Executive Summary

This report recommends rate increases of 10.9% as per the 2017 Six-Year Stormwater Financial Plan to better finance the protection of homes and businesses from the adverse effects of excessive stormwater.

Purpose

The purpose of this report is to propose adjustments to the Town’s Stormwater rates for 2020.

Background

A stormwater charge was established in 2017 to provide a fair, transparent and dedicated funding source to help protect homes and businesses from possible flooding due to excessive stormwater.
The Municipal Act, 2001, S.O. 2001 authorizes a municipality to enact by-laws imposing fees and charges pertaining to a stormwater system pursuant to sections 9, 10, 11 and 391 of the Act.

The recommendation contained within Report 2017-30, being the 2017 Six-Year Stormwater Financial Plan, were adopted. The rates approved in the plan for 2020 are being recommended for adoption in this report.

**Discussion**

The stormwater utility is subject to cost drivers. The main drivers for the increases are:
- Meeting immediate capital replacement needs;
- Building a reserve to replace assets when they reach the end of their useful life;
- Managing increased runoff due to more severe weather patterns;
- Reducing phosphorus runoff to meet rising environmental standards

**Conclusion**

The attached schedule represents the proposed increase in stormwater rates and fees.

The investment required for Low Impact Development (LID) initiatives is growing beyond that which was considered in the original 6-Year Financial Plan. The Plan will need to be reviewed and updated with that in mind.

**Business Plan and Strategic Plan Linkages**

This report links to Council’s Strategic Priority of Long-Term Financial Sustainability by developing a multi-year operating and capital budget that aligns with Budget Policies.
