Agenda

1. Capital Budget
2. Rate-Supported Operating Budgets
 - A. Water & Wastewater
 - B. Stormwater
 - C. Building
3. Next Steps

1. Capital Budget Definitions

- Capital Budget - approved funding for annual capital expenditures for the purchase and financing of tangible capital assets. There are two capacity tests:
 - Operational – that the projects can be delivered
 - Financial – that funding is limited to availability of each individual source
- Capital Program - list of projects contained within the Capital Budget
- Capital Spending Authority - total of all approved capital expenditures for current and future years

1. Capital Budget Capital Program

- Capital Program is broken down into the following:
 - A. Standard Program
 - set at \$20 million to consider operational capacity
 - unallocated provision allows flexibility for Council to add Standard projects during the year
 - B. Major Projects
 - minimal effort from dedicated capital project staff
 - Major projects do not impede delivery of the Capital Program

1. Capital Budget

Capital Program - Prioritization

- Operational capacity limits the standard capital program
- Priority given to projects that align with the Asset Management Plan (core assets), Asset Management process (non-core assets) and DC Background Study
- Also based on:
 - Project category
 - Corporate alignment and opportunity
 - Levels of service and infrastructure impact
 - Community impact
 - Risk assessment
