term rentals.  Staff distributed an information report on September 10, 2020 which provided an explanation as to amending the proposed reporting timeframe. |
|      |                                                            | Meeting Date: Special Committee of the Whole – Electronic – June 15, 2020  Recommendations: 4. That Council direct staff to bring forward a report regarding a Municipal Accommodation Tax (MAT) on all short term rental properties in Q3/Q4 2021.  Responsible Departments:  • Legislative Services  • Planning and Building Services  • Financial Services |                                 | Q3/Q4 2021                               | The Municipal Accommodation Tax will need to be included with this matter, and staff will need to outline a plan to approach this item, starting with stakeholder consultations                                                                                                                                                                                      |

Subject: Lunch and Food Distribution Program Update

Hello Mayor Taylor and Members of Council:

Council provided staff with an initial sum of \$25,000 and an additional sum of up to \$25,000 to ensure that we could provide support to those most vulnerable in our community. As we transition into reopening, the various agencies who normally perform these important functions are able to get volunteers and are able to start to provide some of these services again. So, I wanted to take this opportunity to update you on what has transpired and how those funds were used.

An operating grant of \$5,000 was provided to the Newmarket Food Pantry to help with purchase of food. The Food Pantry switched to a hamper program where hampers of food and essential items were assembled and delivered to families in need. Three to four times a week, a staff member from the Recreation & Culture Department utilized our Community Cruiser to deliver these hampers – over 400 hampers have been delivered by Town staff.

The Newmarket Co-Op Housing was in dire need of baby supplies and essential items. Recreation & Culture staff went and purchased the necessary supplies (totalling \$1,000) and delivered them to their doors (again using the Community Cruiser).

Since late March we have been serving a daily lunch program at the front of the Town Office. Over 4,250 meals were served to those most vulnerable within our community. The lunches were provided daily by The Pickle Barrel at a significantly reduced cost. Just over \$25,000 was spent on providing these lunches. We will be wrapping up the lunch distribution program on Friday, June 26<sup>th</sup>. A meal is now available daily in Newmarket. Staff have been distributing information about where food is available all week.

A grant of \$2,000 will be provided to the Rose of Sharon to help them provide essential items to young mothers.

At this point, approximately \$33,000 has been spent or committed. More importantly, hundreds of members of our community who are most vulnerable have had access to food and essential items during very difficult times.

Staff will continue to monitor the situation and will continue dialogue with the various agencies to ensure that services continue to be available within the community.

If you have any further questions, please don't hesitate to give me an email or phone call.

Take care,

#### **Colin Service**

#### **Petition for No Parking Signs**

#### **Clematis Road**

#### Ward 3

#### September 2020

We the undersigned residents of Clematis Road are hereby petitioning the Ward 3 Councillor of the Town of Newmarket to install "No Parking 8 a.m. to 4 p.m." signs.

Due to the change in the schooling format at St. Elizabeth Seton Catholic Elementary School to a French emersion school, there has been an increase in students traveling to the school outside of the community. As a result, parents are parking on Clematis Road and accessing the school via the walkway at the end of the street. The increase of parking has caused access problems to driveways, including the complete blockage by parked cars. Parking Enforcement has not eradicated the problem.

#### 4. Approval of Minutes

# 4.1 Accessibility Advisory Committee Meeting Minutes of November 21, 2019

Moved by: Lawrence Raifman

Seconded by: Linda Jones

1. That the Accessibility Advisory Committee Meeting Minutes of November 21, 2019 be approved.

Carried

#### 5. Items

# 5.1 Financial Incentive Program Staff Working Group - Accessibility Inclusion

The Business Development Specialist provided an update regarding the Financial Incentive Program Staff Working Group focused on the inclusion of accessibility projects in the application process. She advised that Staff is currently working to allow funding for accessibility projects and conducting research regarding the AODA & Building Code requirements.

#### 5.2 Stickwood Walker Farmhouse Site Plan Update

The Business Development Specialist provided an update regarding the Stickwood Walker Farmhouse and advised that another site plan would be circulated to the Accessibility Advisory Committee when the proponent provided it to Staff. She answered questions regarding the accessible washroom, entrances to the building, and the parking lot.

#### 5.3 Main Street Accessibility Discussion

5.3.1 Stickers and Award Program for Accessible Stores Discussion

Steve Foglia discussed initiatives run by the Rick Hansen Foundation in Vancouver such as the Rick Hansen Foundation Accessibility Certification (RHFAC), and discussed the possibility of a similar initiative for Main Street businesses.

5.3.2 Deputation/Presentation to the Main Street District Business Improvement Area Board of Directors

The Members discussed various improvements that businesses on Main Street could implement to increase the accessibility of their stores. They discussed ways in which the Accessibility Advisory Committee could educate the Main Street District Business Improvement Area Board of Management through a deputation at a future meeting, providing handouts, and potential solutions to identified issues.

#### 5.4 2020 National Access Awareness Week

The Recreation Programmer - Seniors & Special Needs provided an update on the 2020 National Access Awareness Week (NAAW) occurring from June 1, 2020 to June 8, 2020. The Members discussed ideas for the 2020 event including a Farmer's Market booth, Sports for Everyone events, guide dogs, social media presence, and closed captioning availability.

The NAAW sub-committee agreed to meet with the Recreation Programmer - Seniors & Special Needs regarding the 2020 event prior to the March Accessibility Advisory Committee Meeting.

Moved by: Patricia Monteath

Seconded by: Lawrence Raifman

1. That the Accessibility Advisory Committee form a National Access Awareness Week (NAAW) sub-committee composed of Steve Foglia and Pat McIntosh.

Carried

#### 5.5 Chair Updates

- Steve Foglia shared a story regarding his experience voting for the Federal election and the issues with the accessible voting location provided by Elections Canada.
- Steve Folgia discussed the need for an accessible washroom at Fairy Lake and asked Staff continue to look for improvements of the current structure and available grants.

#### 5.6 Accessibility Advisory Committee Member Recruitment Update

The Legislative Coordinator advised that the two vacancies on the Accessibility Advisory Committee had been advertised and numerous applications were received and reviewed. She advised that the two new Members would be appointment prior to the March 19, 2020 Accessibility Advisory Committee meeting.

#### 6. New Business

#### 6.1 Patterson Sidewalk Update

Steve Foglia provided an update on a capital project on Patterson that he attended to assist with an accessibility audit of the sidewalk. He asked Staff to provide an update on the project at the next meeting.

#### 6.2 Accessibility Advisory Committee Membership

The Members discussed amending their terms of reference to increase their membership by two due to the interest during the last recruitment and the current issues with achieving quorum.

Moved by: Patricia Monteath

Seconded by: Lawrence Raifman

1. That the Accessibility Advisory Committee recommend to Council that the Terms of Reference be amended to increase the membership to 10 members.

Carried

#### 6.3 Wheelchair Basketball

The Recreation Programmer, Inclusion & Leisure Services asked the Members to share with the residents that the Wheelchair Basketball program was currently running on Saturdays from 11:30 AM to 1:00 PM at the Recreation Youth Centre and Sk8Park (56 Charles Street).

#### 7. Adjournment

Moved by: Patricia Monteath

Seconded by: Lawrence Raifman

1. That the meeting be adjourned at 11:38 AM.

Carried

#### 5. Items

#### 5.1 2020-2024 Economic Development Strategy

The Commissioner of Community Services, Economic Development Officer, and Business Development Specialist introduced the presentation and outlined the brand development that the Town of Newmarket has undertaken thus far.

The Business Development Specialist provided an analysis of the three identified strategies entitled Attraction & Marketing, Building an Entrepreneurial Ecosystem, and Community Development. For each strategy she reviewed the feedback that was received from the

Newmarket Economic Development Advisory Committee through previous meetings that led to the development of the specific strategies. The Business Development Specialist provided an analysis with an evaluation matrix, and identified key performance indicators to recognize what success for each strategy would look like by 2024.

The Members of the Newmarket Economic Development Advisory Committee provided the Economic Development Staff with feedback on all three strategies regarding the identification of specific actionable targets, design related to distinct sectors, relationship to the 2018-2022 Council Strategic Priorities, and the wording of the third strategy.

Jessica Rawlley took no part in the discussion related to the identified strategy 3 entitled Community Development due to a declared conflict.

#### 5.2 Results of Marketing the Corridor Media Relations

The Business Development Specialist reviewed the results of the Marketing the Corridor Media Relations campaign over the last 18 months. She provided an overview of the marketing programs used, the total impressions received, and highlighted some featured articles and segments that covered the Town of Newmarket. The Business Development Specialist further explained that this marketing will continue as relationships are built with the media and stories continue to be picked up.

#### 6. Closed Session

Donna Fevreau advised that there was no requirement for a Closed Session.

#### 7. New Business

None.

#### 8. Next Meeting

#### 9. Adjournment

Moved by: Edmund Yeung

Seconded by: Robert Bull

1. That the meeting be adjourned at 7:05 PM.

Members Absent: Peter McKinnon

Rod Scotland

Staff Present: C. Kallio, Economic Development Officer

E. Bryan, Business Development Specialist

J. Grossi, Legislative Coordinator A. Walkom, Legislative Coordinator The meeting was called to order at 11:30 AM. Donna Fevreau in the Chair.

#### 1. Notice

Donna Fevreau advised that all Town facilities were closed to the public, and that members of the public were encouraged to attend an electronic Advisory Committee or Board Meeting by joining through the ZOOM information provided with the agenda or by emailing clerks@newmarket.ca.

#### 2. Additions & Corrections to the Agenda

None.

#### 3. Conflict of Interest Declarations

None.

#### 4. Items

#### 4.1 York Region 2019 Employment Survey: Newmarket Results

The Economic Development Officer provided an overview of the York Region 2019 Employment Survey results related to the Town of Newmarket. He outlined the job growth trends, the growth of labour force major sectors from 2006 to 2019, and compared the retail job growth with the healthcare and social assistance job growth numbers.

#### 4.2 Economic Resiliency Action Plan Update and Next Steps

The Business Development Specialist provided a presentation regarding the Economic Resiliency Action Plan Update and the COVID-19 response to Supporting Newmarket Businesses. She provided an overview of the Economic Development Resiliency Action Plan which included the redeployment of Staff to assist the Economic Development department, the Business Assistance Concierge (BAC) partnership with the Newmarket Chamber of Commerce, and the Mentorship Access Program.

The Business Development Specialist analyzed data collected related to businesses who accessed the BAC program and provided next steps. She outlined the collaboration opportunities with the Northern 6 (N6) Municipalities, York Region, Newmarket Chamber of Commerce, and York University for sector specific round tables.

The Economic Development Officer provided an overview of the Temporary Patio Access Program which was launched by Town Staff to allow business to open outdoor patios as of June 19, 2020, when Newmarket entered stage 2 of the Provincial reopening plan.

The Members of the Newmarket Economic Development Advisory Committee queried Staff on the availability of additional statistics related to the BAC program, tax reduction opportunities for vacant properties, and future marketing and advertising opportunities in relation to businesses reopening.

#### 4.3 2020-2024 Economic Development Strategy Status Update

The Business Development Specialist provided a brief update on the 2020-2024 Economic Development Strategy and advised that the final strategy was expected to be presented to Council by the end of 2020.

Donna Fevreau asked the Members of the Newmarket Economic Development Advisory Committee to provide any ideas or comments to the Economic Development Staff related to how the Town of Newmarket can further support local businesses.

Moved by: Carin Binder

Seconded by: Edmund Yeung

 That the presentation regarding the York Region 2019 Employment Survey, Economic Resiliency Action Plan Update, and 2020-2024 Economic Development Strategy Status Update provided by the Economic Development Officer and Business Development Specialist, be received.

Carried

#### 5. Adjournment

Moved by: Patrick Horgan

Seconded by: Beric Farmer

1. That the meeting be adjourned at 1:32 PM.

## By-law 2020-58

A By-law to confirm the proceedings of a meeting of Council - Electronic – November 2, 2020

Whereas s. 5(1) of the Municipal Act, 2001, S.O. 2001, c. 25 provides that the powers of a municipal corporation shall be exercised by its Council; and,

Whereas s. 5(3) of the Municipal Act, 2001, S.O. 2001, c. 25 provides that a municipal power, including a municipality's capacity, rights, powers and privileges, shall be exercised by by-law unless the municipality is specifically authorized to do otherwise; and,

Whereas the Council of the Town of Newmarket deems it advisable to pass such a by-law;

Therefore be it enacted by the Council of the Corporation of the Town of Newmarket as follows:

- That subject to Section 3 of this by-law, every decision of Council, as evidenced by resolution or motion, taken at the meeting at which this by-law is passed, shall have the same force and effect as if each and every one of them had been the subject matter of a separate by-law duly enacted;
- And that the execution and delivery of all such documents as are required to give effect to the decisions taken at the meeting at which this by-law is passed and the resolutions passed at that meeting are hereby authorized;
- And that nothing in this by-law has the effect of giving to any decision or resolution the status of a by-law where any legal prerequisite to the enactment of a specific by-law has not been satisfied;
- 4. And that any member of Council who disclosed a pecuniary interest at the meeting at which this by-law is passed shall be deemed to have disclosed that interest in this confirmatory by-law as it relates to the item in which the pecuniary interest was disclosed.
