Just wanted to say that I think restricting home sizes to fit in with the houses in the neighbourhood is really important. I live on Amelia St., where the lots are a good size and there is one at the bottom of the street, that is "over the top", in relation to the neighbours and looks ridiculous. I feel very sorry for the immediate neighbours, who have now lost considerable light/sunshine on their properties. (Most of the "size" is attic. Completely unnecessary and a real shame.)

So glad you're dealing with this issue, as this is very unfair to the residents in the neighbourhood.

Thanks!
