Declarations of Pecuniary Interest

Presentation

 Presentation of Preliminary Report dated November 15, 2016 by Mr. Paul p. 1 McIntosh, Thomas Brown Architects Inc. regarding Proposed Central York Fire Services Headquarters Station 4-5.

Approval of Minutes

2. Central York Fire Services - Joint Council Committee Minutes of October 4, p. 23 2016.

Items

3. Central York Fire Services Report 2016-02 dated November 8, 2016 regarding p. 27 Fire Station 4-5 Project Plan.

The Fire Chief recommends:

- a) THAT Central York Fire Services Report 2016-02 dated November 8, 2016 regarding Fire Station 4-5 Project Plan be received and the following recommendations be adopted:
- i) THAT Central York Fire Services Report 2016-02 dated November 1, 2016, Fire Station 4-5 Project Plan be received for information purposes;
- ii) AND THAT Joint Council Committee (JCC) approve and recommend to the Councils of Aurora and Newmarket that staff proceed with the design of a fire hall in Aurora which includes administration, fire suppression and training services (Option A);
- iii) AND THAT a budget of \$495,000 be approved to complete the detailed design phase, including project support;

- iv) AND THAT staff be authorized to negotiate a single source procurement with Thomas Brown Architects to complete the detailed design;
- v) AND THAT staff report back to JCC prior to issuing the tender to provide a project update and seek approval for the final construction project.
- 4. Joint Central York Fire Services/Corporate Services Finance Report 2016-54 p. 35 dated November 11, 2016 2016 CYFS Budget Report Third Quarter.

The Fire Chief and the Director of Financial Services/Treasurer recommend:

- a) THAT Joint CYFS/Corporate Services Report Financial Services 2016-54 dated November 11, 2016 regarding 2016 CYFS Budget Report Third Quarter be received for information purposes.
- 5. Fire Services Report 2016-05 dated November 14, 2016 regarding Medical p. 39 Oversight of CYFS Medical Program.

The Fire Chief recommends:

- a) THAT the Joint Council Committee (JCC) approve securing medical oversight from a physician for the CYFS medical response program;
- i) AND THAT JCC authorize an increase in level of service that would allow CYFS to follow a symptom relief drugs protocol.
- 6. Central York Fire Services Joint Council Committee 2017 Meeting Schedule. p. 41

Recommendation:

a) THAT the Central York Fire Services - Joint Council Committee 2017 Meeting Schedule be approved.

New Business

Closed Session

7. Personal matters about an identifiable individual, including municipal or local board employees as per Section 239 (2) (b) of the Municipal Act, 2001.

Fire Services Report 2016-03 dated October 21, 2016 regarding Naming a Fire Station.

8. Personal matters about an identifiable individual, including municipal or local board employees as per Section 239 (2) (b) of the Municipal Act, 2001.

Fire Services Report 2016-04 dated October 28, 2016 regarding Naming a Fire Station.

Adjournment

THOMASBROWN

PRELIMINARY REPORT PROPOSED CENTRAL YORK FIRE SERVICES HEADQUARTERS STATION 4-5

NOVEMBER 15, 2016

PROPOSED CENTRAL YORK FIRE SERVICES HEADQUARTERS STATION 4-5

Thomas Brown Architects Inc. were engaged by the Town of Aurora and Central York Fire Services in the Summer of 2015 to advise on the feasibility of locating a Headquarters Station including Fire Training facilities on 3 selected sites – each approximately 2 Acres in size. Based on our preliminary studies, we were able to determine that each of the sites would accommodate a Headquarters Station complete with Fire Training Offices and Classrooms but without the land area to accommodate Training Props and Training Exercises. Following an informal presentation to the Joint Councils of Aurora and Newmarket, it was agreed to secure the 2 sites which are adjacent to each other on Isaacson Crescent at Earl Stewart Drive to provide a 4 Acre site for the development of a Headquarters Station and Fire Training Facilities including exterior Training Exercises.

Once the properties were secured, we were asked to provide preliminary information as to the probable size of the Headquarters Station, how it might be located on the site and what might be the extent of the Training Facilities which could be incorporated within the balance of the site. In conjunction with this investigation, we were asked to provide a Preliminary Cost Estimate for the project as envisioned.

Thomas Brown Architects have gained an unusual expertise in the Design and Construction Administration of Fire Stations over the past 40 years having completed over 100 such projects. We have attached for reference a copy of our complete experience in Fire and EMS projects and we have attached copies of Fact

Sheets for Fire Stations recently completed in Aurora, Markham, Richmond Hill, Whitchurch-Stouffville and our most recent Station in Oshawa. Our approach to the Proposed Headquarters Station in Aurora is based on a facility which would be comparable in quality to these examples.

We have also included for reference our history of Costs for Fire Station Projects which we have been tracking since 1995. We have highlighted 6 particular projects which we feel would be representative of the costs which would be anticipated for this Project. We have also used this information for a determination of the probable escalation in costs for the Aurora Headquarters in 2017-2018.

We have worked with Central York Fire Services to determine a Programme for the Headquarters Station. The main elements of the Station will be:

- Headquarters Administration Offices
- Fire Suppression Facilities
- Equipment Spaces
- Apparatus Bays & Service Spaces
- Training & Classroom Spaces

These elements are broken down into room sizes in the Preliminary Programme attached to this report.

Using the Programme, we have developed a Cost Estimate based on the projected overall Station size and the historical costs for projects of similar quality. Based on our experience with similar facilities, we have also included projected costs for the development of the Training Facilities.

The Preliminary Cost Estimate attached to this Report is broken down to indicate the costs for each of the main elements located in the Headquarters Station. We have then added projected costs for the Training Area assuming that it would be developed at the same time as the Headquarters Station.

The balance of the Cost Estimate incorporates additional budget items including Escalation, Consulting and In-House fees, Permit Costs, an Allowance for Poor Soils and a Contingency Allowance.

In order to provide a sense of reality to this Report, we have developed a Site Layout Drawing P1 incorporating the Headquarters Station, proper driveways and turning radii for the Fire Vehicles, adequate parking spaces for Staff, Visitors and Training requirements, Exterior Training areas for Training Props, Hose Exercises and Driver Training.

While the Headquarters Station is not specifically planned, we have allocated the required space to the shape which we have shown on the Site Plan. The allocation of the various elements are illustrated on Drawing P2 – Floor Plan & Massing. The Plan Areas are based on the Preliminary Programme.

Drawing P3 provides an overall Aerial View of the Site with the Building shape and size and the Exterior Training Facilities illustrated.

Finally, we have prepared an "Artists Sketch" of the Headquarters Station as seen from the corner of Isaacson Crescent and Earl Stewart Drive.

We trust that you will find the information contained in this Report to be of assistance in understanding and evaluating this important proposed development. We are readily available to assist further with responses to any questions arising or to provide further information and/or opinions.

Respectfully,

Paul McIntosh

Whitby Fire Department Headquarters, Whitby ON, 1992

Tuesday, October 4, 2016 at 9:30 AM Town of Aurora - Leksand Room

The meeting of the CYFS - JCC was held on Tuesday, October 4, 2016 in the Leksand Room at the Town of Aurora, 1 Municipal Way, Aurora, Ontario.

Members Present: Aurora: Councillor Abel

Councillor Mrakas

Newmarket: Councillor Hempen

Councillor Twinney

Regrets: Aurora: Councillor Thompson

Newmarket: Councillor Bisanz

Staff Present: Aurora: D. Nadorozny, Chief Administrative Officer

D. Elliott, Director of Financial Services

L. Lyons, Town Clerk

Newmarket: L. Georgeff, Director of Human Resources

M. Mayes, Director of Financial Services

D. Schellenberg, Manager, Accounting & Finance

CYFS: I. Laing, Fire Chief

R. Comeau, Deputy Fire Chief R. Volpe, Deputy Fire Chief

Open Forum

None.

Additions & Corrections to the Agenda

None.

Declarations of Pecuniary Interest

None.

Approval of Minutes

1. Central York Fire Services - Joint Council Committee Minutes of September 6, 2016.

Moved by: Councillor Twinney Seconded by: Councillor Mrakas

a) THAT Central York Fire Services - Joint Council Committee Minutes of September 6, 2016 be received.

Carried

Items

 Joint Central York Fire Services and Corporate Services Report - Finance 2016-41 dated September 22, 2016 regarding the Draft 2017 Operating and Capital Budgets - Update.

Newmarket's Manager of Accounting & Finance provided details regarding the report. The Fire Chief reviewed the cost savings that have occurred and advised of concerns related to the fleet maintenance line item. He advised that the temporary Training Centre has been used for the last five years with only operating costs and there will be a rental or lease fee incorporated for 2017. He further advised that service level agreements are providing revenues over and above budget figures.

An alternate motion was presented and discussion ensued.

Moved by: Councillor Mrakas Seconded by: Councillor Twinney

- a) THAT Joint Central York Fire Services and Corporate Services Report Finance 2016-41 dated September 22, 2016 regarding the Draft 2017 Operating and Capital Budgets Update be received and the following recommendations be adopted:
- i) THAT the Joint Council Committee (JCC) recommend approval of the draft budgets;
- ii) AND THAT in accordance with the consolidated Fire Services Agreement, the draft budgeting be sent to Aurora Council for comment and then to Newmarket Council for consideration and approval.

Carried

3. Burning By-laws Discussion.

The Fire Chief advised that complaints are being received regarding smoke from outdoor burning. He advised that both communities have burning by-laws in place and that a Member of Council had requested that this matter be brought forth to the Joint Council Committee for discussion.

The Deputy Fire Chief advised that he has reviewed the complaint process associated with outdoor burning. Councillor Twinney requested that the current burning by-laws be reviewed with the intent of updating them to include health/quality of life, bans dependent on property size and best practices of other municipalities.

Moved by: Councillor Twinney Seconded by: Councillor Mrakas

THAT the Central York Fire Services – Joint Council Committee recommend that the Councils of Aurora and Newmarket direct staff (specifically, By-law and Fire Services) to review the current burning by-laws.

Carried

4. Verbal Update from the Fire Chief regarding the status of the new fire station.

The Fire Chief provided a status update with respect to the new fire station. He advised that the architect has been retained to prepare a block schematic drawing of the proposed station and a report should be available for the next scheduled Joint Council Committee meeting. He further advised that the Commissioner of Development and Infrastructure Services, Town of Aurora will be managing the construction project.

Moved by: Councillor Mrakas Seconded by: Councillor Hempen

THAT the verbal status update from the Fire Chief regarding the new fire station be received.

Carried

New Business

- a) The Fire Chief advised he has been approached by a former member of Fire Services with a request to rename the Fire Station on Gorham Street.
- b) Councillor Abel congratulated Central York Fire Services on a successful Open House as well as communication efforts associated with a recent gas leak near the GO Transit station.

Closed Session

There was no requirement for a Closed Session.

Adjournment

Moved by: Councillor Mrakas Seconded by: Councillor Twinney

THAT the meeting adjourn.

Carried

There being no further business, the meeting adjourned at 10:15 a.m.

Date	Councillor John Abel, Chair

CENTRAL YORK FIRE SERVICES

November 18, 2016

CENTRAL YORK FIRE SERVICES REPORT 2016-02

To:

Joint Council Committee

Origin:

Central York Fire Services - Fire Chief

Subject:

Fire Station 4-5 Project Plan

RECOMMENDATIONS

THAT Central York Fire Services Report 2016-02 dated November 18, 2016, Fire Station 4-5 Project Plan be received for information purposes;

AND THAT Joint Council Committee (JCC) approve and recommend to the Councils of Aurora and Newmarket that staff proceed with the design of a fire hall in Aurora which includes administration, fire suppression and training services (Option A);

AND THAT a budget of \$495,000 be approved to complete the detailed design phase, including project support;

AND THAT JCC recommend to the Council of Aurora that staff be authorized to negotiate a single source procurement with Thomas Brown Architects to complete the detailed design;

AND THAT staff report back to JCC prior to issuing the tender to provide a project update and seek approval for the final construction budget.

BACKGROUND

At its meeting of April 7, 2015, the JCC considered staff report 2015-04 dated March 18, 2015 and approved the following motion:

THAT JCC make a recommendation to the Councils of the two municipalities to proceed with a land securement, subject to a report for final approval in 2015 for the construction of a new fire facility to include Administration, Training and Suppression Crew and provide for possible inclusion of Fire Prevention Division.

AND THAT Development Charge funds to an upset limit of \$25,000 be approved to hire, by RFP, an architect consultant to assist in the land securement and upon approval of land purchase and approval of further funding, to undertake the facility design.

Subsequently, staff retained the services of Thomas Brown Architects to assist in block planning of a facility to assist in identifying suitable sites. A site was selected in Aurora and the municipalities purchased the land on the north side of Isaacson Crescent in early 2016. The site selection process included all anticipated future needs, as identified in staff report 2015-04.

The staff report 2015-08 dated October 7, 2015 requesting direction on fire station 4-5 considerations was presented at the October 13, 2015 JCC meeting and the following motion was approved:

THAT Central York Fire Services Report 2015-08 Dated October 7, 2015 be deferred to a future meeting.

Staff report 2016-01 dated February 17, 2016 was considered at the March 1, 2016 JCC meeting and the following motion was approved:

THAT JCC authorize the retention of a consultant to assist with the design and preparation of options regarding site development and configuration of the new fire station;

AND THAT the Fire Chief and consultant report back to JCC with an analysis of the options regarding the development of the site and request that authorization to proceed with construction upon Council approval.

AND THAT staff prepare a report outlining a full analysis on or off site related to each of the following: administration, training, and fire suppression.

This report in conjunction with the deferred report 2015-08 provides the information required to proceed to detailed design and construction.

COMMENTS

Summary of Station Options

Options for the new fire services facility have been provided in previous reports and in various configurations. The purpose of this report is to present the options JCC requested in the motion approved at the March 1st meeting which include:

Option A- fire suppression, administration, and training in one facility

Option B- fire suppression and administration in one facility; training off site

Option C- fire suppression, and training in one facility; administration off site

Option D- fire suppression only; training and administration off site

Option A is the most cost effective from both a capital and operating perspective when considering the long terms needs of having to provide both administrative and training facilities. There are inherent operational efficiencies that will result in reduced operating costs from having all functions in the same facility. There is also increased efficiency with land use, by maximizing efficiency with setback requirements. This scenario keeps all "on duty' CYFS resources immediately available to respond to emergency situations in our first response area (Aurora/Newmarket). The need to call additional staff in on overtime is reduced which lessens the pressure on the operating budget. It is estimated that any scenario which includes Training offsite will result in additional operating expenses, including overtime, of approximately \$600,000 annually.

In Dillon Consulting's Fire Consolidation Feasibility Study, Preliminary Key Finds Report prepared for Richmond Hill's Fire Consolidation Study they concluded that preliminary findings support that the proposed CYFS training facility would still be required within a consolidation model. "Two training facilities would provide greater flexibility and enhanced training opportunities for firefighters and provide greater flexibility for scheduling training activities."

This option only differs slightly from the guidelines in the Fire Department Master Plan which recommended Fire Prevention also be included at the new station. As this is not a recommended option, costing has not been obtained. The recommended option will allow for additional space to accommodate future Fire Prevention services at Station 4-1 which are constrained at this time.

When considering only capital costs, there is a benefit in consolidating all services on one site and all other alternatives will require a second site. While

some costs may be recoverable if Training is off-site, another centralized or decentralized location will need to be procured for Training. The current training site at Timothy Street is only available on a short-term basis. Once a decision is made to repurpose that site, there will be an immediate need to find alternate training facilities. If Administration is not included in the new fire station other suitable accommodation will need to be acquired.

When considering the operating costs from a life cycle perspective, there is a strong argument to consolidate services as much as possible. By accommodating all services identified in option A in the new facility there will be expected efficiencies in the following areas:

- Staff cost savings through reduced need to travel to various facilities for training:
- Increase in available space at Station 4-1 to accommodate growth of the fire prevention program and allow for these services to stay within one building:
- Opportunity for making the new training facility available as a revenue generator;
- Having administration located within the operating building that includes all these services will result in better management and increased efficiencies:
- There will be significant savings in overtime costs by consolidating functions in one facility;
- Building operating cost efficiencies as the cost of operating a consolidated new building would be lower on a per square foot basis than renovation or expansion into an existing building where energy efficiency will be lower;
- The new site is able to replace the existing outdoor training space of 1.5 acres currently used at the Timothy site resulting in no loss to training services once Timothy site is repurposed.

Current Site Fulfills Needs for Option A

The current property site is 4 acres in size. This site is sufficient to provide for the new building to accommodate the suppression, administration and training facilities in a new building that will have a footprint of approximately 17,000 sq.ft. The total building area will be approximately 24,800 sq.ft., as parts of the building will be two stories in height. This facility along with required parking, access considerations, vehicle maneuverability and set back requirements can be accommodated in about 2 to 2.5 acres.

The existing outdoor Timothy training facility currently provides about 1.5 acres but is not fully usable due to building locations and the overall condition of the site. Combining these functions will require a site of 3.5 to 4 acres as identified during the land procurement process.

Any remaining available space will be beneficial to reserve for site screening or other security and community enhancements to mitigate any visual or operational issues that could occur in the operation of a fire hall site.

It is therefore recommended that the full 4 acres be retained to allow for the planned services whether constructed at this time or at a future date.

Building quality will be set to blend into existing community

The cost estimate for the building is set to create a building that will provide for long term reliable and durable service to the community while making efforts to incorporate architectural features that harmonize with the community and Fire Services standards. Typical features planned for the building are:

- Masonry and block construction for exterior and interior high use areas
- Steel roofing and metal framing for durability
- Drywall construction in low impact areas such as training and administration
- Durable low maintenance finishes
- Environmental and air quality features to create a high quality environment while achieving high levels of energy efficiency.

Financial Analysis

	d N	Suppression	Н	eadquarters		Training	Total
Square feet of space		12,920		2,800		4,100	19,820
Circulation and walls		4,955					 4,955

Project management		300,000					300,000
Consultant		432,8 96		67,810		99,294	600,000
Permits		50,000					50,000
Adverse soils		200,000					200,000
	\$	6,782,440	\$	976,270	\$	2,186,330	\$ 9,945,040
Contingency		719,590		103,490		231,880	1,054,960
Total	\$	7,502,030	\$	1,079,760	Ş	2,418,210	\$ 11,000,000

The financial analysis was prepared based on numbers provided by Thomas Brown Architects. Calculations and preparatory work for the last DC background study were done in 2013. Costs have increased by approximately \$1 Million since that time. Also, rough estimates were used back then versus detailed analysis by professionals that were obtained now. As neither the consultant who prepared the FDMPU nor the consultant for the DC background study used by Aurora (Watson & Associates) nor the consultant used by Newmarket (Hemson Consulting) questioned the estimates, we assumed they were sufficient to use for DC's and budget purposes.

The project is still within the funding envelope of both municipalities. As this facility is required to accommodate the growing communities of Aurora and Newmarket, it is prudent planning to maximize this funding source for as much future growth as practical. The budget for this project has been set at \$11,000,000.

Funding

Funding for the construction of the new fire hall, administration and training centre is available as follows:

	Requested Funding	Proportional Funding
Aurora	4,426,400	40.24%
Newmarket	6,573,600	59.76%
Total	11,000,000	

Development Charges will be a significant portion of the funding for this project. Each municipality will provide a funding report when they go before their respective Councils.

Project Schedule

The following is a preliminary schedule for project delivery:

Milestone	Target
JCC approval	Nov, 2016
Aurora and Newmarket Council Budget March Approval	Feb 1, 2017
Secure Architect	March 1, 2017

Design Activity Complete	Sept 1, 2017
JCC/ Council Design Approval	Nov 1, 2017
Tender Period	Feb 1, 2018
JCC/ Council Tender Approval	March 1, 2018
Construction Complete	May 1, 2019

Thomas Brown Architects have been retained to assist in the site selection process, preliminary space needs assessment, site layout and block planning for the new facility and are nearing the end of their current assignment. They have performed this activity well and have provided valuable guidance in the development of this project based on their long standing experience and involvement in over 150 fire hall related projects in Ontario.

Due to their expertise in this area and the fact that Thomas Brown was involved in the delivery of Fire Hall 4-4 (Wellington), there is value in considering a single source assignment for the following reasons:

- This firm specializes in the delivery of fire halls and has a good reputation for cost effective delivery of these types of buildings in southern Ontario.
- This firm has worked in Aurora and was successful in delivery of Fire Hall
 4-4.
- This firm has the resources necessary to deliver the components required for this project.

Single source selection is not uncommon for the design of fire halls. The Aurora Procurement by-law has provision for single source selection when skills are specialized sufficiently to result in an advantage to the municipality by using the single source provisions. Pursuing this award method will result in a faster award process and advance the project by four to six months. Fees for the design service will be negotiated with the firm and verified for competitive fairness based on industry standards for architectural services which are well defined.

CONCLUSION

A site has been secured to accommodate the future needs of the fire service. Staff, with support from a consultant, have verified that the most cost effective option is to proceed with construction of a facility which includes suppression, administration and training in one facility (Option A). The capital costs required to accommodate these services will be substantially funded from Development Charges for the purpose of accommodating future growth needs in the community.

Central York Fire Services Report 2016-02 November 18, 2016 Page 8 of 8

For a number of operational reasons and applying a prudent investment approach, it is recommended that full accommodation of the desired services be approved to leverage growth related funding. This will result in the best use of capital growth funds combined with the most cost effective service delivery model which will minimize future long term operating costs.

IMPACT ON THE MASTER FIRE PLAN

The FDMPU outlines the future direction of CYFS and has been discussed and approved by JCC and both Municipal Councils. Building the new fire station to deliver services to the public in a more effective manner is a key component of the FDMPU.

CONSULTATION

The Director, Infrastructure and Environmental Services in Aurora and the Finance departments of both municipalities were consulted.

JOINT CENTRAL YORK FIRE SERVICES/CORPORATE SERVICES - FINANCE REPORT 2016-54

TO:

Joint Council Committee

SUBJECT:

2016 CYFS Budget Report - Third Quarter

ORIGIN:

Central York Fire Services – Fire Chief Director, Financial Services/Treasurer

RECOMMENDATIONS

THAT Joint CYFS / Corporate Services Report – Financial Services – 2016-54 dated November 11, 2016 regarding 2016 CYFS Budget Report – Third Quarter be received for information purposes.

COMMENTS

Purpose

This report is to provide the JCC with the 2016 operating and capital results for Central York Fire Services for the period ending September 30, 2016.

Budget Impact

A surplus in the range of \$100,000 to \$300,000 is projected for 2016.

Summary

In operating, CYFS net expenditures were \$1,173,626 lower than budget at the end of the third quarter. This is primarily due to wages which continue to be paid at 2015 rates pending a new collective agreement. Retroactive changes are expected upon settlement. Any 2016 CYFS operating surplus would be transferred to the CYFS Reserve Fund to help reach the recommended target level of \$780,000 for 2016.

BACKGROUND

This report is to provide the JCC with the 2016 operating and capital results for Central York Fire Services for the period ending September 30, 2016.

Operating

Revenue at the end of the third quarter totalled \$67,804. Expenses were \$16,060,694 compared to a budget of \$17,186,766 for the same period. Salaries and benefits were \$844,979 under budget, as wages continue to be paid at 2015 rates until a new collective agreement is negotiated and ratified. Upon settlement, retroactive adjustments are expected to eliminate this surplus.

Wellness and dispatch expenses are trending below budget. The wellness/fitness program is expected to start soon, as agreement has been reached on the program details. Dispatch service costs are tracking lower than budget (we show no year-to-date expense), due to the timing of the receipt of the invoice for the first half of the year. These expenses are anticipated to be under budget at the end of the year and the 2017 budget has been adjusted accordingly. Uniforms and clothing expenses are higher than budget, due mainly to the hiring of two classes of probationary firefighters and are projected to be somewhat over budget at year-end. Vehicle maintenance has been more aggressive to maintain or extend useful lives and avoid costly downtime, resulting in higher expenses. We have reached the annual budget amount with 3 months to go in the year.

At this point in time, a surplus in the range of \$100,000 to \$300,000 is projected. Any potential 2016 operating surplus would be transferred to the CYFS Reserve Fund to assist in achieving the recommended target level (\$780.000 for 2016).

Capital

The capital budget, including carryovers, totals \$10,503,065. Land for a new fire station to be built in Aurora has been purchased based on a 59.8%; 40.2% cost sharing arrangement between Newmarket and Aurora, as well as some replacement fire equipment.

It is anticipated that there will be a substantial carry-over of unspent capital into 2017, as the majority of the 2016 budgeted capital expenditures are for the construction of the new fire station and two replacement apparatus.

IMPACT ON THE MASTER FIRE PLAN

This report is consistent with the budget methodology set out in the Master Fire Plan.

CONSULTATION

There has been consultation between the Finance staff of both Aurora and Newmarket.

BUDGET IMPACT

A surplus of between \$100,000 to \$300,000 is currently forecasted for 2016. Any 2016 CYFS operating surplus would be used to help achieve the target level of \$780,000 for the reserve fund.

CENTRAL YORK FIRE SERVICES

2016-11-14

Fire Services Report 2016-05

To:

Joint Council Committee

Origin:

Central York Fire Services - Training

Subject:

Medical Oversight of CYFS Medical Program

RECOMMENDATIONS

THAT the Joint Council Committee (JCC) approve securing medical oversight from a physician for the CYFS medical response program,

AND THAT JCC authorize an increase in level of service that would allow CYFS to follow a symptom relief drugs protocol.

BACKGROUND

CYFS currently works without medical oversight from a doctor. For a number of years, the Department had worked under a doctor's license through Lakeridge Hospital. A dramatic fee increase along with a significant reduction in service caused CYFS and many other departments to seek a different service provider. In 2013 CYFS together with several other fire services joined the Red Cross medical program to ensure all front line staff were compliant with current regulations.

The Red Cross program, although less costly, does put the corporation at risk of criticism in the event of emergency medical treatment. In order to provide a more appropriate level of training and oversight, CYFS has researched available options. The proposed medical oversight through a physician would provide education, evaluation and monitoring services. It would also allow CYFS to carry and administer industry standard symptom relief drugs, starting with Epinephrine for anaphylactic patients. Anaphylaxis is a severe allergic reaction that is rapid in onset and has the potential to be life threatening, either through swelling that shuts off the patient's airway or through a significant drop in blood pressure. Food allergies are the most common cause of anaphylaxis. However insect venom, medications, exercise, latex can trigger an anaphylactic reaction. This change in the level of service has the potential to save a resident's life when they are suffering from a severe allergic reaction.

Fire Services Report 2015-10 December 15, 2015 Page 2 of 2

Early administration of intramuscular Epinephrine is the most effective treatment for this allergic reaction.

BUDGET IMPACT

The annual fee for medical oversight is approximately \$15,000. This fee also includes training and evaluating our shift trainers, writing and updating our medical protocols, evaluating every firefighter and monitoring and reviewing all delegated acts performed by CYFS.

Carrying adequate dosage of Epinephrine on 6 vehicles is estimated to be \$2,200 annually.

With related supplies, the total annual cost for this service is estimated to be \$18,000 and will be incorporated into the 2017 approved budget.

IMPACT ON THE MASTER FIRE PLAN

Increasing the level of medical service response will be reflected in future versions of the Master Fire Plan.
