

GETTING THE ECONOMY GOING AGAIN - A DIGITAL VERIFICATION SOLUTION

A solution built for Canadians, by Canadians.

A TAILORED VERIFICATION SYSTEM – FOR A SAFE RE-OPENING OF THE ECONOMY

WHAT

An open verification system to allow citizens to share their COVID Test results or vaccine status - with their employer, local businesses, travel authorities, local communities (schools/universities etc.)

WHO

A citizen that has recently tested negative for COVID or has received the vaccine (with vaccine date/details)

WHERE

In person and online

WHY

To accelerate a safe re-opening of the economy

HOW

Enabling citizens to prove who they are and to control and share their health data

STUDY SYSTEM PARTNERS

CONCEPT: Extend citizen's personal choice and use of the PDIAA program leveraging digital access to personal health information including their immunization and covid status.

Initially, this study would launch with Newmarket and the region that Southlake serves, then scale based on learnings and community adoption/empowerment.

THE ONTARIO TRUSTED ACCOUNT IS A SERVICE THAT ALLOWS PATIENTS TO PROVE THEIR IDENTITY ONLINE, JUST AS THEY WOULD IN PERSON USING VERIFIED.ME AND THEIR ONTARIO HEALTH CARD. ONCE VERIFIED, USERS CAN ACCESS A GROWING LIST OF HEALTH SERVICES AT NIAGARA HEALTH AND OTHER REGIONS.

“Ontarians deserve a twenty-first-century health care system that leverages modern technology to make it easier, simpler and more convenient for patients to navigate their health care journey, while still safeguarding patient privacy and security. The Ontario trusted account is an example of how made-in-Ontario innovations can enhance the patient experience and support better, connected patient care.”

– *Christine Elliott, Deputy Premier and Minister of Health*

TECHNOLOGY ROADMAP

01

Start using what Ontario has in place - the Ontario Trusted Account to empower citizens with access to their data.

02

04

03

Evolve with pilot learnings to share personal health data. This pilot will leverage a ready-to-scale, safe approach technology solution to access data.

CANImmunize @work

Knowing who is vaccinated against COVID-19 will help businesses operate safely, prevent outbreaks and shutdowns and maintain business continuity. Increasing vaccination rates will make sure your workplace is protected.

CANImmunize@Work is a digital tool to help employers know who is vaccinated, actively track and report employee vaccination rates, and protect unvaccinated employees, customers and the community.

Why CANImmunize?

CANImmunize is a science-based digital immunization company with an internationally recognized solution used by Canadians across the country.

CANImmunize@Work is built into the existing CANImmunize mobile and web application used by Canadians to track their families' immunization records.

How does CANImmunize@Work help?

- If an employee tests positive for COVID-19, employers can view employee vaccination status and instruct unvaccinated employees to stay home or be tested.

- Remind unvaccinated or partially vaccinated employees of vaccinations and increase uptake.

- Employers monitor vaccination coverage at the individual level and by location with the CANImmunize dashboard, enabling data-driven decision making.

**“AN ONTARIO COMPANY BUILT CANADA’S BEST VACCINE BOOKING SYSTEM”
- TORONTO STAR**

Internationally Recognized By:

STUDY OBJECTIVES

01

SAFE RETURN TO WORK

Facilitate a safe return to work by supporting employers through their legal liabilities to protect employees.

Long Term-Care, manufacturing, retail, small business.

02

ACCELERATE ECONOMIC RECOVERY

Empower citizen choice to regain safe access to public spaces.

Dining, entertainment, travel, post-secondary education, fitness/rehab, etc.

03

SUPPORT NEW INTERNATIONAL TRAVEL CONDITIONS

Position Ontario as a leader for proof of immunization travel initiative.

Business travel, trade, economic immigration, tourism.

WHAT'S NEXT?

PARTNERING WITH LOCAL BUSINESS

- **MORE THAN 75% OF ONTARIANS HAVE ALREADY RECEIVED THE FIRST DOSE OF THE VACCINE**
- **THE STUDY WOULD ALLOW CITIZENS WITHIN THE DESIGNATED STUDY AREA REGION TO OBTAIN PROOF OF VACCINATION STATUS OR RECENT PCR TEST RESULTS**

THE NEXT STEPS INCLUDE WORKING WITH LOCAL BUSINESSES TO SET PERIMETERS TO SUPPORT AN ACCELERATED REOPENING.
