

Re.....Maryanneville development at Bayview/Stonehaven

Dear Sir/Madam

I have lived and operated a business in newmarket for almost 40years, this fact focuses my attention on the developments in our community, most of which I am proud of, but the problem of traffic control seems to be a problem no matter how much planning and study had been done. For example, at the Yonge st. corridor between Davis dr. and Green lane, there is now an after the fact control going on.

I am now questioning the amount of proposed homes which will effectuate at least 450 cars entering on Stonehaven ave. to a more realistic number of homes that should be built.

Since the opening of the new supermarket there has been a considerable uptick of cars entering and exiting the plaza, therefore, creating an extension of traffic from its exit going west to the traffic signal at Bayview, this immensely expands the wait time at the lights encouraging careless drivers to violate road safety and accidents, I know, I witnessed a road rage recently.

Traveling east on Stonehaven from Bayview to Best circle at school, many seniors and parents can be seen crossing Stonehaven ave. with children and from police records many speeding tickets have been handed out in this area as well as minor accidents and car running in a couple of homes at the corner, I know, I am a witness, also as recently as Friday 9th Oct. a senior and her dog were killed by a car near the school.

Needless to say, if another few hundred cars travel east on Stonehaven ave. to Leslie st. there will be more accidents and another impediment at the traffic lights, I know, I drive there every day to and from work.

Please, to all decision makers, listen to us and take our advice, we live and walk in Stonehaven daily, keep us safe.

Truly yours

Winston Chong
